England Named Head Of State Farm Council

EVERETT NEWSWANGER
Managing Editor

HARRISBURG (Dauphin Co.) — The annual meeting of the Pennsylvania State Council of Farm Organizations was held Monday afternoon in the Capitol building prior to the annual reception for Pennsylvania legislators. The reception is held each year as an informal meeting of political forces and has become known as the Keystone Cornucopia. State commodity groups, farm businesses, and farm organizations support this event.

In the business meeting, Laura England, Atlantic Dairy Cooperative and a former member of the *Lancaster Farming* editorial staff, was elected president. England succeeds retiring president Robert Gabel, Eastern Milk Producers. In addition, Earl Fink, Pennsylvania Association of Milk Dealers was elected vice president, and Roxy LeVan, Pennsylvania Farm Bureau, was elected secretary/treasurer.

Executive committee elections include Pat Sueck, Agriculture Awareness Foundation; George Stambaugh, Eastern Milk Producers Cooperative; Maria Van Hekken, Rodale Institute, and Sam Sherk, PennAg Industries.

A large portion of the meeting was devoted to approving and updating resolutions. Because of the large number, the last half of the proposed resolutions was held for the next meeting in April.

In other business, Sen. Rodger Madigan and Charles Brocious were supported for re-election to the board of trustees of Penn State University, and Ross Orner, Jr.,

Governor Yet To Announce New Ag Secretary Nominee

VERNON ACHENBACH JR.
Lancaster Farming Staff

HARRISBURG (Dauphin Co.) — As of Friday morning, there still was no decision announced by Gov. Tom Ridge as to whom would be nominated to serve as the state's next secretary of agriculture.

According to John Taylor, Gov. Ridge's deputy press secretary, Taylor was not informed of the progress, or at what stage in the selection process the governor's transition team is, in choosing a nominee for secretary of agriculture.

Although several names of prominent people in the state's agricultural community have been circulating throughout speculative circles, and at least a couple people have confirmed that they have been in contact with the transition team in connection with the selection process, no one involved with the actual selection process has confirmed or denied the prospects of any one individual.

In the meantime, Walt Peechatka, a non-partisan deputy secretary with intimate knowledge of the workings of the department and its programs, has been serving as acting secretary.

Peechatka had said last week that he was not informed about a time table for the selection, but that he was asked to serve as acting secretary to ensure that the department would continue to function and carry out its mission uninterrupted by the lack of an administration-picked secretary.

As of Friday, the governor

Pork Expo Wednesday

ANDY ANDREWS
Lancaster Farming Staff

LEBANON (Lebanon Co.) — Better facilities, improved lunch accommodations, more exhibit space, and a variety of programs to help promote "The Other Burger" will be spotlighted next Wednesday at the annual Keystone Pork Expo at the Lebanon Valley Expo Center.

The Keystone Pork Expo (formerly called the Keystone Pork Congress) was moved from the previous site, at the Penn Harris Inn in Camp Hill, to the new location. The move puts the Expo "closer to the epicenter of hog pro-

(Turn to Page A23)

Ed Snook from Lycoming County took home some first-place ribbons in the Pennsylvania Corn Club's annual production contest. See how Snook does it and read about a lot more state and national corn news in the special section in this issue called "Corn Talk."

After the first snow of the season arrived last weekend, gale-force winds later blew a lot of the snow from the fields into the roadways. For several days this caused a continuous battle for the snowplows. But all was calm Thursday in this mid-morning snow scene. While pointing north from the most recent winds that touched it, even the windwheel was still on this Amish farm along Musser School Road in Lancaster County between Leola and New Holland. ***Photo by Everett Newswanger, managing editor.***

LANCASTER COUNTY LIVESTOCK MARKET AUCTION

Because of recent inclement weather, several markets indicated reduced sales and several were unavailable.

POULTRY ◆ MARKETS

National Egg Market

ATLANTA, GA
FEBRUARY 08, 1995

NATIONAL EGG MARKET - AT A GLANCE:

Prices were unchanged to lower on brown eggs in New England, and the balance of prices were unchanged. The market tone remained generally steady to occasionally barely steady and cautious. Mid- week demand ranged light to good, mostly moderate, and was increased by feature activities. Supplies of large eggs were adequate to fully adequate, instances tight on jumbos, and mediums were generally adequate, occasionally barely adequate. Breaking stock supplies were adequate for the fair demand, and the undertone was steady. Spent hen offerings were fully adequate to ample for the light demand, and the market tone was steady.

North Atlantic Shell Eggs

Thursday, Feb. 9, 1995
Report Supplied by USDA

MARKET COMMENT: THE MARKET TONE WAS GENERALLY STEADY, BUT SOME CAUTIOUSNESS WAS NOTED WHERE WHITE LARGE EGGS REMAINED SURPLUS. DEMAND WAS MIXED, MOSTLY MODERATE, AND BEST WHERE FEATURED. SUPPLIES OF EXTRA LARGE WERE ADEQUATE TO FULLY ADEQUATE; LARGE WERE ADEQAUTE TO AMPLE, AND MEDIUMS WERE ADEQUATE. BREAKING STOCK SUPPLIES WERE ADEQUATE FROM CONTRACTED SOURCES, AND THE TRADE SENTIMENT WAS STEADY. A EXTRA LARGE .62-.65½, LARGE .60-.63½ MEDIUM .56-.57.

Delmarva Broiler

EDISON, NJ
FEBRUARY 08, 1995

DELMARVA BROILER/FRYER MARKET. FEDERAL-STATE

Movement of ready-to-cook whole birds was moderate to good. Offerings varied from balanced to fully adequate. Live supplies were generally moderate. Weights were mixed and irregular in a full range; however, some plants were running much lighter than desired, and as a result, were projecting some curtailment in late week operations. Processing schedules remained very heavy. Less than trucklot asking prices were unchanged at 47 to 58 cents. Trade sentiment was mostly steady. In the parts complex, leg quarters and whole breast were in tight supply. Other items were noted as balanced or available, depending on shipper.

NE Chicken Parts 1&2

EDISON, NJ
FEBRUARY 08, 1995

NORTHEAST BROILER/FRYER PARTS - PART I FEDERAL-STATE

Trucklot buying interest was mixed and irregular. Offerings were tight and held with confidence on bone-in breasts, in close balance on leg quarters, and generally at least adequate on other items with interest limited. Demand was hampered greatly at fast food outlets due to the storm and current business was developing slowly. Retail outlets were also attempting to return to normal following the irregular buying patterns caused by the weekend snow. Trade sentiment was steady but cautious.

PRICES PAID PER POUND, ICE PACKED AND CO2 PACKED BROILER/FRYER PARTS, DELIVERED TO FIRST RECEIVERS IN POOL TRUCKLOT AND TRUCKLOT QUANTITIES.

ITEM CURRENT NEGOTIATED TRADING*

BREAST - B/S (W & W/O TENDERS) 155 BREAST - WITH RIBS 75-76 BREAST - LINE RUN 75 LEGS 45-46 LEG QUARTERS (BULK) 32-33 DRUMSTICKS 40-41 THIGHS 41-42 WINGS (WHOLE) 63-64 BACKS AND NECKS (STRIPPED) 10-12 LIVERS (5 POUND TUBS) 25-30 GIZZARDS (HEARTS) 55

INCLUDES NEW YORK CITY METROPOLITAN AREA, NORTHERN NEW JERSEY, MASSACHUSETTS, CONNECTICUT, RHODE ISLAND, AND PENNSYLVANIA (NORTHEAST OF HARRISBURG). * TODAY'S NEGOTIATED SALES AS OF 11:30 A.M.

NY Phil Frozen Eggs

ATLANTA, GA
FEBRUARY 07, 1995

EASTERN REGION FROZEN EGGS, FEBRUARY 07, 1995. FEDERAL-STATE

Prices were unchanged. The market tone was mostly steady. Demand remained light and for immediate fill-in volumes. Floor stocks of all products were at least adequate. Shell egg supplies were also at least adequate from regular sources, but weekend snowstorms in the Northeast did delay or interupt product deliveries.

National Grain Market

ST. JOSEPH, MO

WEDNESDAY FEBRUARY 8, 1995

EXPORT DEMAND, GOOD AND BAD, INFLUENCED GRAIN AND SOYBEAN PRICES WITH WHEAT PRICES LOWER, CORN AND BEAN PRICES HIGHER. WHEAT UNCHANGED TO 5 CENTS LOWER. CORN UNCHANGED TO 1 CENT HIGHER. SORGHUM MIXED. SOYBEANS 2 TO 5 CENTS HIGHER. WHEAT PRICES FAILED TO REACT POSITIVELY TO NEWS OF CHINA'S WHEAT TENDER AS TRADERS FELT THAT DESPITE THE FINAL ACTION, IT'S OLD NEWS. OTHER EXPORT BUS- INESS HAS BEEN SLOW THIS WEEK. COLD TEMPERATURES IN THE PLAINS AND MIDWEST AREAS THIS WEEK NOT A MAJOR CONCERN AT THIS TIME. CORN PRICES HELD ON AFTER YESTERDAY'S SLIGHT DROP, FIRMING DUE TO NEWS THAT PORTUGAL WAS EXPECTED TO TENDER FOR 250,000 TONNES OF U.S. CORN TONIGHT AND TAIWAN COULD BE IN THE MARKET BY THE END OF THE WEEK. INDICATIONS SOUTH AFRICA'S MAZE CROP MAY FAIL TO MEET ITS DOMESTIC DEMAND THIS YEAR OFFERED ADD- ITIONAL EXPORT OPTIMISM. LATE FUND BUYING ON THE BOARD DUE TO TAIWAN'S SUBSTANTIAL EXPORT PURCHASE PUSHED SOYBEAN PRICES UPWARD AMID CONTINUED CONCERNS OVER UPCOMING SOUTH AMERICAN HARVEST.

Oklahoma Cith Feeder Cattle

Oklahoma City, OK
Wed Feb 8, 1995

Oklahoma National Stockyards Weekly Cattle Summary

Receipts: This week: 13,350 Last Week: 6,965 Last Year: 9,670

Compared to last week: Feeder cattle over 600 lbs 1.00-2.00 lower. Stocker cattle and calves steady to 2.00 higher. Demand moderate early but turned good after Monday's positive CME settlement. Stocker steers and steer calves sold to very good demand thruout the day; heifers joined this scenario once it was established that grazing steers were too high in comparison to heifers. Supply average to attractive. Weigh-ups gaunt to average, few full. Wheat cattle were in wide range of flesh condition as some cattle that were in medium to moderately fleshy condition were ready to trade. However a sizeable number of thinnish cattle appeared to be selling due either to lack of pasture or lack of faith in the market. Stocker cattle in medium to mainly thin condition.

Slaughter cows steady to 1.00 lower. Slaughter bulls 1.50 lower. Packer demand moderate to good for 658 cows and bulls sold with packers taking some 60 percent of supply. Supply consisted of many fleshy cows off wheat as well as several Holsteins. Receipts this week 13,350; last week 6,965; last year 9,670. Supply consisted of 77 percent yearlings over 600 lbs; 18 percent calves under 600 lbs; 5 percent cows and bulls. Prices follow with weighted average price and weight in parenthesis.

Feeder Steers: Medium and Large 1 400-450 lbs (429 lbs) 95.00-100.25 (97.32); 450-500 lbs (474 lbs) 89.00-96.50 (92.25); 500-550 lbs (522 lbs) 86.00-93.00 (88.73); 550-600 lbs (576 lbs) 80.00-88.50 (83.81); 600-650 lbs (622 lbs) 76.25-80.00 (77.76); 650-700 lbs (670 lbs) 75.00-77.75 (76.74); 700-750 lbs (728 lbs) 74.00-77.50 (75.95); 750-800 lbs (778 lbs) 72.75-76.50 (74.75); 800-850 lbs (819 lbs) 72.00-75.50 (73.61); 850-900 lbs (869 lbs) 70.25-74.50 (72.68); 900-950 lbs (914 lbs) 68.00-72.75 (70.73); 950-1000 lbs (958 lbs) 67.75-71.00 (70.10); load 1053 lbs 68.85. PIONEER SOYBEAN SEED

Right on top of higher yields.

There's never been a better time to plant Pioneer® brand soybean varieties. Our new and proven varieties offer you higher yield potential, strong agronomic traits and improved disease and pest resistance. So get on top of higher yields. Ask your Pioneer sales representative about the varieties that are right for you. Bulk seed options are also available.

9341 **Mid-Group III.** Extremely high yield potential with very good standability. Excellent shattering resistance, outstanding field emergence and moderately bushy canopy. 9341 responds to highly productive soils and good management. Above average tolerance to Phytophthora root rot.

9392 **Late Group III.** Record-setting yield potential. Very good Phytophthora root rot tolerance. Excellent field emergence and shattering resistance. Outstanding standability.

9442 **Mid-Group IV.** Exceptional field emergence; gets off to a good start. Excellent yield potential and strong standability. Moderately branching plant canopy. Excellent resistance to shattering. Good Phytophthora field tolerance.

Better beans start with better genes.

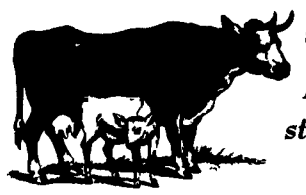
The OLD FARMER'S THIS WEEK WITH ALMANAC

FEBRUARY 13-19, 1995

FULL SNOW MOON, FEBRUARY 15.

SPILT MILK?

In 1930 there were 21.9 million cows in the United States. Collectively they produced 116.6 billion pounds of milk. One of those cows, a Guernsey from Missouri, contributed part of that milk under rather unusual circumstances. On February 18, 1930, the brave cow boarded a plane at the St. Louis International Air Exposition. With a corps of reporters in attendance, Elm Farm Ollie made aviation history as she became not only the first cow to fly, but also the first cow to be milked while aloft. The milk was sealed into paper containers and parachuted over St. Louis — proving that while it may be true that pigs don't fly — cows, apparently, do!



Milk the cow that standeth still.

TIP OF THE WEEK

☞ **Before scalding milk, rinse the saucepan in cold water and it will be much easier to clean up afterwards.**

INDIAN PUDDING

1/4 cup molasses
3 tablespoons cornmeal
3 1/2 cups milk, scalded
1 egg, beaten
1/2 cup sugar
1/2 teaspoon salt
1/2 teaspoon ginger
1/2 teaspoon cinnamon
2 tablespoons butter
1/2 cup cold milk

Stir molasses and cornmeal into hot milk and cook gently, stirring, until thick. Remove from heat. Combine egg, sugar, salt, and spices; add to cornmeal. Pour into a greased 1-quart casserole. Bake at 325° F for 30 minutes. Add butter and cold milk; do not stir. Continue baking for another hour.

Makes 4 servings.

The OLD FARMER'S WEATHER PROVERBS

When the north wind does not blow in February, it will surely come in March.

If February give much snow, A fine summer it doth foreshow.

Of all the months of the year, curse a fair February.

Winter's back breaks about the middle of February.

Leesport Livestock Auction

LEESPORT, PA
February 8, 1995

Keep 'Em Safe
with Lorsban 15G.

You get the broad spectrum control that keeps yields safe with Lorsban* 15G insecticide. You not only get the rootworm control you demand; with Lorsban 15G you're in control of unpredictable cutworm outbreaks, as well as grubs, seedcorn maggots and wireworms.

Stop the collective damage of corn soil insects and give your corn the best chance to fulfill its yield potential – and that means consistently better yields for you.

Choose broad spectrum control – it's another reason Lorsban 15G is the most widely used corn soil insecticide.

OPINION

Take Away The Incentive

"Livestock tampering should not and cannot be tolerated," said Ohio Department of Agriculture Director Fred L. Dailey. "Our best deterrent is the swift prosecution of exhibitors who break the rules."

As reported in "Farm and Dairy," based in Salem, Ohio, the statement came in response to a guilty plea in court by the father of an exhibitor whose steer that was shown in a major state show was found to have been injected with vegetable oil and also retained traces of the illegal drug, clenbuterol. The guilty pleas are based on charges of cheating and sale of adulterated meats. The tranquilizer chlorpromazine hydrochloride and falsification of documents are also involved.

The father faces up to six months to five years in jail and a fine of up to $2,500. And the son faces disqualification of his steer's seventh place win.

This is not the first report from across the country that shows to us that the emphasis in youth programs have taken a turn away from their intended educational value. When families get involved with 4-H and FFA projects to "show off" rather than to learn and be together, the reason for being involved is questionable. The efforts put forth in an honest youth project shows activity that will be impressive on a youth's future work resume regardless of how the project finished in a show ring. But a criminal record for involvement in tampering will stick with the youth for life and put serious limits on what he or she can do.

We think it's time to return to an educational emphasis. Among other things, Ohio is recommending the implementation of a grand champion project that would include a skillathon of project knowledge in addition to the reserve champion placing in the show. In addition, they want to increase the current 17 percent that is deducted from the sale of champion exhibitor's proceeds for use in scholarships and bonuses to those exhibitors whose animals are automatically entered into the carcass competition. One option would be to increase the percentage to reward those who do well in the skillathon and showmanship competitons, or provide greater bonuses for the carcass class animals.

Whatever the methods used, we need to make changes. We can no longer affort to provide the incentive for fine farm families to be caught in the web of competition that causes criminal and unethical actions to spoil all the good that is accomplished when a boy or girl takes responsibility for a youth project.

The laws are in place and will get you if you break them. Now we need to take away the incentive to break the law as well.

Now Is The Time

By John Schwartz

Lancaster County Agricultural Agent

To Install ROPS

Compared to other expenses on the farm, the cost of installing rollover protective structures (ROPS) is a small price to pay and it could save your life.

Every tractor you use should have a ROPS and seat belt.

To make installing ROPS easier, one major manufacturer of farm equipment has introduced a new foldable ROPS for row crop tractors and priced it without markup. Last year this same company introduced a foldable ROPS for utility tractors.

This ROPS program uses attractive pricing to help encourage farmers to equip their older tractors with rollover protection and seat belt. Farmers interested in learning more about ROPS should contact their local farm equipment dealer.

To Prepare Winter Emergency Kit

The recent snow storm reminds us of the need for a winter driving emergency kit.

The kit should contain a snow shovel, extra warm clothing, traction mats, ice scraper, booster cables, abrasive material such as sand or kitty litter, snow brush, flashlight, cloth or paper towels, and blankets. Most of these items could be stored in a plastic or rubber storage box in your trunk.

Some driving tips you will want to consider are:

- Wear good sunglasses to avoid the combined glare of snow and sunshine. At night, let your eyes adjust to darkness before driving. Do not wear sunglasses at night.
- During a nighttime snowstorm, drive with your headlights on low beam.
- Check your windshield wipers and replace worn blades that streak. Make sure the washer reservoir is filled with antifreeze solution.

To Evaluate Boarding Horses

The equine industry in Pennsylvania has doubled in size since 1967 and continues to expand and diversify. As a result, the demand for horse boarding services has increased.

This growing industry provides opportunities for small-scale, part-time or full-time farmers to add income by boarding horses.

However, caring for horses requires considerable time and financial commitments that will affect all family members. Before starting a boarding operation, you should carefully evaluate all aspects of the enterprise.

First, you need to like horses and be willing to learn and provide what horse owners want as they pursue this hobby and recreational activity.

Second, much knowledge and experience are needed to manage horses.

Third, boarding horses results in a loss of privacy on the farm.

Fourth, Managers must get along with many types of people and must deal with complaints or undesirable client behavior.

Fifth, you will need a lawyer to draw up legal documents and advise you on legal issues.

Sixth, liability issues should be a major concern.

When planning a horse boarding operation, you should consider the demand and growth potential for such services. For more information, consult Penn State Cooperative Extension publication "Agricultural Alternatives — Boarding Horses."

Editor:

An article that appeared in the January 1995 issue of *Apprise* magazine entitled "Why Vegetarianism" by Lisa D. Diantoniis was filled with misconceptions, myths and misleading information.

The story contains numerous fallacies and reads like an animal rights recruiting brochure. In her story, the writer questions animal consumption and the so-called negative effects animal agriculture has on the environment, our diets and overall health.

For example, it is a myth, as Ms. Diantoniis' article claims, that "Many pigs, cows and chickens are confined to small cages or stalls in crowded, unsanitary conditions, where suffering is part of their lives. Because of such conditions, disease among the animals is widespread."

This statement is simply illogical. Economics dictate that good care is good business; animals that receive proper care are animals

WHAT DOES IT COST YOU?
February 12, 1995

WHAT DOES IT COST YOU?
February 12, 1995

Background Scripture:
Matthew 26:36-68
Devotional Reading:
Isaiah 53:1-12

Sometimes Jesus is depicted as being eager for martyrdom. But Matthew makes it clear that was not so. For one thing, he tells us that Jesus "began to be sorrowful and troubled" and he says to Peter and the two sons of Zebedee, "My soul is very sorrowful, even to death; remain here, and watch with me" (26:37, 38). That does not sound like a man who desired to die on the cross.

Matthew also tells us that Jesus then prayed, "My Father, if it be possible, let this cup pass from me" (39). First, he asks to escape the cross, but realizing that escape might run at cross purposes with God's will, he adds: "Nevertheless, not as I will, but as thou wilt." When he prays again a little later, his prayer has changed to: "My Father, if this cannot pass unless I drink it, thy will be done" (42). Finding his disciples still asleep, he comes back and prays once again the same prayer. When he returns to the sleeping disciples it is obvious that he has accepted the passion that lies just before him: "Behold, the hour is at hand, and the son of man is betrayed into the hands of sinners" (45, 46).

AVOIDING THE CROSS

I believe that Jesus could have avoided Good Friday — *if* he had not decided to go up to Jerusalem for the Passover, *if* he had avoided the wrath of his enemies by cancelling the Palm Sunday procession, *if*, knowing that Judas was going to betray him, he had sneaked out of Jerusalem so that his enemies could not find him. If he had done any or all of these things he probably could have avoided the cross — but he would have failed to honor his commitment to the Father. So, Jesus did not seek death at the hands of his enemies, but he did accept it as an unavoidable consequence of his unshakable commitment to God.

Remaining faithful to God meant dying on a cross for Jesus. But what does it mean for us? Probably no one who reads these words has ever been called upon to risk dying for his or her faith, so perhaps his example seems irrelevant to us. But it is not: bearing the cross is just as important as being willing to die on it. Living for God is perhaps no less a challenge as dying for him. Remaining faithful to God's will and purpose in the way that we live means being willing to pay the consequences.

PAYING THE PRICE

I read recently of an engineer who some years ago tried to persuade his employers that one of their products was dangerous. Although the data he assembled should have convinced them, they told him the cost of recalling the product would be too great a burden for the company. Eventually the man brought his findings to the attention of a federal agency that forced the company to recall its product. But the engineer was forced out of his job and so far has been unable to get employment in his profession. His conscience has cost him dearly.

We'd all feel a lot better if this man were to be recognized for his courageous action and reemployed in his profession, but often it does not work out that way. Remaining faithful is no guarantee that eventually everything will work out all right. For Jesus it meant death on a cross in the here and now and the promise of vindication only in the life beyond the grave. That's the only promise God gives us.

It was enough for Jesus, but is it enough for us?

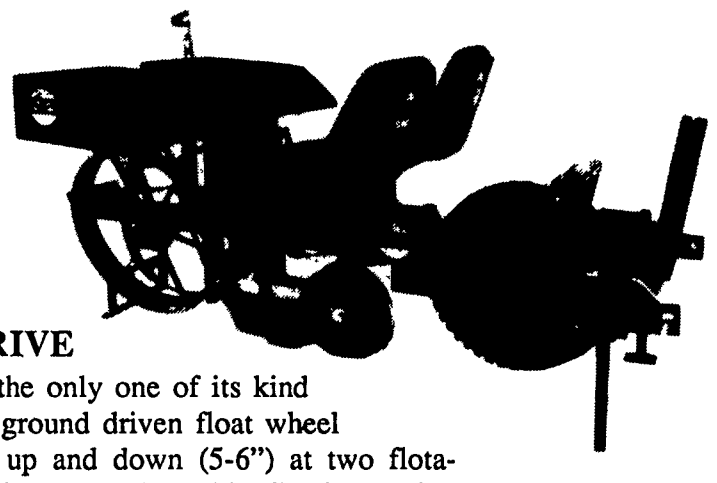
MECHANICAL TRANSPLANTER MODEL 1000

For The Grower That Demands The "VERY FINEST"

The High Performance Model 1000

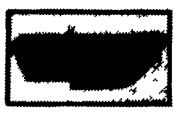
has increased planting speeds 20 to 30%.



OUR PATENTED FLOAT WHEEL DIRECT DRIVE SYSTEM is the only one of its kind available. This ground driven float wheel moves straight up and down (5-6") at two flotation points. This patented double floating action maintains correct ground contact at all times for both the drive wheel and rear packing wheels letting the units float independently no matter how many rows. No weight of any hitch, toolbar, or water tank is resting on the drive wheel to compact the soil. The wheel just smooths, firms and ideally prepares the soil providing accurate plant placement, proper depth control, and positive spacings from 6" and up in all soil conditions.

Optional Non-Stick Shoes

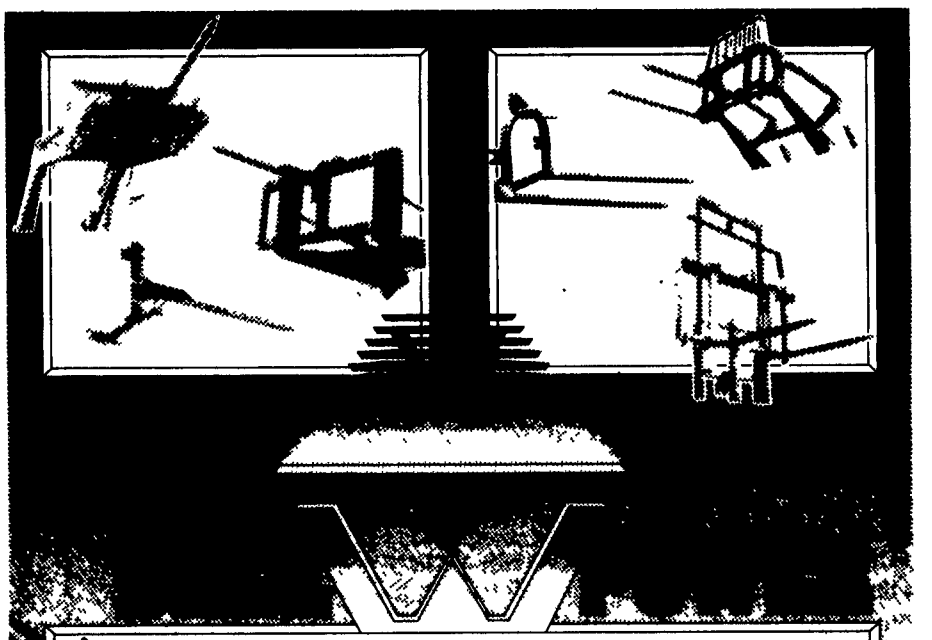
Double Disc Poly Shoe



395RP Poly Shoe

WORKSAVER

HAY HANDLING EQUIPMENT

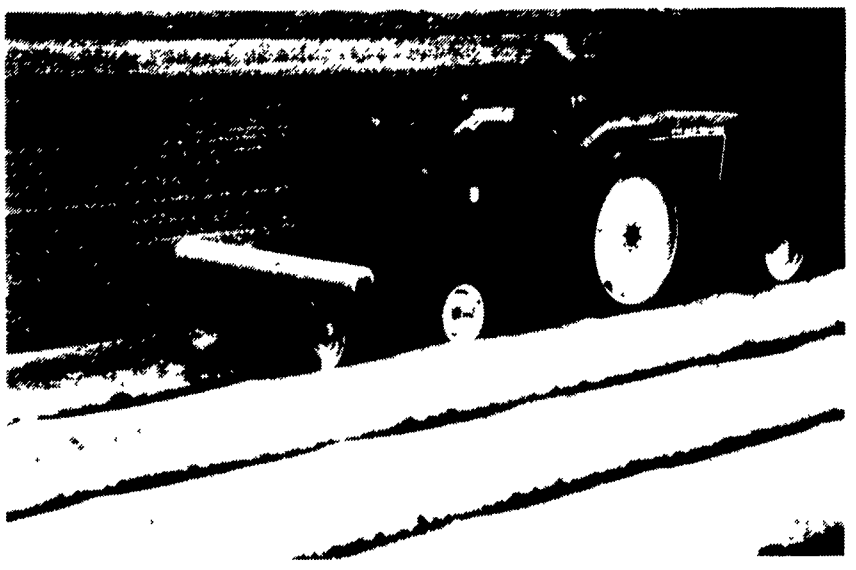


Quality hay handling equipment from Worksaver allows you to easily transport large round and square bales.

Worksaver, Inc.

MODEL 95 TUNNEL LAYER

For Fast Uniform Setting of Wire Hoops and Tunnels



Model 95 laying plastic tunnels over two rows of celery

(Patents Pending)

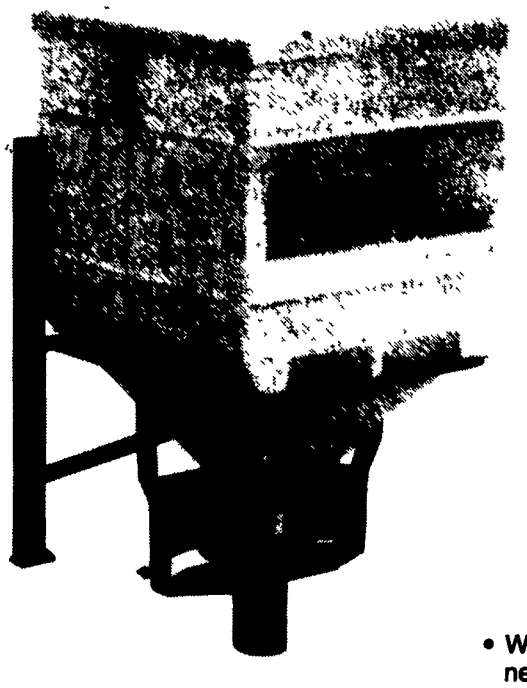
NEW Model 95 wire setter and tunnel layer combination makes tunnel laying easy, efficient and fast. It requires only one person to feed the wires from the holding station into the unit. The wires are then automatically taken and set uniformly into the soil on about 62" centers 12" - 14" high.

MECHANICAL TRANSPLANTER

Reg U S Pat Off

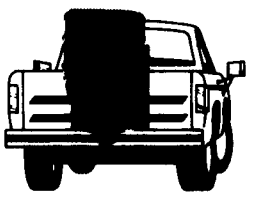
Manufactured Exclusively By

MECHANICAL TRANSPLANTER COMPANY



MINI SPREADER

FOR PICK-UP TRUCKS



FEATURES

- No-rust thermoplastic hopper with stainless steel throat.
- 600 lbs. capacity #1 rock salt or equivalent pelletized material.
- In-cab solid state speed control, with built-in circuit breaker.
  Mounts anywhere in cab convenient for driver.
  Dial control permits variable spreading pattern 3 ft. to 30 ft.
- Direct drive electric motor operates on truck electrical system.
- Weatherproof electrical connector.
- Internal vertical spiral auger assures continuous and even flow of spreading material.
- Easy to attach and easy to remove when not in use.
- Ideal for driveways, walkways and parking lots.
- 12 month warranty on parts and labor.
- Service and parts available through Authorized Meyer Distributors.

Shaping the Future with the 4-H and FFA

CoreStates Hamilton Bank's Agri-Finance Department is proud to support 4-H and FFA members and their respective programs.

We believe that helping to preserve the family farm is one of the most effective ways to insure a better future for us all. And that involves working with and supporting our young people.

It's important to give them guidance, instill the proper values, and help them acquire the skills they need to be successful farmers.

Once again, CoreStates Hamilton Bank is pleased to support our future farmers.

Pictured above: Pennsylvania State Farm Show - Casey High (center) with his champion heavyweight steer with (L to R) Donald M. Cooper, President of CoreStates Hamilton Bank; Neil Snyder, SVP and Credit Officer; Pat Coomes and Darvin Boyd, Agri-Finance Representatives. Casey is the son of Larry and Mae High of Lititz.

Pictured left: 1994 Ephrata Fair - Sarah Boyd with her homebred reserve grand champion carcass lamb and Darvin Boyd. Sarah is the daughter of Kerry and Deborah Boyd of Ephrata.

CoreStates Hamilton Bank purchased these animals and donated them to the Lancaster County 4-H Livestock Banquet held on February 9th at the Country Table Restaurant. The additional meat product was donated to the Lancaster County 4-H Swine Club.

Pa. Holstein Breeders Can Promote Their Operations

STATE COLLEGE (Centre Co.) — Pennsylvania Holstein breeders have a rare opportunity to promote their home operations in connection with the state hosting the national Holtsein convention June 25-28 this year in Pittsuburgh.

According to Kenneth Raney, with the Pa. Holstein Association in State College, "Space is still available for advertising in the convention souvenir booklet, which will go to the hundreds of delegates and guests attending the national event.

"In addition, advertisers of a full-, half-, or quarter-page size (promotion) will be included on a state breeders' map, listing the location of, and directions to, each advertiser."

According to Raney, the booklet and map are to be mailed out to registered attendees of the convention in advance of the event, so they can get information and direc-

Addison Co-Op Pays Dividend

ADDISON, N.Y. — Addison Milk Producers Cooperative Association, Inc. has declared a patronage dividend tor 1994. Dairy farmer members received their dividend checks at a recent meeting of the cooperative in Freemont, N.Y.

Addison Co-op has paid a producer patronage dividend annually for more than 20 years.

Robert Nichols of Addison, N.Y., president ot the cooperative, stated that he was proud of the pertormance ot the cooperative and the ability to pay a patronage dividend year after year. The patronage dividend is in addition to the premiums their members have enjoyed this past year. Addison Co-op has a quality market that consistently pays above the Federal Order 2 price.

Outstanding quality awards were presented by Glenn Baker, field representative for United Ag Services. Receiving first place award was Bruce Bess of Troupsburg. Tied for second were Gary Button of Jasper and William and Aaron Bliss of Troupsburg. Tied for fourth were Tom Lyons of Addison and Jerry Miller of Howard.

Officers elected at the annual meetings were president, Robert Nichols; vice president, Harold Knowles Jr. of Campbell, N.Y.; secretary/treasurer, Hubert (Zeke) Dininny of Addison, N.Y.; and executive secretary, William McCarthy Jr. of Addison.

USDA CAT Insurance Sales Underway

HARRISBURG (Dauphin Co.) — The USDA Consolidated Farm Service Agency (CFSA), formerly the Agricultural Stabilization and Conservation Service, announced last week that producers in the state could begin applying for minimum catastrophic level of insurance on Monday, Feb. 6.

The crop insurance is part of the Federal Crop Insurance Reform Act of 1994 that requires all farmers to buy at least the minimum level of crop insurance to be eligible for certain farm program benefits. Among those benefits are farm loans previously made through the Farm and Home Administration. The loans are now to be made through the CFSA.

The reason for the reform of federal crop insurance program was because of the history of U.S. Congressional aid packages having to be made every couple of years to cover naturally caused crop damage.

After several years of drought in one part of the nation and flooding in another part, lawmakers decided that the system of supply disaster packages through low interest loans or other help was inconsistant and too time consuming. Further, there were often delays in education and instituting aid programs.

The current program requires all crop growers to buy minimum crop insurance. There are more details about the differences between insurable and non-insurable crops for specific regions, and the acreages required before the requirement kicks-in, but those should be directed to a local CFSA person.

What the minimum insurance program attempts to do is to institutionalize the nation's crop-disaster response from the ad hoc follow-up efforts carried out by the previous administrations.

In the long run, the cost for crop disaster relief within the United States can be expected to be less costly and less politicized.

In the short-term is represents higher overhead to commercial crop producers, but limits were placed on what kinds of upfront payments would be required.

The minimum catastrophic (CAT) level of coverage will pay for crop losses after more than half of the actual historical production is lost.

In other words, under this minimum coverage, the producer accepts the loss of half his crop, while insurance will pay for losses beyond that.

The rate of payback on the insurance is 60 percent of the expected market price of the insured crop.

(It should be explained that in situations of widespread losses, the market price of a crop can increase significantly. In comparison to normal or bumper crop situations, 60 percent of a market price during such a catastrophy could actually work out to a price closer to 100 percent during those normal or excessive production years.)

Since farming operations can cross county boundaries, the insurance "premium" is based on a formula that takes that into account. Officials do not call the fee a premium, however, and refer to it as an "administrative charge" that guarantees minimum crop insurance.

The cost of CAT coverage is $50 per crop, with a maximum of $200 per county, regardless of the number of insurable crops. Further, the total cost for all counties in which a producer farms is not to be more than $600.

According to a news release from the state CFSA office, "This administrative fee must be paid when applying for crop insurance."

March 15 is the closing date for crop insurance sales on most crops grown in Pennsylvania.

For more information, contact a local CFSA office.

Atlantic Breeders Cooperative Members Meet

LANCASTER (Lancaster Co.) — Members of a number of locals in the Atlantic Breeders Cooperative have been meeting this past week and many are scheduled to meet this week in annual district meetings for stockholders.

Announcement of the meeting schedule was published earlier in the cooperative's newsletter, a copy of which is sent to each member.

There are three basic purposes of this year's round of meetings, according to Dwight Hawbaker, secretary of the board of directors, in a meeting notice to members: to nominate a director in districts 2, 5, 8, 14, 15, and 16; to elect a resource/promotion committee representative in each district; and for members to learn more about the operation of the cooperative (a slide show is to be given about a proposed merger), and its current sires and service programs.

The results of elections are to published in a future issue of the cooperative's newsletter, ***Transmitter***.

In some cases, a county cooperative extension dairy day program is being held in conjunction with the membership meeting.

In **District 1,** the Eastern Berks Local is to meet Feb. 13 at noon in the Virginville Grange Hall.

In **District 2,** the Chester-Delaware Local is to meet at 7 p.m., Feb. 14, at the West Fallowfield Christian School.

In **District 3,** the Northern Dauphin-Northumberland Local is to meet 7 p.m., Feb. 16, at Berrysburg Community Center.

In **District 4,** the Northern Lancaster-Central Local is to meet noon Feb. 14 at Harvest Drive Restaurant, in Intercourse; and the Northern Lancaster-East Local is to meet 7 p.m., Feb. 16, at the Blue Ball Fire Hall.

In **District 5,** the Southern Lancaster Local is to meet 7 p.m., Feb. 13, in the Hoffman Building, at the Solanco Fairgrounds.

In **District 6,** the York Local is to meet 9:30 a.m., Feb. 16, at Seven Valley Fire Hall in conjunction with the county dairy day program.

In **District 8,** the Mifflin Local is to meet at noon Feb. 14, at the Country Village Restaurant, in Allensville.

In **District 9,** the Northern Blair-Northern Huntingdon-Centre Local is to meet 7:15 p.m., at Warriors Mark Fire Hall.

In **District 10,** the Somerset Local is to meet 7 p.m., Feb. 14, in the Community Building, in Berlin. The Fayette Local is to meet 10:30 a.m., Feb. 13, in Fiddlers Building, at the Fayette County Fairgrounds, in conjunction with dairy day activities.

In **District 11,** the Westmoreland Local is to meet 10:30 a.m., Feb. 14, in conjunction with the county dairy day in the Alwine Civic Center, in Greensburg. The Washington-Greene Local is to meet 10:30 a.m., Feb. 15, in the Ramada Inn, Washington.

In **District 12,** the New Cambria Local is to meet 7:30 p.m., Feb. 13, in the New Germany Grove Hall. The Indiana Local is to meet 7:30 p.m., Feb. 14, in The Omni, in Indiana. The Clearfield Local is to meet at noon, Feb. 15, in Friends Church, in Grampian.

In **District 14,** the Butler Local is to meet 10:30 a.m., Feb. 14, at the Garden Gate Restaurant, in conjunction with the county dairy day event.

In **District 15,** the Mercer Local is to meet 10 a.m., Feb. 13, at the Mercer County Extension Office, in conjunction with the dairy day activities. The West Crawford Local is to meet 7:30 p.m., Feb. 13, at the Vernon Central Hose Company, in Meadville.

For more information about the Atlantic Breeders Cooperative, call its main office at (717) 569-0413, or talk to a local representative.

Waiting To Control Quackgrass Can Cost You Plenty.

Waiting to use a rescue treatment like Accent* can cost you up to twice as much as using Roundup® herbicide to stop quackgrass before your corn is up. But that's not all you'll pay...

WAITING CAN COST YOU 14 BU/A IN YIELD

Quackgrass is an aggressive competitor for soil moisture and plant nutrients. And if you wait until your corn is up to control quackgrass, you've already lost yield. University tests have shown that waiting to control quackgrass can cost you up to 14 bushels per acre. And then there's the matter of reinfestation...

QUACK CAN COME BACK WITH A VENGEANCE

You know how tough quackgrass can be. Unfortunately, post treatments like Accent don't. They often just knock quack back instead of controlling the entire plant, rhizomes and all, like Roundup. The result? Quackgrass comes back and you're back to square one.

DON'T WAIT UNTIL IT'S TOO LATE

Using Accent *after* the damage is done can be costly. So don't hesitate. Use Roundup to stop quackgrass *before* it robs you of yield and profit. See your dealer for the early, economical quackgrass control of Roundup.

Roun... Herbicide

*Always read and follow the label for Roundup herbicide. Roundup® is a registered trademark of Monsanto Company. ©Monsanto Company 1995. *Accent is a registered trademark of DuPont. RUP 5-6083*

Growers Employ Variety Of Techniques To Market Products

ANDY ANDREWS
Lancaster Farming Staff

HERSHEY (Dauphin Co.) — Although vegetable and fruit growers have many ways to sell their products, there is a way to take advantage of simple marketing techniques to ensure their success, according to a marketing expert who spoke to about 30 growers registered last week for the marketing short course at the Pennsylvania Vegetable Conference.

• One grower in Carbon County, who operates a roadside market, publishes a newsletter that she distributes free of charge to her customers, telling them about upcoming specials.

• An Erie County grower mails a color brochure to customers detailing what special promotions are upcoming at the market.

• One grower uses a $30 computer software program to design and print up a calendar, which is distributed to customers. This calendar lists upcoming sales and special events.

• A grower in the central part of the state uses a direct mailing from a list provided at a vegetable stand to triple her business.

• One grower advertises a pruning seminar in the spring and gets a "real nice" turnout that helps to promote and sell products grown on the farm.

• A grower from the northeastern part of the state puts his farm name on plastic polybags to advertise the products grown on the farm.

• A grower of wholesale products, every year, tests products for pesticide residues and advertises that fact on the products grown. Another advertises that the orchard is a Penn State integrated pest management (IPM) testing site and posts whether pesticides are used on the products grown.

• One grower said that he often takes products out of display boxes and eats them in front of customers, to show that if he thinks it is safe enough for him to eat, it ought to be safe enough to buy for the family.

Growers need to do all that they can "to be the last one in," said Adrienne Zoble, founder and president of Adrienne Zoble Associates, Somerville, NJ.

Zoble provided guidance in creating a marketing plan from her quarterly newsletter, Unconventional Wisdom, to those registered for the marketing short course at the state vegetable conference.

In her guidelines, "Perfectly Easy Planning," Zoble provided her step-by-step approach to identifying a marketing plan and making it work.

When promoting products, growers should keep in mind that it is more important to look at benefits rather than "features." Benefits include those principles about your business and products that satisfy people's emotional and psychological needs, also called those "warm fuzzies."

"It's not the quantity of marketing you do, but the combination of quality and continuity," said Zoble.

Features merely promote a certain product for a certain price. Benefits look into satisfying people's needs, as for freshness, quality, or other factors such as keeping products pesticide-free.

As in any other business, when marketing farm products, it's important to keep in mind the components of marketing — perception, price, product, promotion, people, and positioning.

Above all, growers should be "pro-active" about their product, stressing products' benefits and informing the buyers, whenever possible, about what went into growing and distributing the product.

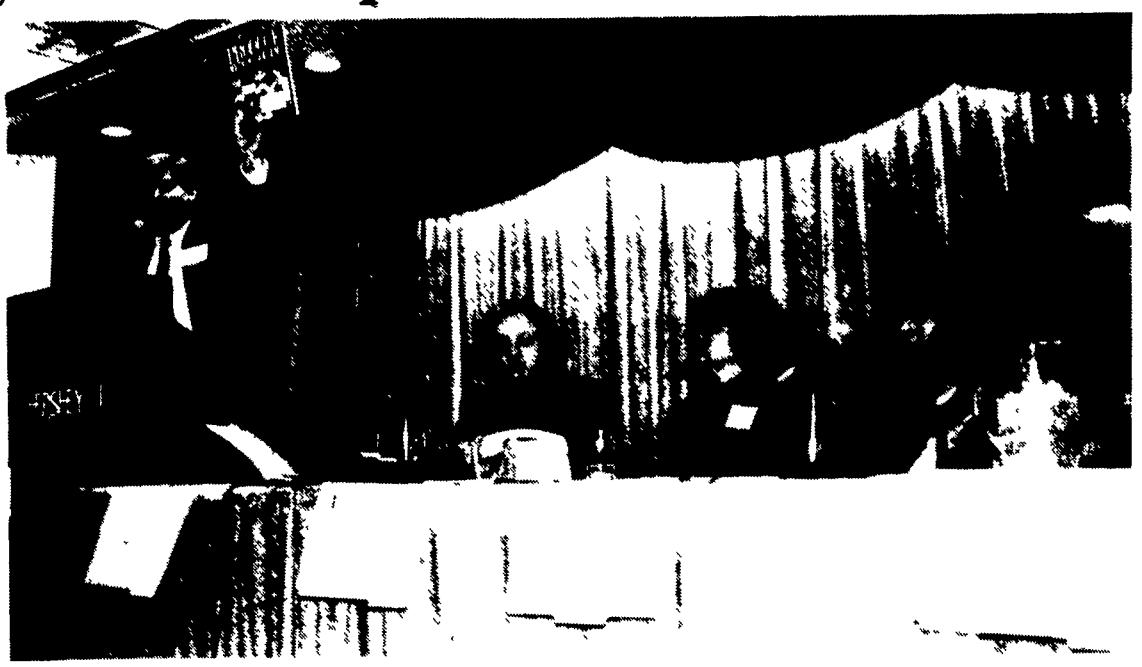
In the '90s, "customer service" is becoming more important, as "high tech" changes into "high touch."

"People really like service and attention," said Zoble. They no longer want to be treated impersonally — they expect more customized, more personalized service.

When developing a plan, it is important to first diagnose what the situation is for the business in the markeplace, look at a company prognosis, set down goals and objectives, choose a strategy (in general), use tactics (the actual work of accomplishing the strategy), and look down the road, after implementation, of how the marketing is proceeding.

Zoble provided some guidance into how growers can work as marketers of their products to be "the last one in" — in other words, to secure a place in the market and build up long-term relationships with customers.

The more information you provide the customers, through newsletters, direct mailings, or customizing the packaging of the product, "the better off you are," said Zoble.



Examples of grower advertising were reviewed at the marketing short course. A panel reviewed samples from growers in the audience. The panel was composed of, seated, from left, Adrienne Zoble, Zoble Associates; Donna Miller, owner and designer for D Square Design, Lemoyne; Robin Hetherington, B&R Farms; and Rudy Grob, sales manager, Funks Farm Market, Millersville. The panel was moderated by John Stark, director of the Bureau of Market Development, Pennsylvania Department of Agriculture, standing.

Examples of grower advertising were reviewed at the marketing short course. A panel reviewed samples from the Lehigh Valley Growers and from other growers in the audience.

The panel was composed of Adrienne Zoble, Zoble Associates; Donna Miller, owner and designer for D Square Design, Lemoyne; Robin Hetherington, B&R Farms; and Rudy Grob, sales manager, Funks Farm Market, Millersville. The panel was moderated by John Stark, director of the Bureau of Market Development, Pennsylvania Department of Agriculture.

What the panel concluded: keep advertising simple (use less clutter), make it consistent (make use of only one logo), and emphasize benefits over features.

Many growers, according to Zoble, who advertise are taken up by the compunction to "put words, words, words in material to fill all the white space" in the ad. Trying to do too much in one space is distracting and confusing.

Also, many retailers are "married" to pages 2-3 of a newspaper and should learn to make use of other sections of the publication where they can more effectively target products.

"People are often overwhelmed and can't digest everything in the ads," said Zoble.

Also, use of pictures is vital to make advertising more attractive and effective.

An effective marketing tool is the use of a business logo, which varies in cost of design, which can range from $200 to $4,000, depending on designer. Designers are listed in the phone book's yellow pages.

Another panel reviewed ways growers can personalize their business for customers. The panel, modererated by Stark, featured Bill Reynolds; Jon Johnson, policy analyst at the Center for Rural Pennsylvania; and Marty Wise, professor of marketing at Harrisburg Area Community College.

Another panel reviewed ways growers can personalize their business for customers. The panel, modererated by John Stark, far left, featured Bill Reynolds; Jon Johnson, policy analyst at the Center for Rural Pennsylvania; and Marty Wise, professor of marketing at Harrisburg Area Community College.

N.Y./N.J Milk $12.83

ALBANY, N.Y. — Dairy farmers who supplied regulated milk dealers (handlers) under the New York-New Jersey marketing orders during December 1994 will be paid by handlers on the basis of a uniform price of $12.83 per hundredweight (27.6 cents per quart); the price for the corresponding month last year was $13.48 per hundredweight.

Market Administrator Ronald C. Pearce also stated that the price was $13.03 in November 1994. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

A total of 11,267 dairy farmers supplied handlers regulated under the New York-New Jersey marketing orders with 960,033,002 pounds of milk during December 1994. This was an increase of 2.7 percent (about 25 million pounds) from last year. The gross value to dairy farmers for milk deliveries was $124,382,471.03. This included differentials required to be paid to dairy farmers but not premiums, deductions authorized by the farmer, or assessments.

Regulated handlers used 423,013,594 pounds of milk for Class I, 44.1 percent of the total. This milk is used for fluid milk products such as homogenized, flavored, low test, and skim milks. For December 1994, handlers paid $14.71 per hundredweight (31.6 cents per quart) for Class I milk compared with $14.88 a year ago.

Handlers used 152,641,158 pounds of milk for Class II products, 15.9 percent of the total. Class II products include fluid cream, eggnog, ricotta and cottage cheeses, ice cream, and yogurt. Handlers paid $12.24 per hundredweight for this milk.

Milk used to manufacture Class III products including butter, cheese (other than ricotta and cottage cheeses), and whole milk powder totaled 354,306,324 pounds (36.9 percent of the total). Handlers paid $11.44 per hundredweight for this milk.

Milk used to manufacture nonfat dry milk (Class III-A) totaled 30,071,926 pounds (3.1 percent of the total). Handlers paid $10.23 per hundredweight for this milk.

The uniform price is based on milk containing 3.5 percent butterfat. For December 1994, there was a price differential of 5.8 cents for each one-tenth of one percent that the milk tested above or below the 3.5 percent standard.

All prices quoted are for bulk tank milk received from farms in the 201-210 mile zone from New York City.

It does a body good.®

Pork Expo Wednesday At Lebanon Fairgrounds

(Continued from Page A1)

duction," said Abe Fisher, president of the Pennsylvania Pork Producers Council (PPPC), sponsor of the Expo. Registration is free of charge.

Fisher said the new site provides more exhibit space over the Penn Harris. In turn, 80 exhibit booths have been sold as of presstime — "more than we've ever had," said Fisher.

"We hope the site proves to be much better for those who regsiter for the Expo," said Fisher. More than 400 will attend the annual event, which features a trade show and educational seminars for producers.

Featured at the Expo will be Dr. Kirk Clark, nationally recognized for his work with medicated early weaning programs at Purdue University. He will speak about the benefits of multiple site production.

Gary Maas, president of Agri Careers in Massena, Iowa, will provide tips on keeping top-notch employees. "Maas is the top guy in the country with his expertise regarding managing ag employees," said Fisher.

Tom Congelton, marketing manager for the Central Kentucky Hog Marketing Association in Springfield, Ky., will provide his perspective on establishing a marketing network.

Also, H. Louis Moore, Penn State professor of agricultural economics, will provide his annual hog market outlook. Dennis Zimmerman, a producer and member of the Nutrient Management Advisory Board, will discuss the state's Nutrient Management Law and how if will affect individual operations.

Keystone Pork Expo

Wednesday February 15 Lebanon Valley Expo Center Lebanon Fairgrounds

An annual event is the Keystone Pork Bowl, where county teams compete. Also on schedule is the junior public speaking contest, where you from ages 8-19 compete.

"We try to provide a variety of themes," said Fisher. Included in this issue of *Lancaster Farming* is the complete schedule.

Also, the fourth annual Legislative Activity Fund Auction will be held following the educational seminars. Fisher said, as of presstime, there were about $14,000-$15,000 worth of items, from quilts and prints to mycoplasma vaccines, to raise funds for the PPPC.

Fisher said that volunteer help allows the PPPC to manage and coordinate the activities of the Expo.

Fisher noted that "The Other Burger" will be sold at dinnertime.

Contact your county extension office for a copy of the Expo program.

Following is a listing of the Keystone Pork Expo exhibitors:

MMI Holds Reorganization Meeting

STRONGSVILLE, Ohio — The board of directors of Milk Marketing Inc. (MMI), based on Strongsville, Ohio, held its annual reorganizational meeting recently and re-elected Herman Brubaker, of West Alexandria, Ohio, as its chairman and president of the board.

MMI is a regional cooperative ranked seventh in size in the nation, with 5,600 dairy cooperators in Ohio, Indiana, Pennsylvania, Kentucky, Maryland, Michigan, New York, and West Virginia. Last year it marketed and processed more than 4.75 billion pounds of milk for revenues of $725 million.

The board of directors consists of 21 district directors and three at-large directors. Annual elections are held on a rotating basis.

Brubaker has served as president of MMI since 1985 and presides over all meetings of the board and 210-member delegate body. The board sets policy and direction for the association.

Elected as vice chairs were Pennsylvanians George Bancroft Jr., of Centerville, and Tom Croner, of Berlin.

Dale Kauffman, of Shreve, Ohio, was reelected secretary. Phillip Hart, of Clayton, Mich., was elected as treasurer.

In earlier board elections, dairy producers in 11 of MMI's 21 districts elected to two year terms James Compton, District 3, Clarksburg (Pa.); Merel Chaplin, District 4, Moundsville, W.Va.; Dale Kauffman, District 6; Connie Finton, District 7, New Philadelphia, Ohio; Harold Schacht, District 10, Canal Winchester, Ohio; Brubaker; Les Kruse, District 13, New Knoxville, Ohio; and Charles F. Hickerson, District 19, Maysville, Ky.

Elected to three-year terms were Paul Broering, District 14, St. Henry, Ohio; Donald Gurtner, District 17, Fremont, Ind.; and Terry Rowlett, District 20, Campbellsburg, Ky.

PRESCOTT (Lebanon Co.) — Though bovine somatotropin (BST) is the most researched and documented safe product ever reviewed by the U.S. Food and Drug. Administration, future genetically altered products also should be well researched before being approved, according to a genetic researcher with an institute devoted to researching applications of the technique.

David Stern, an associate scientist with the Boyce Thompson Institute for Plant Research, located at Cornell University, Ithaca, N.Y. told several hundred farmer-clients of Lebanon Valley National Bank (LVNB) that genetic engineering is a relatively simple tool for creating new variations of plants, but it should be used wisely, and cautiously.

Stern, one of several speakers during LVNB's annual agriculture seminar held Wednesday at the Prescott Fire Hall in eastern Lebanon County, explained the basic procedure of genetic engineering to the group, stressing that it is not a cure-all for the world's problems, but that it is a tool for plant and animal development that can eliminate possibly decades of traditional breeding techinques to arrive at a beneficial variety.

He said that it would take him about six months to come up with a new variety of a plant using genetic engineering techniques, instead of perhaps 10 years.

Stern said his job at the not-for-profit research institute is to "expand essential knowledge of plants and other organisms for the benefit of man." He said that his genetics work concentrates more on plant pests and basic research. Basic research results, he said, take 10 to 12 years to show up in actual products.

While he had no predictions for how the farm community may be involved in the future of genetic applications, he said he personally would like to see his research benefit the world's poorer nations, by making them less dependent on the products of wealthy nations.

In another segment of the day-long seminar, a panel addressed the issue of BST, now more than a year in use in the United States. The panel was moderated by Bob Yonkers, Penn State assistant professor of agricultural economics.

Also on the panel were dairymen Dennis Drager, of Marietta, Joe Snavely, of Manheim, and Vincent Wagner, of Myerstown area. Veterinarian Lynn Sammons, of Willow Creek Animal Hospital, who also works with Monsanto Corp. in helping producers use and understand the company's approved BST product, Posilac, also was on the panel.

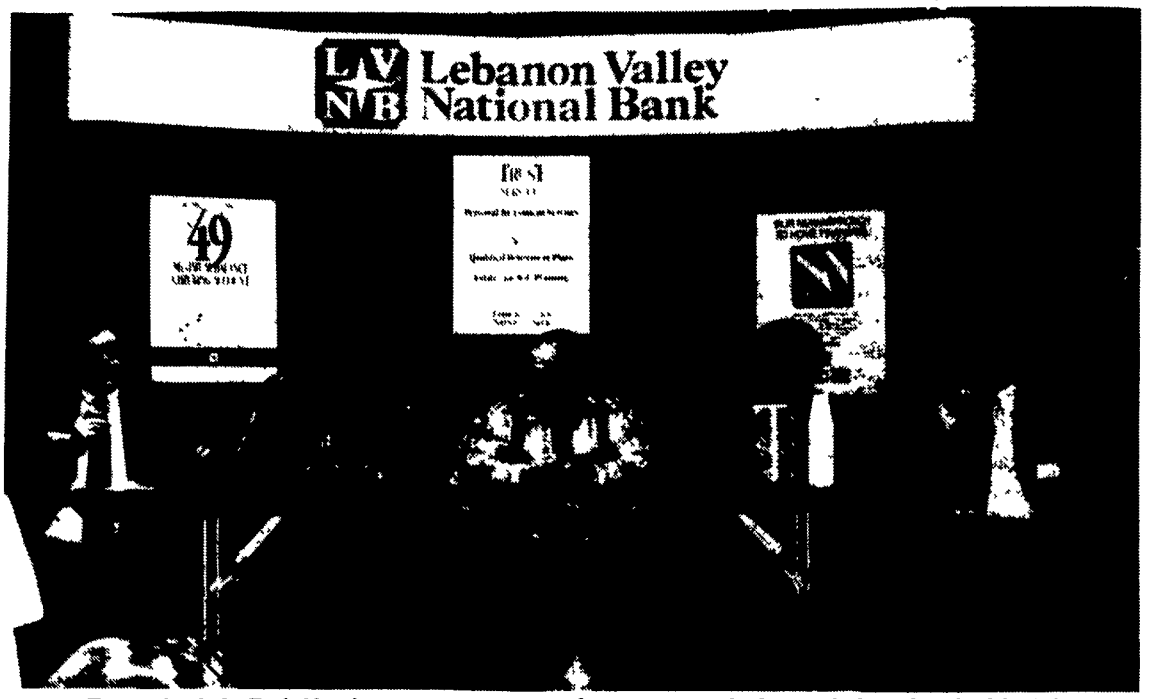
Yonkers had prepared a number of questions to ask the panel, concerning there experiences with BST, what responses they have seen, from milk production to animal health to economic.

According to Yonkers, Monsanto reports that in the first 11 months of its approval for sale, the company has sold 14.5 million units of Posilac, with 53 percent of that coming within the past five months. He said it is estimated that 11 percent of the milk shippers in the U.S. are using the product and that 30 percent of the people using it bought it for the first time within the past five months, several months after the company's special introductory price offer ended.

All dairymen had self-described family farm operations of medium to small size, though different in feeding, management, and buildings.

Wagner had the highest averaging herd and does not use the product, though he is more involved in marketing Holstein breeding stock than the others. He said his herd average is around 24,000 pounds of milk.

According to Wagner he ships his milk to local processor Wengert's Dairies, in Lebanon County, which is also part of Graybill's Dairies in Lancaster. The company (and some other small dairies) had announced last year that it would not accept milk produced by cows injected with the BST.



From the left, Bob Yonkers poses a question to a panel of people involved with dairy production and BST, who are Dennis Drager, Joe Snavely, Vincent Wagner, and Lynn Sammons.

However, there's no way of knowing from testing the milk whether the milk came from a BST-injected or non-BST injected cow. The milk processor does reward its suppliers with a 10-cent per hundredweight premium for not using BST. Its producers can use BST if they want to, but they must forgo the premium, according to Wagner.

Snavely said he uses BST and has a small milking herd and has a herd average of about 20,000 pounds of milk. According to panel discussions, in addition to the use of BST, the major difference between Snavely and Wagner in management had to do with feeding a totally mixed ration (TMR).

Snavely said he has old facilities and feeds from a cart, but feeds well. He doesn't use BST on all of his cows, but he found that it has helped increase his milk production with no noticeable increase in feed, and it gave him flexibility in making certain decisions.

For example, while Drager said he doesn't waste BST on "tail-enders" (those cows finishing up a lactation), Snavely said that doing just that helped him bring in cash instead of losing it.

Snavely said he had some cows that wouldn't conceive again and were destined for culling. He said with low culling prices, he figured he could make more money using BST to continue milking those cows for awhile, instead of drying them off and selling them for meat at basement prices.

As a veterinarian who is on an advisory board to Monsanto Corp., Sammons said that the Willow Creek Animal Hospital practice actually has the most number of clients using BST in the Northeast.

According to Sammons, 65 different clients are using Posilac and he has had no complaints from problems associated with its use. He said that statewide, he estimated that four cases were reported to the company in which a client believed some problem on the farm was caused by using BST.

But he said he wasn't familiar with details of those cases, although he said he has had some clients stop using the product for two reasons: too much time involved in giving shots; they couldn't see the benefits.

He said that some people will not see benefits, especially if there are other management deficits to production.

First and foremost, Sammons and the producers all seemed to agree that cow comfort is key to milk production. Sammons said

STATE COLLEGE (Centre Co.) — Mastitis is the most common and costly disease of dairy cattle. When mastitis is out of control, it can be stealing up to $200 per cow per year out of your pocket.

How can you tell when you don't have mastitis under control?

You need to have at least two monitors: a record of all clinical cases of mastitis; and somatic cell count data, particularly individual cow data.

Both of these pieces of information are essential if you are going to control mastitis, but for this article, we are going to concentrate on somatic cell count data and, in particular, somatic cell score (SCS).

The most common source for SCS is from the Dairy Herd Improvement Association (DHIA). It comes at a cost, and some dairy producers claim that they cannot afford it.

On an annual basis, the cost of mastitis may amount to more than $11,000 for a 60-cow herd, or $16 per cow, per year. In contrast, DHIA testing for somatic cells is less than 10 cents per cow per month. That is an opportunity-to-cost ratio of 160:1. DHIA testing for somatic cells can pay generous dividends.

How does one use somatic cell data to recover these dividends? Let's explore this opportunity first with individual cows, then later with groups of cows.

Use Of SCS With Individual Cows

The first step in using your DHIA SCS information is to find you herd average SCS and identify all the cows in the herd with an SCS greater than 4 (SCS > 4).

Once you have found this information, you need to answer the following questions:

- Is the percentage of cows with SCS>4 higher this month compared to last month?
- Is your herd average SCS greater than 3?
- Do more than 30 percent of your cows have SCS>4?

If you answer "yes" to any of these questions, you have a mastitis problem and you need to make mastitis control one of you top priorities.

But where to start?

If you are having problems maintaining your milk market because of a high somatic cell count, you can take some measurers to bring it under cotnrol by using your DHIA information.

Usually, 5 percent of the highest SCS cows can account for 10 to 50 percent of the cells in the bulk tank. Identify the cows with the highest SCS and look at their percentage contribution to the tank. Segregation of the milk from these cows from the bulk tank can bring your herd average SCS well within legal limits.

When practical, the removal of these cows from the herd will reduce the spread of contagious mastitis from these infected cows to clean cows. This measure will do much to keep future SCS low, if appropriate mastitis control measures are used.

Identify cows with SCS>5 (severely infected), those with an SCS>4 for two consecutive months (chronically infected), and those with an SCS that for the first time is between between 4 and 5 (mildly infected).

These cows are important, because they represent significant loss of milk to your bulk tank. The milk loss per cow per month is estimated as 45 pounds for each SCS greater than 2.

As an example, if the SCS for a cow is 8, then milk loss can be calculated as: **8 minus 2 equals 6.**

Six times 45 equals 270 pounds of milk loss for this cow on this month. This can represent a loss of $32.40 for the lost milk production.

(Turn to Page A28)

How Does Your Herd Compare?

STATE COLLEGE (Centre Co.) — These data are calculated using information pulled from Pennsylvania DHIA's mainframe computer each week. It is a one-week summary representing approximately one-fourth of the herds on test, as they are tested monthly.

These data are valuable from a business management standpoint and can be used for comparing your operations to the averages from about one-fourth of the herds across the state.

DHIA Averages for all herds processed between 1/22/95 and 1/29/95

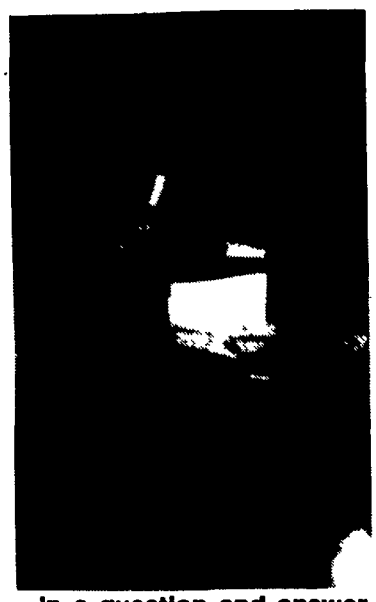
For Virginia Dairyman, Grazing The Way To Greater Profitability, Improved Herd Health

ANDY ANDREWS
Lancaster Farming Staff

PARADISE (Lancaster Co.) — For Crimora, Virginia dairyman Bill Patterson, the work was simply too hard. Milking the cows became a relentless chore. There was no joy in dairying — the constant drive to put high production over everything else (hours worked, herd health, and happiness of his own family) simply became too much to bear.

So nearly three years ago, he opted out. Instead of relying on confinement housing, feeding truckloads of dry matter to get the milk production up, worrying about veterinarian bills and watching his cull rate skyrocket, he switched to grazing and a better lifestyle.

In April 1992, after nearly a year of preparation, planning, and organizing, Patterson let the first group of his Red Mill Farm 91-cow Holstein and Jersey herd out on pasture ground, a combination of orchardgrass and alfalfa, for the first time. Since that time, every dollar he has obtained from milk sales has left him with 50 cents in his pocket, he said.



In a question and answer session that followed, Dave Forgey emphasized the importance of selecting a plant species that works well with your soil types.

Joel Salatin, Staunton, Va. grazer who operates Polyface Tree Farms, has worked out a system that is healthy for the environment and farm-profitable.

Dr. Dave Zartman, professor at Ohio State University, holding microphone, spoke about the results of five years of research done on seasonal dairying. Bill Patterson, far left, reviewed the financial figures on his farm, dated from December 1989 to December 1994 (reprinted this issue of *Lancaster Farming*). In center is Tim Fritz, Montgomery County extension agent, who shared his grazing ideas from Pennsylvania farms. Seated, foreground, is Roman Stoltzfoos.

Patterson told the 350 dairy farmers at Tuesday's Second Annual Southeast Pennsylvania Grazing Conference at the Dutch Town and Country Inn that the key was to make his business less reliable on spending money for increased production. Instead, using grazing, reduced materials and labor costs has produced a healthier herd, with a little less production but with more money in his pocket.

Patterson farms about 400 acres in Augusta County, Va., along with his family, a few miles away from the Blue Ridge Mountains. The land, once set up for high grain production, was converted to mostly pasture land with a combination of alfalfa/grass mixes and some other pasture grasses, including matua.

Patterson spoke about the history of the herd. In 1991, when the herd stood at 65 cows (about half Jerseys), average production was 23,850 pounds. The herd was milked twice a day. That was the highest producing 2x herd in the state at the time. "It was a real high-producing herd," said Patterson. "But where do you go from there?

"Why start grazing?" he said. Well, he explained that cows, under the conventional system, were "really wearing out" with an average yearly cull rate of 41 percent (state average was about 38 percent). There wasn't one big problem, but "a little bit of everything" which led them to choose grazing.

Patterson said the cows had more mastitis because of the confinement. They stood on traditional concrete floors, so heel warts was a problem. Ketosis was something they had to deal with. Production was increased from 14,000 pounds to 22,000 pounds over an 11-year period, but the higher level of production forced more management and "more work."

If we worked hard, it was important to be rewarded for it, said Patterson. The whole system was wearing them out, working longer hours. "It just got to the point . . . where I didn't want to milk the cows anymore," he said.

Patterson wanted to spend more

Patterson reviewed the financial figures on his farm, dated from December 1989 to December 1994. Net income per cow went from $921.49 in 1989 with 61 cows to a net income per cow of $1,290.36 in 1994 with 91 cows.

Amazing Grazing

Amazing grazing, too simple it seems
To use the grass that's free.
But costs were up, and profits down
So now the light I've seen.
Dividing land around the barn
Into paddocks large, then small
The object is to keep the cows
On grass six inches tall.
With several rubber water tanks
And some plastic pipe we've laid,
We've found fresh water availability
To be more important than shade.
We move the cows at intervals,
No longer than a day;
If paddocks get over twelve inches tall,
Make them into hay.
Amazing grazing, too simple it seems,
But I know it works for me.
And I would rather move a little fence
Than give shots of BST.
If you'd like to help with what you've heard
Here's what I would suggest
Get in touch with the Grassland Committee,
Your County Extension, or SCS.

This poem about grazing's benefits was included in the information packet at the conference.

Greater Profitability

(Continued from Page A26)

time with the family. He worried that dairying "may be a good living, but not a good life."

So they switched to grazing.

They installed a new fence. They put in a new water system, paddocks, and other refinements. Corn ground was converted to pasture. They reseeded cropland with fescue and put in alfalfa-orchard grass mixes, making use of some matua-clover-ryegrass combinations.

The land presented a "real opportunity" to graze no-till alfalfa.

The Pattersons installed additional fencing. After a while, cow cull rate was reduced significantly. Overall health showed significant improvement. Costs went down as a result of the switch to a low-production, low-cost system.

And the savings translated quickly into net profit.

Patterson reviewed the financial figures on his farm, dated from December 1989 to December 1994 (reprinted this issue of *Lancaster Farming*). It was clear: net income per cow went from $921.49 in 1989 with 61 cows to a net income per cow of $1,290.36 in 1994 with 91 cows.

In the end, for every dollar obtained per cow, half of that was used as family income. That net income Patterson attributes to the grazing program.

Patterson explained that too often, farmers set up the dairy in order to produce milk to obtain profit. Instead, he said, you should set the farm up for pofit and allow milk to bring that profit.

Producers can then keep as many cows as they can. "Let the cows do the work for you," he said.

The cows, as a result of grazing, are cleaner and drier. He spends less time milking now with 91 cows than he did with the 60-cow herd. It is much less expensive to graze than to grow or purchase feed and feed supplements.

"It is absolutely imperative," said Patterson, "that we learn to be low-cost producers and absolutely imperative that we use grazing to do that."

To further that end, Patterson noted the upcoming Mid-Atlantic Dairy Grazing Field Day scheduled Tuesday and Wednesday, July 11-12, at the Delta Springs Farms in Mt. Solon, Va. and at his farm in Crimora, Va. Examples of grazing, including watering systems, nutritional considerations, cost-share programs, forage varieties, etc. will be discussed.

After addressing the group, Logansport, Ind. dairyman Dave Forgey showed slides of what his farm was like before he switched to seasonal grass dairying. The area around the farm was worn down. Tilled areas surrounded it. Soil was being lost. The area didn't look real clean.

But then he showed those who attended the grazing conference a picture of his farm after he switched to seasonal grazing. Lush, green farm fields. A cleaner, healthier environment for the cows.

The crowd was impressed.

Forgey, columnist for Hoard's Dairyman, switched to seasonal dairying (moving the calving season to fall) over a course of three years. The Forgeys reduced the herd size from 150 to 120. Some of the challenges Forgey faced: becoming more intense about conception rates, selecting bulls for high conception rates, and letting some good livestock go.

The farm also made use of check sheets and electronic heat detection.

But the results, when all other factors were in place, was lower feed costs, optimum use of materials, less equipment costs, and the herd benefited immediately in terms of overall health.

The December DHIA report for the River-View Farm herd was 20,032 pounds, using the alfalfa/grass grazing.

Forgey reviewed the entire farm system, making use of an intensive rotational grazing system using 85 paddocks measuring 2½ to 5 acres each. Included is a simple water supply, with more than three miles of water line feeding separate, transportable 100-gallon tanks. The cows are moved every 12 hours from paddock to paddock.

The cows are kept on pasture all year-round, said Forgey. Silage is fed to them on pasture ground with a round bale system even in the middle of winter. He told the group that in the harsh winter last year, there were 10 days in a row that the temperature outside was 30 degrees below zero, with an 80 degrees below zero wind chill, and the cows were outside.

Net income per cow is more than $800.

In a question and answer session that followed, Forgey emphasized the importance of selecting a plant species that works well with your soil types. For good soil in his system, he uses an alfalfa/orchardgrass mixture. On clay soil, he uses bromegrass/red clover.

Every paddock gets hayed at least once in the spring and is mowed at least once during the year.

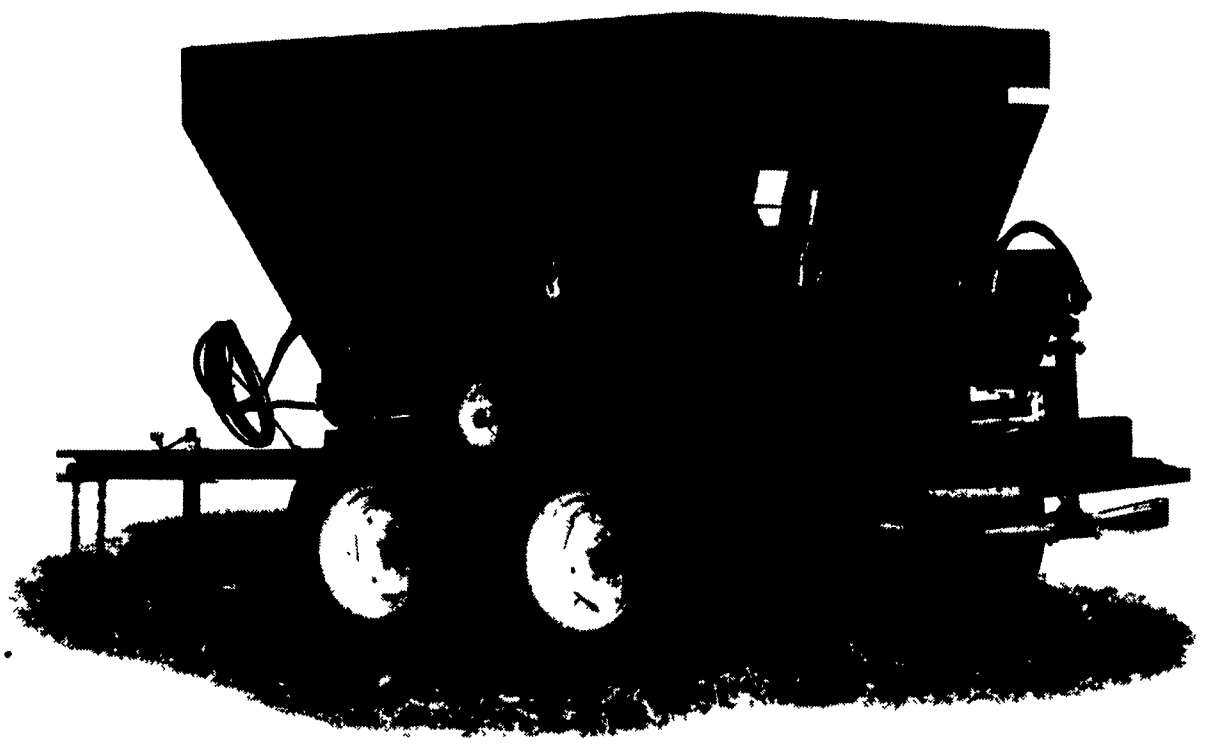
Joel Salatin, Staunton, Va. grazer who operates Polyface Tree Farms, emphasized the importance of "poly," or many-, rather than "mono," or single-culture farms. He said that through a combination of "generic" equipment that does multiple tasks, and watching costs, he has worked out a system that is healthy for the environment and farm-profitable.

Also, he emphasized that animals "should do the work. Don't think that every problem has a heavy-metal, diesel-fuel answer" on the farm.

Dr. Dave Zartman, professor at Ohio State University, spoke about the results of five years of research done on seasonal dairying. Research indicated that something on the order of 15-20 percent additional profit can be made if growers switch to seasonal dairying, and a similar amount using management-intensive grazing, he told those who attended the conference.

But the main message, he said, is that "seasonal dairying has enormous flexibility. It is not locked to grazing." Seasonal dairying works in many different variations. Zartman told the farmers to "give serious thought to seasonality" even if working with a confinement system.

The One Spreader Rugged Enough For Lime, Precise Enough For Fertilizer.



You know how tough it is to spread wet lime. And fertilizer is too expensive to waste. Our new 56i spreader does both jobs with ease. Plus, it has no equal when it comes to spreading "sloppy" material.

Stoltzfus Spreaders have been known as unique, "top-of-the-line" ag spreaders since 1947.

Farmers are still using Stoltzfus Spreaders they've had 20 years or more. That means your investment in a versatile Stoltzfus Spreader will add up to a very smart buy indeed.

Call or write today for a free brochure and the name of the dealer nearest you.

Buy an ACO Ad-lib Feeder
Or buy a bucket.

It took six years of research, and over 7000 separate measurements involving pig behavior to develop the ACO Ad-lib Feeder. Which is why it's the only feeder *proven* to reduce feed wastage to less than 2%, and aggression in the pen by up to 60%.

Curved partitions make fouling virtually impossible. And specially designed agitators keep a perfect flow of feed, be it pellet or meal.

From 11 lb nursery pigs to 265 lb market hogs, there's a precision-cast ACO Ad-lib Feeder to fit your pig.

And, depending on your feed cost, the amount you *save* on wasted feed will have paid for your feeder in just *nine months*.

So, next time you're buying a feeder, make sure it's an ACO. Otherwise you might as well be buying a bucket.

(Continued from Page A25)

Chronic cows may not have extremely high SCS, but because the elevated counts continue for months, significant milk loss is experienced. The mildly infected cows are losing 45 to 90 pounds of milk per month and are likely candidates to become clinical cases.

Such cows are potential sources of bacteria to infect healthy cows and should be isolated from the other cows if contagious mastitis is a problem in the herd. Milk these cows last or with separate milking equipment. It is generally not practical to treat these cows with antibiotics.

Reviewing your DHIA SCS information can provide important clues as to the sources of you mastitis problem and help you to improve your mastitis control program. Is the mastitis in your herd caused by contagious or environmental bacteria, or both kinds?

Environmental mastitis tends to occur early in lactation and affected cows have elevated SCS for short durations. Environmental mastitis can be controlled by cleaning up the environment especially the bedding areas.

Change bedding types and if possible use sand as a bedding. Sand will not allow the environmental bacteria to grow.

You should work to eliminate standing water and mud.

Evaluate your milking hygiene program — predipping is believed to be an effective control measure against environmental mastitis.

Reduce the use of water during udder preparation, keep udders clean, and clip or singe udder hair.

Finally, eliminate "squawking," otherwise known as liner slipping, particularly at the end of milking.

Contagious mastitis is more likely to occur later in lactation and cows, typically have elevated SCS month after month. To combat this type of mastitis consider changing milking procedures, pay particular attention to teat dipping and dry cow therapy.

Prevent teat sores and isolate cows that are known to be infected.

These measures tend to reduce the transmission of the disease to uninfected cows and slowly reduces the number of new cases of contagious mastitis.

In a herd with contagious mastitis, progress in reducing herd SCS can be slow especially if problem cows are not isolated.

An increase in the percentage of cows with SCS of 0, 1, and 2 indicates progress is being made, even when other signs are discouraging. Your DHIA SCS report will be your best monitor of progress.

We have discussed some of the uses of SCS to monitor individual cows, and will next (in a future article) talk about using SCS to monitor cow groups. The important point here is that preventing one case of clinical mastitis can pay for the DHIA testing of 119 cows for a year.

Preventing mastitis by using your DHIA records puts money into your pocket with little extra cost.

Each year that mastitis control measures are continued and mastitis is closely controlled compounds the dividends you make by having invested in somatic cell monitoring and learned how to interpret the SCS report.

Average Farm Feed Costs For Handy Reference

To help farmers across the state to have handy reference of commodity input costs in their feeding operations for DHIA record sheets or to develop livestock feed cost data, here's last week's average costs of various ingredients as compiled from regional reports across the state of Pennsylvania. Remember these are averages so you will need to adjust your figures up or down according to your location and the quality of your crop.

330 Commercial Pumps & Motors For Heavy Duty Use
List $595.00 SALE $280!

Commercial's model 330, 350 and 365 pumps and motors are external spur gear, fixed displacement units designed for continuous operation at pressures up to 3500 psi. They combine a practical high pressure capability with the economy and durability of gear equipment.
High Efficiency - Advances in our thrust plate designs and seal material contribute to pump volumetric efficiency as high as 95% of theoretical, even with fluid viscosity as low as 50 SUS. Longer gear journals present a large effective area to the sleeve bearings and provide excellent load distribution. Internal passages supply a constant flow of lubrication from the pump's inlet to all bearing surfaces. This ensures a film of clean, cool oil on all moving parts at all times. These features greatly extend service life.
Heavy-duty Construction - Housings are made from cast iron for durability and strength. Units are available in single and multiple assemblies.
The drive gears and shafts are machined from a one-piece forging to provide maximum strength. Gear teeth and journals are carburized and ground to a precision finish. Cast-bronze thrust plates are pressure loaded and designed to provide minimum clearance at the ends of the gears for outstanding efficiency.

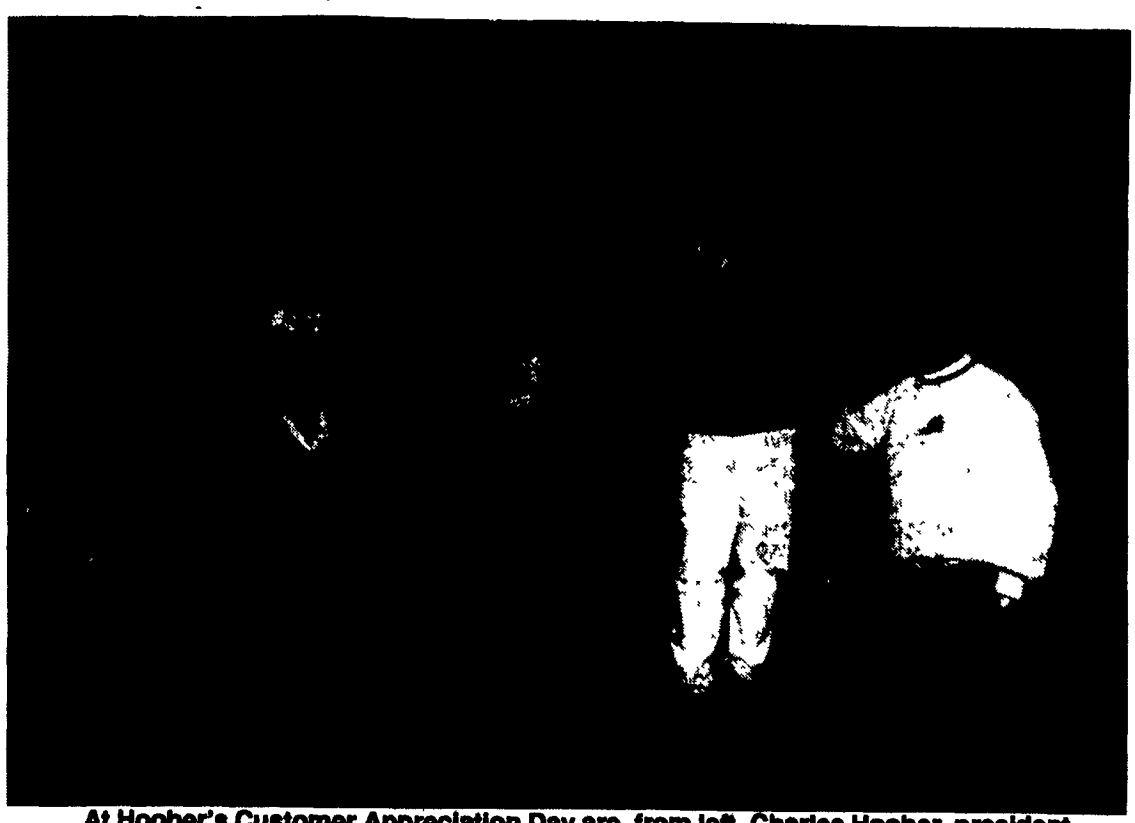
Customer Appreciation Day Held

MIDDLETOWN, Del. — A special day of customer appreciation was on Wednesday by Hoober Equipment Inc., with a large crowd on hand for seminars and an evening of food and fun.

In the afternoon a "focus" meeting was held where a few key farmers sat with officials from Case IH, Racine, Wis. headquarters. The officials brainstormed with the farmers on what the farmers would like to see different in the combines or what they would like to see in the future.



At Hoober's Customer Appreciation Day are, from left, Charles Hoober, president, Hoober Equipment; Harold Bower, Case IH area sales manager; Chuck Hoober, Hoober Equipment; and Jim Minnihan, Case IH product service manager for combines.

Jim Minnihan, product service manager for combines, conducted the focus session. Discussion included future trends such as planting corn in 22-inch rows with seeds further apart in the row so that the plants are scattered more evenly over the field. On farms in the Midwest, where this has been tried, production increased eight to 10 percent. But in the past, down corn at harvesting time had been a problem. But some thought that new varieties may have overcome this problem.

Minnihan likened the farmer's pickup truck to "your mobile farm office." He said farmers are not just farmers anymore. The are farm managers with phones and even computers in their farm truck. With large equipment, many farm operations have become a two- or three-man job. But the idea was presented that this is not all bad. With all the opportunity for a farm accident with the large machinery, it is good to have another person beside the operator in the back fields at harvest time so one person is not alone if an accident happens.

Later they had a customer service clinic for combines to help customers get top production from their machines.

Harold E. Bower, area sales manager, said the company looks for a good year for all farm equipment lines, especially the 2100 series combine, and they have a large number of the combines sold and back-ordered at the factory. This machine has been very well accepted.

"We see the farm economy as good at this time and hopefully it will continue through 1995," Bower said. "Last year was an exceptional year. Results just announced from the end of the year show sales up 14 percent for Case Corporation North America. We are looking for continued improvements. I don't know if it will be 14 percent. But we have shown profits over the last 12 quarters where each of these quarters have been better than the corresponding quarter in the previous year."

The Hoober's also have a location in Intercourse, Pa.

F.O. March Milk $14.38

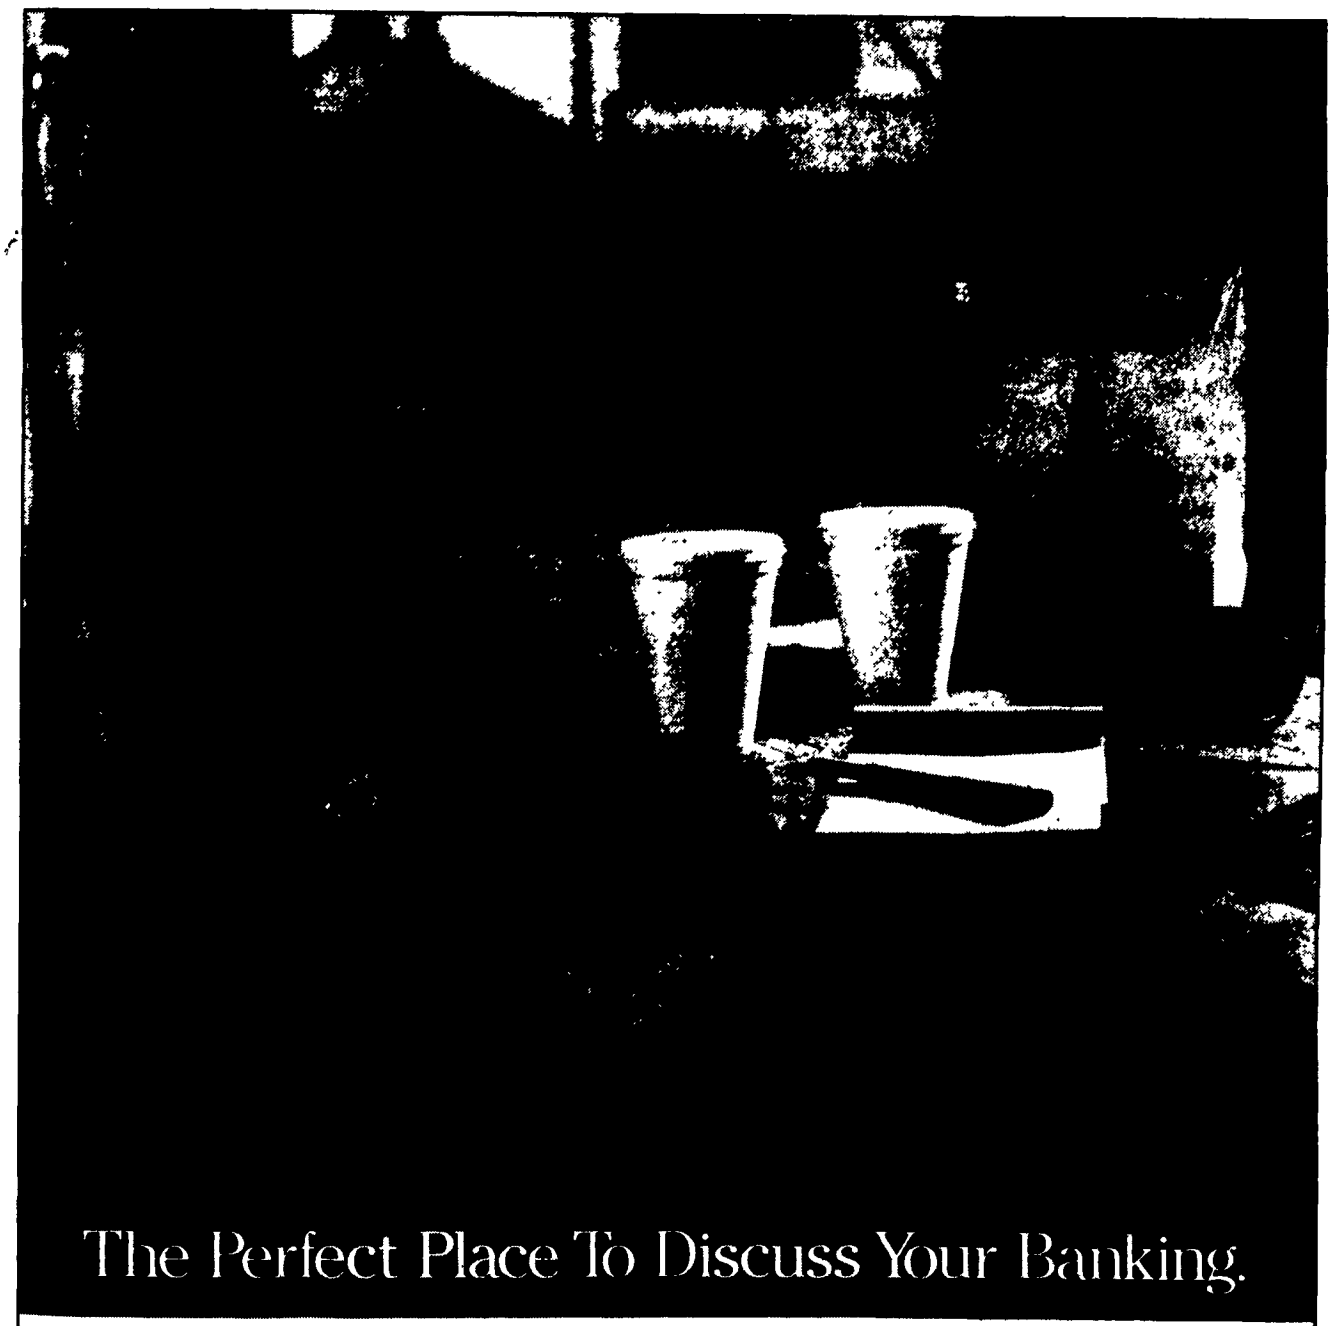
ALEXANDRIA, Va. — Middle Atlantic Order Market Administrator Rex F. Lothrop recently announced a Class I milk price of $14.38 per hundredweight for March 1995.

This price is down 3 cents from February and is $1.06 below last March's Class I price.

Lothrop also announced a Class III milk price of $11.40 per hundredweight for January 1995 and a Class III-A price of $10.11 per hundredweight for the month. The Class III price was down 6 cents from the previous month, while the Class III-A price decreased 14 cents.

The March 1995 Class I price and the January 1995 Class III price are based on the January 1995 Minnesota-Wisconsin manufacturing milk price of $11.35 per hundredweight at a 3.5 percent butterfat content.

The January 1995 butterfat price was 64.48 cents per pound, down 2.95 cents from December. The January skim milk price per hundredweight was $9.48.



When farmers like you have financial needs, you don't have to come to us, we'll come to you. After all, running a successful farm doesn't leave much time for running to the bank. It's this kind of personal attention that farmers in Lancaster County and surrounding areas have been getting from Bank of Lancaster County for over 125 years.

So if you need working capital, a way to finance machinery, land, livestock, buildings, or a loan tailored to specific needs, look to the bank that's committed to your industry and to our area. At Bank of Lancaster County, decisions are made locally. And for you that means fast turnaround and flexible terms.

Why not give Bob Badger or Stan Michonski of our Agricultural Loan Division a call at **(717) 397-7941**? We're looking forward to talking to you about banking on your terms...on your farm.

Bank of Lancaster County, N.A.
The Better Bank.

that are the most productive.

Pennsylvanians for the Responsible Use of Animals (PRUA) sponsors such programs as the Code of Ethics for animal handling, the "I Care" initiative for young animal handlers to raise their awareness of humane animal care and other educational projects to demonstrate that the management practices of livestock producers are no accident. Moreover, livestock producers practice proper animal care because inhumane practices are morally repugnant to them.

This is only one example of the erroneous statements that were made in the article.

As a defender of animal agriculture, PRUA has responded to Ms. Diantoniis' article by sending a letter to the editor of *Apprise* magazine. (*Apprise* is the publication for WITF-TV and radio, the public broadcasting network for central Pennsylvania.) While the damage has been done by her article, PRUA hopes to correct the situation so that *Apprise* readers are given the truth about our industry.

Many members of the animal rights movement have declared war on meat consumption. But this is only one aspect of their "agenda." They also target the elimination of animal use in biomedical research, entertainment, personal companionship and sport.

Members of PRUA, which consists of 17 Pennsylvania groups and associations, affiliated organizations and hundreds of individuals, have banded together to fight the misconceptions, myths and misinformation being spread by individuals like Ms. Diantoniis.

PRUA works to maintain our right to continue to utilize animals in our daily lives. We support the humane treatment of animals and strongly oppose those who seek to end man's use of animals through acts of terrorism, misinformation and intimidation. Furthermore, PRUA's programs provide information, education and support for endangered industries and animal users. PRUA encourages individuals who are concerned about their livelihood or who simply enjoy the companionship provided by a pet to become a member of our growing family. To learn more about PRUA or to become a member write to: PRUA, P.O. Box 61, Elizabethtown, PA 17022.

Ken Brandt
Executive Director PRUA

Editor,

There is a light at the end of the tunnel and the tunnel is getting shorter for dairy farms! In the past, the number of farms and the separation of numbers and ages of farmers kept federal orders pricing to suit the many handlers. Now the last report from Market Administration shows the trend of just who is going to be in charge. The number of farmers, their ability to group, their power in producing large quantities of quality milk — hey, come on, there is power in numbers! Intelligence, integrity, initiative, perseverance and common sense, are all good ways to describe the very few, few powerful dairy farms, that are left. Federal orders have the lowest number of dairies in history! Federal orders are started by farmers and can be ended by farmers, by majority vote.

So just like the good witch said you had the power to go home all the time you just didn't know you had it! There's no place like home. So don't depend on that big balloon to take you anywhere or do anything for you. You must do it for yourself. Stand strong behind your Constitution and Bill of Rights. Say, "I am an American Farmer, I deserve to vote as I choose and if I choose not to vote that's OK too! But untie my right to vote as an individual. That's against the law of the land, that's what we as American Farmers deserve."

Peter A. Seman
Thompson

Ag Seminar Provides

(Continued from Page A24)

that producers using the product need to look a each cow, keep them healthy and in good body condition, and actually they need about 5 percent extra feed (all feeds, not just top dressing grain).

No one saw any relationship to mastitis and BST, except that BST is not a cure for mastitis. Snavely said he doesn't use it with cows with a high somatic cell count; Drager said he just saw that infected cows he injected kept the infection.

Sammons said he actually saw some happy farmers this past year because of BST. He said smiling farmers is something he hasn't been seeing for the past four or five years.

As far as a glut of milk on the market causing lower prices, Sammons said that myth should be debunked. He said that national milk production increases attributed to BST are insignificant.

The real increase in milk production has come from the industry wide use of calf hutches, which has reduced calf mortality significantly, Sammons said, down to about 10 percent from 25 percent or more. More heifer calves surviving to replace or expand the milking herds have more to do with milk production increases than BST, he said.

"BST (represents) less than 1 percent of the (milk production) increase across the country. It doesn't work on every farm," he said. Further, he said 55 percent of those using BST are those with herds of fewer than 100 cows.

The bigger herds don't have the intimacy with their animals to keep on top of the individual cow health. In order to do what the smaller producer can do with BST, the large operations would lose the efficiency advantage of large scale and few employees.

In other presentations, Albert Murry, LVNB president and CEO of the bank, discussed what lenders expect from borrowers; Charlie Parrott, LVNB vice president and business development officer talked about methods for passing on a family farm; and H. Louis Moore, PSU proffesor gave his economic outlook.

A LESSON WELL LEARNED...
LANCASTER FARMING'S CLASSIFIED ADS GET RESULTS!

In a Recent University Trial, Impact Outyielded 43 Varieties Over A Three Year Period. Beating Such Varieties As Centurion, Agressor, DK 125, Alfagraze, Apollo Supreme, Multiking 1, DK 135 And Many Others!!!

Variety	3 Year Average Yield (Yield % of Check)
IMPACT	113%
CENTRURION	111%
AGRESSOR	111%
DK 125	111%
APOLLO SUPREME	110%
DK 135	109%
ALFAGRAZE	108%
MULTIKING 1	106%

When you find a new alfalfa that combines these high yields with these genetic defenses - you plant a winner

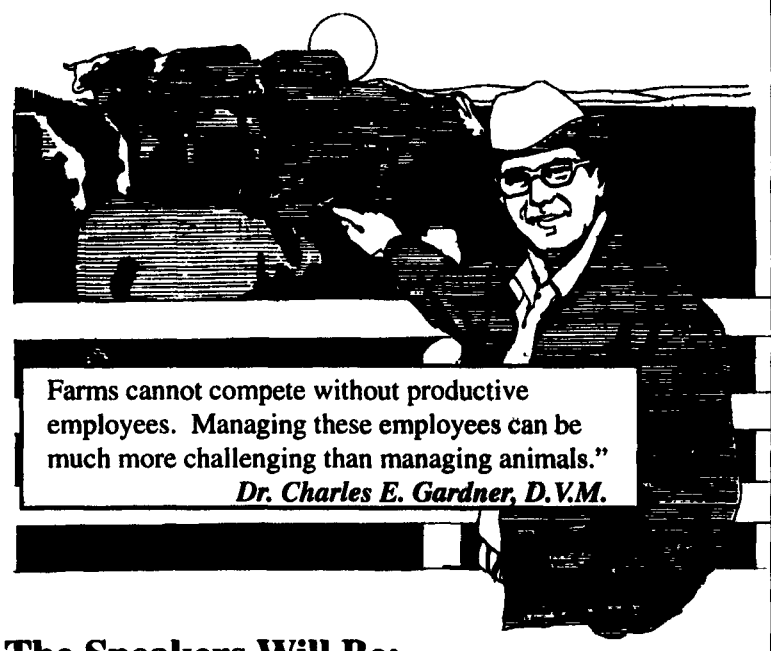
MARCH 15, 1995 • LANCASTER, PA



Farms cannot compete without productive employees. Managing these employees can be much more challenging than managing animals."
Dr. Charles E. Gardner, D.V.M.

The Speakers Will Be:

- ***Dr. Charles E. Gardner, D.V.M.*** - Mission Statement and Job Descriptions
- ***Mr. Dale VanErden, Dairy Farm Owner*** - Bring the employees into the team for greater success.
- ***Mr. Steve & Joe Graybeal, Dairy Farm Partners*** - Creative compensation of employees that works & motivates.

FINALLY A seminar that deals with the most important item on your farm: PEOPLE.

This One Day Seminar, On March 15th Will:

- Enable you to find and keep good employees
- Release the power of teamwork to help your farm succeed
- Teach you how to write job descriptions that you can use to hire and evaluate employees
- Empower you by helping create a mission statement that will guide all future decisions
- Open new creative ways to tie employee pay to performance
- Emphasize ways to keep employees long term

N.Y. Farm Show, State Fairgrounds, Syracuse, N.Y., thru Feb. 25.
Center County Cooperative Extension Association annual meeting, South Ridge Motor Inn, 7 p.m.
Corestates Hamilton Bank Agri-Education Seminar, Farm and Home Center, 8:30 a.m.
Bucks County Conservation and Pesticide Update meeting, Neshaminy Manor Center, Doylestown, 7:15 p.m.-9:30 p.m.

Friday, February 24

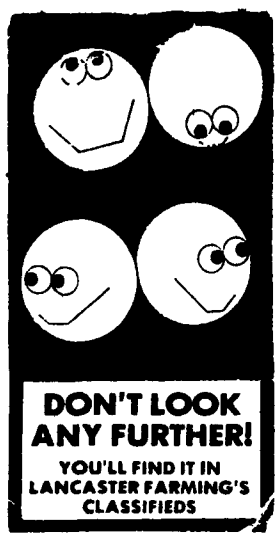
Intensive Grain Mangement School, Lebanon Valley Ag Center, 9 a.m.-3:30 p.m.
Weed Management School, York extension, Pleasant Acres, 9 a.m.-3:30 p.m.
Raleigh DHIA Record Workshop, Paul B. Stoltzfus Farm, Churchtown, 12:30 p.m.
Western Pa. Potato meeting, Bonanza Family Restaurant, Lyndora.

Saturday, February 25

Delmarva Pork Forum, University of Maryland Eastern Shore, Princess Anne, Md., 8 a.m.-4 p.m.
Northeast Regional Christmas Tree Growers Meeting and Trade Show, Mountain Laurel Resort and Conference Center, White Haven, 8 a.m.-3:30 p.m.

Sunday, February 26

International Dwarf Fruit Tree Association Annual Winter Meeting, Hershey.



LEBANON® EXTRA
Granulated Starter Fertilizer

"THERE'S MORE TO IT THAN JUST NPK"

For over 47 years, farmers throughout the Mid-Atlantic Area from New York to Virginia have produced millions of dollars of crops using Lebanon Extra fertilizer.

Lebanon Extra is an ammoniated, homogenous. granular NPK fertilizer. With the increased emphasis on using less and precise applications of plant food, Lebanon Extra provides the nutrient sources that you can depend on, and not just NPK but also secondary and six micro-nutrients. The nutrient integrity of Lebanon Extra is superior to bulk blend fertilizer products. When using row applications or banding accurate amounts of plant food it can be important to use a safe, quality, uniform grade product. If you are using a blend with MAP compare the value of Lebanon Extra.

LEBANON EXTRA PLANT FOOD
Ammoniated Granular Fertilizer
Homogenous
Secondary and Micros
Uniform Analysis
Low Chlorine for Sensitive Crops
Safer to use in row applications
Economical to use on all Crops
Get the Starter Effect by staying 2x2
Excellent for No-till Corn

LANCASTER SHAKLEE SHOWCASE
Sponsored by Lancaster Showcase Association
Tuesday, February 14, 1995
7:30-9:00 p.m.
The Days Inn 30 Keller Ave, Lancaster, PA

Guest Speaker: Aaron Zimmerman, Martinsburg, PA, an experienced farmer who is qualified to speak on the issues mentioned below, will be our guest speaker.

ISSUES TO BE DISCUSSED:
* How chemicals affect us and our environment
* Ways to use less chemicals to protect ourselves and our environment.
* Promote maximum water utilization be reducing runoff and loss by evaporation.
* How to assist drainage in areas where standing water might otherwise accumulate.
* How to permit more uniform water penetration, thereby reducing dry spots.

If you are not presently a Shaklee Member Ask for Anna Burkhart for a free qt. of Basic H. No charge for meeting

Stoltzfus Receives Shepherd, Zimmerman Children Take Home Novice Award At 4-H Banquet

ANDY ANDREWS
Lancaster Farming Staff

MOUNT JOY (Lancaster Co.) — Lancaster 4-H Shepherd of the Year Jason Stoltzfus called winning the grand champion market lamb award at the 1994 Denver Fair "the ultimate" moment in his 4-H showing career, after capping off the ultimate achievement as sheep club member.

Jason, 17, son of Frank and Irene Stoltzfus, Elizabethtown, not only was able to heft up the coveted Shepherd trophy, but also took home the $250 Woolies Club Scholarship, a gift from the Gerald Engle family, on Thursday evening at the Lancaster County 4-H Livestock Banquet.

At the banquet, about 200 4-H members, family, and supporters turned out to see youth honored for their achievements in the past year.

Jason, a senior at Elizabethtown High School, intends to use the scholarship to study radio-television-film with a business minor at Messiah College. A nine-year 4-H member, the past showing season, he said, was really good, and he intends to show another year at several county fairs and at Farm Show.

For the first time in memory, the Novice Shepherd Award, normally given to a burgeoning first or second year 4-H'er, was awarded to the entire family of Jeniffer, Jimmy, and Jay Zimmerman, of Akron. Their parents are Jay and Joanne Zimmerman.

The Red Rose 4-H Award, a tribute to Max Smith and sponsored by Salunga Acres, Mount Joy, was awarded to Danielle and Deidra Buchen. The Jason L. Weaver Memorial Leadership Award, presented by the Jason L. Weaver Family, was received by Casey High.

Chet Hughes, county livestock agent and 4-H adviser, said this year there were more than 50 trophy and award sponsors and nearly 40 lamb and steer buyers. In the county, there are more than 175 4-H'ers who are raising more than 700 head of livestock.

"The amount of community support is overwhelming," said Hughes. "Out livestock markets, banks, and local businesses have for many years supported our programs, not only financially, but with in-kind services as well."

The following members were honored:

BEEF AWARDS
County 4-H Beef Roundup

Grand Champ Steer: Casey High
Reserve Champion Steer: Brad Linton
Champion Showman: Dale Livengood
Reserve Champion Showman: Delvin Kropf
Grand Champion Heifer: Casey High
Reserve Champion Heifer: Jessica Schmidt

Pennsylvania Farm Show (1995)

Heavyweight Champion Steer: Casey High
Angus Class Winner: Travis Donough
Reserve Lightweight Champion Steer: Denise Bollinger
Best Beef Record Book: Jessica Schmidt
Red Rose 4-H Award - a tribute to Max Smith: Danielle & Deidra Buchen
Jason L. Weaver Memorial Leadership Award: Casey High

SHEEP AWARDS
County 4-H Sheep Roundup

Champion Market Lamb: Lisa Reiff
Reserve Champion Market Lamb: Brandon Ziegler
Supreme Champion Ewe: Jessica Stoltzfus
Champion Bred & Owned Ewe: April Leaman
Champion Novice Showman: Kathy Musser
Champion Showman: Lisa Reiff
Reserve Champion Showman: Regina Landis
Sr. Ladies Lead Line: Sarah Zurin
Jr. Ladies Leadline: Jessica Schmidt

Other Awards

Woolies Club President Award: Lisa Reiff
Woolies Club Record Book: John Schmidt
Best Woolies Club Record Book: Gerald Boyd
Novice Shepherd Award: 1st & 2nd Yr. Jeniffer, Jimmy, & Jay Zimmerman
1993 Shepherd of the Year: Lyndon Reiff
1994 Shepherd of the Year: Jason Stoltzfus
Woolies Club Scholarship: Jason Stoltzfus

Community Fair Champion
4-H Steers - 1994

Elizabethtown Fair	Peter Hoffines
Lampeter Fair	Dale Livengood
Manheim Farm Show	Travis Donough
Denver Fair	Casey High

JUDGING TEAM RECOGNITIONS

Junior Livestock Judging Team 2nd in Pennsylvania: Dean Livengood, Gerald Boyd (4th Pa.), Regina Landis, Travis Donough

Senior Livestock Judging Team - 2nd in Pennsylvania: Tracy Bollinger (6th Pa.), Dale Livengood, Jay Hess (5th Pa.), Lisa Reiff

Senior Meats Judging Team - 3rd in Pennsylvania: Amy Bollinger (9th Pa.), Peter Hoffines (7th Pa.), Keith Bollinger, Mark Tracy (8th Pa.)

Additional Judging Participants: Angie Erb, Derick Bollinger, Jason Stoltzfus, Allison Hughes, Kyle Ward, Jessica Schmidt, Jessica Stoltzfus, John Hess, John Schmidt, Dean Livengood, Grant Hossler, Sarah Zurin, Ryan Donough, Ryan Tracy

For the first time in memory, the Novice Shepherd Award, normally given to a burgeoning first or second year 4-H'er, was awarded to the entire family of, in front, from left, Jimmy, Jeniffer, and Jay Zimmerman of Akron. Back, from left, Deidra Buchen, Manheim, Red Rose 4-H Award winner; Jason Stoltzfus, Elizabethtown, 4-H Shepherd of the Year; and Casey High, Lititz, Jason L. Weaver Memorial Leadership Award.

Moving Your Farm Enterprise?

COLLEGEVILLE (Montgomery Co.) — Are you considering packing your bags, loading up the equipment and livestock, and heading to a different area in the next few years?

Moving a farm enterprise is a difficult, costly, and time-consuming process. The decision should not be taken lightly and considerable research should be done prior to the commitment.

Penn State Cooperative Extension is sponsoring a meeting entitled "Moving Your Farm Enterprise?" on March 14 at the Chester County Government Services Center east of West Chester. This meeting is designed to educate farmers of the issues pertaining to moving the farm enterprise. Note: Cooperative extension is not promoting that farmers leave southeast Pennsylvania.

Topics to be addressed include:

10 Welcome & Introduction - Tim Fritz, Extension Agent.

10:10 "To Move or Not to Move" - Farmer Panel.

10:40 Site & Location Characteristics - Tim Fritz & Alan Strock, Extension Agents.

11:25 "Dealing with Lawyers & Realtors" - Farmer Panel, Doug Good, Attorney, Duane Stevenson, Extension Agent.

12 Lunch

1 Tax Consequences & Like Kind Exchange - Alan Strock.

1:30 Long Range Budgeting - Alan Strock.

2 Closing Remarks

Interested participants should register by March 8 by sending a check for $20 per person or $35 per couple to Chester County Cooperative Extension, Gov't. Services Center, Suite 370, West Chester, PA 19382-4546. Make check payable to Chester County Coop. Ext. Also please be sure to include your address and phone number.

For more information, contact Tim Fritz at (610) 489-4315 or Alan Strock at (610) 696-3500.

MUNCY-CHEIF HYBRIDS, INC. LIQUIDATION SALE

Tioga County Dairy Day Educational

C.J. HOUGHTALING
Tioga Co. Correspondent

WHITNEYVILLE (Tioga Co.) — Although the crowd was small, those who attended Tioga County Dairy Day at the Tioga County Fairgrounds in Whitneyville found the sessions worthwhile. The topics GATT and NAFTA, dairy cattle worming and vaccination practices, freestall barn design and bedding, comparing New Zealand and Pennsylvania pasture management, crop insurance, DHIA computer formats and ARIS enlightened, as well as educated, the crowd.

Milton Hallberg, a professor of agriculture economics from Penn State University, discussed the purpose of the General Agreement on Tariffs and Trade (GATT) and the North American Free Trade Agreement, and how they affect farmers worldwide, as well as Pennsylvania farmers in particular.

According to Hallberg, factors affecting international trade include domestic price support policy, inflation rates, world demand conditions, and global operations of food manufacturers.

"We are now exporting more high-volume products and less bulk products like wheat and corn, and that's all due basically to the changing world demand conditions."

One of the primary questions asked conerning GATT and NAFTA is: Why should we in agriculture be interested in international trade?

Hallberg explained, "Since 1950, (the U.S.) has had a fairly steady uptrend in agriculture exports." He contends that is a value to farmers because as those exports have gone up, so too, have the gross farm income per farmer steadily risen. While the average farm today is certainly larger than it was 40 years ago, Hallberg stressed he believed it is not the only reason for the increase in gross farm income.

"The point is," said Hallberg, "that increasing agricultural trade had put us in a position for increased farm incomes.

"Twenty-three countries established GATT in 1947 to reduce tariffs and other trade barriers and to encourage global economic growth and development, which, at least in theory, in turn should lead to increased demand in agricultural products.

"GATT provided a code of conduct for international commerce and a framework for periodic multilateral negotiations," said Hallberg.

He considers trade a long-term issue, so it must be looked at over a long-term period. "No single trade agreement will result in overnight magic," he said.

While grain farmers are likely to experience a positive effect from GATT, with a projected increase of 8 to 12 percent for wheat, 11 to 15 percent for rice, 6 to 9 percent for corn, and 5 to 9 percent for soybeans (with gross farm receipts slightly higher in those areas), the dairy farmer's increase is only projected to increase a maximum of 2 percent (3 percent in gross farm receipts).

According to Hallberg, over the long term, this imbalance in increased prices may force some farmers to go out of business. Those farmers should be encouraged to look into industries that will be expanded due to freer trade. Ultimately, this expansion will lead the nation's producers to shift from the less efficient commodities to those that are more cost efficient to produce.

Continuing to address the complex topic of free trade, Hallberg said, "In 1988, the U.S. negotiated a free trade agreement with Canada. So in a sense, the Mexican-Canadian-U.S. agreement was a natural extension of the Canadian-U.S. free trade agreement.

"Another change of significance in agricultural trade, for the U.S., at least, is that we are now exporting a higher proportion of our commodities to Latin America."

In conclusion, Hallberg stressed that some of the expected gains from these agreements are: production efficiencies in the different countries will increase, we won't have to subsidize the production of commodities which we don't have a comparative advantage, and consumers will now have access to cheaper imports of certain commodities. "All of these things taken together mean that incomes should rise. As incomes rise, demand for products should increase, and that, in turn, will cause prices to increase."

Eric Kolver, a dairy farmer from New Zealand with a background in research, shared his insights on dairy farming practices in his native country compared to Pennsylvania.

New Zealand's climate is similar in range from San Francisco to Seattle. The average farm in New Zealand is family operated with 160 cows on 155 acres. While many farms have Holsteins and Jerseys within the same herd, the most popular cow in New Zealand is a cross-breed of a Holstein and Jersey.

Much of the milk produced in Kolver's country is converted into milk products that are exported, with milk prices varying from $3.30 to $5.50 per hundredweight, with a herd average of 7070 pounds of milk.

"(Another) cost affecting our dairy industry," said Kolver, "is that good dairy land goes for about 3 to 5 thousand dollars an acre.

Farmers in New Zealand incorporate a pasture system for feeding because grain is too costly. Having developed a business-like attitude to survive, according to Kolver, farmers in his country look to lower their on-farm costs. That means minimum use of expense like labor and machinery.

Utilizing pasture for ultimate efficiency, Kolver said farmers dry off their entire herd during the summer which is New Zealand's dry season. This method is compatible with the herd, because both pasture and herd are in their lowest production mode.

In other topics at Tioga County Dairy Day, important crop insurance facts were provided by Sherry Elder, Director of the Tioga County Farm Service Agency and Don Johnson of Wingate Insurance; herd health issues by County Agent J. Craig Williams and Dr. Larry Hutchinson, Extension Veterinarian from Penn State, and DHIA computer formats by DHIA area representative Diane McIlwain and DHIA tech support Dan Smith.

Dr. William George Assumes Del-Val Presidency

DOYLESTOWN — Dr. William L. George secured his place in the history books Wednesday, February 1, 1995, when he opened his term as the tenth President of Delaware Valley College.

At an assembly held in his honor, Faculty, Staff, Students, Administration and Trustees welcomed Dr. George back to the Doylestown area. George, a member of the Delaware Valley College class of 1960, has spent the past ten years as the Associate Dean and Director of Academic Programs in the College of Agriculture at the University of Illinois at Urbana-Champaign.

Prior to his return to Delaware Valley College, Dr. George spent two weeks serving as a consultant to the Government of Uganda, currently in the process of establishing an agricultural university, and with officials from Egerton University, Njoro, Kenya.

Dr. William L. George

Dr. George enters the Delaware Valley College Presidency at a time of great enthusiasm for the future. The College is preparing to honor its Centennial in 1996, with celebrations of the past and improvements for the future. Currently the College has 1,341 full-time day students, coming on the heels of the two largest enrollment classes in its history and an additional 1,020 continuing education students enrolled in Evening Division courses. The College's new residence hall opened January 20th, as plans for further campus improvement follow their prescribed course.

"I am ready to begin," Dr. George stated, as he met with members of the College Community on his first day in office. "I really am looking forward to getting involved with, and getting to know all of you."

Fruit Growers To Meet

MOUNT JOY (Lancaster Co.) — The Lancaster County Fruit Growers Association will hold its annual banquet here at the Country Table Restaurant on Thursday, March 9, at 6:30 p.m.

Cost is $13 per person. Guest speaker will be Jay Irwin, retired Lancaster County extension director, who will speak about "The Farmers Of Romania."

Reservations are necessary by March 1 to Beth Rohrer, (717) 898-2748 or Romaine Erb, (717) 569-5125.

Pennsylvania Tobacco Growers Association
Post Office Box 645, Federal Square Station, Harrisburg, PA 17108-0645

Tobacco Grower Meeting

THE 1995 ANNUAL MEETING OF THE PENNSYLVANIA TOBACCO GROWERS ASSOCIATION WILL BE HELD:

THURSDAY, FEBRUARY 16TH, 1995
PARADISE TOBACCO AUCTION BARN
BEGINNING AT 9:00 A.M.

GROWING TRANSPLANTS USING THE FLOAT SYSTEM

Growing Tobacco Transplants using the float system has become very popular in southern tobacco growing regions.

This year the educational program will be presented by Dr. W. David Smith, extension tobacco specialist at North Carolina State University. Dr. Smith has been active in tobacco research since 1978. He began looking at the greenhouse for transplant production in 1982, and has been working with the float system since 1984. He will be discussing the advantages of the float system and how best to manage the production of transplants. He will also be talking about the control of tobacco diseases and insects during the transplanting process.

> Coffee and Donuts
> Annual PTGA Business Meeting
> Tobacco Industry Representative
> Legislators and Guest Speakers
> Free Lunch
> Pesticide Credit Course (afternoon)

NOTICE: THIS IS CORRECT DATE FOR THE MEETING. DISREGARD DATES IN FEBRUARY NEWSLETTER.

All Pennsylvania Tobacco Growers Are Invited!

Regional Dairy Days Being Held

BIRD-IN-HAND (Lancaster Co.) — Pennfiled dairy days are being held throughout Pennsylvania and Maryland during January and February. Dairy farmer customers with quilifying production are being honored and many nutritional and herd health topics are being discussed.

At the Good 'N Plenty Restaurant, Thursday, Dr. Randy Shaver, dairy extension specialist from the University of Wisconsin at Madison presented ideas about how to feed high producing cows economically.

"The big difference in high producing cows and herds over others is the ability to have a high intake level of feed," Shaver said. "This is so, because it is the amount of protein and energy the cow takes in that drives production and body conditioning.

"In rumen digestion, the little bacteria produce acids that really stimulate milk sugar that stimulates milk fat production. Those bacteria produce the main and the most economical source of ameno acids. As we look to the future and high production, we look toward feeding the rumen bacteria. Maintaining a health rumen and maintaining good output of energy and protein from the rumen bugs is the cheepest source of nutrients for those high producing cows.

"I always like to look at starch, degradable soulable protein to try to optimize the output of the rumen bugs." Snyder said.

Snyder said that a cow that is milking 100 lbs. per day will spend four hours each day eating and 7 or 8 hours chewing her cud. Most of the cud chewing is done at night. Not only does cud chewing rewet the bolice that is regirtated it also produces a buffer that is important to rumen health.

Dr. Timothy Snyder, manager of dairy nutrition for Pennfield said that while dairy farming is not easy, the company tries to help make it a little easier. "Althoug I would point out that if you through in good forages, it makes it a lot easier for us to help you take away a lot of milk."

Snyder illustrated some of the feeding programs they produce for dairy farmers. These programs are changed according to production level. And he said the best grains to use depends on the types of forages and the number of times you are feeding your cows each day. If you slug feed two time per day, the ration would favor ear corn to bring along some of the cob to reduce the quickly fermenting material. If you are feeding many times per day, or with TMR, the more quickly formented starch in shelled corn may be more appropriate. The main thing is to match the grain source to the forages on the farm.

Pennfields newest production equipment to produce their tradenamed "Super Flake" is up and test running. According to Don Mahlandt, manager, dairy and livestock feed sales, the two big crimpers and the conditioning unit are installed. With the old steemrolled process, the grains of corn were process-flattened to dime or quarter size. With the new flakeing machines the grain will roll out completly flat to the size of a quarter. The further processing is done to get the most response from the dairy cows.

Speakers at Pennfield Dairy Days are Dr. Randy Shaver, left, and Dr. Timothy Snyder.

New Ag Secretary Nominee

(Continued from Page A1)

had announced his choices of people to fill 13 of the 18 department- and cabinet-level positions he is to select.

The governor's nominees must then be confirmed by the state Senate.

"Most (of the positions) have been filled," Taylor said. "The nominations have been sent to the Senate. The Senate has been holding hearings. Many (of the selections) have been approved by committees. I don't think any have been confirmed by full Senate," Taylor said.

According to Taylor, the next announcement of a selection for an administration department head should be the agriculture secretary, although Taylor said he could not know when that will be.

According to Taylor, the governor and the transition team want to make sure they have the best possible person to lead the department.

"I'm sure, in this particular post, as with the others, the governor is wanting to take his time to consider the various candidates and make his choice," Taylor said. "In the meantime, the day-to-day operation (of the agriculture department) is going on as ususal under an acting secretary."

Although not mentioned by Taylor, the new secretary will have to have, or quickly get, an understanding of the various duties, agencies, and programs that the department has had, lost, changed, or developed during the past administration.

Also, whomever is selected will have to be able to guide the department well in adopting new responsibilities which have been either added under new laws, or which are expected to come with the governor's proposed restructuring of the state Department of Environmental Resources.

Among those responsibilities is the administration of the state's Nutrient Management Act, which was made into law early last summer by former Gov. Robert Casey.

A timetable has been set by law for the law to take effect and for regulations to be made and approved.

While the State Conservation Commission (SCC) — an autonomous commission that oversees operation of the multi-agency, multi-government supported county conservation districts — has been charged with implementing the Nutrient Management Act, the department of agriculture has a major role in its development and administration, specifically with certification procedures.

Yesterday, after presstime, the Nutrient Management Advisory Board was to have met and was expected to have approved a number of regulatory aspects of the law, bringing the act closer to being completed according to the timetable, as set by law.

The board has been approving regulations without specific direction from the new administration as to how authority between the two departments most involved with carrying out the nutrient management act will be divided, if at all. Those agencies are the department of agriculture and the state DER.

Last month, after Gov. Ridge took his oath of office, the advisory board had contacted the transition team and the governor's office for a meeting to seek probable direction of the new administration, so that board member's work would not become idled, or made obsolete, after more than a year working out details of the law.

According to a report during an earlier advisory board meeting, the transition team had directed the board to continue its work, though with the knowledge that some minor changes may have to be made later in the law to reflect possible changes in governmental organization.

However, the Penn State University Cooperative Extension Service has been charged with creating and delivering educational programs. Much of the timing of public education is tied into when the regulations have been finalized.

If there are significant alterations to the regulations made after they have been finalized, it could mean significant costs in money and time to the Penn State Cooperative Extension Service to reconstruct an educational program.

England Named Head Of State Farm Council

(Continued from Page A1)

Omer Farms, Rockton, was supported for re-election to the State Conservation Board.

Walt Peechatka, acting state secretary of agriculture, said a number of pieces of legislation were passed in the waning days of the last general assembly which primarly come to the Department of Agriculture for implementation. These include consolidated statutes related to the commercial feed act; the establishment of organic food and maple syrup certification programs, and the restaurant inspection program taken from DER to PDA, effective July 1.

"This restaurant inspection program is particularly challenging to the department and to the ag community at large," Peechatka said. "The department will be the administrating agency and the enforcement agency for all food safety functions from preharvest on the farm through the grocery store and restaurant. This means the ag department and the ag community must accept this responsibility honestly and forthrightly if we are going to do the job properly."

Dean Alan Kelly, University of Pennsylvania Veterinary School, told the group of curriculum changes that are of interest to the farming industry. Students can now pick from five tracks: large animal, small animal, equine, mixed, and production ag.

"The reason we have initiated the tracks is because we want to emphasize the importance of production agriculture as a route for our students to train and go out to serve the agricultural industry," Kelly said. "We think this is a very important initiative for the school. And coupled with this program, we have a program of incentives to get students to go into large animal practice for production agriculture.

"Students increasingly come from urban and suburban environments and don't have enough knowledge or background in agriculture to go out into the industry. In addition, we have very high fees, and during the first and second summers, students go out and get high paying jobs mending roads or in the computer industry to pay for their tuition. What we want to do is use the $25,000 annual subsidy to get students to go to work on the farm and learn all the practical, everyday practices on the farm to give the students enough encouragement and confidence to ultimatly go into agriculture."

Kelly also said there is a six-year cooperative program in which a highly qualified student can attend both the University of Pennsylvania Veterinary School and Penn State College of Agricuyltural Sciences. This opportunity is to begin in 1996. In addition, the two institutions continue to have a cooperative dairy management course.

Dean Lamartine Hood, Penn State, talked about Penn State's involvement in the Dairy-MAP program to help farmers become better managers. Penn state researchers have surveyed 1,200 Pennsylvania dairy operation and conducted in-depth interviews with 200 farmers who displayed exceptional profitability. These researchers studied how existing management practices influenced profits and expenses. This information helped form the basis for Dairy-MAP.

Hood also noted the downlink locations for satelite transmissions to local extension offices in Pennsylvania. Thirty-two are installed, 17 are in prograss, and 12 are proposed for the middle of this year.

"Penn State Cooperative Extension is a publicly-funded, nonformal education system," Hood said. "This system links Pennsylvania's people, agriculture and related industries with the educational and research resources and activities of Penn State's College of Agricultural Sciences and its 67 county extension offices."

From formal surveys and discussions with client groups, a number of goals have been created for the 1996-1999 Plans of Work. These goals include:

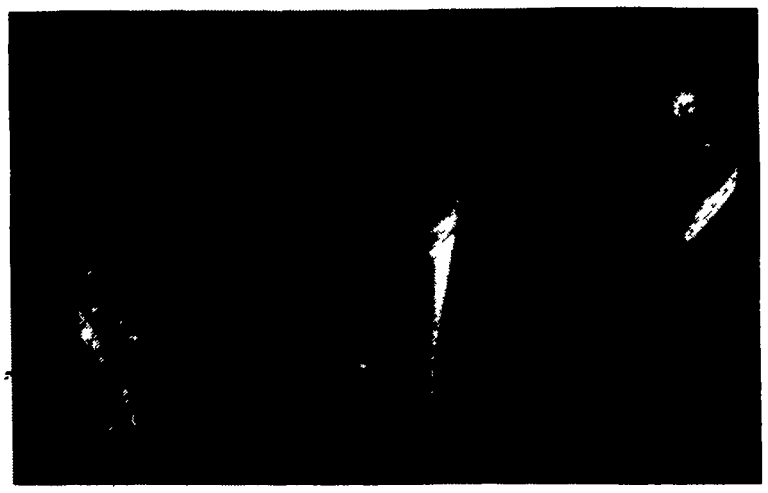
• Strengthen families; enhance the development of children and youth, and build caring, safe, and healthy communities.

• Foster the development and maintenance of productive, profitable and competitive businesses and a sustainable food system in Pennsylvania's changing economic climate.

• Ensure the long-term vitality and sustainablilty of Pennsylvania's natural resources and local environments.

• Enable people to reach informed public judgements on complex issues by fostering public dialogue.

"These goals are not mutually exclusive," Hood said. "Many Penn State Cooperative Exetnsion programs contribute to two or more of these goals."



Retiring president Robert Gabel receives appreciation gift from Laura England, new president, at the annual meeting of the Pennsylvania State Council of Farm Organizations. From left, Roxy LeVan, secretary/treasurer; England; Gabel, and Earl Fink, vice president.

The Pennsylvania State Council of Farm Organizations promotes the welfare of agriculture in Pennsylvania by bringing together organizations of state-wide activity or influence for the study, discussion and solution of mutual problems. In addition, the Council sponsors and supports constructive legislation to help Pennsylvania agriculture. More than 80 organizations belong to the Council.

Ephrata Area Farmers Receive Awards

CAROL STARK
Special To
Lancaster Farming

EPHRATA (Lancaster Co.) — Farming is everybody's business. And if you eat, then you should have an interest in agriculture.

Supporting Lancaster County agriculture is the Ephrata Young Farmers Association.

Receiving awards at the 26th annual Ephrata Young Farmers Association Banquet were the following recipients:

• Luke Ray Zimmerman and his wife Arlene received the award for the outstanding young farmer over 30. They make their home in Ephrata. They have four children who are all married. They also have 11 grandchildren. Luke and his farm together in a partnership. Their operation consists of 150 acres of corn, alfalfa, rye, and barley. They are planning to increase their herd to 120 cows. They also have a two-story chicken house with a capacity of 38,000 broilers.

• Steve Martin and his wife Betty were named Outstanding Poultry Producer for 1995. The Martins are the parents of four children. They reside in Ephrata. They have a broiler house with a capacity of 24,000 birds. They have a contract with Tyson and produce between 5 and 5.5 flocks per year. The Martins also raise 3.5 acres of strawberries with part of that being "pick your own." Steve drives school bus and is also a minister at Indiantown Mennonite Church.

• Fred Weaver was named Outstanding Beef Producer. Weaver and his father farm together in partnership. Their farming program consists of 100 acres of corn, tobacco, and soybeans. They feed 120 steers, have a herd of 18 beef cows, and have a chicken house that houses an 8,000-bird breeder flock. Weaver was graduated from Penn State in 1994 with a degree in dairy science.

• Mary Schantz, Ephrata, received the Active Member Award. Schantz has served the chapter as public relations director for the past year. She lives on a 78-acre farm, which is on the National Register of Historic Places as a family farm registered under the Hibshman Homestead. This past year her farm was used as a test site by Brubaker Agronomic for numerous projects involving herbicicdes, pesticides, tillage, and also yields. Schantz believes research allows farmers to make a profit in agriculture now and in the future and also allows them to be good stewards of the land and environment they live in.

• Walter Augsburger received the Community Service Award. Walter and his wife, Sara, live in Reinholds. They are the parents of four children and 12 grandchildren. Their farming operation consists of 400 acres of corn, wheat, and some hay. Walter was one of the first to build a large hog confinement building with 500 sows, farrow-to-finish. This building is being depopulated so that renovation and expansion can take place to increase the capacity. The Augsburgers also have 16,000 laying hens. Walter has been very active in community service work. For the past six years, he has been on the board of supervisors for West Cocalico Township. Augsburger serves as chairman of this board. He is in his fourth year of service on the Lancaster County Planning Commission Board and has recently been appointed to serve on the Lancaster County Assessment Appeals Board. Walter and Sara attend Blainsport Mennonite Church, where Walter also serves as Sunday School superintendent.

Officers for the 1995 year for the Ephrata Area Young Farmers were named. From left, Robert Fox, treasurer; Fred Weaver, vice president; Luke Zimmerman, secretary; Leonard Martin, president; and seated, Mary Schantz, public relations director. ***Photo by Carol Stark***

Clark Stauffer, left, received the highest award for corn yield at the 26th Annual Young Farmers Banquet last Saturday. Earl G. Martin placed second for his corn yield. ***Photo by Carol Stark***

Two local families were honored at the 26th Annual Young Farmers Banquet for their commitment not only to farming but to those around them. From left, Barbara and Tom Zartman and Brenda and Paul Zimmerman. ***Photo by Carol Stark***

• Top dairy herd in milk, fat, and protein went to Robert Fox. Fox lives in Lititz with his wife, Ruthie and their three children. Robert, with the help of his dad, farms 125 acres of corn, alfalfa, soybeans and some small grain. Fox's herd of 60 cows produced 23,373 pounds of milk per cow and 1,598 pounds of fat and protein per cow. To get this outstanding production, he feeds a TMR. Fox also received the award for the highest increase in milk, fat, and protein. Robert's herd had an increase of 2,093 pounds of milk for the year and increase of 151 pounds of fat and protein.

• Nevin Horning received a second place for milk, fat, and protein. Horning's herd of cows produced 22,591 pounds of milk and 1,534 of fat and protein for the year. The herd consists of 50 cows and replacement heifers. He also uses a TMR. Nevin and his wife Denise have three young daughters and reside in Lititz.

• Two local families received the Appreciation Award. They are Mr. and Mrs. Paul Zimmerman and Mr. and Mrs. Tom Zartman. Paul and his wife, Brenda and three children reside in Lititz. The Zimmermans have a heard of 100 cows and replacements and farm approximately 180 acres. The Zimmerman's exotic animal business has grown rapidly since purchasing one pot-bellied pig about six years ago. Paul specializes in emus, ostriches, and rheas, but he has numerous other exotic animals. His most recent purchase was 50 reindeer and a zebra. Paul and his family also do a lot of nativity scenes during the Christmas season. They also bring their animals to Tent City during the Ephrata Fair and set up a petting zoo for small children. The Zimmermans are active members of Hammer Creek Mennonite Church. Tom and Barb Zartman have been very active with the Young Farmers on both the local and state level. Tom has served as president of the Ephrata chapter and also president of the state association. Tom and Barb have also represented the chapter when they attend state and national conventions. They were also chairmen of the tour for the national convention held in Hershey a few years ago. The chapter appreciates very much their willingness to be chairmen of the refreshment stand at Tent City. They also allow the association to use their concession trailer. Tom also serves as emcee of the pig chase which is a major event at Tent City. The Zartmans' family operation consists of 500 acres of corn, alfalfa, and soybeans. They also have 130 cows, calves, and heifers. They recently built a 2,200-head hog finishing barn. He also serves as a Clay Township supervisor. Tom and Barb are the parents of a son and a daughter and reside in Ephrata.

• Clark Stauffer received the award for the highest corn yield. Earl G. Martin took second place.

Winning top awards at the Ephrata Young Farmers Banquet for the 1994 year were, from left, Steve Martin, Robert Fox, Nevin Horning, Mary Schantz, Fred Weaver, Walter Augsburger, and Luke Zimmerman. ***Photo by Carol Stark***

Know Your Soils, Crops, Varieties, Plant Enemies

VERNON ACHENBACH JR.
Lancaster Farming Staff

LANCASTER (Lancaster Co.) — About 120 people attended the annual Lancaster County crops day program Tuesday, held at the Lancaster Farm and Home Center.

The program featured four speakers, with Dr. Elwood Hatley, a Penn State University professor of agronomy, discussing four different topics; Dr. Steve Ford, on intensive management of pastures, and Dr. Jayson Harper giving presentations on alternative field crops and variations in setting the price for rental properties.

Also speaking was Kathy Baxter, director of the Lancaster County of the USDA Consolidated Farm Service Agency, who updated attendees on crop insurance requirements and options, and milk assessment refunds.

The program was organized by Bob Anderson, county extension agent, who served as program moderator. In addition, Anderson also talked about worker protection standard requirements for pesticide users.

In all of his presentations, Hatley seemed to stress that producers must become familiar with the plants they intend to raise to the extent of knowing how to catagorize them according to growth stages.

It is important that this is done because the use of herbicides, etc., can be useless, detrimental to the crop, or successful on eliminating competitive pests, depending on the stage of plant growth when the treatment was applied.

Hatley talked about the selection of small grain plant varieties, management of small grain crops, possible uses of raising soybeans to ensile for forage, and small grain silages.

Also shown during the program was a video tape from a Penn State University satellite crops conference held earlier that demonstrated aspects of weed control in forages and grain crops.

The meeting was also worth two credits for pesticide applicator certification.

According to Hatley, although he said he's never seen a Hessian fly in Pennsylvania, it's wise to observe the Hessian fly-free date for fall planting overwintering grains.

He explained that while Hessian fly is not a problem now, it could well become a problem if growers flaunt the observed dates and begin to provide good habitat areas for the pest.

Hatley discussed a myriad of different aspects of what to look for and what to do in managing different species.

For winter wheat, he said the stages 2 to 3 are desirable going into the winter dormancy. He said that the stage 3 winter wheat plant has from four to five tillers, while stage 2 growth is when tillers are visible. Stage 3 gives the best survival for the plant because even if a tiller or two do not survive until spring, there is still other potential grain-bearing shoots to the plant.

Stage 5 of winter wheat is when the main stem shows erect growth. Stage 6 is when elongation of the main stem is realy seen. During stage 6, the plant can be vunerable to gowth inhibitors.

The plant continues in leafing out afid growing until it reaches stage 8, when the last leaf emerges. He said that in order to determine when the plant has reached stage 8, the tip of the main stem can be peeled back to reveal the developing head which will soon burst out form the tip.

He said to be sure to examine the main stems of the plants, not the tillers, because the tillers are delayed by a few days in development compared to the main stem, but the heads will be forming in the tillers also.

After Stage 10, when the head has begun to form seeds (grain), it is too late to use fungicides or any other treatment effectively and efficiently.

According to Hatley, producers should concentrate on estimating yield before they plant a crop.

Hatley used a formula for estimating yield: **Yield = (heads/acre) (grains/head) (weight/grain)**

This formula will express yield as weight per acre. In order to calculate this, it is necessary to know the average number of kernels per head, and the average weight per kernel.

"If we got 3 million heads, we're going to need 28 to 30 kernels per head," he said.

He said that in cereal grains, once the yield has been determined, the estimate is not reduced for harvesting losses, but can be reduced due to environmental aspects, such as wide varieties in soils and soil fertility, and weather conditions.

According to Hatley, mid-April is the time of importance. "What we do from mid-April on is what is goig to determine (yield)," Hatley said.

But management of grains has to also be specie specific. For example, when the head of barley matures, during that time, 80 to 85 percent of the photosynthesis of the plant comes from the developing head, not the leaf and stem.

Flowering time for all plants is a critical time in determining yield. If the plants aren't protected and cared for properly during flowering, it doesn't matter how much work went on previously or afterward.

Proper seeding depth should be about 1.5 inches, and not as a median depth for a wide variety of depths, he said, adding that planters have to be set properly not only for rate, but for depth.

He said that at 1.5 inches, the plant has a better chance of keeping good soil to seed contact during periods of thawing and freezing.

The seeding rate for winter wheat should be from 1.2 to 1.5 million plants per acre for a goal of three million heads per acre, in order to achieve a good yield.

The 1.5 million plants only need an average of one main stem and one tiller in order to achieve that three million head population.

Other plants that don't grow tillers need to be seeded at higher densities.

Winter wheat and other overwintering grains need the cold period in order to form a head, he said. While a map of seeding dates has been set for the state, according to regional temperatures and climates, the later the crop is planted past optimum seeding time, the higher the seeding rate. He said the seeding rate can be substantially increased for late plantings.

During much of the discussion, Hatley referenced the new version of the Penn State Agronomic Guide, which is available from local cooperative extension offices for a nominal fee.

Christmas Tree Meeting Set

WILLIAMSPORT (Lycoming Co.) — The Ninth Annual Northeast Regional Christmas Tree Growers Meeting and Trade Show will be held Saturday, Feb. 25 at The Mountain Laurel Resort in White Haven from 8 a.m. to 3:30 p.m.

The topics to be discussed include introduction to soil fertility, 1995 worker protection regulations, Christmas tree diseases, spray adjuvants (spreader/stickers, etc.), and putting fertilizers to work for you.

Additionally, there will be a commercial trade show. All exhibitors deal in Christmas tree related equipment and supplies.

The purpose of this meeting is to educate new and established growers on the most up-to-date cultural and marketing practices available.

Attendance at this meeting qualifies liscensed pesticide applicators to receive credits toward recertification. Update training credits will be assigned by the Pennsylvania Department of Agriculture. Changes in the meeting agenda may result in adjustments in the assigned credits.

Meeting enrollment will be limited to the first 300 people who preregister. All registrations must be postmarked by Feb. 17. For additional information and registration form, please contact the county cooperative extension office at (717) 327-2350.

1995 Dairy Of Distinction Farms Sought

Kingston (Luzerne Co.) — Do you take pride in maintaining your dairy farm? Does your dairy farm project an attractive, wholesome image to consumers? If so, the Dairy Of Distinction Program of New York, New Jersey and Pennsylvania will consider your farm for the program's annual recognition awards.

The Northeast Dairy Farm Beautification Program was first started in 1983 to recognize the hard work and dedication of the farmers who maintain attractive farms. The purpose of the program is to instill a greater sense of confidence in the wholesomeness of dairy products, and increase their sales.

Farms that apply are judged on the roadside appearance of buildings, grounds, and surroundings, since this is what our dairy product consumers observe as they drive by. The cleanliness of the barnyard, feed areas and manure management are other aspects of the farm operation taken into consideration. Roadside judging is conducted during the month of May. Former winners of past years are also rejudged to ensure they continue to meet the standards of excellence.

To qualify for consideration, you must be actively dairy farming and shipping milk. Applications are available from your state secretary, Pennsylvania: Paul Nichols, American Dairy Association and Dairy Council, Inc., 239 Schuyler Avenue, Box 5 , Kingston, Pa. 18704, (717) 283-2204, New York: Carol Weddle, N.Y. Holstein Association, 957 Mitchell Street, Ithaca N.Y. 14851, (607) 273-7591, or New Jersey: August Knispel, R.D. 1, Box 325, Pittstown, New Jersey 08867, (201) 735-4989. All applications muse be completed and returned by April 15th, 1995.

The Dairy of Distinction program is financed in Pennsylvania by Dairy Farmers through the American Dairy Association Dairy Council and Pennsylvania Dairy Promotion Program, plus Agribusiness organizations. The Pennsylvania Dairy Of Distinction Program is conducted with advice and help by Penn State cooperative extension.

HOW IS YOUR FARM SCORED?

Northeast Dairy Farm Beautification Program, Inc.

Awards will be based upon neatness, good maintenance and other factors which can be controlled by the farmer. Attractive background scenery should not be weighed heavily in judging. All judging observations should be made from a vehicle at one or more points on an adjacent public highway (or if farm is off the road, the nearest lane). Judging should give equal consideration to old wood construction and new construction of metal or concrete block.

The award program may be used for subsequent advertising or promotion activities for dairy products or dairy farming. Farmers who apply for awards agree that; if selected they will cooperate with these activities and make all reasonable efforts to maintain both the exterior and interior of their properties in an acceptable condition.

HOW THE APPLICATION WORKS

The owner or operator of the dairy farm should sign the application and send it to NEDFBP secretary by April 15.

HOW THE JUDGING WORKS

Judging teams will visit farms during the month of May. Farms will be judged each year as the award is presented on an annual basis. Any dairy failing to maintain appearance standards will be asked to remove their sign. The Dairy of Distinction signs remain the property of the committee, not the property of the dairy farmer. All farms must achieve a compliance score of 90 percent on their Dairy of Distinction score card. *Your cooperative or milk handler will be contacted to approve your milk quality.*

RULES FOR THE DAIRY OF DISTINCTION AWARD

1). The Dairy of Distinction sign remains the property of the Northeast Dairy Farm Beautification Committee.
2). The post and bracket shall be supplied by and maintained by the dairy farmer. It is suggested that a wood post 4' x 4' x 12' or iron pipe 2' x 12' be used. Posts or pipe should be installed and maintained in true vertical position with 8' above ground. Top of the bracket should be lower than six inches from the top of the post.
3). Sign shall be displayed in front of the dairy at roadside. An attractive post and bracket, or other frame, shall be used to display the sign. No more than three signs should be displayed from the sign frame or post, and all shall be of a style, general size and quality comparable to the Dairy of Distinction sign. Sign should be secured on all sides to avoid wind damage.
4). Signs shall not be moved to other premises. New owners of a Dairy of Distinction farm must apply to retain the sign.
5). Replacement of damaged signs shall be the discretion of the committee.
6). No producer shall be charged with scoring or sign expense.
7). Judges' decisions will be final.
8). Judging will take place between May 1st and May 31st.
9). Farms awarded a Dairy of Distinction sign in previous years will be judged between April 1st and April 30th. If they do not qualify, they will be rejudged between May 1st and May 31st so they have the opportunity to keep the sign.
10). Farms that do not requalify will return the sign to their regional Dairy of Distinction Committee.

Application

PURPOSE OF PROGRAM

Attractive dairy farms give the consumer greater confidence in the wholesomeness of milk and stimulate milk sales which encourages public support for the dairy industry. The award gives recognition to the dairy farmer for maintaining a well-kept farmstead.

ELIGIBILITY

All Northeast dairy farms producing milk for sale are invited to make application for the award. Dairies receiving the 10 highest scores in each of the 91 districts will receive an 18" x 24" Dairy of Distinction sign to be displayed in front of their farm.

Visitors check out a wide-range of practical farming equipment at the Lebanon Fairgrounds during a three-day Cedar Crest Equipment open house.

Cedar Crest Equipment Holds Open House

NORTH CORNWALL (Lebanon Co.) — Hundreds of people attended a three-day open house of Cedar Crest Equipment held at the Lebanon Fairgrounds this week as part of a way of showing appreciation for patronage and to let people examine new and used equipment that may help them with their farming operations.

Feed mixers for totally mixed rations (TMR) by different manufacturers were on display, as well as ventilation fans, automatic or manual side-wall curtain systems, hay, straw and paper choppers, round bale choppers, grain and meal storage bins, elevator systems, small mills, and dairy stall bedding systems for cow comfort were on display in the large covention barn at the fairgrounds.

Along with a provided lunch meal, visitors also were able to attend a free silo unloader clinic and attend a last day equipment auction.

These dishes demonstrate the many different flavors of pork that depend upon various methods of cooking and seasoning. Participants who sampled the dishes gave enthusiastic support for the flavorful taste of each one.

Pork Cuts With Less Fat Than Skinless Chicken

LOU ANN GOOD
Lancaster Farming Staff

LEESPORT (Berks Co.) — The fragrance of pork and aromatic seasoning wafted throughout the offices of the Berks County extension office this week. Homemakers searching for new ideas for preparing nutritious and healthful meals attended the cooking session and learned that pork actually has less fat than skinless chicken thighs.

Home economist Fay Strickler with the help of Ann Marie Schick and Alice Torres demonstrated several different recipes all of which may be prepared in 20 minutes or less with the exception of the pork roast.

Participants tasted the prepared dishes and enthusiastically gave their seal of approval for the succulent and different flavors that pork offers.

Fresh pork has shaped up and slimmed down so much in recent years that it's on average 31 percent lower in fat, 14 percent lower in calories, and 10 percent lower in cholesterol than in 1983.

Livestock extension agent Clyde Myers said that leaner pork is the result of genetics and modern feeding practices.

Schick, a pork producer, said that contrary to popular opinion, a pig will not overeat. She demon-

(Turn to Page B3)

Homestead Notes

Anne Marie Schick, left, and Fay Strickler prepare the dishes while talking about the need to add variety to meals, which makes it easier to receive all 50 nutrients the body needs for good health.

Clyde Myers, Berks County livestock extension agent, talks about genetic and feeding programs that have changed pork in recent years.

Pork Cuts With Less Fat

Fay Strickler, extension home economist, prepares Sausages Baked In Batter.

(Continued from Page B2)

strated how to cut a boneless loin, stuff with filling, and roll back up. Schick often prepares pork in the microwave but warned against overcooking.

Lean pork should only be cooked to an internal temperature of 160 degrees. Years ago, when pork was fatty, it could be cooked for hours and remain tender because plenty of fat juices remained. But today's lean pork becomes dry if it is overcooked.

A three-ounce serving of roasted pork tenderloin has 4.1 grams of fat, 67 milligrams of cholesterol, and 139 calories compared to a roasted, skinless chicken breast, which has 3 grams of fat, 73 milligrams of cholesterol, and 140 calories. A skinless chicken thigh has 9.3 grams of fat, 81 milligrams of cholesterol, and 178 calories.

Here are the recipes prepared during the workshop.

PEACHY PORK PICANTE

1 pound boneless pork loin
1 tablespoon taco seasoning mix
2 tablespoons minced parsley
2 teaspoons vegetable oil
8-ounces salsa, chunky style
¼ cup peach preserve

Cut pork loin into one-inch cubes. Combine taco seasoning and parsley; coat pork cubes with seasoning mixture. Heat oil in heavy skillet over medium-high heat. Add pork, cook and stir to brown, about 3-5 minutes. Add salsa and preserves to pan, lower heat, cook and simmer until tender, about 15 minutes. Serves 4.

263 calories, 24 gram protein, 9 grams fat, 762 mg sodium, 70 mg cholesterol.

Serve over rice.

(Turn to Page B4)

Southwestern Stir-Fry uses pork tenderloin, the leanest cut of pork.

Go where you've never gone before.

The new 4WD Massey Ferguson® 240 at 41 hp and MF 253 at 48 hp give you the traction and clearance you need to get across the wet spots. Through the high weeds. And up the steep slopes.*

They can also reduce compaction And increase stability, especially when doing loader work.

Best of all, we've kept all the great features that have made the MF 240 and 253 two of our most popular tractors:

- High-torque Perkins engines that are unequaled for rugged reliability and efficiency
- Advanced Ferguson linkage and hydraulics to give you faster, more precise control of implements.
- Superb dealer and parts support to keep you on the job
- And high resale value to protect your investment

Better test drive one today before they're all sold out

Pork Cuts With Less Fat

(Continued from Page B3)

PORK TENDERLOIN WITH RASPBERRY SAUCE SUPREME

1 pound pork tenderloin, trimmed and cut into 8 crosswise pieces
Cayenne pepper, to taste
2 tablespoons margarine
2 kiwi fruit, peeled, thinly sliced
Raspberry sauce:
6 tablespoons red raspberry preserves
2 tablespoons red wine vinegar
1 tablespoon reduced-calorie ketchup
½ teaspoon horseradish
½ teaspoon soy sauce
1 clove garlic, minced
Fresh raspberries, optional

Press each pork tenderloin slice to 1-inch thickness. Lightly sprinkle both sides of each slice with cayenne pepper. Heat margarine in a large heavy skillet over medium-high heat. Add pork slices; cook 3 to 4 minutes on each side.

Meanwhile combine all sauce ingredients in a small saucepan; simmer over low heat about 3 minutes, stirring occassionally. Keep warm.

Place cooked slices on warm serving plate. Spoon sauce over; top each pork slice with a kiwi slice. Garnish serving plate with remaining kiwi slices and fresh raspberries, if desired. Makes 4 servings.

Calories 300, protein 25.3 gr, fat 10.1 gr, carbohydrate 26.2 g, cholesterol, 70 mg.

ROAST PIG PERNIL
(A Puerto Rico Favorite)

4 pound pork shoulder or boneless picnic
Mix together:
2 teaspoons oregano
1 teaspoon minced garlic
2 teaspoons adobo seasoning
1 tablespoon vinegar
½ teaspoon black pepper

Make deep cuts into the meat and pour seasoning over the pork shoulder. Cover meat with foil and bake at 350 degrees for 2½ hours or more or until meat is soft and tender. Uncover meat for about ½ hour to make skin crispy. Serve with vegetables or rice.

SOUTHWESTERN STIR-FRY

1 pound pork tenderloin, cut in quarters lengthwise and then cut ¼ -inch thick
2 tablespoons dry sherry
2 teaspoons cornstarch
1 teaspoon ground cumin
1 clove garlic, minced
½ teaspoon seasoned salt
1 tablespoon cooking oil
1 green pepper, seeded and cut into strips
1 medium onion, thinly sliced
12 cherry tomatoes, halved

Combine sherry, cornstarch, cumin, garlic, and salt in medium bowl; add pork slices and stir to coat. Heat oil over medium-high heat in heavy skillet. Add pork mixture and stir-fry about 3-4 minutes. Add remaining ingredients, cover pan and simmer for 3-4 minutes. Serve hot with green chili salsa. Serves 4.

SAUSAGES BAKED IN BATTER
(Toad-in-the-Hole)

1 pound pork sausage links
1 cup all-purpose flour
1 cup milk
2 eggs
½ teaspoon salt

Cook sausages as directed on package; reserve drippings. Heat oven to 400 degrees. Brush oblong baking dish, 11x7x1½ -inches, with sausage drippings. Place sausages in single layer in baking dish. Beat flour, milk, eggs, and salt with hand beater until smooth; pour over sausages. Bake uncovered until puffed and golden brown, about 30 minutes. Cut into squares. 4 to 6 servings.

Toad-in-the-hole is the whimsical name (like our pigs-in-a-blanket) the British give this sausage and pastry casserole. It is often prepared for children when parents are dining out, and is a dish children enjoy making themselves with a little guidance from Dad and Mom. More elaborate versions of toad-in-the-hole include steak and kidneys.

Pork Tenderloin With Raspberry Sauce Supreme was the top winner in a Pork Cook-Off Contest.

Agri-Women Applaud Selection

SHANNON, Il. — The recent selection of the Honorable Dan Glickman as Secretary of Agriculture-Designate, was heralded as a positive move by American Agri-Women. "We believe that Mr. Glickman, will provide sound judgment, based on his experience in the Congress, and his background as a rural legislator," stated American Agri-Women President Ardath DeWall.

In a statement from the USDA on January 6, Glickman commented, "My highest priority will be meeting Mr. Clinton's commitment to our farmers and ranchers, and everyone in rural America-the commitment to sustain a solid economy that provides opportunity for growth and prosperity."

"All of the organizations that encompass, American Agri-Women are strongly dedicated to the prominence of the U.S. agricultural economy, and toward the continued growth and prosperity of our nation's agricultural economy, and we look forward to working closely with Mr. Glickman," according to Ardath DeWall.

But I really needed to go to the supermarkets

My last visit had been two weeks earlier. And now the cardboard bottom was showing through the dwindling contents of the last box of The Farmer's favorite breakfast cereal. A basket I keep on the kitchen counter filled with assorted fresh fruit was down to one sad-looking banana, while the vegetable crisper was bare except for a small section of cabbage. Even my chalk supply for marking pens of baby calves until I get identification eartags made had run out.

See, I really did need to go to the supermarket. Yet I dreaded going on a Friday, one of the busiest grocery shopping days of the week. And, the weather forecasters were warning of the impending First Big Snow of the season.

Awareness of all that still didn't totally prepare me for the worst supermarket crush of shoppers I've ever seen in my entire life. After gathering a supply of fresh produce, I rounded the far end, rolled partway down the aisle and nearly plowed into the end of the first checkout line, a dozen-plus-carts long and stretching down through snacks and soft drinks.

Halfway through shopping, I had to backtrack through cereals and greeting cards because the backup of carts completely blocked the other end and stretched a good third of the way back through that one, too. Plans to buy ice cream were halted by the line winding the whole way from the last checkout counter down into the dairy section—and it would have been soup 'til I got through anyway.

Several times I was tempted to do as a few others did: abandon the whole thing and leave. But most shoppers were in a smiling, if resigned, good humor about the whole thing. We became instant sympathizers with one another, shaking our heads and comparing gripes about the insanity of it.

Fact is, most of us could have gone right home with nothing and still wouldn't have gone hungry. Only about half of the carts in line were filled with the usual week's worth of family supplies generally purchased by most Friday shoppers. It appeared to, at least in part, be a case of Supermarket Snow Scare. And nearly every cart contained milk, a fact I noted with glee. Not mine, though I did grab some bread.

Standing a full half-hour in the line to checkout gave me time to recall a couple of clippings cluttering my office desk. One railed on about milk prices and the "expensive" price of farm programs. Another one details the Census of Agriculture's figures which show a shrinking of farm numbers by an estimated 32,500 per year. And tacked to the bulletin board is yet another with the headline "Farmers Need Other Income To Survive." ("WHY?" I have scribbled across it.)

If farm programs were the get-rich-quick scheme detractors label them, why are so many farmers going out of business—or needing to rely on outside income to survive? In reality, farm programs contribute little to the overall income of the vast majority of American farm families, cost a fraction of one percent of the national budget and several times less than the food stamp portion of USDA spending. They are instead a food insurance safety net, which continues to give us consumers the most abundant, safest and relatively cheapest food supply anywhere.

I pondered while waiting in line that half hour how many fellow shoppers considered that in many countries, people wait in line like that every day for a simple loaf of bread, a cut of fatty meat, or maybe reconstituted, powdered milk for a hungry baby.

Just suppose some day we really needed to go to the supermarket— and it was empty.

Supermarket Snow Scares would be a picnic compared to what would happen then.

Sweet Potatoes' New Form

BY DORIS STANLEY
Everybody's Science

Sweet potatoes—even candied—have fewer calories than a spinach souffle and they're loaded with beta carotene and only a trace of fat. Now a new, high-value frozen food made from low-grade sweet potatoes rivals, can even exceed the quality of top-grade fresh sweet potatoes.

Developed by a U.S. Department of Agriculture chemist and North Carolina State University (NCSU) scientists, the new product takes only 15 minutes to prepare from freezer to plate.

Although an important food source since ancient times, sweet potatoes have declined in popularity because they've traditionally been considered a seasonal food. Also, most consumers prefer a baked sweet potato which takes an hour.

William M. Walter, a chemist with USDA's Agricultural Research Service in Raleigh, NC, hopes to revive interest in this nutritious vegetable. At the ARS Food Science Research Unit in Raleigh, he and NCSU scientists ground up low-grade sweet potatoes, added two types of cellulose texturizing agents and a little sugar and froze the mixture in sausage casings. When baked in a conventional oven at 400°F for 15 minutes, the food was rated equal to baked fresh sweet potatoes in taste, texture, color and overall acceptability by a 30-member taste panel.

One of the additives used could increase the health value of the sweet potatoes, Wal aid. Widely used in the food industry in texture modifiers, thickeners, binders, and stabilizers, MHPC (methylhydroxypropylcellulose) may lower blood cholesterol levels.

Walter and colleagues also increased by 100 percent the firmness of french fried sweet potatoes with an alkaline-neutralization treatment. This treatment and the frozen product work on all grades of sweet potatoes, which could open up new markets for growers. (Agricultural Research Service. U.S. Department of Agriculture)

Edible Valentines That Say 'I Love You'

Valentine's Day may not be a major holiday, but it is a day of major celebration. Sweethearts send flowers and chocolates, cards are selected, and romantic dinners for two are the order of the day.

Looking for the perfect gift for a loved one on Valentine's Day? How about preparing one of these recipes — a gift from the heart that says "I love you."

PEANUT BUTTER MELTAWAYS

1½ pounds chocolate melting chips
⅓ cup melted vegetable shortening
18 ounces peanut butter

Melt chocolate, stirring until smooth. Add melted shortening and peanut butter until just blended. Pour into bowl and chill until the consistency of soft custard. Occasionally scrape sides and bottom. Beat with a mixer 30 seconds. Do not overbeat. Pour on wax paper-lined 10x13-inch baking pan. Place waxed paper on top and level off. Let stand in cool place until firm but not hard. Cut into squares. Makes about 80 pieces. When dipping chocolate, work quickly as the mixture will soften.

Mrs. Stoltzfus
Honey Brook

RED VELVET CAKE WITH FROSTING

1 1/2 cups sugar
1/2 cup shortening
1 teaspoon vanilla
2 eggs
2 ounces red food coloring
2 tablespoon cocoa
2 1/4 cups cake flour
1 teaspoon salt
1 cup buttermilk
1 tablespoon vinegar
1 teaspoon baking soda

Cream sugar, shortening and vanilla. Add 1 egg at a time and beat. Make a paste of food coloring and cocoa. Add to sugar mixture. Sift flour and salt. Beginning and ending with flour, alternate adding flour and buttermilk to sugar mixture. Beat. Combine vinegar and soda and add to batter. (fold in) Pour into two 8-inch cake pans and bake at 350° for 15 to 20 minutes.

Butter Frosting
3 tablespoon flour
1 cup sugar
1 teaspoon vanilla
1 cup butter
1 cup milk

Combine milk and flour and cook over medium heat until thick. Cool. Cream sugar, butter and vanilla until creamy. Add cooled milk and flour mixture and blend.

Erin Williams
Lebanon Co. Lil' Miss

Make your sweetheart a romantic dessert of Shortbread Hearts, drizzle with chocolate, and serve with whipped cream and berries.

PEANUT BUTTER FUDGE

makes 1 9" square pan
4 cups sugar
1 cup milk
2 tablespoon butter
1 tablespoon vinegar
1 pound smooth peanut butter
2 1/2 tablespoons marshmallow whip
1 teaspoon vanilla

1. Mix together in a saucepan the sugar, milk, butter, and vinegar. Boil slowly to the soft ball stage.

2. Remove from heat and stir in peanut butter, marshmallow whip, and vanilla.

3. When mixture begins to set, cut into serving pieces. Then refrigerate. Remove pieces from pan only after the candy is cold and hardened.

Stephanie Buck
Lebanon Co. Dairy Maid

SINFUL BROWNIES

1 cup butter
⅔ cup cocoa
2 cups sugar
4 eggs
1½ cups flour

Frosting:
4 tablespoons butter
3 tablespoons vanilla
2 cups confectioners' sugar
2 to 3 tablespoons milk

Melt butter in saucepan; add cocoa. Stir and remove from heat. Stir in sugar, then eggs; Add flour, stir by hand until well blended. Pour into ungreased 9x13-inch pan. Bake at 350 degrees for 20 minutes. Frost while hot.

Frosting: Melt butter; blend in cocoa. Stir in vanilla and sugar. Add milk. Stir until consistency is spreadable.

Pa. Alternate Dairy Princess

CREAMY RICE PUDDING

Serves 10
1 quart milk
1/2 cup rice
2 tablespoons butter
1/4 cup sugar
1/4 teaspoon salt
2 eggs
1 teaspoon vanilla

1. Stir together milk, rice, butter, sugar, and salt. Pour into double boiler and cook slowly for 1-1 1/2 hours until rice is soft.

2. Beat the eggs. Remove 1 cup hot milk and rice from double boiler and gradually add to the beaten eggs. Then add the egg mixture to the rest of the pudding. Stir in the vanilla. Serve either warm or cold.

Lebanon Co. Dairy Maid

DIABETIC STRAWBERRY SAUCE

1 quart fresh or unsweetened frozen strawberries, thawed
3 envelopes aspartame sweetener
1 teaspoon orange juice
1 teaspoon fresh lemon juice

Combine all ingredients in a food processor or blender. Process or blend into a puree. Transfer to serving bowl. Cover and refrigerate.

Delicious served over waffles, diabetic rice pudding and yogurt.

Yields 4 servings, 52 calories per serving.

Featured Recipe

Apples originated in Asia and were first grown in Europe more than 5,000 years ago. They came to America with the Pilgrims in 1629, and made their debut in Pennsylvania in the 1680s at orchards planted by Swedish settlers along the Delaware River near Philadelphia.

Pennsylvania also served as home to folk legend Johnny Appleseed, who according to history, gathered apple seeds from the state's cider mills to plant orchards along the Ohio River and into Indiana.

Today, apples are grown in all 67 of the state's counties, yielding an annual crop of almost 13 million bushels, which ranks fifth nationally.

Apples are the perfect snack food: they're portable, great tasting, and good for you with only 80 calories each. They are also high in fiber and pectin, which are useful in reducing blood cholesterol and lowering the risk of certain types of cancer, as well as potassium, which may reduce the risk of stroke.

For more information and recipes on apples, write to Pennsylvania Apple Marketing Board, 2301 N.Cameron St., Harrisburg, PA 17110 (717) 783-5418.

BAKED CHICKEN BREAST WITH APPLE SLICES SAUTE

6 chicken breasts
3 tablespoons butter
Salt and pepper
2½ cups golden delicious apples
¼ cup sugar
1 teaspoon grated lemon rind
½ teaspoon cornstarch mixed with
1 tablespoon lemon juice
¼ cup water
1 teaspoon Worcestershire sauce
1 teaspoon prepared horseradish

Lay chicken breasts on baking sheet; dot with butter. Sprinkle with salt and pepper. Bake at 350 degrees for one hour or until tender. Combine apple slices, sugar, lemon rind, cornstarch mixed with lemon juice, water, Worcestershire sauce, and horseradish. Heat. Serve over chicken. Serves 6.

Edible Valentines

(Continued from Page B6)

SWEET 'N' SPICE CAKE

1 cup butter, softened
1 cup granulated sugar
2 eggs
2 cups all-purpose flour
1 teaspoon baking powder
½ teaspoon salt
½ teaspoon ground cinnamon
½ teaspoon ground cloves
¼ cup milk
½ cup cinnamon candies (red hots), if desired
2 tablespoons confectioners' sugar
1 tablespoon unsweetened cocoa powder

Preheat oven to 350 degrees. Cream butter and sugar in large mixer bowl until light and fluffy. Add eggs; blend well. Add half of flour, blend well. Add remaining flour, baking powder, salt, cinnamon, and cloves; mix until well blended. Gradually blend in milk. Stir in cinnamon candies. Spread batter into buttered 8-inch square baking pan. Bake 40 minutes or until wooden pick inserted in center comes out clean. Cool cake in pan on wire rack 10 minutes. Turn cake onto wire rack; invert so cake will be top side up. Cool completely. Place cooled cake on serving plate. Combine confectioners' sugar and cocoa powder, transfer to small sieve. Place heart-shaped doily on top of cake; liberally dust entire surface with cocoa mixture. Positioning hands on opposite sides of doily, carefully lift doily, leaving decorative heart image on cake's surface.

Shannon Semmel
Northampton/Lehigh Dairy Princess

RED VELVET CAKE

½ cup shortening
1½ cups sugar
2 eggs
2 cups flour
1 tablespoon cocoa
½ teaspoon salt
1 cup buttermilk
2 ounces red food coloring
1 teaspoon baking soda
1 tablespoon vinegar

Cream shortening, eggs, and sugar until light. Sift flour, cocoa, and salt 3 times. Add flour alternately with the buttermilk and red food coloring. Beat well, add baking soda and vinegar. Bake at 350 degrees for 50 minutes.

Rachel Tanis
Centre Co. Dairy Princess

CHERRY ANGEL DELIGHT

1 large prepared angel food cake
21-ounce can cherry pie mix
3-4-ounces instant pudding mix
1½ cups cold milk
1 cup sour cream

Cut or tear cake into ½ -inch pieces to measure 8 cups or half the cake. Place in 9x9-inch baking pan. Reserve ⅓ cup of pie filling. Spread remaining filling over cake cubes or pieces. Top with remaining cake pieces. Combine the pudding mix, milk, and sour cream. Beat well. Spoon over cake. Cover and chill. To serve, cut in squares and top with cherries. Yield: 10 to 12 servings.

SHORTBREAD HEARTS

1 cup butter, softened
½ cup confectioners' sugar
1 teaspoon vanilla extract
2 cups all-purpose flour
2 ounces white chocolate baking chips or white chocolate baking bar, broken into ½ -inch pieces
2 ounces semisweet chocolate morsels
Seedless raspberry preserves, if desired
Confectioners' sugar, if desired
Sweetened softly whipped cream, if desired
Raspberries, if desired

In large mixer bowl, cream butter until light and fluffy. Beat in ½ -cup sugar and the vanilla. Gradually add flour; mix well. Divide dough in half. Wrap each half in plastic wrap. Refrigerate at least one hour or overnight for easier handling. Preheat oven to 325 degrees. Roll out each half of cookie dough on lightly floured surface to ½ -inch thickness. Cut with floured, heart-shaped cutter; place on unbuttered cookie sheets. Bake 15 to 20 minutes or just until cookies begin to brown. Remove from oven; transfer to wire racks to cool completely. Meanwhile, to melt chocolate, place white chocolate and semisweet chocolate in separate, small resealable freezer bags. Close bags. Microwave one at a time approximately 2 to 3 minutes on medium heat, just until melted.

Knead bag until chocolate is smooth. Cut off very small corner of bag; use bag to pipe or drizzle white and semisweet chocolate over cookies. Spoon raspberry preserves into small resealable freezer bag. Cut off very small corner; pipe preserves onto cookies as desired. Sprinkle lightly with sugar. Serve with whipped cream and raspberries.

SWEETHEART POTATOES

Wilton Mini Heart Pan
Wilton 6-piece heart graduated cookie cutter set
1 pound baking potatoes, cut into ¼ -inch slices
½ cup butter, melted
½ teaspoon seasoned salt
¼ teaspoon garlic powder
¼ teaspoon paprika
¼ teaspoon thyme (optional)
Pepper to taste
¼ cup finely shredded medium sharp cheddar cheese

Preheat oven to 400 degrees. Spray mini heart pan with vegetable pan spray. Stir seasonings into melted butter. Using second smallest heart cutter, cut 6 little hearts out of potatoes. Place one in center of each cavity. Brush with seasoned butter. Divide remaining potatoes among the six cavities, make 3 layers in each one, brush between layers with seasoned butter and sprinkle with a small amount of cheese. Bake 30-35 minutes or until fork tender. Let potatoes set for 5 minutes before taking out of pan. Invert to remove. Makes 6 hearts.

PARTY PUNCH COOLER

1 quart whole or 2% milk
1 quart sherbet, any flavor
1 quart vanilla ice cream
3 cups pineapple juice
2 cups orange juice
3 teaspoons lemon juice

Soften ice cream and sherbet. Combine all ingredients in a large punch bowl, serve immediately. An ice ring of equal parts pineapple juice, orange juice and water may be used if desired. Flavor of sherbet determines punch color. Serves 20.

STRAWBERRY GLAZED OR CHERRY CHEESECAKE

CRUST:
2 cups graham cracker crumbs
1/4 cup sugar
1/2 cup (1 stick) butter, melted
FILLING:
2 packages (8 ounces each) cream cheese
2 cups cottage cheese, sieved
1 1/2 cups sugar
2 teaspoon salt
6 egg yolks
1/3 cup all-purpose flour
6 egg whites
Strawberry Glaze or Cherry Pie Filling (20 ounces can)

For crust, combine crumbs, sugar and butter until well blended. Press onto bottom and sides of 9-inch springform pan. Chill. For filling, beat cheeses until smooth; add sugar, vanilla and salt. Beat in egg yolks, one at a time. Gradually blend in flour. Beat egg whites until soft peaks form, fold in cheese mixture. Turn into prepared pan. Bake in preheated 350° F oven 1 1/4 hours; then turn off heat, open door and let cake cool in oven. (cake will sink slightly in center.) Chill before adding Strawberry Glaze or Cherry Pie Filling.

Erin Williams
Lebanon Co. Lil' Miss

STRAWBERRY DAIQUIRI

2 cups whole or 2% milk
2 cups frozen strawberries, slightly thawed
1 teaspoon fine granulated sugar
5 ice cubes

Combines ingredients in blender until frothy. Serves 3.

Cook's • Question • Corner

If you are looking for a recipe but can't find it, send your recipe request to Lou Ann Good, Cook's Question Corner, in care of Lancaster Farming, P.O. Box 609, Ephrata, PA 17522. There's no need to send a SASE. If we receive an answer to your question, we will publish it as soon as possible.

Answers to recipe requests should be sent to the same address.

QUESTION — R. Burkhart, Narvon, wants the corn fritter recipe that tastes like those served at Yoder's Restaurant in New Holland.

QUESTION — Lucy Lowe would like a recipe to make 5 to 10 pounds of a good-tasting pork sausage.

QUESTION — Dolly Getty, Oxford, would like recipes for muffin mix and quick bread mix in which the dry ingredients may be combined ahead of time and stored until ready to bake.

QUESTION — Livina Fisher, Mifflin, would like a recipe for stuffed chicken breasts.

QUESTION — Gladys Lillya, Salem, N.J., would like a recipe for breakfast casserole made with potatoes, eggs, and sausage.

QUESTION — Karen Martin, Berks Co., would like a recipe for Yorkshire pudding, which the author James Herriot writes about in his books on being a veterinarian.

QUESTION — Evelyn Godshall, Huntingdon Valley, would like a recipe for chewy chocolate chip cookies.

QUESTION — Cindy Guigley, Machado, would like a recipe for old-fashioned fastnachts.

QUESTION — Mrs. N.H. Good, Timberville, Va., would like recipes for potato soup.

QUESTION — Pam Zebley, Northeast, Md., would like a recipe for potato doughnuts like those sold at the Pennsylvania Farm Show.

QUESTION — Janet Rutz, Carlisle, would like recipes to use dried cranberry beans.

QUESTION — Carol Modesto, Smyrna, Del., would like the recipe for Dutch cake, a yeast-bread cake baked in a loaf pan. The bread-cake has raisins and dried baking fruits. Carole writes that her grandparents of German ancestry made it when she was a child, but no recipe exists in the family now.

QUESTION — Frank T. Cat of Millerstown, would like a recipe for English toffee cookies like those sold by Weis Markets. The cookies are great tasting and don't crumble for children.

QUESTION — Miriam Byler, Middlefield, Ohio, would like a recipe for a cheese strudel made from scratch.

QUESTION — N.Martin, Bowmansville, would like recipes using potato starch in fruit puddings. Do you use it as Clear Jel? Also, how do you use instant Clear Jel?

QUESTION — Joanne Swords, Manheim, would like a recipe for Cottleston pie, a British recipe.

QUESTION — Robin O'Brien, Reading, would like a recipe for a hard candy with nuts called Mooshie.

QUESTION — Karen Kinnane, Shartlesville, would like a recipe for a cold light as air lemon-flavored dessert served in tiny parfait glasses, which is called Lemon Melting Moments (not a pudding, but with the texture and weight of whipped cream, served in a fancy New York Restaurant in the 1970s).

QUESTION — Karen Kinnane, Shartlesville, would like a recipe for garlic ring bolonga; for clear cranberry jelly that can be molded in shapes; for a yeast bread shaped like a dragon, which is sold every year at an antique shop on Church Lane, N.J. Karen writes that she has never been able to even taste one because the baker only makes two and the "help" buy them before the sale opens. The dragon appears to have an egg wash which gives a shiny golden brown color and a raisin in the eye.

QUESTION — Mrs. Wayne L. Miller, Bruceton Miles, W. Va., wants recipes using cabbage and recipes using oranges.

QUESTION — Louise Graybeal, Renick, W.Va., would like a recipe for pancake syrup that is light in calories.

QUESTION — Anne Wiegle, Pottstown, would like a recipe for pickled herring. She wrote that years ago, her family made it by cleaning, splitting, and deheading the herring. The fish was salted and packed in barrels. The fish juice leaked out and formed the brine. She needs to know the ratio of salt to pounds of fish.

QUESTION — Ruth Best, Newburg, wants recipes for diabetic jams and jellies of several different fruit flavors.

QUESTION — Andy Andrews, Brownstown, would like a recipe for pumpkin-flavored candy apples.

QUESTION — Do any readers have a recipe for homemade ice cream made with potatoes?

QUESTION — Virgina Unger, Winchester, Va., would like a recipe for souse made from pig's feet.

QUESTION — Sarah Clark, Breezewood, would like a recipes for angel hair fudge and for white bark fudge.

QUESTION — Mrs. David Early, Annville, would like a recipe for crumb buns made with yeast.

QUESTION — Frank T. Cat of Millerstown, wanted a recipe for Oatmeal Raisin Cookies like those sold by Weis Markets. Thanks to a reader who sent in the following recipe.

Chewy Oatmeal Cookies

1 cup brown sugar
1 cup granulated sugar
1 cup shortening
2 eggs
1 teaspoon vanilla
4 cups rolled oats
1 cup flour
1 teaspoon baking soda
½ teaspoon salt
½ cup coconut
½ cup nuts
1 cup raisins, ground

Cream sugar, shortening; add eggs and the remaining ingredients in order listed. Drop by teaspoonful on ungreased cookie sheet. Bake at 350 degrees for 10 minutes.

ANSWER — Valerie Miller, Honesdale, wanted a recipe for chicken hot wings. Thanks to Pam Zebley, Northeast, Md., for sending two recipes.

Hot 'N' Honeyed Chicken Wings

3 pounds chicken wings
¾ cup Pace Picante Sauce
⅔ cup honey
⅓ cup soy sauce
¼ cup Dijon-style mustard
3 tablespoons vegetable oil
2 tablespoons grated fresh ginger
½ teaspoon grated orange peel
Additional Pace Picante Sauce

Cut off and discard wing tips; cut each wing in half at joint. Place in 13x9-inch baking dish.

Combine ¾ cup picante sauce, honey, soy sauce, mustard, oil, ginger, and orange peel in small bowl; mix well. Pour over chicken wings. Cover and refrigerate at least six hours or overnight.

Preheat oven to 400 degrees. Place chicken wings and sauce in single layer on foil-lined 15x10-inch jelly-roll pan. Bake 40 to 45 minutes or until brown. Serve warm with additional picante sauce.

Hot Barbecued Chicken Wings

12 chicken wings
½ cup flour
½ teaspoon chili powder
⅓ cup cooking oil
½ cup barbecue sauce
½ teaspoon hot pepper sauce

Remove wing tips and cut wings in half. Dust in a mixture of flour and chili powder and fry in hot oil 8-10 minutes on each side, until golden brown. Drain on paper towels. Heat together barbecue sauce and hot pepper sauce. Add the cooked chicken wings and simmer for a few minutes.

ANSWER — Anna Lehman, Hershey, would like a recipe for black walnut chipper cake. Thanks to D.Horst, N.Y., for sending a recipe.

Walnut Cake

½ cup butter
2 cups sugar
2 eggs
1 cup chopped black walnuts
1 cup cold water
1 teaspoon baking soda
1 teaspoon cream of tartar
3 cups flour

Beat shortenings, sugar, and eggs. Add remaining ingredients. Bake at 350 degrees for about 30 minutes.

(Turn to Page B9)

Edible Valentines

(Continued from Page B7)

OATMEAL COOKIES

1 cup all-purpose flour
1 teaspoon baking powder
½ teaspoon baking soda
½ teaspoon salt
¼ cup cinnamon applesauce
2 tablespoons margarine
½ cup granulated sugar
½ cup firmly packed light brown sugar
1 egg
1 teaspoon vanilla extract
1½ cup uncooked rolled oats
½ cup raisins, optional

Preheat oven to 375 degrees. Spray cookie sheet with nonstick cooking spray.

Combine flour, baking powder, baking soda, and salt. Set aside.

In large bowl, cream applesauce, margarine, sugar, eggs, and vanilla. Stir in flour mixture and oats. Fold in raisins.

Drop 2-inches apart with rounded teaspoon on prepared cookie sheet.

Bake 10 to 12 minutes or until lightly browned. Cool 5 minutes on cookie sheet, then remove to wire rack to cool completely.

1 cookie equals 60 calories, 1 gram fat, 60 mg sodium, 5 mg cholesterol.

B.J. Light
Lebanon

STRAWBERRY BON BONS

14-ounces sweetened condensed milk
4 3½-ounce cans flaked coconut
6-ounce package strawberry gelatin
1 cup ground blanched almonds
1 teaspoon almond extract
2 cups sifted confectioners' sugar
¼ cup heavy cream
Red food coloring
Green food coloring

In a large bowl, combine condensed milk, coconut, ⅓ cup Jell-O, almonds, extract, and enough red food coloring to tint to a strawberry shade. Chill until firm enough to handle.

Use approximately ½ tablespoon to make a strawberry or heart shape. Sprinkle remaining Jell-O in flat dish. Roll shaped berry to coat. Place on waxed paper-lined cookie sheet. Refrigerate. Mix confectioners' sugar, cream, green color. Use a pastry bag and pipe a hull on each berry with an open star tip. Keep refrigerated until serving. Makes 2½ pounds or 60 candies.

Rachel Tanis
Centre Co. Dairy Princess

CITRUS BERRY CREAM PUNCH

2 packages (10 oz.) each frozen strawberries in syrup, thawed
1 can (46 oz.) apricot nectar or pineapple juice, chilled
1 quart each vanilla and strawberry ice cream
1 bottle (2 liters) gingerale, chilled

In blender, puree strawberries. In large punch bowl, combine pureed berries and nectar. Just before serving. top with scoops of ice cream. Add gingerale. Garnish as desired. (Makes about 4 1/2 quarts)

— (Continued from Page B8)

ANSWER — S. Brace, Knoxville, wanted a recipe for homemade cracker recipes, any flavor. Thanks to Lena Hoover, Shippensburg,

Soup Crackers

7 cups flour
1 cup butter
½ teaspoon baking soda
½ teaspoon cream of tartar

Add water to mix. Roll very thin and cut cracker size. Sprinkle with salt and bake.

Graham Crackers

1 cup shortening
2 cups brown sugar
1 cup granulated sugar
2 cups all-purpose flour
4 cups graham flour
1 teaspoon baking soda
2 teaspoons baking powder
½ teaspoon salt
1 cup whole or sour milk
1 teaspoon vanilla
1 teaspoon cinnamon
½ teaspoon cloves

Mix together ingredients. Roll ¼ -inch thick and cut with cookie cutters. Bake at 350 degrees until dough is done. When all the crackers are finished baking, pile on two cookie sheets and crisp at oven's lowest temperature for 10 hours or overnight. Do not burn them while crisping.

Market Crackers

3 cups sugar
1½ cups shortening
9 cups flour
10 tablespoons water
2 eggs
1 teaspoon baking soda
1 teaspoon cream of tartar
1 teaspoon salt
2 teaspoons vanilla flavoring

Mix as a cookie dough. Roll thin and cut into squares. Bake. Spread frostening between two crackers and serve.

ANSWER — A reader from Bridgewater, Va., wanted a recipe for Boston clam chowder like that served at Hoss's Steak and Seafood House. Thanks to Linda Musser, Mount Joy, for sending a recipe, which her family really enjoys and is easy to make. Although this recipe is for the microwave, you may adapt it to making it on the stove top, but make sure, you stir often and don't scorch the milk.

New England Clam Chowder

3 slices bacon, chopped
1½ cups potato cubes
2 cans minced clams, drained, reserve ⅓ cup liquid
½ cup chopped onion
3 tablespoons flour
2½ cups milk
1 teaspoon salt
¼ teaspoon pepper

Place bacon in 2-quart casserole. Microwave on high until bacon is crisp. Add reserved clam juice, potatoes, and onion. Cover. Microwave on high until potatoes are tender, 8 to 10 minutes, stirring after half the cooking time. Blend in flour. Stir in milk, salt, and pepper. Microwave at high until thickened, 5 to 7 minutes, stirring after half the cooking time. Stir in clams. Microwave at medium-high until thickened and heated through, 4 to 5 minutes.

ANSWER — Valerie Miller, Honesdale, wanted a recipe for sourdough bread that does not take yeast, baking powder or baking soda.

ANSWER — Nancy Koons, Lebanon, wanted some recipes for crockpot meals. Thanks to Pam Zebley, Northeast, Md., for sending the following recipes. Also, look for the upcoming crockpot recipes in the "Home On The Range" page.

Magic Meat Loaf

2 pounds ground beef
2 eggs
⅔ cup quick cooking oats
1 package dry onion soup mix
½ cup catsup

Reserve 2 tablespoons catsup. Combine ground beef, eggs, oats, soup mix, and remaining catsup. Shape into a loaf. Place in crockpot. Top with remaining catsup. Cover and cook on low for 8 to 10 hours or high for 4 to 6 hours.

Barbecue Meats

Place uncooked, seasoned, and cut-up chicken, ham, pork chops, or rabbit in crockpot. Pour a little barbecue sauce on each piece. Add no water. Cover and cook on low for 8 to 10 hours or on high for 4 to 6 hours.

For added flavor, put cooked meat in broiler pan; pour remaining sauce and drippings over top. Place under broiler for 5 to 10 minutes.

Improve Your Health

SCRANTON (Lackawanna Co.) — Do you need to: Lower your serum cholesterol? Lower your blood pressure? Lose weight? Then.... "My New Weigh Of Life" is for you!

Mid-Valley Hospital and Penn State Cooperative Extension are sponsoring an exciting nutrition class focused on a workable weight-loss and maintenance program.

In My New Weigh of Life, participants will learn:

- to make permanent life style changes
- to be a low-fat eater in a high-fat world
- basic nutrition information
- how to make choices to control their weight

My New Weigh of Life is a 2 1/2 hour-a-week, 10-week course taught by Florence Norelli, nutritionist, and Carol Jones, registered dietitian at Mid-Valley Hospital. The classes will be held on Thursday evenings from 6:00 p.m.- 8:30 p.m. beginning on February 23.

For more information or to register, contact the Penn State Cooperative Extension office of Lackawanna County at (717) 963-6842 by February 15. Enrollment is limited so participation will be based on a first-call, first-serve basis.

Taming Tempers

Temper tantrums — those often embarrassing, yet quite normal, outbursts of frustration that toddlers and preschoolers seem to display at the most inopportune times! What can parents do to limit frustration and stay sane?

Jane Brooks, parenting author, writes about toddlers, "We are pleased by their achievements, intrigued by their verbal observations, and sometimes outraged by their stubbornness."

One of a toddler's main goals is to develop autonomy or independence. These youngsters want to show some control over their lives. They do this by asserting their wills — saying "No," turning from food or resisting dressing. Parents also hear toddlers declaring, "Me do it." or "Come now!" This assertiveness turns to frustration when the child can't accomplish what she set out to do.

Researcher Florence Goodenough has studied tantrums. She says they usually peak in frequency during the child's second year and that they are most likely to occur when the child is hungry, tired, or ill. With younger children these flare-ups tend to last less than five minutes. They may last longer with older children who sometimes sulk or keep hard feelings. In order to prevent some frustration, a parent should consider a child's situation when determining the day's schedule. If a child has an ear infection and is tired, she is primed for an outburst. In that case, it is wise to put off any shopping trips or restaurant stops that aren't absolutely necessary. Parents can also take other steps to cope with and reduce temper tantrums.

Techniques that Goodenough, Haim Ginott, and other parenting experts recommend include:

√ Diverting the child's attention.

√ Redirecting the child's behavior verbally with a statement like, "Scribble on this paper, not on the wall." or "People are not for hitting. Pillows are for hitting."

√ Ignoring the outburst.

√ Listening carefully to the child, restating the child's feelings in a way that shows care, reasoning with the older child.

√ Living by a regular schedule for bedtime, meals, etc., and providing a ten minute warning of an activity change.

√ Removing the child from the frustrating situation.

Goodenough identified these actions as ones used by parents whose children displayed few tantrums. In contrast, parents whose children seemed to have recurring tantrums resorted to less effective methods of taming tempers like granting the toddler's desire, removing the source of trouble, coaxing, and threatening. These parents tended to ignore the child and her needs until the outburst occurred.

To make managing tempers even more complicated, some researchers have categorized tantrums. Children can use tantrums to manipulate parents into giving them what they want. They also have tantrums when they suddenly feel out of control. These two types of tantrums require different approaches. The first is often handled by ignoring. The second demands quiet listening, caring and stating of feelings. It can be exhausting for the parent to deal with.

When a child has a temper tantrum in public, the parent may also feel uncomfortable, suspecting that onlookers are critiquing her parenting skills and assessing her as cruel or incompetent, unloving or unfair. The reality is that most on-looking parents will be sympathetic remembering a time or two when they themselves experienced a similar exasperating event.

Finding successful ways to tame a child's temper takes time — time to know each child and his needs, time every day to review rules and provide advance notices in order to avoid confrontations, and time to listen and understand this tiny person's frustration and anger.

I know occasionally "big people" need that same time, advance notice, and respect. As much as we'd like to deny it, even adults can slip into tantrums — sometimes when we're hungry, tired or sick just like our two-year olds.

Reasons To Grow Herbs

FLEMINGTION, N.J. — Discover the special pleasures of growing herbs—include them in this year's garden plans. A few plants tucked among the flowers and vegetables is a good way to start.

Herbs are annual, biennial, and perennial species, vast in number, that have been deemed valuable for certain uses—scent, flavor, medicine, and dyes being most important. Herbs have been collected or grown for centuries and their history is intriguing.

For example, dill, which today is used almost exclusively as a culinary herb, was used to crown heros and adorn banquet halls in ancient Greek and Roman times. In the past it has variously been used to induce sleep, to combat witches, to thwart the "evil eye" and for various medicinal purposes. Try the 1992 AAS winner 'Fernleaf' dill, a compact variety.

Parsley, too, has a more varied history than its present, mainly culinary use suggests. Parsley was used in funeral ceremonies, to honor athletes and to invigorate race horses by the ancient Greeks. It was important in medieval medicine, even as a treatment for plague. 'Triple Moss' and 'Forest Green' are curly varieties recommended for New Jersey gardens. 'Dark Green Italian' is a good choice for cooking.

Mint has an extensive history of use though it is now most important for flavoring and garnish, especially in Mediterranean and Middle Eastern cuisines. Through the ages mint has been used for tax payments, in religious rituals, as an antidote to sea serpent sting, for bathing, as a body rub, to "purify" drinking water, for strewing, to repel insects and to treat medical problems including mad dog bites and hiccups. Mints are available in an endless variety of 'flavors' and foliage types. Try a curly-leaf mint (M. crispa) for strong flavor and unusual appearance. Corsican mint, a very small creeping plant, though not reliably hardy, is an interesting addition to the herb garden.

Today, herbs are grown mainly for flavor, scent and ornament (and, perhaps, history!) adding an extra dimension to the garden. In general, herbs need full sun, well-drained soil, and a pH ground 6.5, the same as for most vegetables and flowers. There are a few that like partial shade. Most prefer a light hand with fertilizer and tend to be relatively pest free. Many of the most popular culinary and fragrance herbs are readily available as seeds or plants. Select those that you (or someone you know) use, read about them and try growing them yourself.

Even if you don't use herbs, many are very nice ornamentals so don't overlook them. Some of the thymes make good edging or ground cover plantings. Lavenders, sages, and many others have silvery foliage, an important component in flower garden design. Some have attractive though, generally, not showy. blooms. The scents of herbs can be enjoyed every time you work around them.

An avid herb grower once told me her greatest pleasure was weeding her garden! There are lots of good reasons to grow herbs—try it this year.

Coronation, Vintage Fashions Highlight Auxiliary Program At Fruit And Vegetable Conference

LOU ANN GOOD
Lancaster Farming Staff

HERSHEY (Dauphin Co.) — The Women's Auxilary offers an alternative to the educational sessions at the Pennsylvania Fruit and Vegetable Growers Conference held last week at the Hershey Lodge and Convention Center.

"We provide a relaxing time for women accustomed to hectic schedules," said Tempalyn Lohr, president of the Maryland Auxilary, which works in conjuction with the Tri-State Auxilary in planning the program.

"It's mostly a social organization but it's also a place to exchange ideas on marketing."

The Auxilary also pays the expenses of the apple queen and selects the queen.

In addition to the Maryland Apple Queen Coronation and a business session, this year's agenda included touring Chocolate World, shopping, a vintage fashion show, and a luncheon.

Jody Tucker of Damascus, Md., was crowned the Maryland Apple Queen during the Thursday luncheon.

Jody is the 18-year-old daughter of Joan and Bill Tucker. Jody's tie to the apple industry is working at the farm market of Butler's Orchard in Germantown.

An honor student at high school, Jody is a varsity and junior varsity cheerleader, and is an All-Star squad member of the University Cheerleading Association. She participates in marching and symphonic bands, student government, and the school newspaper staff.

Jody has studied classic ballet for nine years and student teaches dance to seven through 10-year-olds.

Jody plans to study biology and dance at James Madison University or Radford University. She is selected as one of 20 finalists for a full four-year scholarship at Radford.

In addition to the coronation, a vintage fashion show was held with members of the auxilary modeling dresses from the 1800s to the present. The collection is owned by Mira Graves, who said her mother collected three generations of clothing.

The Tri-State Auxilary includes members from New Jersey, Maryland and Pennsylvania. Maryland also maintains a separate auxilary, but work together in planning the Pennsylvania program, according to Tempalyn Lohr, who is president. Lohr is serving her second two-year term as president while completing graduate studies and working at Lohr's Orchard owned by her parents.

Additional officers selected during the business meeting include treasurer Helen Black whose daughter Pat Black is a committee member. The Blacks owned Catoctin Mountain Orchard in Thurmont, Md.

Vice-president Marg Jacques is from Smithsburg where she helps with the family's Edgemont Orchard, which has been in her husband's family for four generations.

Michele Konno is secretary for the Tri-State Auxilary. Marcella Tanrer is treasurer. Other committee members are Doris Trax of Trax Farms in Liverpool, Pa., and Darlene Hurff from N.J.

Sponsor Susie Butler stands between Maryland Apple Queen Jody Tucker and her mother Joan Tucker. For two years, Jody has worked in the farm market at Butler's Orchard.

Planning committee members, from left, Helen Black of Maryland, Marge Jacques of Maryland, and Doris Trax of Pennsylvania.

During the Auxiliary's Vintage Fashion Show, Tempalyn Lohr, president of the Maryland Auxiliary program, models a fashionable gown with detachable lace collar and cuffs.

Maryland Apple Queen Jody Tucker is crowned during the auxiliary program at the Fruit and Vegetable Growers Conference. Tempalyn Lohr, president of the Maryland Auxilary, makes the presentation.

"Hat Lady Mira Graves" started her vintage fashion show after her mother left her three generations of "pack ratting."

Dinner On A Disk

What's for dinner? New meal-planning software from The Potato Board solves this age-old question using exciting, interactive technology.

Called Ready, Set, Dinner, this cutting-edge software program is available free of charge (plus $2.99 for shipping and handling). It's so simple to use, even a computer novice can handle it without a manual. The disk includes a collection of 40 savory dinner recipes, a weekly menu-planning tool, and the ability to print out your grocery list.

To order the software, send a check or money order for $2.99 (payable to Specialized Marketing Services, Inc.) for shipping and handling, along with your name, address and preference for *Macintosh* or *Windows* (4 or 8 MB RAM for Windows version must he specified) to:

READY, SET, DINNER
P.O. Box 1416
La Mirada, CA 90637-1416

Please allow 4 to 6 weeks for delivery.

Minimum System Requirements for Mascintosh: Macintosh LC, System 7.0 or later, 4 MB RAM, 4 MB hard disk storage, 13-inch monitor (Preferred. 256 color, 8-bit).

Minimum System Requirements for PC: PC 386, Windows 3.1 or later, 4 or 8 MB RAM (please specify RAM preference), 4 MB hard disk storage, 13-inch monitor, (Preferred: Super VGA monitor and sound card).

Consuming Thoughts

by

Fay Strickler

Penn State Extension Home Economist For Berks Co.

Are you one of those people who always feels cold, even when others are comfortable? While you're searching for an extra sweater, consider this: you may not be getting enough iron in your diet. A study done by the U.S. Department of Agriculture shows that regulating and maintaining body temperature in the cold may depend on the amount of iron that is consumed daily. An inadequate amount of iron may leave you in the cold, literally.

Iron deficiencies have long been associated with feeling tired. But the study showed that women with inadequate iron in their diets may start feeling cold long before they feel the fatigue associated with iron deficiency or anemia.

In the study, six healthy, young women consumed less than one-third the recommended dietary allowance of iron for a period of time, then replenished their iron stores with daily supplements. When exposed to a cool temperature, the women lost 29 percent more body heat and produced 9 percent less heat after the low-iron period than after the supplemental period.

Women of childbearing age, pregnant women, and growing children are liable to suffer from iron deficiency and its consequences. It's estimated that more than half of American women aged 11 to 50 consume less than the recommended daily iron intake of 18 milligrams.

However, before you begin taking iron supplements or giving them to members of your family, talk with your doctor. It is possible to get too much iron, especially from supplements. Excess iron, over a period of time, can result in liver damage; in younger children accidental ingestion or misuse of supplements can cause iron poisoning. Speak with your doctor about the type and quantity of iron supplement you should take, if it is decided that you would benefit from one. Meanwhile, follow these strategies to increase the iron in your diet:

• Eat more iron-rich foods, including lean red meat, fish, poultry, liver, dried peas and beans, and leafy green vegetables. In fact, eating small amounts of meat, fish or poultry increases your body's absorption of iron from plant sources.

• Go easy on the amount tea consumed with your meals. Substances in tea called tannins may considerably reduce the amount of iron your body will absorb. Coffee, to a lesser extent, also reduces iron abosrption. Save the coffe and tea for an hour before or after eating.

• Certain types of antacids can also reduce the amount of iron the body absorbs. If you use antacids regularly, talk with your doctor about other possible strategies to ease digestion problems and reduce the need for antacids.

• Use iron pots for cooking. High-acid foods, such as tomatoes, will leach some of the iron from the pot and possibly add substantial amounts of iron to your diet. (In one study spaghetti sauce cooked in an iron skillet for about 20 minutes had five times as much iron as spaghetti sauce cooked in a ceramic pot.)

• When choosing grain-based foods such as bread and cereals, look for wholegrain or enriched products. Certain B vitamins and iron are added back to enriched breads and flour. Keep in mind that your body does not absorb iron equally well from all food sources. So don't depend on a single source of iron; get it from a variety of foods.

What To Do When Your Freezer Stops

HUNTINGDON (Huntingdon Co.) — A freezer full of thawed food is a sad sight as well as a potentially dangerous one.

As with any emergency situation, being prepared can be the difference between nuisance and disaster. If your area is likely to have power outages, or if your freezer malfunctions, have a plan of action in mind. The food safety standard of "when in doubt, throw it out" may be applied to most situations.

However, there are some things to do to possibly save frozen food. Any food that still contains ice crystals or is still cold (40 degrees Fahrenheit or less) and has been at this temperature no longer than one to two days can probably be safely cooked and eaten or re frozen.

Discard perishable foods that thaw to room temperature. This includes meats, poultry, fish, vegetables and dairy and flour products. Fruits are a possible exception. Cut fruit ferments as it warms. A little fermentation won't make the fruit dangerous to eat but it may spoil its flavor. This applies also to canned fruit juices.

It's important to refreeze thawed or partially thawed food as quickly as possible. If the freezer only needs to be washed out and plugged back in, you can probably safely refreeze the food at home. To do this, turn the freezer temperature control to its coldest position and place the food in the freezer with the warmest packages closest to the freezer coils. Arrange the packages so air can circulate around them. After the food is well frozen, turn the temperature control back to its usual setting.

If it's going to be a while before you get power or get the freezer fixed, you need to find some way to keep your frozen foods safe in the meantime. A full freezer usually can keep foods frozen for two days without power. A half-full freezer or freezer that's part of a refrigerator-freezer usually can keep foods frozen for up to one day — IF the door stays closed. You can place blankets over the freeze for added insulation.

If you have a commercial locker plant nearby, this may be your best bet for refreezing. If not, try using dry ice, block or crushed ice, or freezer gel packs. Because of the fumes it gives off, dry ice is not recommended for the refrigerator.

If the blizzard's raging, the power's out and you can't get anywhere to get ice, you may have to place food in clean portable ice chests on a cold porch or outdoors in a protected area. Be aware of the potential for lost food with this method.

Become An Educated Consumer

FLEMINGTON, N.J. — Join Kathleen Klotzbach, Interim Home Economist, and your local Shop Rite of Clinton, Route 31 on February 22, 10:00-12:30 p.m., for a two-hour aisle by aisle tour that compares products and product labels and teaches you how to be a more educated consumer. Learn to read labels and reduce the fat in your diet. Find out how to make dietary changes your doctor has recommended to lower your blood pressure or cholesterol.

To register send your name, address and phone number with a check for $5 payable to Agricultural Advisory Council to Rutgers Cooperative Extension of Hunterdon County, 4 Gauntt Place, Flemington, NJ Att: Home Economics Department. Registration deadline February 17.

Stuff omelets with your favorite combination of fillings.

How To Cook 'Eggsactly' Perfect Omelets

LOU ANN GOOD
Lancaster Farming Staff

LANCASTER (Lancaster Co.) — Want to entertain by serving something different, fun, inexpensive, and impressive?

Throw an omelet party.

After you demonstrate omelet making to your guests, each one can make their own omelet.

Omelets are popular any time of the day. They may be served plain, but the addition of fillings makes an endless variety of omelets possible. Flavor the omelet, filling or both with about ⅛ -¼ teaspoon of your favorite herb or spice or a sesoning blend from a salad dressing, soup or other flavoring mix. There's no limit to the range of exciting ideas. Here are some possible fillings that may be mixed and matched, according to personal preference. Use one or more filling ingredients to total about ⅓ to ½ cup filling for each omelet.

Lancaster County Poultry Ambassador Michele Stauffer adds a bit of pizazz to omelet making when she flips an omelet for guests at a food fest.

SUGGESTED FILLINGS:

- chopped onion
- chopped green or red peppers
- cubed ham
- bacon, fried and crumbled
- mushrooms
- pizza or spaghetti sauce
- broccoli, cooked and drained
- chopped celery
- salmon, drained and flaked
- zucchini, cooked and drained
- chopped green chilies
- shrimp, cooked, deveined
- preserves or jam
- tomatoes
- cheese
- canned pie filling
- leftover turkey, chicken, beef or pork

SEASONINGS:

- Sour cream or yogurt
- Worcestershire sauce
- Hot pepper sauce
- Salt and pepper

Before throwing a party, develop and perfect your own omelet-making skills. Here are step by step instructions.

PLAIN OMELET:

2 eggs
2 tablespoons water
Seasonings

INSTRUCTIONS:

Over medium-high heat, preheat an 8- to 10-skillet with sloping sides.

- Drop in a tablespoon of butter to melt.
- Mix the omelet ingredients with a fork or a whisk, just until blended.
- Pour the egg mixture into the heated, buttered pan. It should set at the edges almost immediately.
- With a turner, draw or push the cooked edges toward the center.
- Tip and tilt the pan so the uncooked portion can get to the bottom of the pan.
- While the top is still moist, add filling. The whole process should take no more than a minute.
- Fold one side over the filling with the turner. (Filling is on the left for right-handed people, opposite for lefties). Tip the pan over the plate and out rolls the filled omelet.

SUPPLIES NEEDED:

- One heat source (a butane burner, hot plate, or burner of your range). A range burner should be set on medium-high.
- One omelet pan
- One butter plate and knife
- One pancake turner
- One ladle for each bowl of egg mixture. Most standard kitchen ladles hold ½ cup, the perfect amount of the egg mixture for an individual omelet.
- One serving plate per person.
- Egg mixture (2 eggs, 2 tablespoons water, and seasonings per omelet).
- Assortment of fillings.

PLANNING PARTY

- Select meeting spot.
- Send out invitations several weeks in advance.
- Get a final guest count.
- Make a list, order food and supplies (1 week in advance).
- Buy food staples, 2 to 3 days in advance, perishables the day before.
- Set up tables and work station(s) 3 to 4 hours in advance.
- Chop and prepare filling ingredients (2 to 3 hours before).
- Break eggs and mix with water ½ hour before.
- Put food at cooking stations ½ hour before.
- Welcome guests, take care of introductions.
- Demonstrate the art of omelet creation.
- Create!

NEW HOLLAND
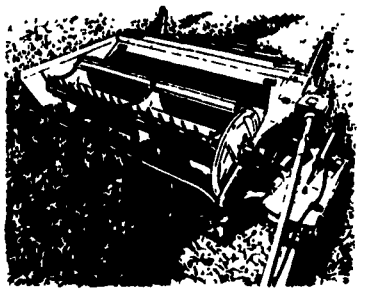
WINTER BUYER'S DIVIDEND
is back!

Now's the time to save money on new hay and forage equipment and lawn and garden tractors you'll need next spring. It's **Winter Buyer's Dividend**...the pre-season sale that's going on right now!

Come on in and make your best deal by February 28. Then, get a big New Holland **Winter Buyer's Dividend** to apply toward the purchase of:



- **Round Balers**
- **Bale Throwers**
- **PT Forage Harvesters/Headers**
- **Crop Choppers**
- **SP Windrowers**
- **GT Lawn and Garden Tractors**
- **Square Balers**
- **Bale Wagons**
- **Forage Boxes/Blowers/Wagons**
- **Mower-Conditioners**
- **Rakes/Mowers/Tedders/Inverters**
- **LS Yard Tractors**

Great dividends are available whether you pay cash or take advantage of the waiver of finance charges to 9/1/95*. Hurry in for more details...time is money!

* Offer available to qualified buyers through Ford New Holland Credit.

Family Living Focus

by
Tioga Co.
Extension Agent
Linda Yungwirth

Within our workplace four individuals have recently had medical problems with their heart. All of those people have suddenly realized that they have a health problem and need to do something about it, whether that be to take medication and/or to change some of their lifestyle practices. Their friends or family members will ask me about changes in diet, since I often do extension programs involving nutrition and health. Although I cannot give direct dietary advice, as that information should come only from a personal physician or registered dietitian, I can provide general information for developing a healthy lifestyle. Here are a few simple ways to get started:

CUT THE FAT IN YOUR DIET!

Examine your eating habits and find where those fatty food sources are. Begin to read food labels so that you can identify foods that are known to be high in fat. Fatty meats, dairy products, sauces, gravies, and fried foods are to be examined and then switch to lower fat choices such as lean meats, chicken, turkey, fish, and low-fat dairy products. Don't eliminate any food groups but find the lower fat choices within them. Substitute lower fat recipes. Change your method of cooking from frying to baking or broiling or just cook with less fat. Change to a lower fat spread for your bread and/or cut the amount you spread on it. Simple, small changes result in a large overall effect when cutting back on the fat! Less fat in your diet will help to prevent the build up of fatty deposits in your arteries which can cause heart problems.

GET UP AND GET MOVING!

Combine a low fat diet with more activity. First, be sure that you check any exercise regime with your personal physician. Increase your activity level gradually with changes such as parking your car further away from the workplace and walk, using the stairs rather than taking the elevator, walking to lunch, walking your dog, or asking a friend to join you for a leisurely walk and talk, window shopping in town or walking the mall, supermarket or large discount stores. Those extra steps will add more activity to your life, strengthen your heart, and surprisingly give you more energy.

MANAGE YOUR STRESS!

If work, family problems or timeframes are getting to you, examine your life and find some ways to relieve the pressure. Do you have a hobby that you haven't pursued in quite a while? Schedule some free time and do it. What about relaxing to music? Find your favorite tape and listen to it on the way to town, or on the way back home to unwind and change your thinking. Call a friend or neighbor that will listen to your stresses and offer positive suggestions. Get out in more social activities that are away from your work or home environment. How about a Saturday night square dance or line dancing for a change of pace? Have some fun with life! Put some laughter and humor into it and see if you don't feel less stressed. By unwinding and relieving the tension you will be putting less stress on your body and its muscles.

For more detailed information on nutrition, exercise and stress contact our local Cooperative Extension Office or use our computer data base Pen Pages.

Gypsy Moth Research Takes 'Think Tank' Approach

UNIVERSITY PARK, (Centre Co.) — Contrary to the fictional adventures of the brilliant detective Sherlock Holmes, the more people you have working on an investigation, the better the results. That same thinking is what drives the scientists at the Gypsy Moth Research Center at Penn State to study the forest pest through the prism of their own expertise to gain a clearer image of what makes the insect function.

"No one has the foggiest idea why the gypsy moth does what it does," says Jack Schultz, professor of entomology in the College of Agricultural Sciences and head of the center. "The ability of this insect to go from populations that are very small to an outbreak of millions is one of the great mysteries of biology."

Working on that mystery are nine scientists in the department of entomology with wide-ranging areas of expertise. By sharing research and networking new discoveries, this loosely organized group can not only clarify how the gypsy moth functions but also try to apply that new information to other insect applications.

"High quality science seeks generalization," Schultz says. "The amount of collaboration that goes on at Penn State allows us to work on solutions that go from the molecular level to the landscape level. That kind of perspective is pretty unusual in entomology."

Schultz says banding together the research of nine scientists can get tricky, especially since the nature of science and academic reward is often tied to individual achievement.

"The temptation is to always make your way in the scientific world by specializing," Schultz explains. "We try to tap into people's desire to attack and solve complicated problems and make that into a teamwork philosophy."

The formation of the center at Penn State is particularly apt because the state's hardwood forest is a prime target for the pest. "We are sitting right in the middle of a forest that is like candy for gypsy moths," Schultz says.

Although the group is called a research center, its members are as far-flung as, well, gypsy moths. Some of the team work in a laboratory away from central campus, and others have offices in the Agricultural Sciences and Industry building. Schultz credits contemporary technology with keeping the group focused on its goals.

"Electronic mail has helped us tremendously," Schultz says. "At a large university, you can play telephone tag for weeks without contacting another researcher. With E-mail, everybody has new information in a matter of hours."

By keeping the center collaborative, yet loosely structured, each researcher also can pursue specialized interests. "I think people like to run their own show, but it's crucial to stick your head out of the gypsy moth mire and see what's going on around you" Schultz says.

For example, William McCarthy, associate professor of entomology and a molecular biologist, studies how pesticides attach to the gut of a gypsy moth. He often collaborates with Schultz and Heidi Appel, a research associate in entomology, to research wilt disease, a viral infection of gypsy moth caterpillars.

Another collaborative effort between Michael Foster, research associate in entomology, and Michael Saunders, associate professor of entomology, applies Foster's expertise in computer and mathematical models for gypsy moth populations to Saunders' work in computer systems for aerial pesticide spraying.

Another cooperative project by Karl Mierzejewski, research associate in entomology, centers on improving the efficiency of pesticide sprays. Data from his aerial tests also are used by Ralph Mumma, distinguished professor of environmental quality, to study the occurrence and persistence of pesticide residues.

Schultz says the group divides its work into three categories: biological controls for gypsy moths, aerial application technology, and information management (telling landowners and others when to spray).

The group's work has also been used for applications other than gypsy moth control. For instance, the aerial spray group has used its work on penetrating the forest treetops with pesticide to spraying broccoli. "Broccoli has a canopy too, but it's only a foot off the ground," Schultz explains.

Schultz emphasizes that the research group's work still can only add one piece at a time to a biological jigsaw puzzle that is largely unfinished. Such things as controlling an outbreak or even predicting a gypsy moth infestation are merely pipe dreams for the moment. "If I could predict a gypsy moth outbreak, I'd be a rich man," Schultz says.

"Everybody has their pet theories about gypsy moths," he adds. "The difference at Penn State is that the person with the opposing theory is just down the hall instead of at another university."

HAPENINGS

4-H Horse Shows Require Rabies Vaccination

Penn State Cooperative Extension has released a reminder for rabies vaccination requirements for horses, ponies or mules participating in 4-H activities.

According to the extension service, all horses and ponies entered in 4-H horse shows, open horse shows sponsored by 4-H, or used in rides at public events must be vaccinated for rabies at least one month before the event. Revaccination is required each year.

Vaccinations are required for all horses over six months of age. In addition, mules that might be included in rides, public displays, or projects must be inoculated. Finally, ponies used in 4-H fundraising pony rides also must be vaccinated.

Horse owners can present a form signed and dated by a veterinarian stating that the horse was vaccinated, or owners may sign a statement when they arrive at a show indicating their horse has received a rabies inoculation. For more information, call your local cooperative extension office.

Northampton County 4-H Dairy Club

On January 16, Northampton County 4-H Dairy club held its monthly meeting.

Sara Hlavaty brought the meeting to order. Jennifer Koehler presented the minutes from the last meeting and Jason Koehler presented the treasurer's report.

The club then discussed old business and new business. Then the club held its yearly election.

The results are Sara Hlaraty, president; Lisa Pysher, vice president; Jennifer Vemer, secretary; Michael Kromer, treasurer; and Rebekah Pysher, Jennifer Koehler, and Amada Klein, news reporters.

Game leaders are Bryant Hlavaty, Eric Koehler, and Brian Kromer.

4-H Goat Club

The Cumberland County 4-H Goat Club held its first meeting Feb. 1 at the home of Tim Zeigler. There were 14 members present with six new members.

Ron Zeigler talked on the selection of meat goats.

Election of officers was held with the following results: president, Nate Gutshall; vice president, Tim Zeigler; secretary, Sonya Rinker, treasurer, Greg Garvin; news reporter, Derrick Carpenter; County Council representatives, Linnea Hoover and Ruschelle Henry; and social chairmen, Matt Hoyaux and Zach Travis.

The next meeting will be held March 1 at 7:30 p.m. at the home of Tim Zeigler.

Those wishing to join the club or needing additional information should contact one of the leaders: Red Allen at (717) 776-5097 or Ron and Lois Zeigler at (717) 776-7583.

Cumberland County 4-H

The Cumberland County 4-H Condoquinet Sheep Club held its first meeting of the new year on January 18 at the Extension Office in Carlisle.

New project books were distributed to the members. The club held the election of officers for the new year. They are: president Wendy Holtry; vice-president, Meri Witter; secretary, Amy Brehm; assistant secretary, Sonya Rinker; treasurer, Sandy Anderson; news reporter, John Witter; social chairpersons, Zach Reed and Mark Myers; and county council representatives, Amy Brehm, Linnea Hoover, and Zach Reed, Alt.

Northampton 4-H Dairy Club

The Northampton County 4-H Dairy Club is having a Square Dance March 25 at the Blue Valley Farm Show building from 7:30 p.m.-11 p.m. The cost will be $5 at the door.

If you'd like to order tickets ahead of time for $4, contact Norman Koehler at (610) 498-3389, Terry Kromer at (610) 258-5050, Fay Fulmer at (610) 759-4365, or Jeff Brewer at (610) 588-9477.

Bob Lambert will be the caller. Pretzels, chips, and root beer will be provided.

(717) 394-3047 or 626-1164 puts you in the Classifieds

AGCO ALLIS
8600 SERIES TRACTORS

36 SPEED CHOICES

AGCO Allis 8600 Series tractors give you 36 speed choices, an electronic engine speed governor and many other quality performance features, as well as a comprehensive 4-year/4,000-hour warranty.

- **Speed choices for all conditions.** The standard synchropower transmission offers 24 forward and 12 reverse speeds. An optional power Hi-Lo transmission boosts that to 36 speeds both forward and reverse Both 8600 Series models are AWD with planetary final drive, and a self-adjusting, hydraulically-actuated clutch.
- **The air- and oil-cooled engine advantage.** The 8600 Series tractors feature the high-output, 6-cylinder, air- and oil-cooled diesel engine that eliminates components that cause downtime in liquid-cooled engines. The 8610 model has a 103 PTO hp engine with a 22% torque rise and the 8630 model has a 120 PTO hp turbocharged engine with a 30% torque rise.
- **PTO power and versatility.** The independent PTO operates at 540/1,000 rpm with 6- and 21-spline shafts and an electrohydraulically-actuated wet PTO clutch. The 3-point hitch comes standard with telescopic stabilizers: Category II/I on the 8610; Category III/II on the 8630. Optional telescopic lower links are available.
- **Quality performance features.** The 8600 Series tractors ride on premium Goodyear radial tires. They have hydrostatic steering, a tilt-telescope steering wheel and hydraulically-actuated wet disc brakes on all four wheels for 40% better braking These models also have electrohydraulically-actuated rear and front differential locks that an operator can manually disengage for tighter turns.

To learn about all the quality features of the 8600 Series tractors, or any of the "orange" line of AGCO Allis tractors ranging from 40 to 128 PTO hp, stop by or call us soon.

Ida's Notebook

by

Ida Risser

Almost Valentine's Day and I have many thoughts. When I was almost eight years old, I had a little sister born February 14. However, she did not live to be more than 12 years old. Doctors in that day did not have the knowledge that they do today.

On a happier note, Allen and I are helping to plan a Valentine Dance. Thus, I have helped to make about 100 paper carnations. I was really surprised at the beauty of the pink, white and red flowers. Of course, I had to be shown how to make them. Even planning and buying the refreshments for a large group takes time. And, I am the one responsible for the advertising prior to the event. This means meeting publication deadlines.

Recently, we attended a large funeral of a friend. Many people paid tribute to his life's accomplishments. He was active in many organizations and had a variety of experiences including farming, church work, and big business. Not everyone can fill so many different shoes.

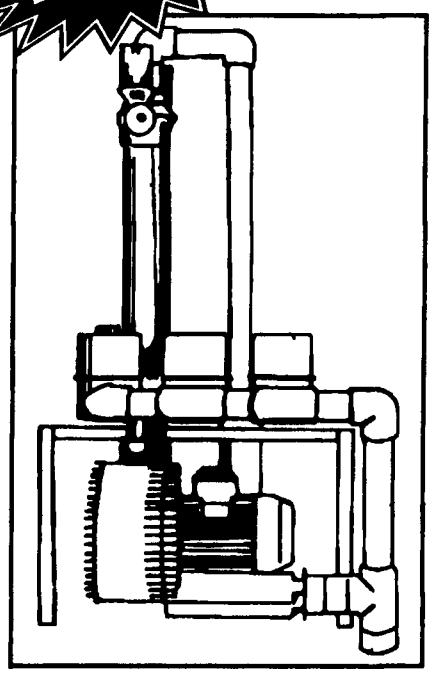
Since January 1, my husband has decided to work fewer days on the farm. We just had a 47th wedding anniversary and every day since then he has worked on the dairy farm. Now he feels just a few days a week will be enough. So, he has been doing some necessary jobs her at home plus doing more reading.

He is making holes in locust posts for a rail fence. I'm glad he has a woodworking shop. I tell people that at least that gets him "out of the kitchen." When I bake pies or try to follow a complicated recipe it is nice not to be disturbed. How I ever did that with six children clamoring for attention, I do not know.

NEW!

SURGE

TURBINE VACUUM PUMP



Designed for the Commercial Dairyman, Built by Siemens

The Surge Custom Line Turbine Vacuum Pumps from Siemens are a high-tech design featuring maximum strength materials. They are light weight, use no oil or water and are virtually maintenance free for vibration and wear.

As an added benefit, the residual heat from the pump exhaust can be reclaimed with the use of a heat exchanger to provide hot water for a commercial dairy use.

Features and Benefits:

- Low noise creates a better work environment.
- Oil free air is environmentally safe. No oily exhaust air to collect and dispose.
- Direct drive requires no belts to replace or adjust.
- Non-contact operating surfaces create no internal friction to cause wear and fatigue of internal pump parts.
- Built to endure long running times of a commercial dairy operation increasing machine life-span.
- Low maintenance keeps the long term costs of operation low, and eliminates downtime.
- High efficiency means low cost of operation.
- Free hot water eliminates the expense of operating electric or gas water heaters as primary heaters.

SURGE

COMMANDER

Vacuum Regulators

TOPS IN PERFORMANCE

TOPS IN VALUE

Two sizes to fit your vacuum system and your budget!

COMMANDER® 1.5 K

The **SURGE COMMANDER 1.5K vacuum regulator** is designed to work with vacuum pumps that have capacities of up to 53 CFM (1500 L/min.) ASME. Its high degree of sensitivity and accuracy, combined with simplified maintenance, make it an ideal replacement for older vacuum controls.

The **COMMANDER 1.5 K** is an economical way to improve your vacuum system's performance and reduce your service requirements.

COMMANDER® 5 K

The **SURGE COMMANDER 5 K vacuum regulator** is designed to work with vacuum pumps that produce up to 178 CFM (5000 L/min.) ASME.

Precise control, dependable operation and simplified service are reasons enough to replace your old vacuum control. You can spend a lot more money and not surpass the **COMMANDER 5K's** performance.

Computer Maps Pests To Protect Wildlife

by Jan Suszkiw
Everybody's Science

WASHINGTON, D.C. — Computer maps that track hungry crop pests may also chart a road to recovery for endangered wildlife species.

U.S. Department of Agriculture scientists built the computer maps so farmers could be alerted as to where boll weevils might threaten cotton crops.

In Mississippi and Tennessee, the maps are helping farmers wipe out boll weevils by tracking the insect pest's every move in cotton fields.

Now wildlife researchers are interested in adapting the scientists' maps to store timely information about the movements and behaviors of endangered species —important for strategies to protect them, or to bolster their numbers in refuges, parks and other habitats.

One endangered species, the red-cockaded woodpecker, could be among the first to undergo such computerized tracking. Heavy cutting of southern pine and other native forests in Mississippi, Florida and other southern states over the past 90 years has reduced the woodpecker's numbers and natural habitat.

But scientists at the U.S. Fish and Wildlife Service (FWS) are working to reverse that trend.

As part of a pilot study, the FWS scientists have enlisted the help of USDA researchers Glenn Wiygul and John Reinecke to adapt the maps to monitor a small population of the endangered woodpeckers at the Noxubee National Wildlife Refuge. The refuge is located about 35 miles southwest of Columbus, Miss.

"Only about 350 of the small, insect-eating birds exist in Mississippi, 125 of which are known to reside at the Noxubee refuge, the best place in the world to see one," said Reinecke, who works with Wiygul at USDA's Agricultural Research Service.

If successful, said Reinecke, computer mapping could give federal, state and non-government organizations like the National Audubon Society an affordable new system for monitoring and protecting endangered animals and plants.

FWS scientists, for example, plan to use the maps to set up artificial nesting sites to bolster the woodpecker's numbers at the Noxubee refuge.

Wiygul, Reinecke and colleagues at ARS' Boll Weevil Research Unit at Mississippi State, Miss., built the maps using a computer geographic information system (GIS).

The GIS sketches state and county boundaries and areas such as farms, cities, lakes and parks on the maps. It can use red, yellow and other colors to show the size of a pest population or the locale of an endangered wildlife species, Wiygul said. (Agricultural Research Service, U.S. Department of Agriculture)

Safe Food For Meaningful Regulation

SHANNON, Ill. — American Agri-Women recently voiced it' s support of a scientifically based approach to pesticide policy in the United States; questioning whether our nation's pesticide regulations regarding food safety are in need of the massive overhaul being proposed by the Clinton administration.

"Clearly, we all want a safe food supply for every consumer, and especially for our children, and the need to change the outmoded Delaney Clause is very real," stated AAW President Ardath DeWall. Likewise, American farmers and ranches are now consistently providing food and fiber for the worldwide market, and the productivity and safety of these agricultural products is due in large part to the judicious utilization of the most modern fertilization and crop protection chemicals by U.S. farmers.

"Therefore, the draconian call to ban all pesticides would not only limit our ability to consistently produce abundant safe food, it would cost the average household $228/year; and including fertilizers in such a ban would raise food costs $420/year," said DeWall. Yet the scare tactics about food safety and pesticides persist. "This is why, the government should take a reasoned, scientific approach to pesticide/food safety regulation," stated DeWall.

American Agri-Women is a national coalition of farm and ranch women's organizations, dedicated to the truthful depiction of American Agriculture. For more information, please contact Ardath DeWall, AAW President, 11841 Mt. Vernon Rd., Shannon, Il. 61078, 815-864-2359.

Hesston 1160 Mower Conditioner
Now's The Time To Buy!
See Dealers Below For Company Programs, Financing And Warranty Information
When you're doing high-capacity haying, our Hesston 1160 Hydro Swing Mower Conditioner gets right down to business.
We built it with a center-pivot design that gives you all the benefits of a self-propelled—without the extra expense. And it's made for consistent, even cutting.
Once you've entered your fields, the 1160's fully engaged 110" conditioner goes to work for fast drying and even, well-conditioned windrows. You can even adjust the forming shields to produce everything from a swath to Hesston's unique fluffy windrow. Whatever the crop conditions, the 1160 tailors itself so you can harvest the highest quality hay and save lots of time in the process.
See your AGCO/Hesston dealer listed here and ask about our flexible financing plans on the 1160. Or on our wide selection of other equipment, all backed by the AGCO Warranty Program.

Farm Women Societies

Berks Society 1

The January meeting of the Berks County Society of Farm Women Group 1 was held at the home of Marian Leberman, Douglassville.

The newly installed president, Evelyn Heacock, presided at the meeting. Other officers for the new term are Geraldine Marsteller, Pearl Levengood, Catherine Yanos, and Bettye Wegman.

The February meeting of Group 1 will have a Valentine's Day theme at the Oley Legion Diner, Oley.

Berks Society 9

The January meeting of Group 9 met in the home of Kathy Hafer. Seven members were present. Members began with a Bible reading, Lord's prayer and flag salute. Pat Haas installed new officers. The new program books were handed out. The February meeting will be at Pat Haas' house for a wine and cheese tasting party. Each member is to bring a bottle of wine, also canned good for Berks Co. Food Bank. The group read the By-Laws, and the meeting was adjourned for refreshments. At the February meeting, members decided to discuss a 25th year anniversary party.

New Black Emerald Grapes Offer Taste Treat

by Marcia Wood
Everybody's Science

WASHINGTON, D.C. — A sweet, juicy new grape called "Black Emerald" could be on sale at your supermarket in about three to five years, says a USDA grape breeder.

"It will take a few years before enough Black Emerald vines are in the ground and bearing enough fruit to market this tasty grape nationwide," estimates USDA grape breeder David W. Ramming.

When that happens, expect a taste treat.

"The flesh of Black Emerald grapes" says Ramming, "is translucent, firm, and almost crisp. Each grape is about the size of a dime, with an attractive, dark-black skin."

He says Black Emerald "fills a unique niche because it ripens in late spring—a time when you can't find another top-quality, U.S.-grown black seedless grape at the supermarket."

In southern California vineyards, Black Emerald will be ready to harvest in mid- May. That puts it right after Perlette—a "white" or green seedless grape—and before Flame Seedless—the popular red seedless variety.

"Until now," notes Ramming, "the only black seedless grapes available at that time of the year were either not as good quality as Black Emerald, or were imported from South America, so they weren't as fresh as locally grown fruit."

Ramming, with USDA's Agricultural Research Service, first produced Black Emerald vines about 10 years ago by breeding a seeded grape with a seedless type. He did the work at the ARS Horticultural Crops Research Laboratory at Fresno.

With ARS colleague Ronald Tarailo, Ramming has scrutinized more than 800 experimental Black Emerald vines growing at about a dozen commercial vineyards in California and at a research vineyard at California State University, Frenso.

The researchers offered Black Emerald to other grapegrowers and breeders last spring. The vines will grow not only in California—the nation's leader in grape production—but also in Oregon, Washington, and Arizona, the researchers say.

Berks Society 6

Members of the Berks County Society of Farm Women Group #6 held their January meeting in the home of Dorothy Wagner.

Dorothy Wagner, Tara Wagner and Joyce Mast treated the ladies and their husbands to a Mystery Supper.

Janet Schlegel and Dorothy Wagner reported on the State Convention. All the new by-laws were approved and passed at the convention.

The group will be helping with the Oley Community Pot Pie Dinner on March 19th.

The Spring Ralley will be May 23 at Dickenson College.

The February meeting will be at the Yellow House Hotel for lunch. The group will be touring the Kiwi Shoe Polishing Factory before lunch.

YOUR POST FRAME BUILDING HEADQUARTERS

Wickes Lumber is the place to turn for all your packaged building needs. We offer a wide selection of sizes and styles of buildings, perfect for a variety of needs. We also carry a complete assortment of steel for siding and roofing, quality lumber, treated posts, heavy-duty hardware and all the extras. Add delivery and credit plus attentive, knowledgeable salespeople and you've got it all!

You ask ou answer

This column is for readers who have questions but don't know whom to ask for the answers.

"You Ask — You Answer" is for non-cooking questions. When a reader sends in a question, it will be printed in the paper. Readers who know the answer are asked to respond by mailing the answer, which will then be printed in the paper.

Questions and answers to this column should be addressed to You Ask — You Answer, Lou Ann Good, P.O. Box 609, Ephrata, PA 17522.

QUESTION — Don Wooduard, Honey Grove, would like to know where a corn cracker can be repaired and where he can buy a small one.

QUESTION — A reader said that she had heard there are many uses for white vinegar in addition to use in cooking and for window cleaning. She asks if readers know of other uses for white vinegar.

QUESTION — J. Martin, Lititz, would like to know where a baler can be purchased to make miniature bales for crafts and decorations.

QUESTION — Vonnie Davis, Manchester, would like information on how to make pine cone fireplace starters that burn different colors.

QUESTION — Nancy E. Cummings would like to know how to store sweet potatoes. She had a super crop but is disappointed that many have withered up, although some have stayed nice that were dried the same way.

QUESTION — Karen Kinnane, Box 212, Shartlesville, PA 19554 (610) 488-7792, is searching for Christmas dinnerware picturing a winter outdoor scene, marked on the back with Sango 3900 Silent Night, Korea, Joan Luntz. Please contact her.

QUESTION — Cindy Eshleman, Jonestown, would like to know where a Cub Cadet tractor hat can be purchased or sent for.

QUESTION — Cindy Eshleman, R.D.#, Box 7958 Jonestown, would like dates and directions to upcoming rabbit shows in central Pennsylvania.

QUESTION — John T. Los, 2350 Croll School Rd., York, PA 17403, would like to talk with someone about the lithographs with the following information on them: Artist signature — Fred S. Cozzens 1893. Armstrong & Co. Lith. Boston. Copyright 1893 American Publishing Co. — Hartford, Conn.

QUESTION — Roland Kamoda, Monongahela, would like to know how to pluck a duck or goose and dress it. Also, how can one tell the difference between a young duck and a young goose?

QUESTION — A faithful New York reader would like a wholesale source for goose feathers to use to make old-fashioned feather Christmas trees.

Register For Lancaster County Extension Workshops

LANCASTER (Lancaster Co.) — The following educational activities have been scheduled for the coming months.

If you want to enroll, write the workshop title, your name, address and phone number for each of the workshoips or meetings you plan to attend and RETURN WITH YOUR CHECK made payable to *"Agricultural Extension."* No registration will be accepted without payment.

All of the classes will be held in the Extension Training Center (unless indicated otherwise) which is located in the basement of the Farm and Home Center, 1383 Arcadia Road, Lancaster.

Registration deadline for each of the activities is one full week before the meeting or the first of a series of workshops. Registration will be accepted on a first come basis. Unless you hear from us, please come to the meeting or the first class scheduled for the workshop in which you enrolled. Please call the extension office (394-6851) if you are unable to attend a class.

FOOD AND NUTRITION

Calcium Rich Eating - Options for calcium sources and quick milk containing drinks are discussed and demonstrated as an introduction to the "Calcium-Rich Eating" Learn-At-Home series. Cost: $1.

Workshop #3 - 7 p.m. - 8:30 p.m. on February 21.

Workshop #4 - 9:30 a.m. - 11 a.m. on February 22.

(Turn to Page B23)

QUESTION — Edgar Jackson, Ligonier, would like to know how to puff wheat, rice, and corn for making cereal.

QUESTION — Martha Hertzler, West Salisburg, would like an address to know where to send for a gasket for a stainless steel Flex-Seal pressure cooker Model 908, which is made by Vischer Products Company, Chicago.

QUESTION — Tom Hicswa, Hammonton, N.J., would like to purchase sheet metal parts for a Case tractor model 300B made about 1960. He wants a grille, gas tank cover, etc. Please send information to Hicswa at Box 2169 Elwood R1, Hammonton, N.J.

QUESTION — Evelyn Michaels, Beaver, asks if anyone remembers Ole Oid, a type of linament made by Dr. Peter Farhney and Sons Company in N.Y. City. It contained camphor, oil of cloves, sassafras, and turpentine. The Swedish/Finnish community in Tioga County used it widely from the 1930s to the 1960s. Evelyn has asked telephone operators in the calling areas 212, 718, 917, and 914, for telephone listings for the company but no listing exists in those areas. Does anyone know a supplier?

ANSWER — Edie Mae Carty, Downingtown, wanted to know how to make fabric stiffener. Thanks to a reader who sent in the following directions. In a saucepan, mix 4 tablespoons flour and 1 cup cold water. Slowly add 1 cup boiling water. Bring to a boil. Remove from heat and stir in 1½ tablespoons sugar. Mix and cool. Using a brush, paint the mixture on the fabric. Allow to dry. Great for making ribbon.

ANSWER — Henry F. Stoltzfus, Gordonville, asked where Timex or other wind-up watches with glow-in-the-dark spots can be found. Thanks to Harold Martin, Ephrata, who writes that they are featured in the following catalogue, which can be requested. The Sportsman's Guide, 411 Farwell Ave. So. St. Paul, MN 55075-0239.

ANSWER — Helen Mill, Honesdale, wanted to purchase new or used butchering knives, which must be good with 6-10-inch blades. Thanks to Harold Martin, Ephrata, who writes that they may be purchased through Southeastern Outdoor Supplies, Route 3, Box 503, Bassett, VA 24055.

NOTICE — Thanks to the many readers who sent answers for homemade soap and for window cleaners. Sorry, we cannot print the numerous answers, most of which were duplicates and slight variations of those printed last week. Keep sending your answers and yours is certain to be printed sometime.

Workshops

(Continued from Page B22)

Spring Vegetables - Peas and Greens - Learn how to cook green leafy vegetables and peas for taste appeal and saving nutrients. Instructor: Althea Engle, M.S., R.D., Extension Agent - Family Living/Food and Nutrition. Cost: $2.

Workshop #5 - 7 p.m. - 8:30 p.m. on April 6.

Workshop #6 - 9:30 a.m. - 11 a.m. on April 7.

Fitting The Bodice - The basic bodice will be fitted with sleeves and will teach you how to deal with rounded shoulders, full busts, thick waists, etc. The finished basic pattern or "sloper" can then be compared to commercial patterns to make fitting an easy job. Cost: $40.

Workshop #8 - 9:30 a.m. - 11:30 a.m. on March 3, 10, 17, 24, 31.

Pants That Fit - European styling eliminates the baggy seat look of many American designed patterns. You will be constructing a wearable pair of pants rather than just a fitting shell. For the first class, please bring a tape measure and a pencil and wear pantyhose for measuring. Cost: $48.

Workshop #9 - 7 p.m. - 9 p.m. on April 19, 26 (Wednesdays), May 4 (Thursday), May 10, 17, 24 (Wednesdays).

Ultrasuede Accessory Workshop - Create a belt of your choice, a bag and a piece of jewelry in this hands-on class using scraps and ¼ yd. pieces of this creative easy-to-sew fabric. Many creative ideas and patterns will be supplied. A supply list will be sent prior to the first class. Cost: $20.

Workshop #10 - 9:30 a.m. - 12 p.m. on March 7, 14.

Workshop #11 - 7 p.m. - 9:30 p.m. on March 7, 14.

Sewing Grainboard Workshop - Construct a padded gridded board which makes straightening, cutting, pressing and tailoring easier and easier. Part of the class will be a demonstration of its multiple uses. A supply list will be sent prior to class. Please note: supplies for this workshop will cost between $30 and $40. Cost: $16.

Workshop #13 - 9 a.m. - 1 p.m. on March 4.

Re-Entry Sewing - Learn about up-to-date techniques and tolls to make sewing easier and more fun than ever, while sewing a garment of your choice. Each student receives an individualized work plan to insure the garment is completed by the end of class. Cost: $48.

Workshop #14 - 7 p.m. - 9 p.m. on March 8, 15, 22, 29 (Wednesdays), April 6 (Thursday), April 12 (Wednesday).

Mastering Zippers - Bring your sewing machine (indicate on registration if you need to borrow one of our machines), zipper foot for the machine, 3 zippers at least 9" long (may be longer), 6 pieces of stable cotton fabric at least 8" x 12", thread, pins, scissors, sewing gauge, ½ " transparent scotch tape and sewing needles. Cost: $12.

Workshop #15 - 6:30 p.m. - 9:30 p.m. on February 6.

Workshop $16 - 9 a.m. - 12 p.m. on February 7.

Sewing Machine Maintenance - Bring the following items to class: sewing machine, sewing machine oil, cotton swabs, tweezer, brush for cleaning machine parts, screwdrivers (the tiny one which came with your machine, and one medium size), threaded bobbin, spool of thread and small piece of scrap fabric to test thread tension, and your user manual. Cost: $8.

Workshop #17 - 7 p.m. - 9 p.m. on April 3.

QUILTING WORKSHOPS

Woven Floral Baskets - The four-basket, 30" wall hanging boasts baskets that appear to be woven, overflowing with simple, colorful yo-yo flower bouquets. The flowers can be embellished with beads and metallic threads. The novice is exposed to a bit of both, without being overwhelmed.

A fabric/supply list is provided at the first class. Bring along basic sewing supplies . . . pins, fabric scissors, paper scissors, pink, blue, yellow and green thread, hand sewing needles, a pencil and a 12" square piece of white or cream colored cotton fabric.

A $3 supply/pattern fee is due the instructor on the first night of class. Cost: $38.

Workshop #18 - 7 p.m. - 9 p.m. on February 22, 6 p.m. - 9 p.m. on March 8, 6:30 p.m. - 9 p.m. on March 15, 6:30 p.m. - 8:30 p.m. on March 22.

Log Cabin Quilting For Beginners - Participants must have sewing experience and be able to bring and operate their own sewing machine.

Bring the following items to the first session: thread, needle, scissors, thimble (if you own one!), pencil and paper. Cost: $36.

Workshop #19 - 7 p.m. - 9 p.m. on March 20, 6 p.m. - 9:30 p.m. on March 27 and April 10.

Jacob's Elevator - Work with color placement, and then learn the quick piecing techniques to stitch together a miniature Jacob's Elevator wall hanging (26" square).

This quilt is made of basic units that are joined together to comprise a quilt that has small blocks running on the diagonal, as in a single Irish Chain, but also uses larger square-in-square blocks to provide visual impact.

This is a suitable project for beginners, as participants will learn tricks for quick cutting and piecing of four patches, Flying Geese and Puss-in-the-Corner units. Directions will also be given for a large queen size quilt that can be made after learning the how-to's on the miniature.

The first class will work with color and planning, and the all-day session will be a stitching session. Experience with a rotary cutter is a plus. A supply list will be sent several weeks before first class date. Instructor: Donna Lucidi-Nachwostach. Coat: $28.

Workshop #20 - 7 p.m. - 9 p.m. on April 19 (Wednesday), 10 a.m. - 3 p.m. on April 29 (Saturday).

The Heart of Curved Piecing - During this 3-hour class, you will piece one block, then inset it into a square piece of fabric. Intermediate sewing skills are absolutely necessary. Ideas for using this block in creative ways will be presented. There will be a $3 supply fee payable to the instructor at the first class.

Supplies needed for class: Sewing machine, extension cord, sewing and cutting supplies, iron, mat, 3/8 yd. of a solid (100% cotton) fabric, 8-10 pieces of coordinated cotton calicos or solids (6" x 10" each is sufficient), paper scissors. Cost: $12.

Workshop #21 - 6 p.m. - 9 p.m. on February 27.

Traditional Finishes For Quilts - Learn to sew a mitered border corner, a butted border corner, a wrapped binding, continuous binding, double bias binding applied to a straight edge and a curved edge, mitered binding at corners, prairie points and a ruffled edging. The samples will then be yours or refer to as needed in future quilt projects.

This class is for the person with some quilt making experience, but who needs more instruction on finishing the edges of the quilt.

Samples will be prepared in class, so a sewing machine is necessary. A supply list will be sent prior to the first class. A minimal supply fee will be requested at the first class to cover cost of handouts. Cost: $24.

Workshop #22 - 6 p.m. - 9 p.m. on April 26, May 10.

HOUSING

Take Control of Your Finances - Get your spending under control. Find out where you money is going. Learn how to put together a simple budget. Take control of your credit use. Cost: Free.

Workshop #24 - 7 p.m. - 9 p.m. on March 16.

Workshop #25 - 1 p.m. - 3 p.m. on March 28.

Morton Buildings is having a very Special Sale.
We're opening our doors bright & early for you on
February 23, 24, & 25, 1995
from 7:00 am to 6:00 pm

Recieve two free "Outback" style jackets with the purchase of any new Morton Building. The "Outback" jacket features sanded, poly/cotton poplin; broadcloth lining with half mesh overlay; hidden hood in convertible collar; zip front with snap down storm flap; pleated, double entry lower pockets; inside pocket; adjustable cuffs; inside drawstring waist; with a relaxed fit. Watch for special price ad flyers in your area or contact your local Morton Buildings design & construction center for details. All Morton Buildings will reflect special sale pricing.
Sale ends February 25th, 1995. Call Now!

Firestone The Leader in The Field

Super All Traction 23°

R-1

- New top-of-line bias-ply tractor rear, featuring our long bar/long bar design for tread stability, and heavy bar bracing to extend tread life.
- Long wearing and smooth riding, due to the more uniform, flatter contour of the long bar/long bar design.
- Proven 23° bar angle for traction and open center for self-cleaning.
- Bead and rim protector shields the rim to help keep stubble and soil from getting between the bead and rim flange.

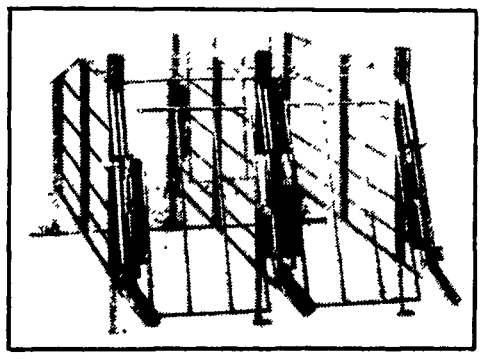
TRI-COUNTY CONFINEMENT SYSTEMS, INC.

Total Swine Confinement Systems Center

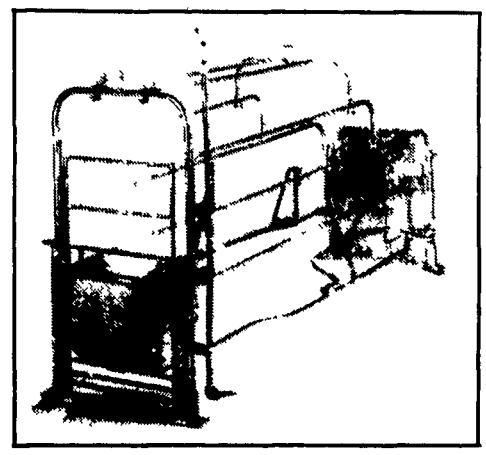
See You At The Keystone Pork Congress Feb. 15, 1995
Discuss Your Needs With Us

YOUR NEEDS ARE OUR BUSINESS



CONFINEMENT STALL
Developed in our R&D farm. Our goals were convenience, safety and durability. The low back and flat top rails are easy to reach over with no sharp edges. Stainless steel rear legs and front feet along with solid steel horizontal rods through punched uprights provide the strongest, most durable stall ever produced by Tri-County (21"-24" O.C. x 86")

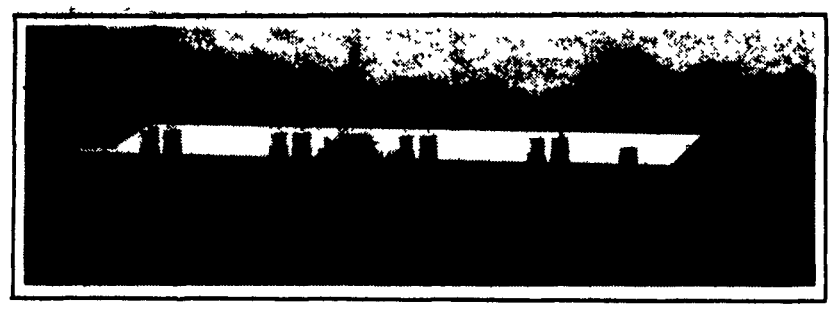
FINISHING PENNING
Optional stainless steel feet and fasteners offer improved durability over other similar types of penning. Loop and flapper latch arrangement eliminates the use of drop pins. Stainless steel fence line feeders provide excellent durability and a minimum of waste.



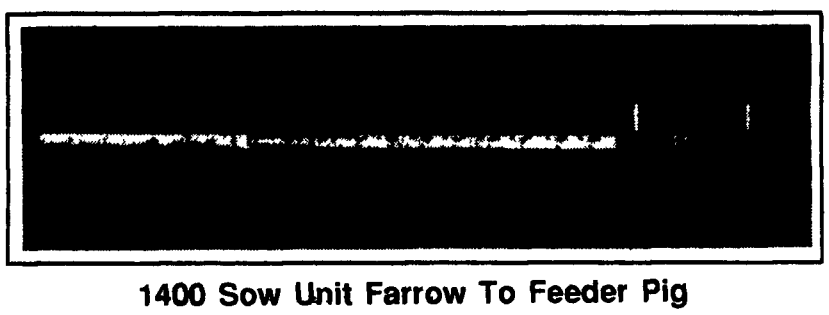
PIG SAVER "DUTCH CRATE"
Developed through testing in our research farms the goal was to develop a crate that nearly eliminates crushing, due to lay ons, unmatched durability and be easy to work around. All this has been achieved by a unique gravity fliprail that forces sows to lie down slowly. Proven horizontal and solid steel rod construction. All this at a reasonable cost.

NURSERY PENNING
Nursery penning has been improved by the use of an optional solid stainless steel panel on the front gates which keeps wet feet in pigs. Stainless steel optional feet on penning eliminates corrosion where penning attaches to the floor. Stainless steel drinker pipes & mounting brackets also increase durability.

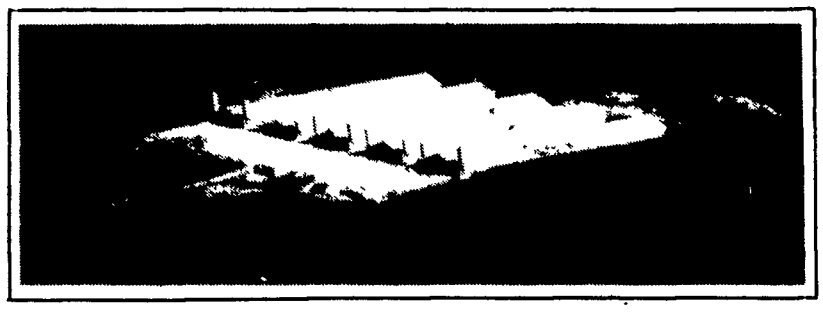
2800 HP Offsite Nursery (7 Rooms)
(Pull Plug, Preferated Ceiling Ventilated)



2200 Head Finisher (5 Rooms)
(Pull Plug, Power Ventilated)



1400 Sow Unit Farrow To Feeder Pig



5000 Head Finisher Complex
(Deep Pit, Tunnel Ventilated)

Judges Selected For Beef Expo

MADISON, Wis. — A slate of 11 individuals with a wealth of experience and diversity in the beef industry have been honored by being selected as 1995 World Beef Expo judges.

"These judges will greatly benefit the show by giving their feedback to beef producers on how their herd's genetics fare in the marketplace," said Diane Nichols, livestock manager for World Beef Expo. A total of 19 beef cattle breeds will be exhibited, along with a junior competition, during the third annual World Beef Expo, slated for April 7–9 in Madison, Wis.

Dr. Tom Turner is a professor of animal science at Ohio State in Columbus, Ohio, where he is involved in beef cattle research, extension and teaching. He is coach of the Intercollegiate Livestock Judging Team. His teams have won many contests, including one national championship. He has also coached the high individuals in beef, swine, and sheep (twice) in the national contest. Turner completed his degree at Ohio State and the University of Tennessee. He has judged shows in 22 states and Canada.

Dr. Doug Parrett is a beef cattle extension specialist and a professor of animal sciences at the University of Illinois, where he works with producers in the areas of beef cattle breeding and selection, cow herd management, and market cattle evaluation. In addition, Parrett works with the livestock evaluation teams at the University of Illinois, which have won more than 25 national contests in the last 10 years. His livestock judging has taken him to 28 states as well as Canada and Australia. He has judged more than 30 breeds of cattle, including national shows for 13 breeds.

Knic Overpeck is a life-long resident of Clinton, Ind., and an honor graduate from Purdue University. Overpeck has judged different cattle breeds at a variety of shows, including the National western Livestock Show, American Royal, North American International Livestock Exposition, the Queretaro, Mexico Exposition, the Canadian Western Agribition, and the Calgary Exhibition and Stampede International Livestock Show. Overpeck owns and manages a west-central Indiana farm and cow-calf operation called KO Cattle Company. Registered Simmentals comprise the majority of the cow herd and numerous national champions have been bred and raised in the herd.

Don Boggs was raised on a grain and livestock farm in central Illinois. He received his bachelor's degree from the University of Illinois, master's from Kansas State University, and doctorate from Michigan State University. While at Michigan, he co-authored the widely used textbook, "Live Animal and Carcass Evaluation and Selection Manual;" and coached the livestock judging team to the 1980 national championship at the North American International Livestock Exposition. Boggs was on the research and faculty team at the University of Georgia for six years before becoming extension beef specialist at South Dakota State University in Brookings in 1988.

Jerry Taylor served as a judge at the 1994 World Beef Expo and has judged all breeds of cattle and has the opportunity to evaluate most of the major shows across the country. These include; the American Royal in Kansas City, the National Western Stock Show in Denver, the Eastern National at Timonium, Maryland, the Cow Palace in San Francisco, and numerous state and county fairs. For the past several years, Jerry has managed a 3,000-acre ranch with 500 head of Charolais and Crossbred cattle in Buffalo, Mo.

Greg McCurry is manager of McCurry Brothers Angus of Sedgwick, Kan. He is president of the Angus Association and has served as judge at numerous livestock shows, including Angus judge at the 1995 National Western in Denver.

Mitch Myers was graduated with a bachelor's from East Texas State University at Commerce. He has been a breeder of Belgian Blue cattle since 1989 and owns a small herd of crossbred and Belgian Blues near Comby, Texas. In 1993, he traveled to Belgium to obtain his official certification to judge the Belgian Blue Breed and is one of a handful of people in the U.S. certified to judge the breed.

Judges for each breed are as follows:

Breed and/or Class	Judge	
Angus	Greg McCurry	Sedgwick, Kansas
Belgian Blue	Mitch Myers	Cumby, Texas
Belted Galloway Red Angus, Shorthorn	Tom Turner	The Ohio State University
Charolais, Gelbvieh, Murray Grey	Jerry Taylor	Buffalo, Missouri
ChiAngus, Hereford, Piedmontese	Knic Overpeck	Clinton, Indiana
Galloway, Highland, Salers	Dar Giess	Sauk Rapids, Minnesota
Limousin, Polled Hereford	Don Boggs	Brookings, South Dakota
Maine-Anjou, Simmental	Chuck Simons	Marcus, Iowa
Texas Longhorns	Bill Anthony	Ardmore, Oklahoma
Junior Heifer Show	Doug Parrett	University of Illinois
Junior Steer Show	Tom Hook	Tracy, Minnesota
Showmanship	Parrett, Hook and Taylor	

Conference Set

GETTYSBURG (Adams Co.) — The Adams County Farm Bureau will conduct a National Leadership Conference on Tuesday, Feb. 14 at the Adams County Co-op Extension building.

The program begins at 10:30 a.m. with registration and will continue until 3 p.m.

All county board members, advisory councils, legislative committee members, young farm committees, women's committee and all interested PFB members are urged to attend.

The National Leadership Conference is a national satellite broadcast by AFBF to set the stage for member action on Farm Bureau's 1995 priority issues. The conference will highlight many national issues.

USING DHIA BODY CONDITION DATA HERD MANAGEMENT

A. Jud Heinrichs, Professor
Dairy And Animal
Science Extension

A. Jud Heinrichs

If done on a regular basis, body condition scoring can be used to troubleshoot problems and improve the health and productivity of the dairy herd.

Research and field experiments have shown that fluctuations in body condition influence productivity, reproduction, health, and longevity of the dairy cow. Furthermore, thinness or fatness can be a clue to underlying nutritional deficiencies, health problems, or improper herd management.

Overconditioning (fatness) may result from poor nutrition or reproduction management. A fat cow is more susceptible to metabolic problems and infections and more likely to have difficulty at calving.

Overconditioning often begins during the last three to four months of lactation when milk production has decreased, but grain and total nutrient levels have not been reduced accordingly. Other possible causes of overconditioning are prolonged dry periods or overfeeding during dry periods.

Underconditioning (thinness) can frequently lower production and milkfat levels because the dairy cow has insufficient energy and protein reserves. Thin cows often do not show heat or conceive until they begin to regain or at least maintain body weight. Care must be taken when feeding these animals to maintain production while increasing body reserves.

Once the concepts of body condition and the potential it has for fine-tuning rations for dairy cattle in all stages of lactation is understood, the next step is to incorporate the data into the herd's management system. The monthly DHIA report is a great tool for this purpose. But first data must be recorded for a particular herd.

One individual should evaluate the herd, or a good sample thereof, monthly. Typically, the farmer, veterinarian, or a feed industry representative will score the cows. This can be done at any time, but preferably within two weeks of a test date. A DHIA technician will add the data to the DHIA management reports at no cost to the farmer.

Where to find body condition scores on the PA DHIA sheets: Body condition scores can be found in two places on the Pennsylvania dairy herd improvement sheets — the PA DHIA Herd Summary Report II and the individual cow page.

The first place to look for body condition scores is on the PA DHIA Herd Summary Report II. The body condition scores appear on the far right hand side in the center of the summary report under "Profile of Cows by Lactation Number." In this area, scores are broken down into first, second, and third lactations, and the average or total for all lactations. The body condition scores appear on the far right, with the number of cows scored to the immediate left.

Body condition scores are also found on this summary report just under "Profile of Cows by Lactation" and to the left in the "Profile of Cows by Group Number." These scores can be useful to the farmer who physically groups his cows (for example, in a freestall building as opposed to a stanchion barn). However, cows in a stanchion barn can easily be assigned to groups without moving them, an arrangement that may allow the farmer to feed each cow according to her group needs.

Using the body condition scores as listed in these areas of the DHIA reports, farmers can monitor each group of cows and to see if they are achieving recommended or desired body condition score on average. Body condition scores of a group readily reflect this.

Typically, a first-lactation cow would score lower than a cow in third lactation. A cow in first lactation is still growing and has a smaller body capacity. Cows in later lactations most often have a larger body capacity, and thereby consume more feed. Such cows can consume more calories each day from a similar ration.

This information also could be used to access individual cows in a given lactation and determine how they compare to others, as well as to help in the assessment of overall herd management.

The "Profile of Cows by Days in Milk" can be found on the bottom of the page. This area will be very helpful to farmers because it shows body condition scores for cows by the length of time they have been milking. Lactations are broken down into specific management categories of days in milk so that closer observation can be made in each lactation.

Once again, it would be common to see a cow enter a lactation with increased body condition score of 3+ or 4-. As the lactation progresses, the score will decrease to a 3- or even a 2+ six to ten weeks into the lactation. In the 100- to 199-day area, a farmer would want to see the score level out or even rise closer to a 3. A score of 3 to 3+ in the 200 to 299 day range would have the cow ready for late lactation and the dry period. Scores should continue to rise in the 3+ or 4-. This should put the cow in an optimal state to dry off in preparation for the next lactation. Finally, a summary of the current lactation body condition scores can be found on the individual cow summary page.

Penn State Dairy and Animal Science Extension has prepared information that further explains

Environmental Stewardship Of Pesticide Use Partnership Formed

WASHINGTON, DC — The U.S. Environmental Protection Agency (EPA), the U.S. Department of Agriculture (USDA) and the U.S. Food and Drug Administration (FDA) have formed a partnership with a number of groups and companies representing agricultural and non-agricultural pesticide users to promote environmental stewardship in pesticide use in the United States.

The partnership is the first under the commitment made by the three agencies before the U.S. House Of Representatives in September 1993 to work jointly with pesticide user groups to develop commodity-specific initiatives toward achieving the Administration's goal of reducing the use and risks of pesticides in the United States.

"Voluntary pollution prevention has been a cornerstone of our efforts to protect human health and the environment, and this new pesticide partnership is an important step toward that goal," said Carol M. Browner, EPA Administrator. "I congratulate the companies and grower groups that are joining with us for their forward-thinking approach to environmentally-sound pesticide use practices and look forward to seeing others follow their lead."

The groups and companies that have joined the partnership include: the National Potato Council, the American Corn Growers Association, the International Apple Institute, the California Citrus Research Board, the California Pear Growers and California Pear Advisory Board, Appalachian Power, Atlantic Electric, Carolina Power & Light, Columbus Southern Power, Delmarva Power, Duke Power, Indiana Michigan Power, Kentucky Power, Kingsport - Power, New York State Electric & Gas, Ohio Power, Pennsylvania Electric, Pennsylvania Power and Light, Pennsylvania Rural Electric Association, the Virginia, Maryland, Delaware Association of Electric Cooperatives, Wheeling Power, and Wisconsin Public Service Corp.

In forming this partnership, the federal government agencies and the participating groups and companies agree that environmental stewardship is an integral part of pest management practices. Specifically, the partnership has agreed to commit to a number of guiding principles that will shape pest management practices. The principles are:

• Pesticide users will continue to work towards pest management practices that reduce risk to humans and the environment and will continue to work to minimize the use of pesticides where desirable and practicable.

• The groups and companies will continue to develop and implement regional environmental stewardship plans containing specific pest management strategies that reduce risk to humans and the environment.

• In recognition of the need to maintain cost-effective pest control in the marketplace, the federal government will seek to foster, fund and promote through education, research and other means the adoption of alternative pest management technologies and practices that enhance pest management and reduce pesticide use and risk.

• The federal government shall integrate the environmental stewardship plans developed by the participating groups and companies into its agricultural and environmental policies and programs.

Many of the grower groups and utility companies have taken specific steps to demonstrate their commitment to the partner-ship. The grower groups have committed to more research and demonstration into Integrated Pest Management techniques and programs, the development of prediction models for more targeted and precise pesticide applications, education programs to encourage alternative pest control technologies, and cooperation with equipment manufacturers to find application techniques that maintain pest control efficacy while reducing application rates.

The utility companies have committed to promote regional input on environmental stewardship so that a national environmental stewardship plan for utility rights-of-way can be formulated; to research IPM technologies and application methods which will lower the risk to humans and the environment; and to promote worker training on pesticide use to lower the level of risk to the workers and the environment.

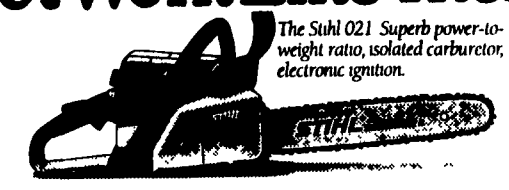
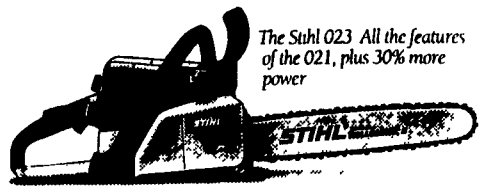
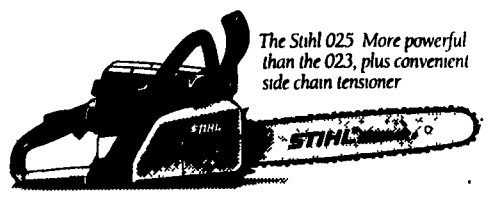
The Chain Saws For People Who Want To Act Like Lumberjacks, Not Work Like Them.



The Stihl 021 Superb power-to-weight ratio, isolated carburetor, electronic ignition.



The Stihl 023 All the features of the 021, plus 30% more power



The Stihl 025 More powerful than the 023, plus convenient side chain tensioner

The Stihl 026 Designed for professional use, or the demanding weekend-woodcutter

If you know a little about the timber business, you know that Stihl chain saws have been used by professional woodcutters for over sixty years.

So maybe you think Stihl equipment is "too good" for a suburbanite or farmer or anyone else who needs to cut wood on an occasional basis.

Well, we're happy to tell you that Stihl makes a whole series of chain saws with your needs in mind.

But don't confuse them with discount-store chain saws.

All Stihl saws are designed for performance, ease of handling and starting, and durability.

Now, about the 026 shown at the bottom: we'll admit we sell this saw to professional woodcutters. But it's also bought by people who simply put a lot of hours on a saw every year.

And by the way, when were you ever unhappy because you bought a product that was too good?

For The Part Of You That Promised You'd Never Compromise.

Mid-Atlantic Conference Set

MAYS LANDING, N.J. — To many of us, "planning" often starts as a four-letter word, and too often, we do some rough calculations in our heads and say we have a plan.

But farming is a serious business and for our operations to remain viable, well thought out (and written) marketing and business plans will be essential.

The theme of 1995 Mid-Atlantic Direct Marketing Conference (MADMaC '95) is "Charting Your Future on Foundations of the Past".

February 22-25 are the dates for MADMaC '95, which will be the 13th year of collaboration on this regional event at the Marriott Seaview Golf Resort in Absecon, N.J. The Opening session speakers will address the past, present, and future of direct marketing.

Taking a look at a historical perspective of the industry will suggest some future directions. To help understand the planning process, Bob 'Matty' Matarazzo of RJM Marketing will address the topic to the general assembly as well as being featured in one of the breakout sessions. Even on the annual tour of markets scheduled for Saturday following the two-day program, planning for everything from the day-to-day scheduling to dealing with regulatory and consumer issues that affect how you manage your market will be discussed.

MADMaC '95 was developed by agents, specialists and direct marketers from New Jersey, Delaware, Maryland, Pennsylvania, and Virginia. In addition to the traditional general and break-out sessions, feature stories, and a popular "Bring Slides/Let's Talk" gathering, a feature at the Thursday evening round table discussions will be author Eric Gibson of Carmichael, Calif. His recently published book, "Sell What You Sow! The Grower's Guide to Successful Produce Marketing," features some of the best marketing ideas in layman's terms gathered from farm marketers around the country.

An extra preconference workshop was added to the program this year in response to suggestions from earlier conferences. This basic, hands-on course in flower arranging will be offered to farm market operators who are considering this value-added enterprise as a potential addition to their market. There is also room for more than 50 exhibitors who will bring in supplies (such as boxes, fruit basket trimmings, signs, equipment (such as juicers, and ovens) and supplemental, value-added products (such as preserves, pies, and candies) for farm markets to see, sample, and order during the conference.

Programs and registration materials are being mailed to direct marketers in the five Mid-Atlantic states (including Virginia officially this year) in early January.

If you are interested in the conference and do not receive a mailer shortly, contact your county agricultural agent (who should have copies from your state's extension marketing specialist or agents) or the Richard VanVranken, Lead Conference Coordinator, at Rutgers Cooperative Extension of Atlantic County, 6260 Old Harding Highway, Mays Landing, NJ 08330, (609) 625-0056.

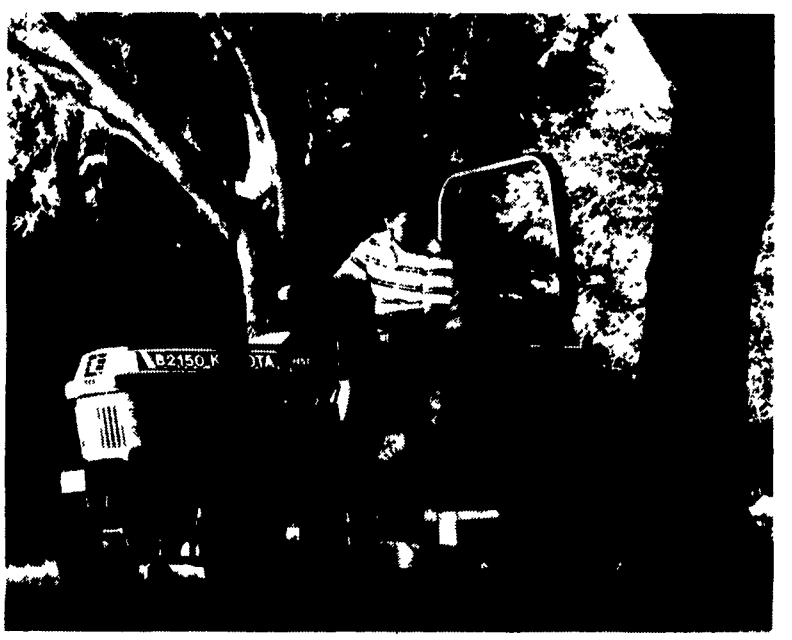
Grower Wins FMC Sweepstakes

PHILADELPHIA — Stephen Burkholder, an Alburtis corn grower, has won the grand prize for FMC Agricultural Chemical Group's "Facts of Furadan" sweepstakes. As grand prize winner, Burkholder will receive a Custom Delivery System for applying Furadan 4F® Insecticide-Nematicide and enough Furadan to treat up to 500 corn acres.

Kenny Cordell, FMC North American herbicide marketing manager said "The 'Facts of Furadan' sweepstakes generated thousands of farmer entries from key corn producing states. Farmer interest in the new technology for controlling corn pests is strong as indicated by the number of corn growers entering the sweepstakes and the number wanting more information about Furadan 4F Insecticide-Nematicide."

Furadan 4F Insecticide-Nematicide is a liquid formulation product that provides broad-spectrum insect control in corn, including control of true common stalk borer, corn rootworm larvae, European corn borer, flea beetles, nematodes, potato leafhoppers, root weevils, sunflower stem weevil and wireworms.

A MACHINE FOR ALL SEASONS

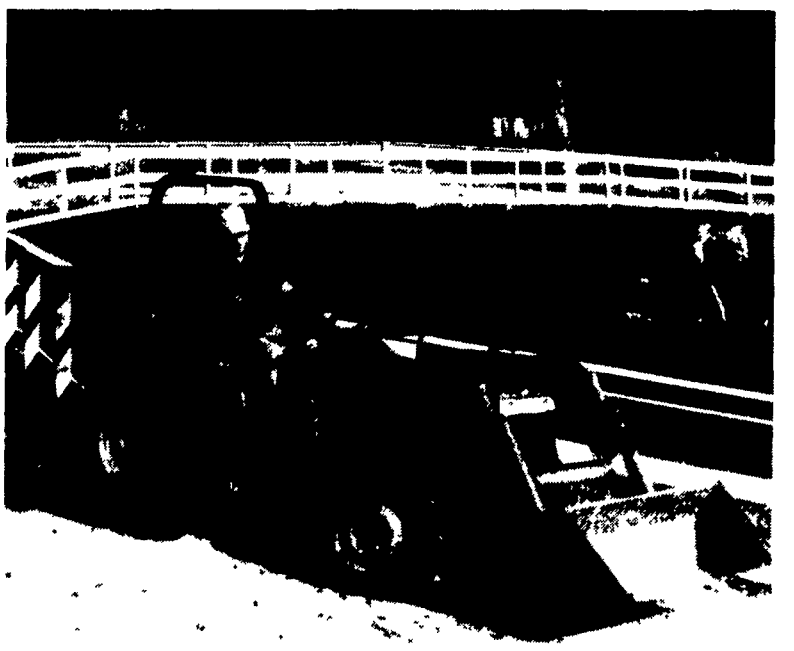


No matter what the task or season, Kubota's mid-sized tractors have the versatility and implements to handle the job.

Like our B-50 Series tractors that come with liquid-cooled diesel engines, 2 or 4-wheel drive, quick-attach implements and a powerful 13 - 20 PTO HP. Optional Bi-Speed Turn allows for amazing precise turns in 4-wheel drive for lawn care in the spring and snow removal in the winter. HST transmission and power steering are available, too.

Our Kubota L-Series tractors provide the extra horsepower you need, boosting 20 - 49 PTO HP. Built with liquid-cooled Kubota diesel engines, these mid-sized tractors come in 2 or 4-wheel drive. These models come with lots of choices which include the new Ever-Clutch - a first-of-a-kind wet clutch that doubles clutch life and even comes with its own warranty and the Kubota exclusive Glide Shift Transmission, enabling you to "glide" through 8 forward and 8 reverse gears without clutching.

When you need a tractor that can handle any job in any season, look at a Kubota.



Kubota Tractor Corporation markets a full line of tractors through a nationwide network of over 1,000 dealers.

National FFA Week Feb. 18-25

ALEXANDRIA, Va. — FFA members in high schools all over the nation are planning to celebrate and highlight the achievements of FFA and agricultural education during National FFA Week, Feb. 18-25.

This year's theme is "FFA — The Leadership Advantage." During FFA Week and throughout the year, FFA chapters conduct activities which develop the leadership skills of high school students. These experiences will prepare them for important leadership roles in the future.

The week also provides members in thousands of chapters across the U.S., Guam, Puerto Rico and the Virgin Islands the chance to create awareness of and support for agricultural education and the FFA. Public service announcements at the local, state and national levels will help spread the message.

Agricultural education classes stress hands-on experience in diverse areas of agriculture. FFA activities provide leadership and personal development, career training and award incentives for young people.

Corey D. Flournoy, national FFA president from Chicago, Ill., said "FFA Week is an important time to share success stories about high school agriculture and FFA. Many leaders in American agriculture were members of FFA and studied agriculture education. They are leaders as well in their communities.

"We are proud of the increasing numbers of members who are joining our ranks," said Flournoy. "The organization achieved an increase in membership for the first time in a number of years in 1992 and increased again in 1993 and 1994. We are also seeing significant changes in the ways chapters and their advisors serve their communities. The attendance at the national convention in November was a record-breaking 34,491."

Each year, FFA Week is held during the week of George Washington's birthday to recognize his leadership and commitment to American agriculture. The National FFA Center is located on part of Washington's original Mt. Vernon estate near Alexandria, Va. Local chapters celebrate the week with special meetings, extra media efforts, the distribution of FFA materials to students, parents and adult leaders, and special events to tell younger students about FFA.

Business News

Baler Produces Optimum Size Large Bales

COLUMBUS, Ind. — The Claas® Quadrant 1200 Square Baler produces dense 4-foot wide x 2¼ -foot high x up to 8-foot long bales for fast, productive baling of straw, hay, and silage and reduced time in the field.

The highly compressed, efficient sized large bales allow stable, high stacking, increasing storage and transport capacities. To ensure good fermentation and reduce spoilage, the bales can be stacked and covered to create an airtight package of silage.

The Quadrant 1200 is equipped with a 6½ -foot wide, hydraulically operated pickup and resilient spring steel double tines to provide reliable, thorough harvesting. Six high-performance knotters driven by universal drive shaft and gears ensure that the bale is securely tied. The Quadrant 1200 holds 24 balls of sisal or plastic twine. Other features include adjustable bale length and density, swinging drawbar hitch, wide angle universal drive shaft, and retractable support jack.

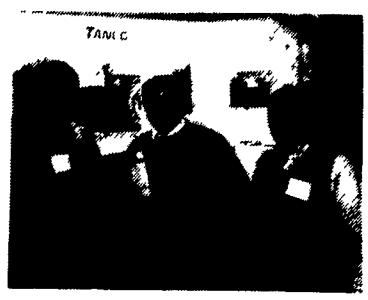
Fast, productive baling of straw, hay and silage is achieved with the Claas® Quadrant 1200 Square Baler. It produces dense 4-foot wide x 2¼ -foot high x up to 8-foot long bales that provide stability and high stacking, increasing storage, and transport capabilities.

Cummings & Bricker Award Dealers

HARRISBURG (Dauphin Co.) — Bill Lopatofsky of North East Dist. & Equipment, Clifford, received Top Dealer Award for 1994. The award was presented at the 79th Pennsylvania Farm Show by Jim Cummings, president, Cummings & Bricker, Inc., Carlisle, and Cummings & Bricker territory manager Jim Heintzelman of New Tripoli.

Cummings & Bricker, Inc. distributes a number of equipment product lines to more than 600 farm equipment dealers from Maine to North Carolina.

North East Dist. & Equipment achieved the top volume award by utilizing exceptional product knowledge, providing demonstrations, and outstanding after-sales service to customers. Prominent among products sold by North East are Tanco round bale wrappers and Deutz-Fahr round balers. North East has sold Deutz-Fahr products for more than 20 years.



Bill Lopatofsky, center, of North East Dist. & Equipment, Clifford, receives Top Dealer Award for 1994. The award was presented at the 79th Pennsylvania Farm Show by Jim Cummings, president, Cummings & Bricker, Inc., Carlisle, and Cummings & Bricker territory manager Jim Heintzelman of New Tripoli.

In addition to the plaque, Lopatofsky received a personal gift in appreciation of his efforts.

Also, Jim Heintzelman of New Tripoli received the Top Salesman Award for 1994. The award was presented at the 79th Pennsylvania Farm Show by Jim Cummings, president, Cummings & Bricker, Inc., Carlisle.

Jim Heintzelman, right, of New Tripoli receives Top Salesman Award for 1994. The award was presented at the 79th Pennsylvania Farm Show by Jim Cummings, president, Cummings & Bricker, Inc., Carlisle.

Swope To Retire From Silo Sales

MYERSTOWN (Lebanon Co.) — John Swope, sales representative for Star Silos, plans to retire in 1996 after serving the silo industry for 31 years.

Swope, who has sold silo equipment at the state Farm Show since 1964, was honored recently by Boyd Wolff, state secretary of agriculture, at the Farm Show for Swope's many contributions to the industry.

Swope began selling equipment for Star Silos in 1964 at the Farm Show. In 1977, he left Star Silos to manage his own Ribstone Silo business, but then returned as a field representative for Star Silos in 1988.

Swope, who has attended the Farm Show since 1964, said there has been many changes at the annual event. Back then, there were more silo companies and tractor and combine equipment at the show. Now, there are only a handful of manufacturers at the show.

Swope thanks all those who supported him during the many years in the industry. In his retirement, Swope said he will work on his own farm, where he raises 60-70 head of steers annually.

Star Silos of Myerstown is a dealer for Little David, J-Star, Rissler, Starline, and Van Dale equipment.

John Swope, right, who has sold silo equipment at the state Farm Show since 1964, was honored recently by Boyd Wolff, state secretary of agriculture, at the Farm Show for Swope's many contributions to the industry.

Beyer Honored By Association

BRIDGEPORT, N.J. — George L. Beyer, a field representative of the New Jersey Farm Bureau, was recognized and received honorary membership from the New Jersey Agribusiness Association (NJAA) at its annual banquet recently.

Beyer was recognized by Ray Samulis, president of the association, for his long service to NJAA, and its predecessor the Pesticide Association of New Jersey.

Said Samulis, "We have appreciated George's long service to us as our legislative chair, and as liaison from the New Jersey Farm Bureau. His information on legislative and regulatory activities as they relate to pesticides and fertilizers are invaluable to us."

President Samulis also emphasized Beyer's accomplishments as Chief of the Office of Pesticide Control in the NJDEP from 1971 to 1983. "George Beyer developed the regulations of the Pesticide Control Act of 1971 and always had the best interests of the farmer in mind," said Samulis.

Beyer was also research-scientist, principal chemist, and senior chemist in the office of pesticide control before assuming the duties as "chief." He was also Assistant Engineer in the New Jersey Department of Transportation and served his country as a member of both the United States Navy and the United States Coast Guard.

Dekalb Genetics Issued Corn Transformation Patent

DEKALB, Ill. — Dekalb Genetics Corporation said that it has secured a key U.S. Patent (# 5,384,253) for producing genetically transformed corn.

The patent covers a process called electroporation, which introduces foreign genes into corn cells using an electrical pulse. Electroporation is an alternative to corn transformation using a gene gun to introduce foreign genes.

"This is the only patent issued by the U.S. Patent Office that claims a method of making fertile, transgenic corn plants. In addition to this issued U.S. patent, Dekalb has a patent pending on the electroporation technology with the European Patent Office," said Bruce P. Bickner, chairman and chief executive officer.

"Corn is one of the world's most important crops, and there is enormous potential to improve the crop's value through genetic engineering," Bickner said.

Dekalb's Discovery Research facility, based in Mystic, Conn., is developing a number of corn hybrids with the aid of transformation. Several products are currently in field tests, including hybrids with herbicide resistance, insect resistance, and improved nutritional value.

PACMA To Market Homer Meal

PALMYRA (Lebanon Co.) — PACMA, Inc. has announced that it has entered into an agreement with Homer Oil Co. to market Homer Meal. Under the agreement, PACMA will be the sole distributor of Homer Meal south of New York State.

Homer Oil Co., located in Homer, N.Y., has been successfully marketing Homer Meal in New York since 1985. Homer Meal is an "old process" soybean meal, and is a product of locally grown soybeans. They use five mechanical extraction presses, which yield higher concentrations of undegraded protein than competing soy process products.

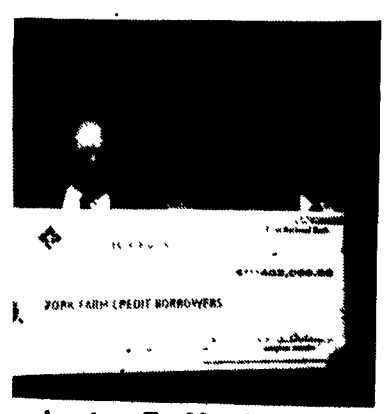
"Products possessing high levels of bypass protein have always had their place in the dairy industry, but recent reports have placed increased significant benefits associated with its use," said Richard Cole, vice president and program manager for Homer Meal sales at PACMA.

Homer Meal has shown enormous growth in New York and New England, as production increases have encouraged more dairy feed manufacturers and total mix dairymen to incorporate Homer Meal in their rations. Pennsylvania and Maryland show great potential for this bypass meal, and PACMA encourages nutritionists, feed formulators and veterinarians to call the PACMA office for more information.

York Farm Credit Returns Cash To Members

The holidays became a little brighter for 1,746 York Farm Credit members/borrowers when the association returned a total of $403,000 in allocated surplus to them.

York Farm Credit files as a cooperative with the IRS, allowing it to return allocated surplus, earnings held by the association in the name of its individual members/borrowers, at a future time. Members/borrowers derive benefits based on their use — the more business they do with York Farm Credit, the larger their refund check, so patronage refunds actually reduce their cost of borrowing. This patronage refund is the first revolvement since York Farm Credit's merger in 1989 and represents one-half of 1990 total patronage.



Lester E. Martin, board chairman, and Jay V. Rush, president, display a $403,000 check payable to York Farm Credit borrowers. The check represented the total amount distributed among 1,746 members/borrowers in the association's first patronage refund since its 1989 merger.

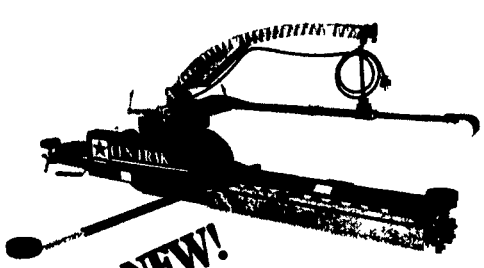
On The 2 Best RING DRIVE UNLOADERS

Move 'Em Out!



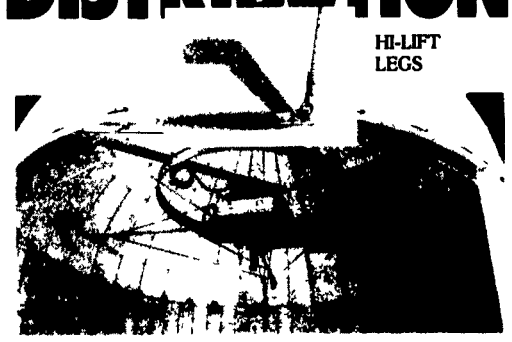
NEW! **Cen-Trak™**
Power Drive Unloader

Meet Cen-Trak! The new and better concept in single-cable unloaders. Simple, dependable power drive design eliminates the problems of other high-torque, center-drive machines. **See your Starline Dealer for literature and pricing!**

STARLINE

Built to last, priced to sell.

VOLUMAXX GIVES YOU A CHOICE OF DISTRIBUTION



The new advance design Volumaxx unloader gives you the best of both worlds your choice of distribution. New *HI-LIFT* legs let you raise the unloader an extra 15" into the silo roof, so you can use a conventional side distributor. Or, choose the Jamesway Powermaxx™ broad pan silage distributor. With proper distribution, you'll have better quality feed, and you'll increase your silo's capacity up to 35%. And we can prove it!

JAMESWAY

Volumaxx™ unloader. Expect the best from the leader.

"IT IS TIME TO ONCE AGAIN GET SERIOUS ABOUT STORING YOUR VALUABLE FEEDS!!!"

The recent "innovations" and temporary methods of storing your grains and forages are just not protecting your feeds like they should, nor are they really efficient.

Research and practical experience has shown that "the lower silo has never been equalled in its ability to protect your forage quality." And remember..." on most dairy farms, forage quality is the single most important factor affecting profit."

Contact us soon to be sure you get on our schedule to have your poured concrete tower silo constructed in time!

SILOS TO STORE
200 TO 4000 TONS EACH!
No Used Silos!

Best in the Country

For rough duty, rougher weather: Rugged, practical, cost-efficient Centurydrain™ roofing and siding.

Centurydrain is the roofing and siding to use for a strong, tight structure that'll carry you through the years of heavy snows, driving rain, and ripping winds.

Wheeling Centurydrain is a pure practically: full-hard, high tensile steel; galvanized for toughness, durability, and rust resistance; and with an exclusive drain channel for dry, snug interior.

Handsome appearance, too: bold shadow lines and choice of rich, baked-on colors. The best in the country is right here, Stop by.

A 1st Class Team Together For 25 Years!

Milk's got more!

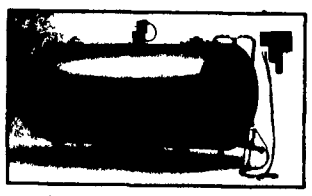
RUFUS BRUBAKER REFRIGERATION

And...

MUELLER DAIRY FARM EQUIPMENT

Offer

Scroll-Compressor Technology
New in 1994



You may pay less for some dairy farm equipment... but it can cost you more!

Equipment cost is not the only cost of cooling milk.

In the long run, total operating costs of a Mueller' milk-cooling system are generally substantially less than those of "bargain-brand" milk-cooling equipment.

Example	Mueller	Competition
Cost of equipment	$31 000	$28 000
Cost of electricity @ 08 kW for 12 000 lbs milk day for 10 years	$17 550	$22 850
Total operating cost for ten years	$48 550	$50 850
Savings	$ 2 300	

Contact your *Mueller* distributor for further comparisons.

From MAR-PRO, INC.

4 - 1 - 1 Liquid

MAR - PRO

AG - FISH

Plant food From The Sea
Remains Liquid At All Times

- **WHAT IT IS:** LIQUID AG-FISH Plant food is a fish emulsion product that has been carefully refined to meet our high standards of quality. It is low cost and basic in any liquid plant feeding program.
- **HOW TO USE LIQUID AG-FISH**

For corn and row crops: AG-FISH should be placed in the row, close to the seed, with a squeeze pump or other liquid applicator, at the rate of 2 gallons per acre.

For tomatoes or other transplanting: AG-FISH is best applied in the transplanting water, at the rate of 3 gallons pr acre.

AG-FISH can be used as an effective foliar feeding by diluting 1 to 2 gallons to 20 gallons of water and applying with 50 gallon nozzles.

- **GUARANTEED ANALYSIS**
- **AVAILABLE IN:** 5 Gallons; 55 Gallon Container or Bulk
- **For all kind of field crops/vegetables/fruits**

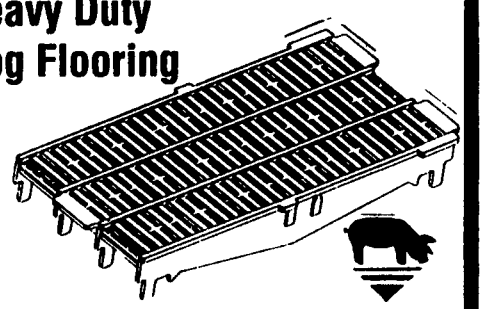
REPLACING HOG FLOORING? CONSIDERING NEW CONSTRUCTION?

☑ CHECK OUT Polygrate™

Heavy Duty Hog Flooring



Time Tested and Proven
This style of POLYGRATE was first introduced in 1981. Over the years Farocx has continued to refine this product. POLYGRATE is one of only a few "World Class" floors that has stood this test of time.

Outstanding Traction
POLYGRATE'S unique "high-low" finger design provides outstanding traction for pigs of all sizes, while enhancing safety and comfort.

- ◆ POLYGRATE'S rounded corners minimize injuries. The edges are beveled providing a smoother, safer surface that promotes comfort, too.

What Does This All Add Up To?

- ◆ More piglets survive until weaning
- ◆ Less splay/spraddle leg problems
- ◆ Heavier piglets at weaning
- ◆ Better conditioned sows at weaning

Anything Less Isn't Good Enough

If livestock is your business, Eby Gooseneck Trailers include these features to protect the livestock you transport:

- Durable all-aluminum construction with less weight for more payload
- Axies, wheels, tires and brakes that are designed to carry the weight the trailer will hold
- Gates and doors designed for easy loading/unloading
- Proven post and slat design to control airflow and easily close up for winter conditions
- Aerodynamic design to improve fuel economy

Eby Gooseneck Trailers are available in lengths from 12 to 32 feet with a choice of widths and inside heights. We offer every custom option, including stainless steel front end for great looks.

Whatever kind of livestock you transport, you can rely on EBY products to do the job right.

Eby custom-builds bodies and trailers for all types of livestock, grain and farm commodities.

Livestock Notes

Big Crops are Mixed Blessing

H. Louis Moore
Professor Ag Economics
Penn State

Producers in the Midwest are scurrying to take advantage of the loan deficiency payments on corn. The size of the crop keeps growing, and the price keeps drifting lower.

The $1.90-per-bushel price posted in Chicago gives the illusion that the price at the farm is still well above the loan rate of about $1.89 (depending on the county-posted price). We must remember that there is a transportation differential (basis) at county points, which is lower than Chicago. As you come east to Pennsylvania, there is a positive basis of 30 to 40 cents per bushel.

Corn prices are likely to drift lower as the harvest of the record 9.6 billion-bushel crop progresses. The price of corn has not fallen as much as yields have increased, so incomes to producers are expected to be higher.

In the Midwest, equipment is being stressed by high yields, as corn in many places reaches 200 bushels per acre. Grain storage is full, and many elevators are storing grain on the ground as a temporary measure. Grain producers may salvage a better crop season by storing as much grain as possible for sale in the first half of 1995.

The grief of cash grain producers in the Midwest is translated to better news for Pennsylvania, where 70 percent of cash receipts in agriculture come from the sale of livestock, poultry, eggs, and milk. Nationally, only 52 percent of cash receipts come from livestock and animal products. Lower grain prices mean that feed costs will be lower in the year ahead. Lower production costs will help the bottom line, but we have an oversupply of all kinds of meat. Prospects for considerably higher livestock prices are not good for the remainder of 1994.

USDA's Hogs and Pigs Report released late in September indicates that price weakness will continue in the hog business. The number of all hogs and pigs on farms was up 4 percent on September 1, indicating that fall and winter supplies of pork will be up 4 to 5 percent. The recent price disaster of hogs in the low-$30 range has not caused any cutback in production. Producers indicate that they will farrow 5 percent more sows in the September-November period and 4 percent more in the December-February period. Many small producers may be forced out of business during this period of prolonged low prices.

Fed cattle supplies should drop some during the remainder of 1994, but price gains will not come easily. There is very strong competition from an overabundance of pork and poultry. Lower priced feeder cattle and decreasing feed grain prices are helping cattle feeders to get back near the break-even price. Smaller farmer/feeders seem to have been hit hardest by the late spring price decline. Inventory in the 1,000+ capacity feedlots in the seven major cattle feeding states is still increasing. The inventory in the feedlots with over 1,000-head capacity now accounts for 91 percent of the total.

Observations On Early Weaning

John W. Comerford
Assoc. Prof. Dairy and Animal Science Penn State

Researchers at Penn State are conducting a trial that involves weaning some calves at four months of age and comparing their performance with calves weaned at a more conventional seven months. One twist is that when the calves are weaned, they are returned to the pastures from which they came. The objective is to see what kind of performance we can get from grazing calves and if we can reduce the stress of weaning by returning them to familiar surroundings.

So far, the early weaned calves have performed very well. One group that had their dams removed from sight and hearing after weaning gained an average of 17.8 pound per head in the first week after weaning and 34.3 pound per head over three weeks. Calves left on their dams gained an average of 19.9 pound in the first week.

Dams for the latter group were left within hearing after their calves were weaned, and it appears their calves did slightly better. They seemed to start grazing and settle down faster than those with the dam removed.

There has been no sickness in the calves, and they all have gained weight so far. These findings have been very encouraging and present some helpful alternatives for pasture use, marketing, and backgrounding calves.

Table 1: Vitamin Degradation in Vitamin-Mineral Premixes
Percent of vitamin remaining in premix

Vitamin	2 Months w/o Minerals	2 Months w/ Minerals	6 Months w/o Minerals	6 Months w/ Minerals
Vitamin A	96	80	89	58
Vitamin D	97	86	92	65
Vitamin E	99	93	97	82
Vitamin K	73	36	48	0
Riboflavin	95	85	82	59
Vitamin B-12	99	97	97	89
Pantothenic acid	95	86	82	58

Niacin	96	86	81	58
Choline	99	98	98	91

Vitamin Stability In Vitamin-Trace Mineral Mixes

Kenneth B. Kephart
Assoc. Prof. Animal Science
Penn State

Feed manufacturers and producers recognize that vitamin stability is decreased when vitamins are mixed and stored in the same bag with trace minerals. Trace minerals cause vitamin degradation by catalyzing oxidation-reduction reactions with vitamins. The question has always been, "How long can vitamins and minerals be stored together, and to what extent are vitamins destroyed?"

The percentage of active vitamins remaining after two and six month's storage is presented in the table below.

No matter what the storage conditions are, vitamins do not retain their activity indefinitely. The good news is that most of the vitamins we use in swine production, even after six months of storage, will remain at least 80 percent active if stored without minerals. The exceptions are vitamin K and folic acid. Although both of these vitamins are important, they aren't as critical as other vitamins.

Significant amounts of vitamin K are manufactured by microbes in the gut of the pig, helping reduce the requirement. Folic acid is important when moldy grain is included in the diet. It also improves performance of sows under normal conditions, but the response is not dramatic.

Another important conclusion that can be drawn from the table is the detrimental effect of minerals on vitamin stability. Based on these data, swine producers purchasing vitamins and minerals in one package should make every effort to use their inventory in less than two months. The reason is obvious, especially when you consider that the product may have been stored for some time before it reached the farm.

Although not indicated in the table, choline can also have a negative effect on vitamin stability. That is because choline draws moisture which reduces vitamin stability. As a result, removal of choline from the vitamin premix will cut vitamin losses by half. For commercial manufacturers, this may be an important issue, but for swine producers, the presence of choline in vitamin premixes will be of little consequence so long as the premixes are used within two months.

Feedlot Test Complete

John W. Comerford
Assoc. Prof. Dairy and Animal Science Penn State

The first Pennsylvania Feedlot Test is complete, and the calves performed very well. In spite of poor weather conditions, a pneumonia problem, and lousy markets at sale time, fully one-third of the consignors received a profit for feeding their calves. Overall, the economic performance of the calves was better than what the rest of the cattle feeding industry had been experiencing.

One of the objectives of the test was to determine the value of the feeder calf after it was fed out. In the top one-third of the steers (based on profit) the average value of a calf entering the feedlot was $93/cwt. Because this value is higher than the price of calves last fall, it indicates these calves were worth more than the market was prepared to pay. Thus, the breeders benefited from retaining ownership as a marketing tool for their calves.

Secondly, the difference in profit between the top and middle third of the steers was about $50 per head. Because breed, carcass value, and carcass grade did not differ among groups, the genetic potential of the cattle to grow and perform in the feedlot made the difference. The top group averaged 2.87 pounds per day, and the middle group averaged 2.7 pounds. Not surprisingly, the feeder calf value of this middle group was $84/ cwt, or just about the average price for feeders last fall.

Table 2. Carcass data for Pennsylvania Feedlot Test steers for top-, middle-, and low-profit groups

Farm Family Recognized For Water Quality Improvements

MONTROSE (Susquehanna Co.) — Increasing numbers of farmers in Susquehanna County have demonstrated their commitment to improving the quality of neighboring streams and rivers by installing a variety of farm practices. The practices are aimed at proper management of soil and soil nutrients, including animal waste and commercial fertilizers.

The farmers are participants in Pennsylvania's Chespeake Bay program. The program is designed to reduce the amount of sediment and nutrient pollution entering local waterways, which eventually empty into the Chesapeake Bay. The program is administered locally by the Susquehanna Conservation District through an agreement with the State Conservation Commission, DER.

Exactly $302,830.91 in cost share funding, as well as technical assistance, has been provided to Susquehanna County farmers since 1990, through the combined efforts of the Susquehanna Conservation District, the Natural Resources Conservation Service, the State Conservation Commission, the Bureau of Land & Water Conservation, DER and the U.S. Environmental Protection Agency.

Jim and Kay Garner, of Wyalusing Watershed, were recognized at the local Chesapeake Bay Program Committee Meeting for their completion of best management practices on their farm. They received a sign that will be erected at the entrance of their farm.

Also recognized were Lillian Theophanis, district manager for her 20 years of dedicated service and John Benscoter, nutrient management technician for his outstanding efforts and contributions to the Chesapeake Bay Program in Susquehanna County.

PSEUDORABIES HEADLINE UPDATE

A column to update hog producers on the Pennsylvania Pseudorabies Eradication Program.

PSEUDORABIES NATIONAL PROGRAM STATUS

Dr. Arnold Taft
Swine Health Staff
Veterinary Services
USDA-Animal And
Plant Health
Inspection Service

By January 1, 1995, nearly all herds in the United States had been tested for pseudorabies. Nearly all known infected herds are on a cleanup plan.

Herds are being released from quarantine at a greater rate than newly infected herds are being discovered. The release of quarantine of infected herds will continue at an accelerated rate now that all herds are working on cleanup plans.

Widespread use of vaccine for breeding animals and finishers where indicated has greatly reduced the spread of pseudorabies. As more herds clean up, there will be a reduced amount of pseudorabies virus left to infect other susceptible animals, thus further reducing the number of newly infected herds.

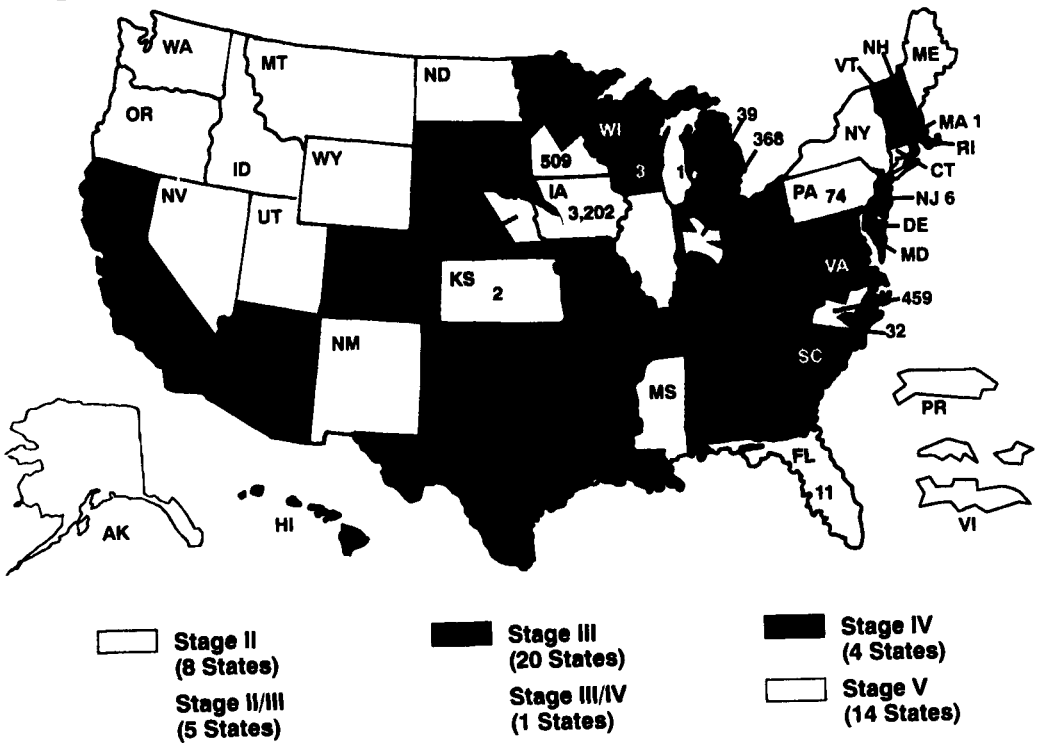
Only 12 states remain with more than 10 pseudorabies infected herds. All states have the goal of being free by the end of the year 2000. Eradication will eliminate the costs of treating pseudorabies and the accompanying diseases.

A study at Iowa State University in the mid-1980s estimated that pseudorabies was costing U.S. swine producers more than $21 million annually. A recent benefit-cost analysis published by The Ohio State University states that pseudorabies may cost some infected herds as much as $6/hundredweight of swine produced.

The elimination of pseudorabies is cost effective and, furthermore, may greatly enhance the U.S. swine industry's position in the international pork market.

Pseudorabies

Program Stages and No. Infected Herds-Jan. 1, 1995



Map showing Pseudorabies Program Stages, January 1, 1995.

STAGE I — PREPARATION — This is the initial stage of the program. All states have advanced beyond this stage.

STAGE II — CONTROL — Infected herds are located — Cleanup plans are initiated — many herds being released from quarantine. Some restrictions on feeder pig movement into states of higher status.

STAGE III — MANDATORY HERD CLEANUP — The number of infected herds has already been reduced to less than 1 percent of the total herds in the state. Surveillance continues to locate any additional infected herds. Monitored status given to all feeder pig herds that are not known to be infected (individual herd test not required — Status maintained by statewide surveillance program). Fewer restrictions on feeder pig movement to states of higher status.

STAGE IV — SURVEILLANCE — All infected herds have been cleaned up — No new cases of pseudorabies have been discovered during the year prior to application for Stage IV. Statewide surveillance continues. Breeding swine may be sold without individual test — all feeder pigs maintain monitored status. Greater restrictions on swine movements into state from lower status states.

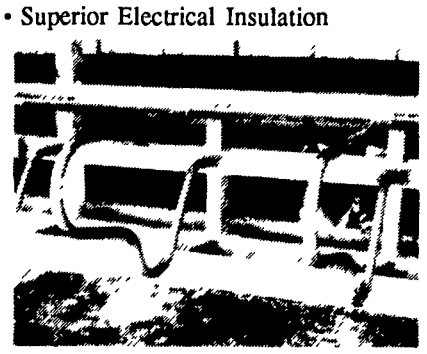
STAGE V — FREE — State has been free of pseudorabies for 1 year since recognition of Stage IV status. Free movement of breeding swine and feeder pigs within and between Stage IV and V states. Surveillance continues at one-half the rate of Stages III and IV. Some restrictions on swine from states with lower status.

PAUL B. Zimmerman INC.

LOOP STALLS

All Loop Stalls Are Coated With Baked On Top Grade Polyester TGIC Powder Coating After Fabrication

- Super Tough Finish
- Protection From Rust & Corrosion
- Superior Electrical Insulation
- Chip Resistant
- Resists Acid & Chemicals
- Smoother Finish Stays Cleaner



FREEDOM STALLS
FEATURING
- Greater cow comfort in shorter stall beds
- Provides additional side head room in the lounge process

CONVENTIONAL STALLS

Loop Stalls Are Constructed Of:
- 2 3/8" Outside Diameter High Yield Steel Tubing With A 12 Gal. (.108) Wall
- Spray Arc Transfer Method Used On Welds

Pa. Tobacco Growers Set Meeting

PARADISE (Lancaster Co.) — Tobacco growers are invited to attend the Pennsylvania Tobacco Growers' Association annual membership meeting on Feb. 16 at the Paradise Tobacco Auction.

The day will begin with coffee and donuts at 9 a.m. The morning session will include talks by many of the local legislators and tobacco industry personnel.

Following a free lunch, an educational program on growing transplants using the greenhouse float system will be presented by Dr. W. David Smith, extension tobacco specialist at North Carolina State University.

Growing tobacco transplants using the float system has become very popular in southern tobacco growing regions. Smith, a native of Florida, has been active in the tobacco research since 1978. He began looking at the greenhouse for transplant production in 1982 at North Carolina State and has been working with the float system since 1984. He will be discussing the advantages of the float system and how best to manage the production of transplants using this system.

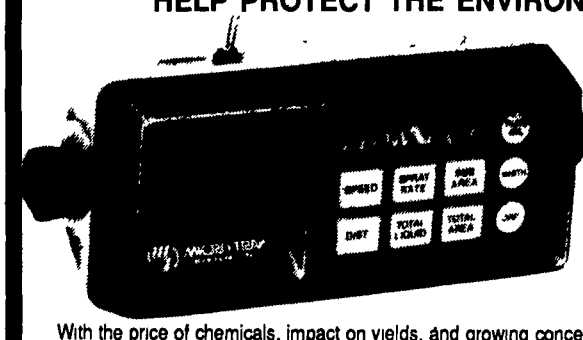
ABC GROFF
HARDI

FLOW-TRAK™ SPRAYER MONITOR

INCREASE THE ACCURACY OF YOUR SPRAYER.
SAVE TIME, MONEY AND CHEMICALS.
HELP PROTECT THE ENVIRONMENT.



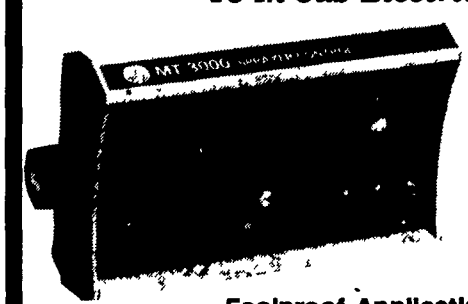
The economical, easy-to-use system that thousands of farmers and custom applicators have chosen to reduce waste and achieve better, more consistent results.

With the price of chemicals, impact on yields, and growing concern for the environment, no farmer or custom applicator can afford to rely on guesswork. Even with a properly calibrated sprayer and years of experience, costly application errors can occur due to inaccurate ground speed measurement and undetected variations in sprayer output
The Flow-Trak sprayer monitor gives a clear picture of performance Key spraying functions are monitored with the same precision provided by our top of the line control systems. With the touch of a button, the operator can view ground speed in miles per hour, gallons applied per acre, total gallons sprayed, acres worked and distance traveled.

EASY TO INSTALL • FREE SHIPPING on all monitors ordered before Feb. 28th

FLOW-TRAK™ SPRAYER CONTROL

LARGE RIG OR SMALL, HIGH VOLUME OR LOW
Convert Your Sprayer from Manual To In-Cab Electric Controls!



Whatever your spraying requirements, Micro-Trak control systems provide the versatility and intelligence to keep your application rate on target — automatically.

Foolproof Application

The stakes are simply too high to rely on guesswork when applying liquid chemicals or fertilizer. The MT 3000 and MT 5000 sprayer control systems are designed to automatically compensate for the unseen variables that cause over or under application. They also make it easy to monitor the progress of your work and see exactly how your sprayer is operating at all times.
Judged on performance, ease of use and length of payback, no other systems offer you more.

EASY TO INSTALL • FREE SHIPPING on all control systems ordered before Feb. 28th

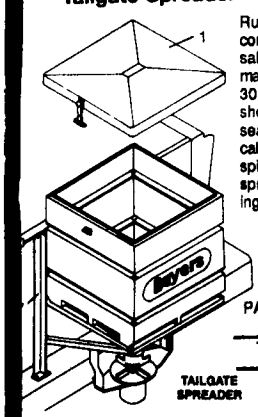
GET READY FOR SPRING WITH YOUR FERTILIZER HANDLING EQUIPMENT FROM BINKLEY & HURST

Hydraulic Truck Auger 15½' Folding & Other Sizes

Tailgate Spreader



Rugged thermpolastic hopper resists rust and corrosion. Designed to hold 600 lbs. of #1 rock salt, calcium chloride or similar pelletized material of the same size. Spreads from 3 to 30 feet, ideal for parking lots, driveways, shopping centers, and roadways. Heavy duty sealed ball bearing motor is controlled by an in cab electronic speed control. Stainless steel spinner and auger assures an even flow of spreading material. Complete with all mounting hardware and quick detach power cables.

Two New Knight ProTwin Heavy Duty V Type Manure Spreaders In Stock At Binkley & Hurst Bros. For Immediate Delivery

In Stock For Delivery Now!

Model 8018 Approx. 400 Bu. Or 1800 Gallon, Model 8030 Approx. 600 Bu. or 3080 Gal.
Trade-In Your Good Used Late Model Box Spreader Today!

Retire Your Current Spreaders!

The 8000 Series ProTwin Slingers can handle a wider range of materials than any other spreader . . .

With the patented twin auger design, material circulates inside the unit This unique action helps keep the load level during normal operation as well as during start-up, fine spreading, and closed-door turns

As a result of the twin auger system and the steep angle sides, material bridging and excess forward movement of material are virtually eliminated, even in pen packed and sticky feed lot material

Examine the material flow in the illustration below and note that the left auger moves material forward to the discharge hammers The slightly raised right auger moves the material rearward while keeping the left auger evenly charged with material It is this patented circulating action that makes the ProTwin so effective in handling the toughest material encountered in most applications

Twin Auger Design History

The first ProTwin model, the Industrial 8030 unit, was introduced in the summer of 1993 The total acceptance of the ProTwin Slinger by agricultural and industrial operators in handling the toughest waste material has been phenomenal

Originally, the 8030 ProTwin was targeted for industrial use Today, the same design has been adapted to smaller models to meet the material handling needs of most applications. All of these models handle a wide range of materials, from tough pen pack and sticky feed lot material to slurry types of manure, as well as difficult industrial materials.

Front Drive Compartment*

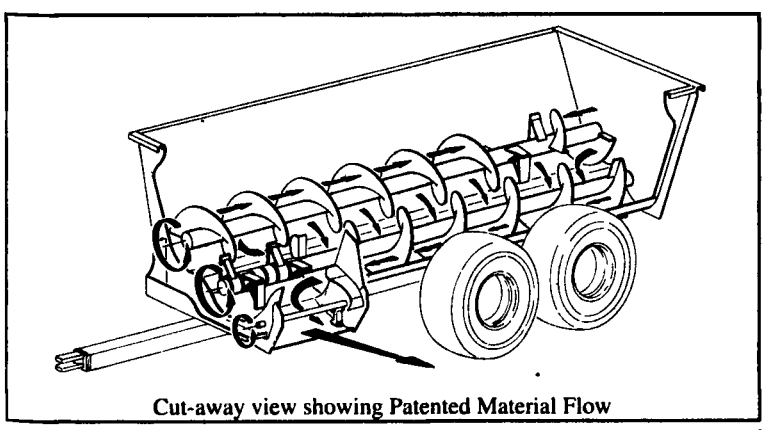
Simple Massive Reduction Drive

Each of the ProTwin models is designed for maximum, high torque output. The fully sealed front oil bath enclosures help assure that chains and sprockets remain clean and well lubricated. The auger and expeller shafts are sealed to help eliminate oil contamination. Polyethylene-type spring loaded chain tighteners are used on all driveline chains for positive alignment and long life. Bearings can easily be greased through the external grease banks without removing the front drive shield. Splined shafts have been used in all high-torque areas to provide added strength and reliability

PTO Driveline

Constant Velocity PTO with Overload Clutch

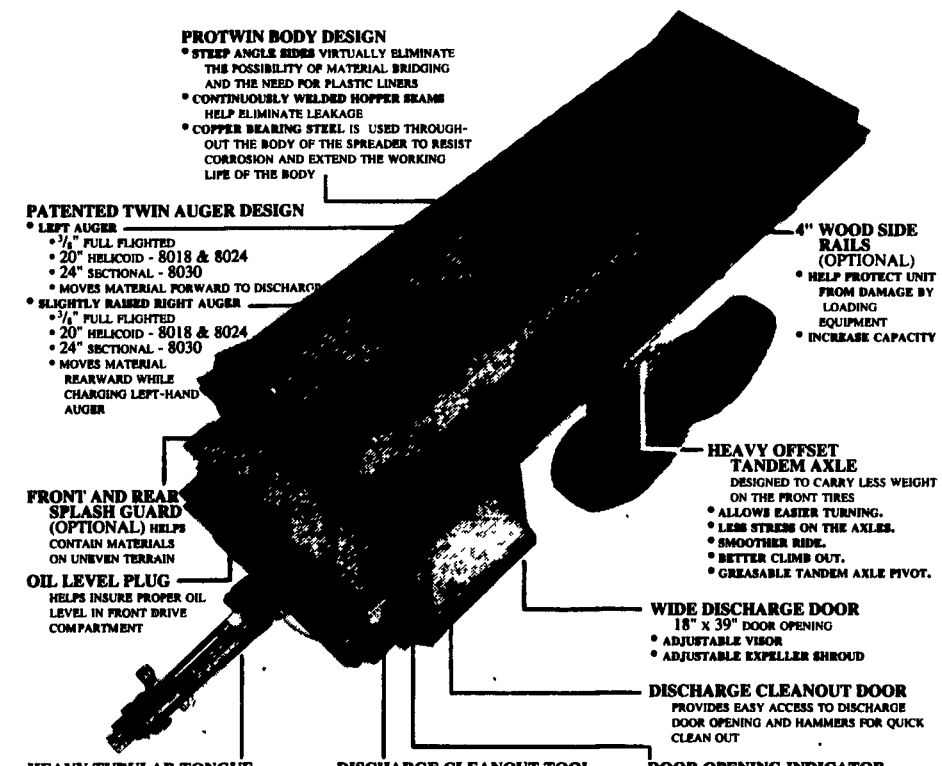
Both 540 and 1000 RPM drivelines incorporate a constant velocity joint to provide a smooth transfer of power from the tractor to the unit. This relieves uneven stress on the drive train during normal turns and during operation over uneven terrain. The overload clutch provides protection for the expeller shaft and initial drive components. (There is no shear pin in the expeller drive)



Cut-away view showing Patented Material Flow

Forged-Steel Hammer

Each hammer has a nylon bushing and a replaceable manganese steel wear plate



PROTWIN BODY DESIGN
• STEEP ANGLE SIDES VIRTUALLY ELIMINATE THE POSSIBILITY OF MATERIAL BRIDGING AND THE NEED FOR PLASTIC LINERS
• CONTINUOUSLY WELDED HOPPER SEAMS HELP ELIMINATE LEAKAGE
• COPPER BEARING STEEL IS USED THROUGHOUT THE BODY OF THE SPREADER TO RESIST CORROSION AND EXTEND THE WORKING LIFE OF THE BODY
PATENTED TWIN AUGER DESIGN
• LEFT AUGER
• 3/8" FULL FLIGHTED
• 20" HELICOID - 8018 & 8024
• 24" SECTIONAL - 8030
• MOVES MATERIAL FORWARD TO DISCHARGE
• SLIGHTLY RAISED RIGHT AUGER
• 3/8" FULL FLIGHTED
• 20" HELICOID - 8018 & 8024
• 24" SECTIONAL - 8030
• MOVES MATERIAL REARWARD WHILE CHARGING LEFT-HAND AUGER
4" WOOD SIDE RAILS (OPTIONAL)
• HELP PROTECT UNIT FROM DAMAGE BY LOADING EQUIPMENT
• INCREASE CAPACITY
HEAVY OFFSET TANDEM AXLE
DESIGNED TO CARRY LESS WEIGHT ON THE FRONT TIRES
• ALLOWS EASIER TURNING.
• LESS STRESS ON THE AXLES.
• SMOOTHER RIDE.
• BETTER CLIMB OUT.
• GREASABLE TANDEM AXLE PIVOT.
FRONT AND REAR SPLASH GUARD (OPTIONAL) HELPS CONTAIN MATERIALS ON UNEVEN TERRAIN
OIL LEVEL PLUG
HELPS INSURE PROPER OIL LEVEL IN FRONT DRIVE COMPARTMENT
WIDE DISCHARGE DOOR
18" x 39" DOOR OPENING
• ADJUSTABLE VISOR
• ADJUSTABLE EXPELLER SHROUD
DISCHARGE CLEANOUT DOOR
PROVIDES EASY ACCESS TO DISCHARGE DOOR OPENING AND HAMMERS FOR QUICK CLEAN OUT
HEAVY TUBULAR TONGUE
PULLS DIRECTLY FROM AXLE FOR ADDED STRENGTH
DISCHARGE CLEANOUT TOOL
IS CONVENIENTLY MOUNTED NEAR DISCHARGE
DOOR OPENING INDICATOR
IS CLEARLY VISIBLE FROM THE TRACTOR

Hammer Discharge

Patented Free Swinging Hammer Expeller

The expeller on all ProTwin models features 15 forged steel hammers mounted on a 2½" shaft. The hammers pivot on ⅝" bolts with nylon anti-seize type bushings that allow free movement The expeller rotates at over 800 RPM allowing each eight pound hammer to swing down into the material, peeling it off and slinging it underhand in a fine spread pattern with no clumps. The 3" wide, free swinging hammers absorb shock and tolerate most foreign objects Each hammer is faced with a work-hardening manganese steel wear plate for longer life and low cost replacement. The adjustable shroud allows easy hammer clearance setting for optimum spread pattern width. This proven hammer expeller design enables fine spreading control and material calibration through the combination of the hydraulic door opening and ground speed

Rear Drive Compartment*

The right auger is driven at the rear and is shear pin protected Bearings, chains and sprockets are easily accessible for routine maintenance

Shields removed for illustration only
Do not operate without shields in place and functioning

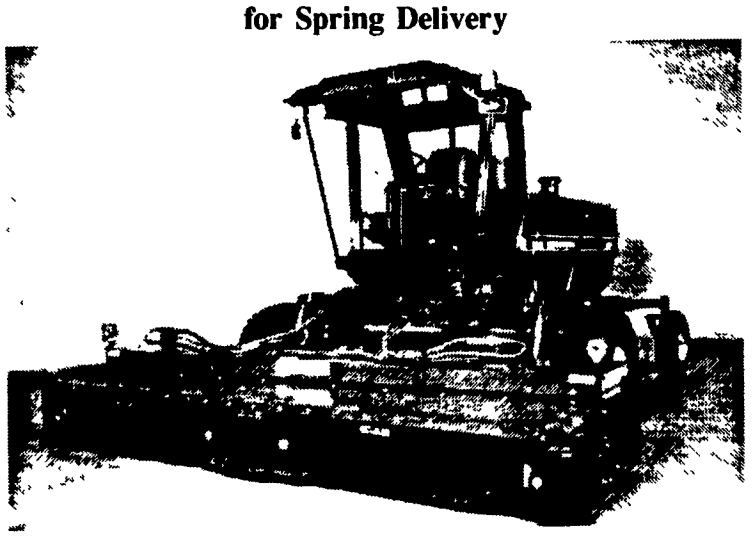
First Of Its Kind Case IH 8850 HP Self-Propelled Disc Windrower

Available from Binkley & Hurst Bros. for Spring Delivery



The 8850 HP is the first production windrower of its kind to combine self-propelled capacity with disc cutting performance. With its 15' rotary disc header, the 8850 HP can handle crops and crop conditions at operating speeds not previously possible with sicklebar machines.

The chassis and header are powered by the Case 6T-590, a turbo-charged, 6 cylinder diesel with 152 horsepower. The rotary disc header features a heavy-duty spur gear cutterbar with separate hydraulic motors that provide power to each end for reduced gear loads and long life. The oval cutting discs are heat treated spring steel for durability.

The 8850 HP is a top-of-the-line unit, and comes equipped with standard features that are synonymous with operating ease, and operator control and comfort.

8850 HP Specifications - Header

Overall Width - ft. (m)	15'5"
Cutting Width - ft. (m)	15'3"

Now's the time to save money on new hay and forage equipment and lawn and garden tractors you'll need next spring. It's **Winter Buyer's Dividend**...the pre-season sale that's going on right now!

Come on in and make your best deal by February 28.
Then, get a big New Holland **Winter Buyer's Dividend** to apply toward the purchase of:

- **Round Balers**
- **Square Balers**
- **Bale Throwers**
- **Bale Wagons**
- **PT Forage Harvesters/Headers**
- **Forage Boxes/Blowers/Wagons**
- **Crop Choppers**
- **Mower-Conditioners**
- **SP Windrowers**
- **Rakes/Mowers/Tedders/Inverters**
- **GT Lawn and Garden Tractors**
- **LS Yard Tractors**

Great dividends are available whether you pay cash or take advantage of the waiver of finance charges to 9/1/95. Hurry in for more details...time is money!*

* Offer available to qualified buyers through Ford New Holland Credit.

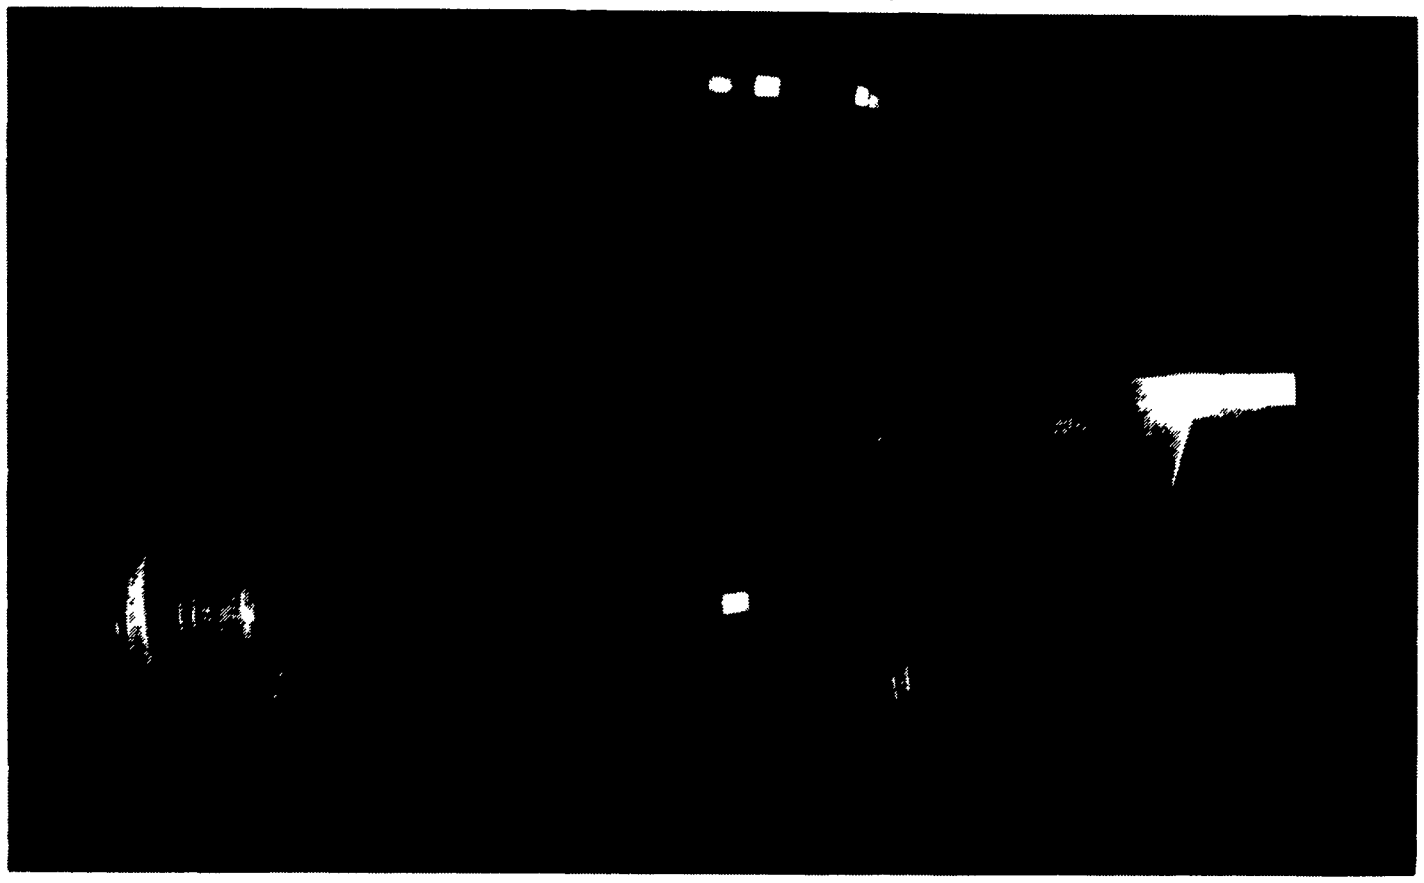
MAGNUM

Chosen by farmers 50,000 times since 1987



Order one of the next 50,000 today

The MAGNUM Tractor has proven itself for **RELIABILITY**, **DEPENDABILITY,** and **ECONOMICAL PERFORMANCE** on EASTERN Farms since 1987. Others have tried to copy the MAGNUM - but MAGNUM remains

THE STANDARD BY WHICH LARGE TRACTORS ARE JUDGED.

When you buy a MAGNUM from Hoobers you get

HOOBER SERVICE EXPERIENCE:

1) HOOBER has sold more MAGNUMS than any other dealer in PA, MD, NJ and DE...

2) HOOBER has (9) Factory-trained Servicemen; (4) in DE & (5) in PA.

CHOOSE FROM (5) MODELS	
MODEL	**PTO HP**
7210	130
7220	155
7230	170
7240	195
7250	215

THERE IS NO BETTER TIME TO TRY A MAGNUM FROM HOOBERS. RENT ONE NEXT SPRING. SEE FOR YOURSELF.

Crop flow is the secret

Four intake and precompression rollers pack the crop together densely Hydraulic dampers smooth out any bumps in crop flow, if irregularities should occur the rollers are driven positively by gearboxes and drive shafts The lower front roller houses the latest generation CLAAS "PROTECTOR" metal detector. The 17" distance between it and the drum is greater than on any other forager, thus improving the chances of stopping metal from getting into the cylinder, and giving a much faster feedroller speed
Easy, comfortable chop length adjustment The gearbox provides for 6 different chop lengths 5/32, 13/64, 1/4, 9/32, in corn, plus two extra lengths in grass. when so equipped, the changeover between two lengths in each range can be done at the touch of a button The header is also switched over from slow or fast at the same time

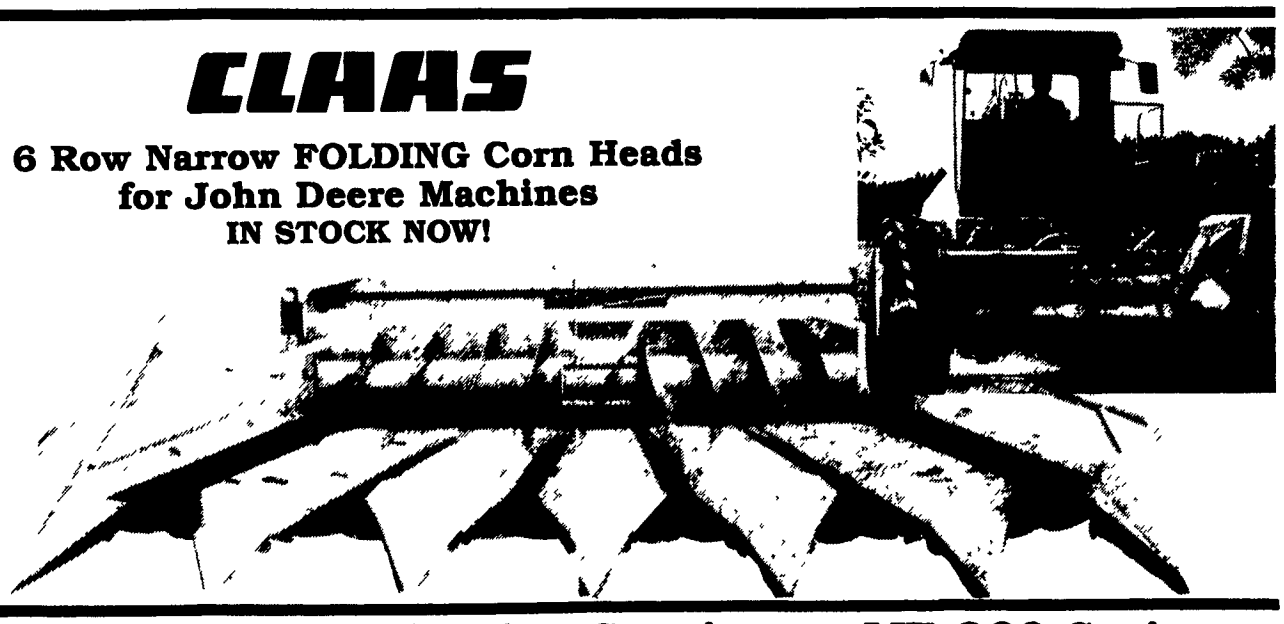
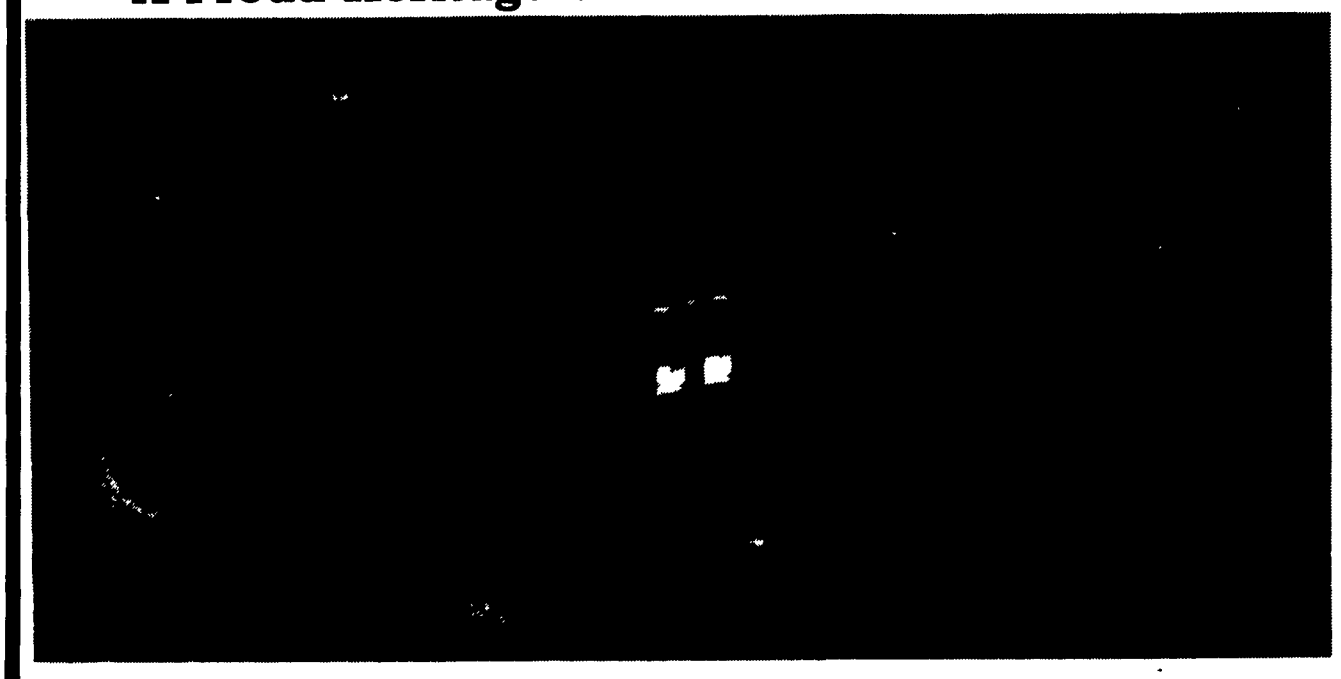
6 Row Narrow FOLDING Corn Heads for John Deere Machines
IN STOCK NOW!



A Proud Heritage of Performance And Value Continues. MF 200 Series



The newest MF 200 Series tractors carry forward the traditions set forth by Harry Ferguson when he invented the first modern tractor over 75 years ago.

Ferguson, a successful tractor dealer and talented mechanic in Ireland, observed that simply relying on the weight of the tractor for traction was inefficient. In addition, simply hitching a plow to the drawbar frequently caused tractors to rear over backward when the plow struck an obstruction. Late in 1917, Ferguson applied for the first of a long series of patents that defined what came to be known as the "Ferguson System"

MASSEY FERGUSON

For serious loader jobs, you can't beat an MF 253 with the speed of an optional synchro shuttle transmission and the traction of 4-wheel drive. New for '93!

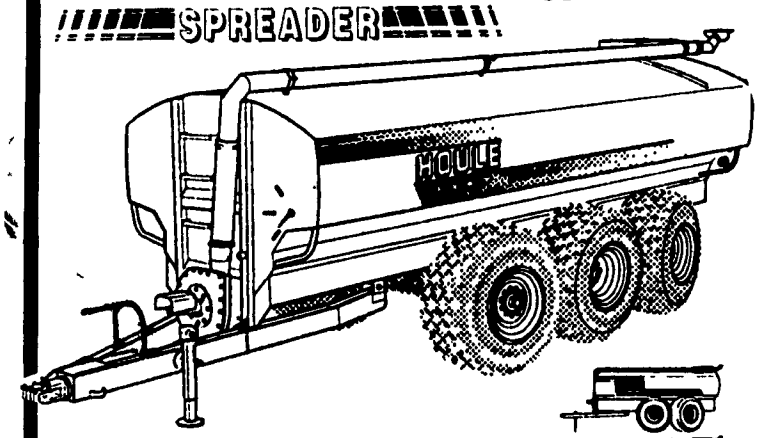
QUALITY EQUIPMENT - DEPENDABLE SERVICE
A Trusted Name For 22 Years

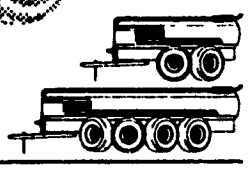
HOULE

LIQUID MANURE SPREADER

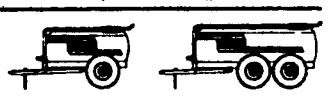
WITH FLOTATION TIRES TO MINIMIZE SOIL COMPACTION



4 - 6 OR 8 WHEEL SPREADERS WITH POWER STEERING - 3850 TO 9500 US GAL.



SPREADERS WITH SINGLE AXLE OR TANDEM - 2350 TO 6000 US GAL.

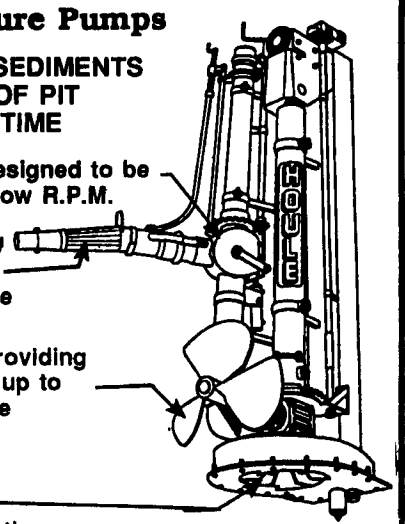


- "V" shape bottom for more complete clean out.
- Standard exterior finish: epoxy primer and urethane paint.
- Low profile tank for maximum visibility and stability.

HOULE AGI-POMPE®

Liquid Manure Pumps

AGITATES BOTTOM SEDIMENTS AND SURFACE OF PIT AT THE SAME TIME



Rotative directional valve designed to be operated while P.T.O. is at low R.P.M.

Powerful nozzle to slice and agigate the crust of manure covering the surface of large holding area.

24" dia. mixing propeller: Providing a full time bottom agitation up to 21 500 US G.P.M. even while loading a spreader.

20" dia. impeller with self-cleaning blades.

Bottom gear box with oil bath protected by a greaseable 3 seals mechanism on each shaft.

Available in 5 versions for concrete pits.

Calumet SPREADER TANKS

- 2,250-6,000 Gal.
- Heavy Duty Undercarriage w/5 Year Warranty
- 10 Year Tank Warranty

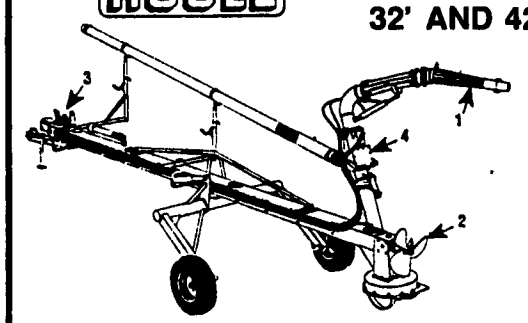
Available With Rear Slinger Or Front Mount Pump

Calumet VACUUM TANK

- 1500 to 5000 Gal.
- 10 Year Tank Warranty
- 4 Shank Rear Injector
- Commercial Duty Shut-Off And Vac Pump
- 28 Ply Flotation Tires

HOULE TRAIL AGI-POMPE®

32' AND 42' FOR LAGOONS



Gear box oil bath protected by a greaseable 3 seals mechanism on each shaft.

AVAILABLE WITH MULTIPURPOSE OPTION TO ALSO CLIMB INTO CONCRETE PITS UP TO 14' DEEP

GREAT PERFORMANCE IN HOG OR DAIRY MANURE

1-Highly articulated nozzle designed to slice and break the top crust from above the manure level as the propeller homogenises the liquid with the remaining floating chunks.
2-24" dia. mixing propeller providing full time agitation up to 21,500 US G.P.M. even when loading a spreader.
3-Hydraulic controls can be operated from tractor seat.
4-Rotative directional valve designed to be operated at low R.P.M. without stopping the P.T.O.

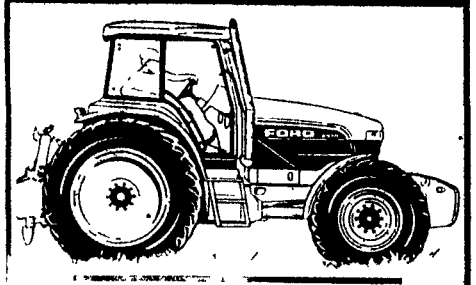
NEW GENESIS™ TRACTOR



GOTTA DRIVE IT!

You gotta get behind the wheel of a new Ford 6 Series GENESIS™ tractor. It'll change your entire perspective of tractors and technology.

- You gotta hear the new cab.
- You gotta feel the power of the 5 liter engines.
- You gotta U turn at the tightest headlands.
- You gotta powershift through all 16 forward and 5 reverse speeds.

You gotta glide the control console into a position that's comfortable for you.

You get the idea. GENESIS tractors. Four new tractors in the 145 to 210 hp class that you gotta drive to believe. Stop in today for a demonstration.

Gotta drive it.

SERVICE EXCELLENCE

Service Excellence

A pat on the back for us. Quality service for you.

Our Service Excellence rating from Ford New Holland means a lot to us. And it means a lot for you, too. It means you'll get fast, accurate diagnosis and quality service. It means we've met tough, higher-than-industry standards for service training, tools, record-keeping and performance.

Being a Ford New Holland Service Excellence dealer is hard work. But, we've made the commitment to be the best we can be. And that means service backup that keeps equipment on the job for you.

HERSHEY EQUIPMENT CO., INC.

Extends

Thanks & Congratulations

STEVE STRICKLAND

Bainbridge, PA - For his decision in choosing

Big Dutchman. AND HERSHEY EQUIPMENT CO., INC.

" The Mark of Excellence" " A Step Ahead"

On his newly remodeled layer house
90,000 birds total capacity

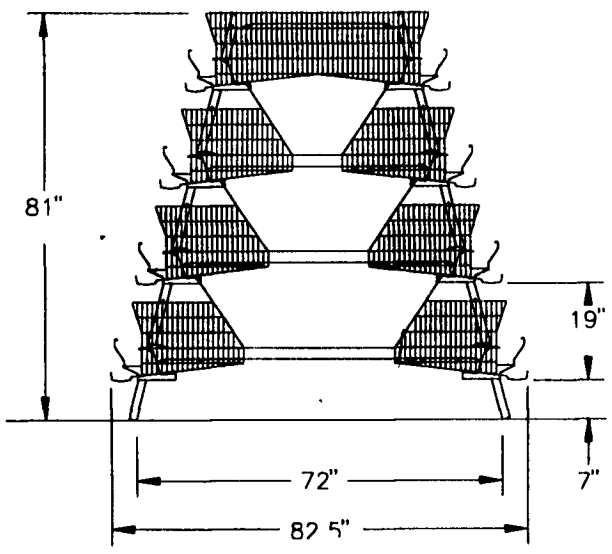
PROFIT-TIER 420

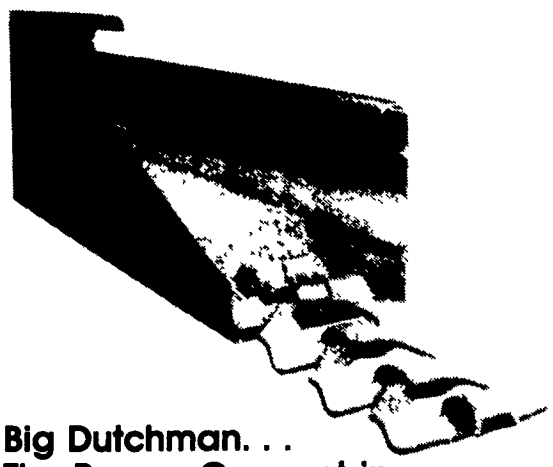
System Features

Big Dutchman has taken its low profile cage and condensed the overall section width to produce the Profit-Tier 420. This four tier system is designed to maximize density in new or existing houses.

The Profit-Tier 420 features the Champion Feeding System with in-line feed hoppers with belts or gear motor drive.

Rigid leg frames with feed trough supports provide suspension and maintain proper alignment for the system.

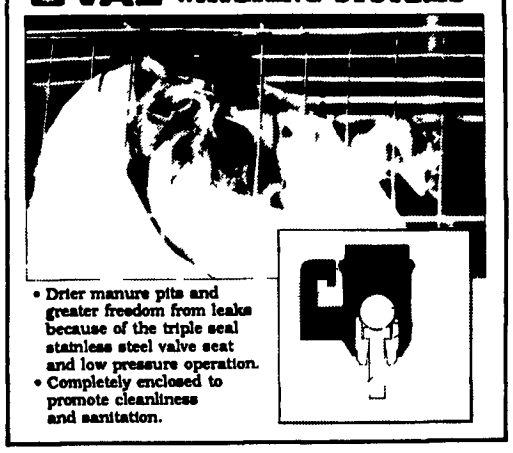




Big Dutchman. . .
The Proven Concept in Automated Feeding

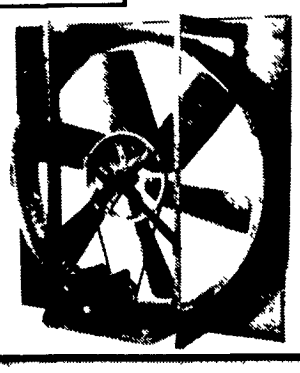
No auger or link feeder can perform as efficiently as the highly successful concept of feeding with a wide chain from a hopper that is open at both ends. It has been proven time and again for over forty years in poultry houses around the world.

OVAL WATERING SYSTEMS

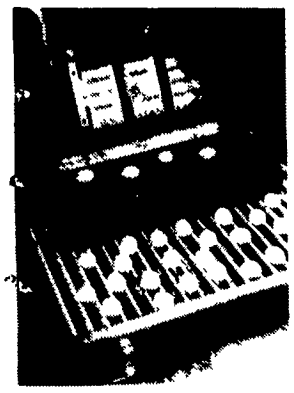


- Drier manure pits and greater freedom from leaks because of the triple seal stainless steel valve seat and low pressure operation.
- Completely enclosed to promote cleanliness and sanitation.

Coolair FANS



Reliable, Safe Egg Collection and Handling from Cage to Packing Room



The transfer of eggs from cage belts to cross-conveyor is a critical step in mechanical egg handling. The big Dutchman Fingerbelt collector utilizes a series of rubber fingers mounted in a durable belt to hold eggs in a safe position on the incline, going down from cage belts to cross-conveyor

FORD 70 SERIES GENESIS™

THE INNOVATOR

GOTTA DRIVE IT

GENESIS™ tractors feature advanced styling for greater performance. They're designed for the way you want to work. More powerfully. More productively. More confidently.

- Advanced exterior styling means contemporary looks plus easy access to all systems
- Advanced cab design — inside and out — means increased comfort, visibility and control
- Advanced state-of-the-art powershift transmissions mean smooth, effortless, straight-line gear changes and shuttle shifts
- Advanced manufacturing technology means greater engine performance and reliability
- Advanced electronics mean more control and operation simplicity

See the tractor styled for performance. See the GENESIS tractor.

Oct 20-22	Uniontown	Uniontown Pltry & Farm Show

N.Y. Farm Show Beats Winter Blahs

SYRACUSE, N.Y. — One of the larger indoor farm shows gives farmers something to cheer about during the lingering days of winter. New York Farm Show, held Feb. 23-25, Thursday through Saturday, at the State Fairgrounds in Syracuse offers more than 175,000 square feet of exhibits.

More than 400 companies and manufacturers display the newest equipment, supplies, technology, inputs, and services. Farmers can tour four buildings at the fairgrounds, meet with company representatives, and comparison shop.

"Farmers who want to keep up on the latest piece of equipment, tillage management or whatever their farm operation needs can find it at New York Farm Show," said Scott Grigor, New York Farm Show manager.

The 10th annual event offers farmers an opportunity to brush up on their conservation practices by viewing the world's largest model farm. The 380-square-foot Choice Farm shows 30 conservation practices on an integrated crop and livestock farm. The Choice Farm is sponsored by the Soil Conservation Service (SCS), New York State Department of Environmental Conservation, Empire State Chapter of the Soil and Water Conservation Society, New York Association of Conservation Districts and the New York Conservation District Employees' Association.

"We're trying to get out the message that soil conservation, water quality, wildlife habitat, and energy conservation can all fit together in an economically and environmentally sound management program for farms," said Karen Williamson, SCS public affairs specialist. "Farmers can protect the environment and enhance their business at the same time."

The New York Farm Show's conservation program also includes a residue display and special speakers, sponsored by the Crop Residue Alliance.

Rounding out the farm show will be daily programs on farm safety and health, crop insurance, and personal protective equipment. Other highlights include an antique tractor display and Farm Toy Show Auction.

Proceeds from the popular auction, held on Friday, Feb. 24, at 6 p.m., benefit the FFA Alumni Scholarship Fund and the Hamilton FFA chapter. Last year's auction contributed $1,800 to these organizations.

New York Farm Show is sponsored by the New York Equipment Dealers Association and *American Agriculturist* magazine. Hours are 8:30 a.m. to 4 p.m. daily. Tickets are available free from New York state farm equipment dealers or by writing New York Farm Show, P.O. Box 3470, Syracuse, NY 13220.

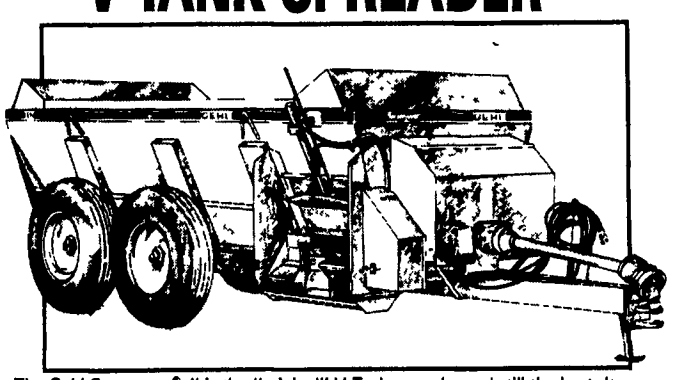
GEHL

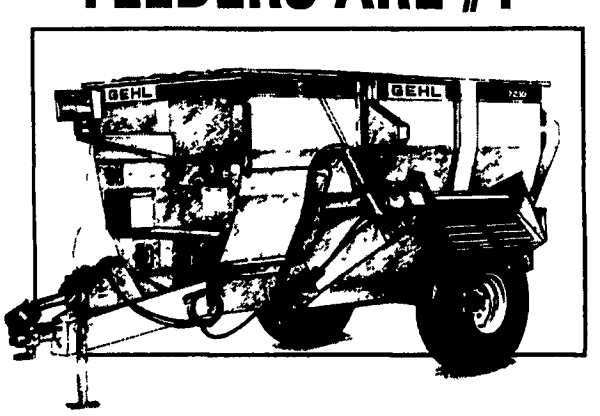
NORTH AMERICA'S #1 V-TANK SPREADER



The Gehl Scavenger® II is the "original" V-Tank spreader and still the best. It delivers outstanding performance in all types of manure, from liquid to semi-solid to pen-packed or even frozen manure.

- **Patented square-tube auger** – Hydraulically powers up and down to break up solid material.
- **Variflo discharge** – Spreads smoothly and evenly for complete application control.
- **Five models** – From 192 to 596 bushel heaped capacities to match your operation.
- **10-Year warranty** – Against rust-through on the tank for peace of mind.
- **Options include** – Truck-mounted units and hydraulic lids.

GEHL TMR MIXER FEEDERS ARE #1



Nothing makes a Total Mixed Ration (TMR) feeding system work better than a Gehl mixer feeder. Here's why:

- **Better Mixing Action** – Unique four-auger design creates a double figure-8 mixing pattern for fast and complete mixing of all feed ingredients.
- **Energy Efficient** – Planetary drive system requires less horsepower.
- **Built To Last** – Patented star couplers absorb shock loads by allowing the bottom augers to flex, providing long service life.
- **Six Sizes** – 150 to 500 cubic feet capacities
- **Three Styles** – Trailer type, stationary and truck-mounted units to fit your operation

Stretch your equipment purchase dollars with Gehl Finance. Talk to your participating Gehl dealer about our current programs

GENERAL STRATEGIES TO TREAT, PREVENT AND CONTROL POULTRY DISEASES

Patty Dunn, DVM
Animal Diagnostic Lab
Dept. Of Vet Science

Anyone who has raised or tended poultry on any scale, from a small hobby flock to a large commercial enterprise, has encountered disease problems in individual birds or throughout the flock from time to time. Birds, like other animals and people, are susceptible to their own sets of diseases. Fortunately, very few of them are transmissible to man.

Infectious avian diseases (those that are contagious or transmissible from bird to bird) are caused by viruses, bacteria, fungi (mold), and parasites. Due to vast increases in medical/scientific knowledge regarding the relationships of these disease-causing agents with their hosts over the last several decades, several effective control strategies have been developed to decrease infectious disease outbreaks in flocks. Employment of these strategies is crucial to the successful raising of healthy groups of birds, especially as numbers of birds and flock densities increase as poultry producers strive for efficiency of production and maximum use of facilities.

To follow are five general methods of disease control that are widely used to control infectious diseases in poultry. The ideal goal of all the strategies is to prevent outbreaks of clinical disease which should result in optimizing productivity.

1. REDUCE THE LEVEL OF EXPOSURE. A critical part of the control method is biosecurity. Biosecurity is the buzz word for the total health plan designed to reduce (or in some cases, eliminate) the number of disease agents that come in contact with a flock. There is much published information on the components of a complete biosecurity plan. They include wearing clean protective clothing and foot wear into your poultry houses, keeping out unnecessary vehicles and visitors, etc. Sanitation, especially cleaning and disinfecting (C&D) of the house and equipment between flocks, is extremely important to decrease the numbers of viable infectious agents left from the last flock to levels that won't overwhelm the incoming birds. This is particularly true if there has been a clinical disease problem in the previous flock. C&D involves both physical removal and chemical deactivation of agents. Unfortunately, some microbial agents are extremely hardy, and a few may remain in the environment regardless of the stringency of the C&D procedures.

Rodent and insect control is important at all times, but particularly between flocks. Mice and rats are effective carriers of many types of bacteria. Beetles and flies can mechanically transfer various types of infectious agents.

If these pests are not removed between flocks, they will serve as reservoirs of the agents to infect the next birds housed.

"Down Time" is the period of time between flocks when the house (or premise) is empty of all birds. The longer the down time before restocking, the less chance of carryover of large amounts of disease agents, especially the more fragile viruses. Even if complete C&D and pest control are not practiced during the down time, some viruses and bacteria become inactivated with time because no suitable hosts (birds) are present to allow them to live and maintain their population. On the other hand, some hardy organisms can remain viable in the environment for years, and can re-infect any birds put back on the premise during that time.

It is important to remember that disease control is a "numbers game" in many respects: X number of organisms may not be able to establish an infection in a healthy bird, but 10 X or 100 X organisms can overwhelm the host's immune defenses and cause serious disease. Once disease is established in the bird, the agent usually multiplies rapidly and numbers of organisms build up exponentially and are shed into the environment, thus perpetrating the cycling of disease in the flock.

2. REDUCE STRESS. "Stress" is a very general word that is sometimes hard to define. It implies that a condition or conditions exist that cause discomfort on a physical or mental level. A low level of stress may actually help the immune system operate at peak efficiency. However, moderate or high stress levels cause the body to release certain "stress hormones" that suppress the activity of certain key components of the immune system thereby rendering the bird more susceptible to disease.

High stress is both a cause and an effect of disease. Proper management is the cornerstone of reducing stress. Birds should not be overcrowded. Do not exceed bird density recommendations for your housing situation. Control damage from picking or other vices by trimming beaks, toes, or snoods (depending on the species and production type) and by be controlling light intensity. These procedures are to some extent stressful in themselves, but when accomplished at the appropriate age and level, should decrease total additive stress in the long run. Birds should always be handled and moved carefully, especially at the hatchery and during catching, loading, transport and vaccination procedures. Working calmly around the birds is also important. On-time routines of caretaking and feeding are ideal. Changes in feed schedules or running out of feed, even for a relatively short period of time, can be extremely stressful. Supplemental vitamins or other nutrients may be given to combat nutritional stress.

3. VACCINATE. Vaccination is a planned and controlled exposure to a specific disease agent or agents in order to stimulate the bird to build protective immunity specific to the agent(s) contained in the vaccine preparation. In most cases, it is used to prevent a disease break before it occurs. In some special situations, vaccine may be applied to a flock currently experiencing a particular disease to limit the disease's progress and effects. Some poultry vaccines are used very extensively. For example, virtually every chick from commercial hatcheries in the U.S. is vaccinated for Marek's Disease at day of age. Other vaccines have a much more limited application. In the U.S., infectious coryza vaccine is used in only a few areas (California, extreme Southeast) where the disease can be a commercial problem.

Types of vaccines used on a farm should be chosen based on what is known about the particular disease challenges in the geographic area. A vaccine should *not* be used if there is no known problem or direct potential problem with the disease. Not only is it economically unsound to do so, it is also potentially dangerous. There have been instances in which live vaccine strains, introduced into an area with good intentions, have caused more disease problems than they prevented. Fortunately, this has been the exception rather than the rule.

FFA Officer T

ALEXANDRIA, Va. — Six agricultural youth leaders from the United States will continue with their plans to visit agribusiness and government leaders in Japan as part of the 1995 National FFA Officer International Experience Program January 27-February 10.

"The hosts in Japan have been most helpful in this time of crisis to reorganize travel plans so that the tour could continue. Their nation is an important customer of American agriculture," said Dr. Larry Case, national FFA advisor and coordinator of agricultural and rural education, U.S. Department of Education. "This is an excellent opportunity for our future agricultural leaders to learn about the changing opportunities which face the agricultural industry."

This international tour is an important part of the national officers' preparation to serve the National FFA Organization. During their time in Japan, they will receive a briefing by U.S. Embassy officials on agricultural trade, tour one of Tokyo's largest fish, vegetable and floral market facilities and visit several agricultural high schools.

In addition, the group will tour

LEADERSHIP AT WORK™

Tour Japan

some facilities of Mitsui and Co., Ltd. Recent earthquake damage will curtail visits to some of the agricultural businesses and historical landmarks in Kyoto and Hiroshima. While in Tokyo, they will visit the corporate headquarters of Toyota.

The officers will meet with their Japanese counterparts — members of the Future Farmers of Japan (FFJ) — to further extend contacts between the next generation of agricultural leaders for both countries. Despite the disaster in their country, FFJ has managed to reassign each officer with a Japanese host family for one weekend to learn more about the culture and traditions of one of the United States' most important trading partners.

The international program is sponsored by Mitsui & Co. (USA), Inc., as a special project of the National FFA Foundation, Inc.

"This experience will provide the national FFA officers knowledge about the competitive global economy," said Corey D. Flournoy, national FFA president. "Our officer team is anxious to learn about the agricultural marketplace in order to explain it to other members we will meet during the year. We appreciate their extra efforts to host us during these difficult times."

The national officers traveling to the Far East are Flournoy, national president from Chicago, Ill.; Travis Hagen, national secretary from Chico, Calif.; Trisha Bailey, southern region vice president from Dover, Fla.; Jennafer Neufeld, central region vice president from Inman, Kan.; Greg Vetter, western region vice president from Carpenter, Wyo.; and Lee Schroeder, eastern region vice president from Leipsic, Ohio.

The national FFA officers represent FFA members to officials in government, education, business and agriculture. As they travel during the year, they meet with members on the chapter, state and national levels and will be able to share with their fellow students the importance of developing a global perspective and an understanding of international trade issues.

(Continued from Page E20)

Many different variations of vaccination programs are in use. Proper scheduling of vaccination requires knowledge of the specific type of disease to be protected against, age of the birds, concurrent management procedures, disease status of the flock, and the duration of immunity that can be expected from the vaccine. Poultry veterinarians and other poultry health specialists can recommend sound vaccination programs tailored to specific situations.

Most commercial vaccines have been stringently tested and quality controlled for purity and efficacy. Vaccine companies make very specific recommendations on how their products should be handled and applied. These instructions should be followed closely in order to ensure that the flock will be properly protected.

Improvements and innovations in poultry vaccines are occurring constantly in response to industry need.

Responsible use of quality vaccines is an extremely valuable tool in controlling disease. However, it will not make up for the gross deficiencies in management of some of the other control methods. Sound biosecurity and stress reduction measures are important adjuncts in making vaccination work for your flock.

4. MEDICATE. Although medication is the strategy most often thought of as traditional disease control, it is arguably the *least* important to total flock health. Medication, when instituted in response to a disease problem is considered "damage control" rather than disease control. The disease is often out of control by that point. Medication certainly can help reduce sickness and mortality significantly, especially if instituted early in the disease course.

It can, however, be a waste of time, effort and money if not done properly. Antibacterial and anticoccidial drugs can be used at both treatment and preventive levels. Anticoccidials are invaluable in preventing losses due to coccidiosis. Their use is considered a necessity of modern poultry production.

Antibacterial drugs (antibiotics) are not effective against viral diseases. However, they are used in some situations in which a viral problem has been implicated in order to prevent or reduce secondary bacterial infections that inevitably follow.

Proper use of chemotherapeutic agents should be based on a correct diagnosis of the disease at hand, and specific targeting of a drug to the disease agent. If a bacterial disease has been diagnosed by culture, a laboratory test to determine the best drug to use against the bacteria found in the birds is in order. In the meantime, a "best guess" may be employed to start the birds on a treatment that is likely to help. For example, Staphylococcal infections are likely to be helped by penicillin, especially if the drug had not been extensively used on that farm previously.

Poultry drug lists and guides are available from many sources. Advice from poultry health specialists can be useful in guiding drug use in specific situations.

Poultry drugs are usually mass applied by inclusion in feed or drinking water. Mixing and dilution must be done carefully in order to avoid dosing mistakes. Both overdosing and underdosing can have adverse effects. Overdosing can cause drug toxicities and disruption of normal gastrointestinal flora. Underdosing leads to ineffective treatment (and therefore wasted dollars), and may promote the development of antibiotic resistance in bacterial populations.

Drug residues in animal and poultry meat and products is an important public health issue. Drug withdrawal times before slaughter or marketing of eggs must be strictly followed. Most poultry companies have stringent in-house programs to prevent any violations of drug use, and often check bird tissues for residues before slaughter to ensure that no traces of drugs are present. A recent issue of theFDA Veterinarian, Nov/Dec 1994, Vol. IX, No. VI, contains a summary of illegal drug residues in meat for the 1993 fiscal year. The incidence of detected violative tissue drug residues listed by class of food animal shows that turkeys and chickens made up the lowest number of cases. Poultry species (7 total cases) were significantly lower than any other major food animal category including cattle (3,373), swine (345), and sheep (17). Continued responsible use by poultry producers of drugs for treating poultry will help continue this enviable record.

Responsible chemotherapy can be summed up this way: Use the correct drug at the correct time for the correct duration. Above all, *don't* use a drug if you don't need it.

5. ERADICATE. The most drastic control measure is eradication. This is a strategy to eliminate the disease from the host population. Complete eradication schemes are reserved for highly contagious and virulent diseases such as highly pathogenic avian influenza and velogenic Newcastle Disease. The highly pathogenic avian influenza (AI) virus responsible for the 1983-1984 outbreak in Pennsylvania and surrounding states was eradicated from the area by an intense and costly effort. Monitoring programs involving testing of birds, environments, blood and eggs are still in place. These are considered necessary to prevent reintroduction or spread of similar AI viruses, which still persist in migrating waterfowl and live bird markets, into our commercial poultry populations.

Partial eradication programs, such as those included in the National Poultry Improvement Plan (NPIP), involve eliminating certain vertically transmitted diseases from the breeder bird populations. Pullorum disease and MYCOPLASMA GALLISEPTICUM (MG) infections have been drastically reduced in our country due to the collective efforts of the poultry industry. Other nations look to these programs as models of poultry health improvement. Partial eradication requires constant disease monitoring (usually by serologic tests) and follow-up on any suspected positive birds. Depopulation (or at least quarantine and discontinued use of hatching eggs) is necessary when disease breaks occur. Commercial level birds may have sporadic problems with these controlled diseases. Pullorum is extremely rare in most U.S. poultry, but MG is fairly common in multi-age layer flocks.

Backyard flocks serve as reservoirs for most diseases. For this reason, strict biosecurity around known positive commercial flocks and backyard flocks is necessary in order to prevent spread of the agents back to breeders.

As you can see, all five control strategies — Pathogen Reduction, Stress Reduction, Medication, Vaccination and Eradication — are very different from each other in details and scope, but the goal remains the same. It is necessary to combine various elements of the five methods to build a sound, total health program that works on your poultry farm. Everyone benefits from disease control efforts including your birds, you, and the industry.

BELLEVILLE LIVESTOCK MARKET

SPECIAL SALE SCHEDULE

Spring 1995

Machinery Sale

Friday, March 3, 1995 at 9:00 AM we will be having our Annual Spring Consignment Machinery Sale. We will be selling all types of Horse drawn and conventional equipment along with several loads of new tools. Tractors, Hay and Straw will be sold at 1:00 PM. For early advertising of your machinery please call us as soon as possible.

Easter Lamb and Goat Sale

Wednesday, April 5, 1995 we will be holding our annual Lamb and Goat sale. To take advantage of the best market for your lambs and goats, consign them on this date. We are expecting a better market this year due to more good buyers and fewer animals on the market. For low commission rates, friendly service and competitive prices come see us. Sale starts at approximately 3:30 PM.

Spring Heifer Sale

Friday May 5, 1995 beginning at 6:00 PM. We will be holding our Annual Spring heifer sale. 400-500 head are expected and many buyers both in state and out of state will be on hand to fill **their** orders with **your** heifers. For early advertising of large groups of heifers, at no added expense to you, call us as soon as possible. All animals must have a good health chart, pregnancy check slips that are signed by a vet will be accepted.

HOLSTEIN MILKING HERD DISPERSAL
Thursday, March 23, 1995 — 11:00 A.M. Sharp

Located in Franklin County, off Route 81 at Exit 8 Scotland - Route 997 North to Route 433 - North 1 mile to farm - Watch for Sale Signs.

SELLING 100 SIRE IDENTIFIED GRADE HOLSTEIN YOUNG MILKING ANIMALS AND 10 HEIFERS DUE TO FRESHEN WITHIN THE NEXT 3 MONTHS

Owner Sampler Records - Rolling Herd 21000 3.6Fat 3.2Protein - Somatic Cell 250,000 - 30 Day Blood + T.B. Test.

This Dairy is 100% Home-raised - No BST - Averaging between 65 and 70 lbs. per milking animal in the tank - Herd is on a monthly Health Plan with a complete Vaccination Program in Place.

Cattle milked in Tie Stall Barn and Housed in Free Stalls

Approximately 45% of this Dairy is now Milking in First Lactation - with very few older animals selling.

This is a Year Round Dairy with approximately 25 Animals Fresh since January.

15 Animals from the Milking Herd and 10 Heifers due to calve in the next 90 days.

Plus - a good number of Fall Freshners that are milking heavy now will be sold.

Atlantic Sires used heavily in this Herd, along with several other top bulls from other units now being used.

Also Selling is: Delaval Rationmaster #2 Computer Feeder - with 4 Feeding Stations and 70 Transponders.

And Harvestor Spartan Bottom unloader for shelled corn silo - Chains are in good shape.

These items, along with a few smaller Dairy items sell first.

Auctioneer's Note: If you are looking for Top grade Replacements, this is the Auction for you - Fancy Udders - Great Production - Youth and Type.

I.D. Required for Bidder's No.

ANNOUNCING — 90 HEAD

SANDSON HOLSTEINS COMPLETE DISPERSAL
SATURDAY, FEBRUARY 25 • 11 AM
TUNKHANNOCK, PA

In event of inclement weather, sale would be held Tuesday, February 28th

* Due to the recent and unfortunate death of Thomas E. Sands, this herd will be sold at public auction, at the farm in Tunkhannock, PA. The family of Thomas E. Sands wishes to thank all their friends for the support they have given these past few weeks with the herd and invites everyone to take home a piece of this great production herd!

HERD AVERAGE: 50 Cows 18.596 milk 3.9% 731 fat 3.3% 605 Protein
Herd Has Been Accredited for Over 50 Years.
CONTINUOUS FAMILY FARM FOR 93 YEARS * Sire Power Bred Since 1945
Herd Averaging 58 Lbs. 3.8% on Last Test

* This herd has never been pushed but many in the past have gone on to produce over 150,000 lbs. milk for this herd! Longevity and production are bred into this fine herd.

A young herd! 46 sell between 5 years to 2 years of age

**A year round herd with a lot of quality! Good feet & legs and many beautiful udders throughout the herd!

A good set of heifers by the Great Hot Sires

* **Heifers sell by Mountain! Frontier! Concord! Vanquish! Ryan! Leader!**
* All cattle will be tested for interstate shipment. Pregnancy checked and vaccinated against shipping fever.

❑ Sale Held Under Heated Tent ❑ Lunch Available ❑ Trucking Available *

Directions: From Tunkhannock. head south on Rt 29 2.2 miles to 1st right turn past Walmart (Sand Bank Rd). Make second left 1.3 miles onto Benson Hollow Lane and farm is 1/2 mile on left. Watch for auction signs.

For Snook, Standability's Most Important Factor

CAROLYN N. MOYER
Bradford Co. Correspondent

JERSEY SHORE (Lycoming Co.) — Some people say it's the rich river bottom soils that allow Ed Snook to take home the first-place ribbons in the Pennsylvania Corn Club's annual production contest. But according to the long-time corn grower and hog farmer, there are many factors that contribute to bumper corn crops.

"In the Five Acre Corn Club, I don't enter the same fields every year. I've had them in the Nippenose Valley on limestone ground and along the river. It's always pushed up to me that I have pig manure and river field, but we've had the Five Year Corn Club in seven or eight locations and we've won awards on all of them," he said.

In this year's contest, Snook placed first in the three-year average shelled grain class for the regular harvest size. His yield in 1992 was 191.8 bushels per acre. In 1993 he produced 201.6 bushels per acre and in 1994 he produced 194.1 bushels per acre for an average

(Turn to Page 2)

Ed Snook checks the moisture of the grain before moving it into storage.

One of the main factors Ed Snook looks for when selecting hybrids is standability. Here he examines a plot of corn which was also selected for that factor in a neighbor's field. According to Snook, the neighbor has decided to see just how long these four rows of corn will stand.

CORN TALK Farm Calendar

PMCGA Directors Step Down

Greg Roth
Penn State Agronomy
Assistant Professor

Several PMCGA board of director members are stepping down after one or more three-year terms in office. Their contributions and commitment to our organization have contributed considerably to PMCGA.

Steve Mellot, our outgoing vice president from Mercersburg, is stepping down this year after two consecutive terms. Steve has helped to provide leadership to PMCGA over the years and his participation in many of our directors meetings has been especially productive.

Mike Wilcox, from Carelton in Mercer County, will also be stepping down. Mike was instrumental in the planning of the corn conference in western Pennsylvania and has also been an active board member who will be missed.

Duane Hobbs, a Dupont representative who served as one of our industry members on the board, will also be stepping down after three years. Duane was instrumental in developing our Accent membership program and has been active in the planning and execution of our corn conferences.

Each of these members devoted considerable time and resources to the board and their dedication has made a difference in this organization. Elections are under way to fill these open slots on the board and the results will be announced in the next issue of Corn Talk.

The PMCGA board of directors consist of 15 members, nine corn growers, three industry representatives, and three extension/education representatives.

NCGA Announces Yield Winners

ST. LOUIS, Mo. — In this tremendous production year, it is no wonder that yields over 200 bushels per acre were common in many areas of the U.S.

The National Corn Growers Association (NCGA) is pleased to announce corn yields ranging from 192 to 332 bushels per acre were produced by the 27 national winners in NCGA's 30th Anniversary National Corn Yield Contest.

(Turn to Page 6)

For Snook, Standability's

(Continued from Page 1)

yield of 195.8 bushels per acre, all with Pioneer 3293.

This is not the first top award he has captured in the nearly 20 years he has entered the contest. However, Snook's reasons for entering don't center on the awards.

"We've been doing this about every year. I don't like to jump in one year and miss another year. Even the year 1991, which was a drought year, there's a lot of people who pulled their entries. I don't like to do that," Snook said. "They send us a report back and in our county, the extension agent requires that you do a budget plan. We have to include all investments . . . the amount of equipment we have, the number of acres we farm . . . It's not only on this corn, it's on our whole operation."

The reports Snook and other farmers in the area receive back include figures for the average cost per acre on everything. To Snook, this information is worth all the effort.

Snook gained some of his corn growing expertise when he worked for Doeblers from 1967-1977.

"We used to raise seed corn here," he said. "I worked there part time. What would happen is that I'd work there in the fall and the spring and I'd be off in the summer and in the winter I'd be off a while."

When Doeblers downsized production in the East, Snook and his wife, Nancy, decided to look into other enterprises. They started working with Pioneer Hybrids and ventured into the hog business. They also dabbled in the hay business in the early 1980s.

"We built our hog house in 1977. We started with sows and raising feeder pigs. In about 1980 we switched over to finishing too," he said. "A couple of years ago because of the lack of extra help, we got rid of the sows and now all we do is finish."

As an independent producer, the Snooks finish between 400-500 hogs per year on Snook's OK Hog Farm. They also raise raise about 700 acres of corn and soybeans, mostly on rented ground.

"There's a lot of people who have farms they don't want to farm in the area," said Snook. "Every year it seems you get offered more land. We have written agreements with the owners usually for three to five years."

Snook is responsible for all the improvements to the land.

The corn is grown for both high moisture corn and dry shell corn.

He notes that his harvest is not as fast as other farmers because he works at it himself, especially when he's drying the corn. When he's harvesting the corn for high moisture corn, truckers are hired and the corn is taken off at a quicker pace.

Often, because of the weather, Snook is not able to get all the corn out of the fields in the fall. This past year was one of those years where having corn standing was to his advantage.

"We had corn out there after the first of December. About the middle of December the price of corn went up. From the first part of December to the last we gained $.25. We sold corn over the holidays which we were harvesting and bringing in to the bin, drying it and emptying it right out. I've seen this happen year after year, so one of the big factors that I'm a big stickler on is corn standability. That's the whole key to our outfit as far as I am concerned. That's why we went to Pioneer because we got better dry down and better standability. I select hybrids on how well they stand."

Snook also watches hybrids closely for disease.

"We're down along the river where we get a lot of fog. Sometimes we get a lot of fungus diseases and some corn really gets it bad," said Snook. "This past year there weren't a lot of problems with anything. I'm really fussy."

Before planting a whole field in a new hybrid, Snook will usually develop a test plot.

"We put a test plot out every year. I'm looking at not just basic yield, I want to know about standability and dry down," he said.

If there is another key to making Snook a successful corn grower, it is in planting the corn.

"A lot of guys say you can't grow continuous corn. We're only growing about 125 acres of soybeans. We do that to break up the rotation and we feed them to the pigs.

"The planting part is the most important part," said Snook. "You've got to check the seed depth yourself. If you don't plant right, you don't have a harvest."

Snook also believes in taking it slow. He doesn't plant over about four miles per hour to ensure more accurate seed placement.

Although he does plant some of his corn with the no-till method, he relies on the chisel plow and the standard moldboard plow.

"We no-till about 200 acres. We have better results on an average with conventional. This past year we averaged 20 more bushels per acre on conventional than on no-till," he said. "When we get a dry spell, it really hurts our no-till."

No-till also means more herbicide and more potential for disease.

"What I've done is take fields where I've no-tilled a section and then chisel plowed a strip. It looks like strip farming, but we actually put it all in corn. I see some real results where we've no-tilled and chisel plowed and then after four to five years go in there and moldboard again. It's really a stand out. So, the bottom line is, we're keeping our plows!"

What this ultimately means to the Snooks is that they concentrate on rotating tillage methods more then rotating crops.

His main fertilizer is the pig manure, but he's careful not to apply too much.

"We didn't find we were getting any more results after 15 tons per acre. We did a study with the Soil Conservation Service on applying manure at different rates. We found out we were getting our best yields at that level. We try to redistribute the manure over more acres. It costs us a little more money to do it, but it pays in the long run," he said.

His pig manure runs at about 10-11-10 on an analysis. This past year he added a 10-34-0 starter at eight gallons per acre when he planted his corn.

Snook is also a big believer in the Pennsylvania Crop Management Association. In fact, he helped start the West Branch Crop Management Association.

During the growing season, technicians visit the farm to scout for weeds and pests. They also check moisture content, percent lodging and other factors in the crop and take soil samples to give the farmers fertilizer recommendations.

For Snook, the technicians are like having a hired hand. With their help, he can concentrate on planting or harvesting while they scout for pests and check the field conditions.

"Basically a lot of farmers want their high moisture corn from 25-28 percent moisture," explained Snook. "You can look at the reports and know which fields to harvest first. We cover about seven miles. I don't like to go to a field and find that it's not ready."

Crop management records are an important tool to Ed Snook who captured first place in the three year average, regular harvest size, shelled grain class in the 1994 Pennsylvania Corn Club competition.

Use of the technicians has also allowed Snook to virtually eliminate insecticide use.

"I haven't used any insecticide for five or six years. That's why we went to some soybeans. When a field gets a high threshold, I push it into soybeans for a year," he explained. "That was a crop management principle. It you take the time to do your scouting, you'll know what you have out there."

Knowing what's in the field also helps Snook determine which herbicides he will use.

"I'm going to change my herbicide program and go back to what I used to use," said Snook. "For the past year or two I tried to do it all preemerge, now I'm going to go back to post-emerge. We're having a problem with a couple of weeds where we'll get better results with post emergence."

What Snook would like to see someday is a corn efficiency contest.

"I'd like to see who can raise the most corn with the least amount of cost," he said. "In a heavy dairy state this could be done really easy."

Marathon Oil Announces ETBE Production

ST. LOUIS, Mo. — Marathon Oil Company, Findlay, Ohio announced it would immediately begin producing ethyl tertiary butyl ether (ETBE) at the company's Robinson, Ill. refinery. This will be the first full-scale production of ETBE. an oxygenate additive made from ethanol, to occur in the United States.

"This is a significant first step in helping to diversify the role of ethanol in America's gasoline pool. The continued use of ethanol blends, the development of E-85 vehicles, and now ETBE, all help to fulfill the Clinton Administration's objectives to lessen our dependence on fossil fuels and reduce global warming," said Rod Gangwish, president of the National Corn Growers Association (NCGA) and a farmer from Shelton. Neb.

Marathon had been producing methanol based, MTBE at the Robinson refinery but has decided to make the switch to ETBE for economic reasons. Production levels will range from 1,500 to 1,600 barrels per day or approximatelv 63,000 to 65,000 gallons of ETBE per day. Ethanol will comprise roughly 40 percent of the total ETBE gallon, with the remaining 60 percent being isobutylene, a butane based refinery by-product.

Marathon cites the recent ruling by the Treasury Department to allow the application of the Federal Excise Tax Exemption for ethanol blends to ETBE, as the reason for the switch.

Daniel Moenter, manager of governmental affairs for Marathon, said, "This change in refinery operation will benefit both the environment and agricultural interests in Illinois." While not the first to produce ETBE, Marathon Oil will be the only fully dedicated ETBE etherification unit in operation. Arco Chemical is also producing ETBE. but has yet to "scale-up" to major production levels. Most of their production has been on a test market basis.

"We are very optimistic but the extent of ETBE use has yet to be determined, variables such as the price of imported methanol, production and logistical considerations for ethanol and the final ruling of the U.S. Court of Appeals on the Renewable Oxygenate Requirement, will all play a role in shaping the future of ETBE," Gangwish said.

Penn State Agronomy
Assistant Professor

CROP ROTATIONS THAT WORK

Crop rotation is a topic that we've all heard about before but probably don't take serious enough.

We've all heard that crop rotations can reduce fertilizer costs, help control weeds and insects, and give a yield kick to crops like corn and soybeans. But, do they work in our modern crop production programs?

During the last five years, I've been continually reminded of the importance of crop rotations by corn growers around the state who are using systematic systems of crop rotation. These folks are cleverly exploiting rotations to reduce input costs, improve their timeliness, reduce labor requirements, and to set themselves up for no-till crop production.

In this column, I'd like to review some of the successful crop rotations I've encountered during the past few years.

A few years back, I attended the Top Farmer Workshop conducted by the Farm Management Faculty at Purdue. A considerable portion of the program was devoted to figuring out the optimum machinery mix, the best tillage system and the best crop rotation for individual participants.

I attended the conference with Rich Burd, who was a 900-acre mostly continuous corn grower. When we ran his farm through the production model, the system kept suggesting a 50:50 corn/soybean rotation. Since then, he has gradually converted to that rotation and has been very pleased with the results. Now he finds he can get most of his crop planted on time and he avoids some of the late planting yield penalties he had when he was fighting to get all that corn planted by the end of May. He needs less storage capacity, uses less N fertilizer, uses no insecticide, and all of his corn is no-tilled into soybean stubble. When it gets dry in July, having half his acreage in beans lets him sleep a little easier at night. Changing to a systematic crop rotation on this farm has had a major impact.

On dairy farms, I've seen systematic crop rotations work just as well. I've seen several folks using three-year corn/alfalfa rotations with really good success. This rotation also helps to reduce input costs. One big advantage is that they reduce the amount third, fourth, and fifth year corn in rotation. These are the corn fields that have the heavy rootworm levels, the perennial or triazine resistant weeds, the soil compaction and the generally lower yields. By eliminating these, we can help to increase corn yields and reduce the cost of production.

We also help to avoid lower yielding fourth and fifth year alfalfa and the extra fertility costs that are some times necessary to topdress those fields with P and K. This system works especially well with no-till — spring seeding the alfalfa into third year corn stubble harvested for silage and no-tilling the first year corn into fall killed sods. It also is best adapted in southern Pennsylvania where alfalfa yields are relatively high in the establishment year.

The downsides are the need to reseed alfalfa more often and to discipline yourself to kill some relatively good looking three-year-old alfalfa stands.

In some areas with less productive soils, longer hay rotations seem to be favored by many growers. Some producers, such as Fred McGillvray, a Cumberland County farmer who spoke recently at the Pennsylvania Crop Conference, have found effective corn rotations in these areas. Fred uses a five-year alfalfa rotation followed by corn, rye grain, corn, soybeans and corn silage and then rotates back to alfalfa.

In Fred's rotation, all of his corn follows a rotational crop, giving him a yield benefit and eliminating his need for insecticides and some fertilizer. His cropping system is diversified enough to give him some insurance in the dry years that occur frequently in his area and to provide options for manure hauling when the ground is dry.

Crops such as soybeans and rye are more drought tolerant than corn and provide some return in dry years when the corn suffers. His rotation and attention to details have also helped him to eliminate tillage for the past 15 years.

In some areas, particularly those with good, deep, level soils, continuous corn has continued to yield well. My biggest concerns with continuous corn arise with continuous corn silage. On some soils, there seems to be a potential for silage yields to decline with time.

I've encountered several silage producers who have gone to continuous no-till corn-rye and seem to be able to maintain corn production at reasonable levels while protecting the soil, conserving nutrients, minimizing potential runoff problems and sometimes producing a ryelage crop. The rye and no-till features of this rotation help to reduce the decline in soil organic matter that can occur. The downside is that rye can get out of hand in the spring and cause planting and alleopathy problems. Because of this, I favor killing the rye relatively early in the spring or harvesting it for ryelage, especially in areas where this can be done without causing planting date delays. A mixture of oats and rye or wheat and rye can help to reduce this early season flush of growth from straight rye seedings.

Another important management consideration in this rotation is that you have to be able to stay off these fields when they are wet or you'll cause compaction problems that will necessitate a tillage operation and reduce the effectiveness of this rotation. Well designed rotations are working for growers around the state. For the most part they stick to their systematic plan but are flexible if market conditions dictate.

Many of the serious crop production problems we try to address with quick and often expensive solutions can frequently be solved with a good crop rotation. If you're not satisfied with your present system, sit down and do a thorough analysis of an alternative rotation system. Be sure to consider the timeliness, reduced inputs and higher yields you can achieve with crop rotations. You may be surprised.

HYTEST BRAND HYBRID CORN BRINGS YOU

New Beginnings. . .

New Beginnings are allowing us to tap into state of the art research programs with better genetics at our fingertips!

Introducing 21 new products for our 1994-95 lineup! Eight new Hytest Brand corn hybrids, 8 new soybeans, 3 forage grasses plus 2 new alfalfa varieties

Eight New Corn Hybrids!

BH4107 - 80 day maturity; Excellent early silage corn

BH4208 - 85 day maturity; Excellent all purpose hybrid with short to medium season capabilities

BH4[illegible] - [illegible] day maturity; [illegible]

BH4[illegible] - [illegible] day maturity; [illegible]

BH47[illegible] - [illegible] day maturity; Excellent all purpose hybrid widely adaptable for variable soil conditions and cropping management practices

BH4752RT - 114 day maturity; Roundup tolerant hybrid

BH4880 - 118 day maturity; Excellent stand ability under irrigation

BH4924 - 122 day maturity; Excellent plant health & stress tolerance. Widely adaptable to population & management practices

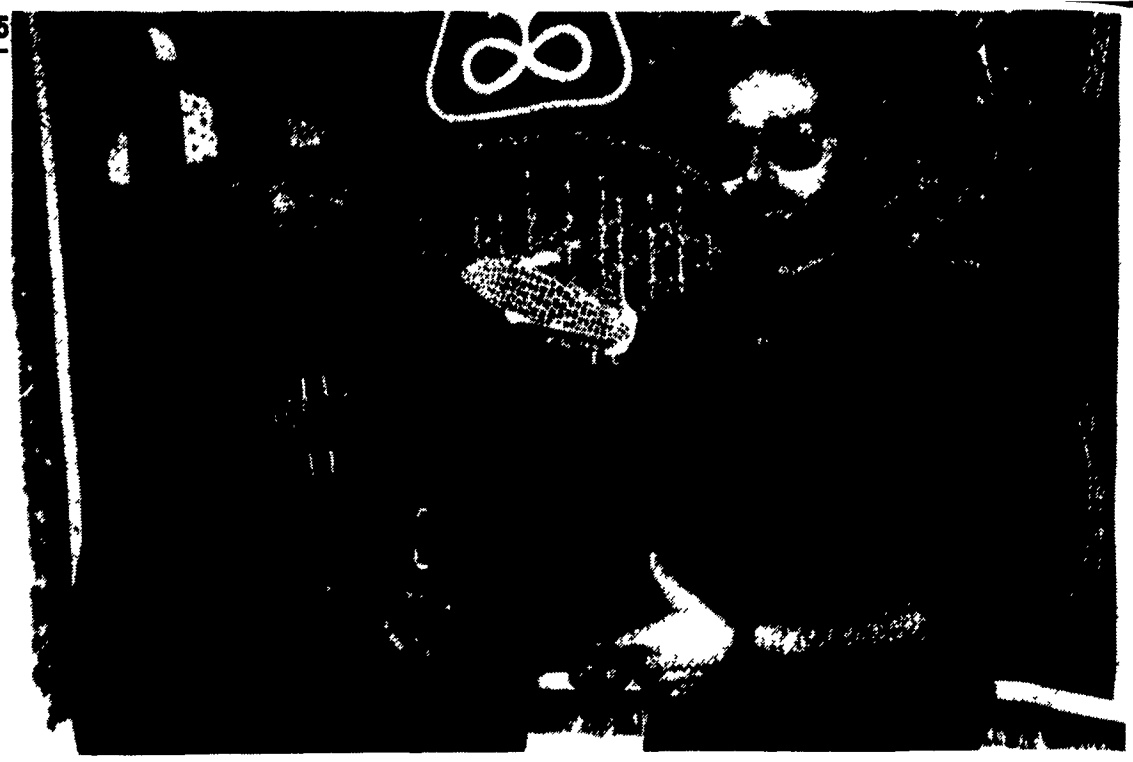
Northumberland Farmers Win Corn Growing Contest



Lance Gresh, left and Jody Hock show their award from the Pennsylvania Corn Growers Association for top production in the 3-acre plus harvest size shelled grain class.

JUDY PATTON
Union Co. Correspondent

WATSONTOWN (Northumberland Co.) — "I treat my crops like I would a baby—I make sure they are never short on the nutrients they need to grow," said Jody Hock of Kevin-Charles Farm when talking about the keys to raising good corn.

With his partner and brother-in-law Lance Gresh, Hock grew corn yielding 212.4 bushels per acre in 1994, which earned them the first place award in the three-acre plus harvest size, shelled grain class of the Pennsylvania Corn Growers Association contest.

Watching the planter (a John Deere 7200 six-row) closely to make sure it is functioning properly during planting is also important to Hock. He checks for seed depth of 1–1 1/4 inches and no skippers in the 30-inch rows. As a result, there were 25,522 plants per acre on the award-winning plot.

Since they started crop farming four years ago, Hock and Gresh have tried several varieties of corn hybrids, but they settled on Pioneer as their preference. The winning plot was Pioneer 3293. Using Pioneer hybrids on 99 percent of their 265 acres of crop ground, they got overall yield averages of 160 bushels per acre of corn and 43 bushels per acre of soybeans.

The partners now have a 50-50 rotation with corn and soybeans going on their ground, which has sandy loam soil on the home farm and heavy clay on the 90-acre rented farm. The rented ground is in half-acre contour strips, as it is very hilly. All their crop acreage was laid out according to a Soil Conservation Service plan.

Using advice from Kepner's Farm Supply for crop planning, Hock and Gresh fertilize mostly with 8-32-16 starter, sidedressing with nitrogen and topdressing potash and lime as needed according to soil tests. They no-till bean stubble acreage and mostly chisel plow the rest for better weed control.

From the Corn Growers Association guidelines, they can choose the best time for marketing their crops. They have a storage capacity of 36,000 bushels.

Hock learned about crop raising from working with Northumberland County farmers Donald Beaver and Gerald Shoop after graduating from high school, while Gresh was taught by his fathers from whom Hock and Gresh bought their farm.

Pa. Corn Stocks Reviewed

HARRISBURG (Dauphin Co.) — Pennsylvania's corn stored in all positions on December 1, 1994 was 104.1 million bushels, up 13 percent from December 1, 1993.

On-farm corn stocks amounted to 95.0 million bushels, while off-farm stocks were 9.1 million bushels. Wheat stored off farms totaled 6.1 million bushels. Soybeans stored off farms totaled 2.9 million bushels. Barley stored off farms was 1.2 million bushels. Oats stored in all positions was 6.0 million bushels, 5.3 million on-farm and 735 thousand off-farm.

Pennsylvania's on-farm stocks of wheat, soybeans and barley are not published separately but instead are included with an unallocated national total.

Hay stocks on-farms on December 1, 1994 were estimated at 2.72 million tons, up 10 percent from a year ago.

On December 1, 1994, there were 248 off-farm storage facilities (mills, elevators, warehouses, terminals and processors) with a total grain storage capacity of 28.9 million bushels, down 9 percent from December 1, 1993.

On December 1, 1994, on-farm storage capacity was 160 million bushels, 6 percent less than December 1, 1993.

Nationally, corn stocks in all positions on December 1, 1994 was estimated at 8.08 billion bushels, 36 percent more than on December 1, 1993. On-farm stocks totaled 5.42 billion bushels, 42 percent more than last year. Off-farm stocks were 2.66 billion bushels, up 25 percent from last year.

All wheat stocks in all positions on December 1, 1994 are estimated at 1.50 billion bushels, down 6 percent from a year ago. Wheat stored on farms was 576 million bushels, down 12 percent from last year. Off-farm stocks totaled 920 million bushels, 1 percent below last year.

Soybeans in all storage positions on December 1, 1994 totaled 2.10 billion bushels, up 34 percent from December 1, 1993. Farm stocks totaled 986 million bushels, 41 percent above last year. Off-farm stocks are placed at 1.12 billion bushels, 27 percent above a year ago.

Barley stored in all positions on December 1, 1994 totaled 279 million bushels, 16 percent below stocks a year ago. On-farm stocks totaled 166 million bushels, 14 percent below a year earlier. Off-farm stocks were 113 million bushels, 19 percent below last year.

U.S. hay stocks on farms on December 1, 1994 are estimated to be 104.4 million tons, 3 percent above a year ago.

The total number of off-farm storage facilities in the U.S. on December 1, 1994 was 11,595 with a total grain storage capacity of 8.38 billion bushels, down 1 percent from a year ago.

On-farm grain storage capacity on December 1, 1994 for the United States was 11.5 billion bushels, down 1 percent from a year ago.

NCGA Announces Winners

(Continued from Page 1)

"Congratulations to the 471 state and national contest winners. American farmers have once again proven we are the most efficient corn producers in the world," said NCGA president Rod Gangwish, Shelton, Neb. corn farmer, referring to the record-breaking corn crop of 10 billion bushels this year's entrants and other farmers helped to produce. "We have the capabilities to supply all of our current markets and are continuing efforts to expand foreign markets and develop new industrial uses."

Of the 3,172 total entries received, 2,383 completed the contest by submitting accurate crop production records and harvest reports as required by contest rules.

The 1994 National Corn Yield Contest featured nine classes with the following national winners named:

A Non-Irrigated (comprised of corn growers from all states except IL, IN, IA, MN, MO, OH and WI)

1. Schwenke Brothers, Union, KY—255.47 bu./acre—Pioneer 3163.

2. Bob S. White, Morganfield, KY—245.73 bu./acre—Pioneer 3163.

3. Sam Langford, Sparta, TN—244.90 bu./acre—DEKALB DK689.

AA Non-Irrigated (comprised of corn growers from IL, IN, IA, MN, MO, OH, WI)

1. Walter H. Hasselbring, Watseka, IL—300.33 bu./acre — Gutwein 2590

2. Gary A. Cross, Hartsburg, IL—278.55 bu./acre—Pioneer 3162 3. Gary Porter, Mercer, MO — 252.29 bu./acre— Pioneer 3162.

A No-Till Non-Irrigated (comprised of corn growers from all states except IL, IN, IA, MN, MO, OH and WI)

1. Kathleen J. Wittler, Talmage, NE—251.83 bu./acre—Pioneer 3162.

2. Teri A. Birchmeier, New Lothrop, MI—249.58 bu./acre —Pioneer 3525.

3. Noble E. Howard, Campbellsville, KY—243.47 bu./acre—Pioneer 3163.

AA No-Till Non-Irrigated (comprised of corn growers from IL, IN, IA, MN, MO, OH, WI)

1. Richard F. Johnson, Alexander, IL—248.23 bu./acre.—ICI 8400.

2. Lee Roy Behymer, Mt. Sterling, IL—247.87 bu./acre —Burrus BX70.

3. Robert A. Johnson, Alexander, IL—243.37 bu./acre—ICI 8260.

No-Till Irrigated (comprised of corn growers from all states)

1. Leila B. Beaver, Sterling, NE —332.35 bu./acre—Pioneer 3162.

2. Alvin Harris & Sons, Inc., Pasco, WA—279.27 bu./acre —Pioneer 3417.

3. Milferd Nichols, Dalhart, TX—278.77 bu./acre—Pioneer 3162.

A Ridge-Till Non-Irrigated (comprised of corn growers from all states except IL, IN, IA, MN, MO, OH and WI)

1. Lyle L. Epke, York, NE — 263.23 bu./acre—Pioneer 3162.

2. Frog Level Farms, Elkton, KY—223.07 bu./acre—Pioneer 3163.

3. Leah Oswalt, Plantersville, MS—192.76 bu./acre—Northrup King N8020.

AA Ridge-Till Non-Irrigated (comprised of corn growers from IL, IN, IA, MN, MO, OH, WI)

1. Williams Farms, Crescent, IA—231.65 bu./acre—Pioneer 3162.

2. Mike Richmond, Nevada, OH—230.26 bu./acre—Asgrow RX811.

3. Bruce Baumgartner, Lena, IL—218.45 bu./acre—ICI 8501.

Ridge-Till Irrigated (comprised of corn growers from all states)

1. Kenneth Beaver, Jr.,Sterling, NE—326.12 bu./acre—Pioneer 3162.

2. Gary Baalman, Menlo, KS—264.11 bu./acre—Pioneer 3162.

3. August J. Ochs, Hoxie, KS—262.64 bu./acre—Pioneer 31621R.

Irrigated (comprised of corn growers from all states)

1. Chris Beaver, Sterling, NE—327.72 bu./acre—Pioneer 3225.

2. Hawman Farms, Inc., Hermiston, OR—310.17 bu./acre—Pioneer 3417.

3. Tim Dewey Farm & Cattle, Cimarron, KS—301.97 bu./acre—Pioneer 3162.

The National Corn Yield Contest was established 30 years ago to recognize farmers for innovative production practices designed to improve profitability.

All of the 27 national winners and 471 state winners (top three state winners in each class) will be formally recognized with awards during the NCGA Corn Classic, Feb. 26-28, in Nashville, Tenn.

Contest winners, their yields and production practices will be summarized in the 1995 Corn Yield Guide, sponsored by American Cyanamid Company, Deere & Company and Northrup King Company. The guide will be published in the March issue of Farm Journal magazine.

Copies of the 1995 Corn Yield Guide can also be obtained from NCGA's office, 1000 Executive Parkway, #105, St. Louis, MO, 63141.

GATT's Passage Marks Victory For Growers

WASHINGTON, D.C.—The National Corn Growers Association (NCGA) is savoring a major victory in Washington, DC. The recent Senate passage of the Uruguay Round of the General Agreement of Tariffs and Trade (GATT) clears the final hurdle to full U.S. acceptance of the century's most sweeping trade reform.

U.S. corn farmers can expect to gain new export market opportunities for 200-300 million bushels of corn each year, roughly equivalent to Kansas' entire 1993 corn crop.

"The Uruguay Round agreement will level the playing field around the world," said Rod Gangwish, NCGA president and a Shelton, Neb., corn grower. "In a fair market, the U.S. corn farmer is the most efficient corn producer in the world. We will benefit substantially from this trade accord."

NCGA played a major role in securing GATT's sometimes rocky passage through Congress. As a leader of the Ag for GATT Coalition, with more than 300 members, NCGA encouraged corn farmers across the U.S. to voice their support for GATT. That grassroots initiative helped clinch GATT's final approval.

Once President Clinton signs the Uruguay Round agreement, GATT is expected to boost U.S. ag exports $5-14 billion during each of the next five years, generate $10-30 billion in related economic activity, boost farm income $1.3 billion and create more than 112,000 jobs.

The GATT treaty marks the second recent major trade victory for U.S. corn farmers. Just one year ago, Congress passed the North American Free Trade Agreement (NAFTA). NCGA and other members of the AG for NAFTA Coalition coordinated a major grassroots campaign to support NAFTA. It proved key to securing NAFTA's ratification.

In the year since NAFTA linked the U.S., Mexico and Canada into the world's largest free trade zone, corn shipments to Mexico have surged. Exports to Mexico are predicted to reach 2.5 million metric tons (nearly 100 million bushels) this year, five times more than last year's sales.

"GATT will build on NAFTA's success," said Gangwish. "Corn farmers can rightfully relish this victory. They did the hard work that made it happen."

PENNSYLVANIA MASTER CORN GROWERS ASSOCIATION

President's Message

Curt Rakestraw
President, PMCGA

I would like to take this opportunity to write about the EPA (Environmental Protection Agency) review of the Triazine herbicides (Bladex, Princep, and Atrazine).

Most of the corn growers in our area as well as across the country use some form of Triazine herbicide in their weed control program. We use it because it is fairly inexpensive, it works well in all types of tillage practices, it tank mixes well with a number of other herbicides, and it is relatively safe to handle.

Should the EPA ban Triazines, we would also lose more than 20 pre-tank mixes such as Bicep and Laddok.

If you are concerned about an EPA ban on the Triazines, please write to the EPA and let them know why it would be a hardship to you in your farming operations. The address to write to is Public Response and Program Resources Branch (OPP-30000-60), Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington, DC 20406.

Remember, if you don't write and these products are banned, you have nothing to complain about.

One other thing I would like to mention is the 1994 record corn crop. According to the latest USDA crop report, the American corn growers produced a 10.1 billion bushel corn crop with an average yield of 138-bushel per acre. This is a remarkable feat when you consider that it has only been 40 odd years since the national average yield was only 38 bushels per acre.

Unfortunately, record crops come with lower prices. That's the bad news. However, there is some good news in the USDA report. This is the corn usage figures.

Exports are projected to be 1.95 billion bushels, feed use is projected at 5.65 billion, and crush at 1.7 billion for a total of 9.3 billion bushels. This equals the size of the second largest crop in U.S. history. With a 7.5 percent set aside in 1995, we will need to produce another 138-bushel-per-acre crop just to meet demand.

When you look at these figures, it is hard not to be a little optimistic. Let's hope 1995 is one of those rare years which bring both good yields and good prices.

Sincerely,
Curt Rakestraw

NAFTA One Year Later: Growers Reap Benefits

ST. LOUIS, Mo. — More than a year ago, Congress voted to ratify the North American Free Trade Agreement (NAFTA) after intense debate and negotiation. Today, U.S. corn growers are among those reaping the benefits.

"Corn shipments to Mexico have surged. There is every indication they will reach 2.5 million metric tons (99 million bushels) this year, almost triple last year's sales," said Rod Gangwish, president of the National Corn Growers Association (NCGA) and a Shelton, Neb. farmer. "Through NCGA, corn growers did the hard work that made this market a reality."

As a leader of the Ag for NAFTA coalition, representing more than 175 agricultural organizations, NCGA helped NAFTA pass through a sharply divided Congress. Corn growers participated in a massive grassroots campaign, writing and calling their senators and representatives to urge support for the trade agreement.

Their efforts paid off. Congress voted to ratify NAFTA. NAFTA took effect, linking the U.S., Mexico and Canada into the world's largest free trade zone.

Under NAFTA, U.S. corn growers have benefited significantly. During January–August 1994, U.S. corn exports to Mexico reached about 54 million bushels, compared to only 7 million bushels exported during the same time period in 1993. USDA projects that 1994 corn exports, if continued at the same pace, will ultimately total about 99 million bushels.

Early Registration Incentives Encourage Growers

ST. LOUIS, Mo. — The nation's most progressive farmers are taking note of the National Corn Growers Association's (NCGA) 1995 Nashville, Tenn. Corn Classic location and making plans early to qualify for two enticing early-registration incentive opportunities.

NCGA's 37th annual convention and trade show will be held at the Nashville Convention Center on Feb. 26-28.

Compose a masterpiece name for the Grand Old Corn Classic's three-piece corn man band featured in the 1995 Classic logo and have the opportunity to take the stage at Corn Classic to claim one of these prizes: First Prize—an all-new Ford LS25 lawn & garden tractor; Second Prize—Ford toy pedal tractor; or Third Prize—scale model of Genesis tractor. Winners will be announced at the 1995 Corn Classic.

Sandoz Crop Protection Corporation is planning an early-registration incentive bonus event for Saturday, Feb. 25, for the first 1,000 paid 1995 Corn Classic registrants.

To register for Corn Classic, call NCGA at (314) 275-9915.

CORN GROWERS SPECIAL

Badger Forage Boxes... Built for the Long Haul!

Model BN1050

Model BN1055

Now Badger gives you more choice in forage boxes. Two models, in three sizes 14', 16' or 18'. The new Model BN1055 offers variable speeds to match the forage density of your load. Look to Badger for the only forage boxes built to flex on all terrain.

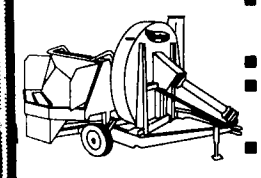
- High-strength alloy steel undercarriage
- 23-1/2" wide high-speed cross conveyor
- Model BN1055 available with heavy-duty corrugated steel roof
- Lifetime warranty on sides and deck

SAFETY! It's no accident

Contact your Badger dealer today for details

Badger Blowers Beat Bottlenecks

NEW



Model BN2060

- Designed for plug-proof operation
- Unload wagons faster, fill silos more efficiently
- Choose from Model BN2054 or New Model BN2060, for bigger silos
- Rugged, heavy-duty construction
- Adjustable shear bar prevents hair pinning, carry-over and power loss
- All material goes up the pipe in the air stream
- Flexible wind guards minimize spillage

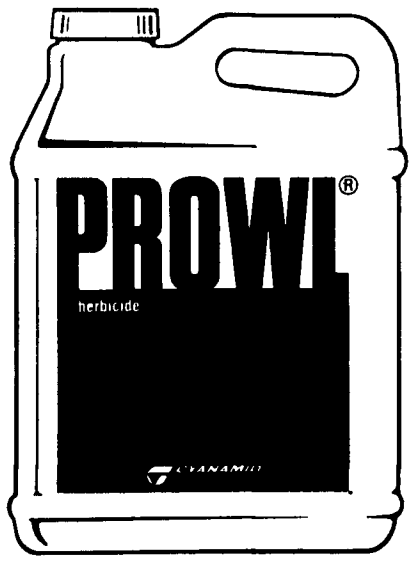
FOR LOW-COST WEED CONTROL IN CORN VELVETLEAF, FOXTAIL AND OTHER ANNUAL GRASSES USE A PROWL® TANK MIX



EFFECTIVE CONTROL PROWL® herbicide with atrazine or bladex stops velvetleaf and foxtail from choking your young corn plants. This tank mix gives you top performance and real economy in corn weed control.

EASY APPLICATION Apply the PROWL tank mix preemergence, or early postemergence after the corn is up, but no bigger than the four-leaf stage. Weeds should be no more than an inch tall. Do NOT incorporate PROWL in corn.

See us today. We have the products and the service to help your farming operation.

Ethanol To Play Major Role

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

WASHINGTON, D.C.— To most Americans, the 1950's in Southern California meant sun, surf, and the Beach Boys.

But to the teenaged Neale Shaner, who lived there during the school year, it meant *smog*.

"Some days, the smog was so bad, we'd be kept inside during phys. ed. class. I couldn't wait for the end of school, to return to Nebraska, where my grandfather had his farm, and get away from all that contaminated air," he said.

Today, Shaner spends his working days on that same farm in Fort Calhoun, Neb. the one his family has owned for more than 100 years.

"It's a challenge, being a farmer," he said. "There's the outdoors...working on your own...having the chance to appreciate nature...I can't think of anything more satisfying than looking out and seeing a field of corn or soybean growing that you're responsible for.

"As a boy, I liked the idea of being part of the industry that produced the food Americans eat. I never thought, though, back then, that the corn I was growing would also help clean up the air we breathe."

Now, as gasoline refiners prepare for the introduction of the U.S. Environmental Protection Agency's RFG (Reformulated Gasoline) program in some four dozen metropolitan areas around the country, corn stands to play a greater role than ever before in this country's environmental efforts, due to the development of a product known as ETBE (ethyl tertiary butyl ether).

ETBE is an oxygenate produced by combining corn-derived ethanol with natural gas by-products. Blended with gasoline, oxygenates increase the fuel's oxygen content, which makes it burn more cleanly. This "cleaner burn" helps to reduce emissions of the harmful pollutants associated with conventional gasolines.

Since all the oxygen in ETBE comes from ethanol, it takes the same amount of ethanol to "oxygenate" a gallon of gas with ETBE as it does using ethanol alone. However, when ethanol is blended into ETBE, some of its properties change. ETBE burns as cleanly as ethanol, but since it is a petroleum hybrid, it is 100 per cent compatible with gasoline —so, unlike ethanol, it can be transported via the pipeline systems that supply gasoline to much of the country. And instead of increasing gasoline's evaporation rate—a characteristic of ethanol that had limited its use — ETBE *reduces* it.

For American corn farmers and ethanol producers, ETBE is the breakthrough they've been waiting for.

Ever since 1979, when ethanol was first used to enhance octane and extend fuel supplies, farmers' hopes for the corn-derived product have sprung eternal. However, ethanol's chemical properties have limited its use to splash blending as gasohol. Wider distribution via the major pipeline system supplying such fuel-hungry gasoline markets as the Northeastern United States was prevented by ethanol's affinity for water.

Growth beyond local splash blending markets was further limited by increased restrictions on vapor pressure, including stringent RFG criteria intended to reduce air pollution caused by evaporation as well as exhaust emissions. Since ethanol increases gasoline's evaporation rate, it appeared that ethanol's role could be further diminished by RFG requirements. Yet paradoxically, corn farmers and ethanol producers now see that same low vapor pressure requirement as opening the way to new markets for ethanol.

"ETBE is the key," said Shaner, a former president of the Nebraska Ethanol Board. "Vapor pressure was a major hurdle to California and other warm weather markets. But now that ethanol can be used to create an oxygenate that actually lowers vapor pressure, those earlier restrictions on ethanol's potential markets no longer exist. We now have an oxygenate that makes as much sense to refiners as it does to farmers."

According to Gary Goldberg, president of the American Corn Growers Association, ETBE will allow farmers to more fully benefit from the EPA's ROR (Renewable Oxygen Requirement), which calls for 30 per cent of the oxygenates used in reformulated fuels to be derived from renewable feedstocks, such as corn.

"The figures we've looked at indicate a sizeable increase in the bushels of corn converted into ethanol. Right now, we're only using about 400 million bushels a year—but we expect that to increase to about 750 million bushels to meet RFG provisions. And that's because ETBE is the only oxygenate out there that can meet both vapor pressure *and* fuel renewability requirements."

But corn farmers and ethanol producers still have work to do before growing into these new markets, said Shaner. "There's a big job to do in educating the public about ethanol and ETBE; you have to show people that the benefits are really there. And not just their environmental benefits, which have been demonstrated over and over again, but their positive impact on the farm economy, how they make our country more energy-self-sufficient, and how they create more jobs."

One significant hurdle still to be overcome, said Goldberg, is the current federal income tax credit structure. "The problem of tax credits has to be addressed; the way the code is currently written, the only one who gets a tax break from using ETBE is the refiner who sells reformulated gasoline into the marketplace. While we support this credit, the fact is that the current tax status of many refiners will prevent them from taking advantage of it. Because of this, we feel that only the way to ensure that the tax code supports the commercial viability of ETBE is to broaden this tax credit to include ETBE producers.

"It should be clear that the future of the ethanol industry lies in full commercialization of ETBE. Without that, we are looking at flat growth for the ethanol industry and for corn consumption for years to come. ETBE is the avenue to whole new markets and unprecedented growth. But we have to make sure that government, the public, and the media, and corn farmers understand what is at stake.

"Everybody benefits. Refiners finally get a renewable oxygenate that they can blend at the refinery, ensuring greater quality control and efficiencies. Corn and ethanol producers benefit from expanded markets, which in turn reduces the need for government subsidies to corn farmers—a benefit to taxpayers. And we all benefit from a cleaner environment.

"The way I see it," Goldberg said, "ETBE is the brass ring for which corn growers have been waiting for more than a decade. Right now, we have a simple choice: we can either grab this opportunity and make it work for us—or we can ignore it and let it pass us by."

NORTHRUP KING

To help you make the right decisions, your dealer has a full range of product information, backed by scientific research. He has multi-year performance data, access to the most recent university research and can call on regional agronomists for special assistance.

You'll also hear about Northrup King innovations like the new Q-Bit™ seed container. In addition to being a more efficient way to handle seed, it is better for our environment. As part of the Load and Go™ seed handling system, the Q-Bit container is one more example of technological leadership.

Your dealer is your guide to putting Northrup King leadership to work on your farm. He is in good company and your best local source for sound seed advice.

Because it all starts with the seed, you need the right seed and the right advice.

When you plant Northrup King, you're in good company.

Here's What Area Growers are Saying!

"Harvested my N5901 hybrid corn and Pioneer 3527 side by side and weighed them both. Results were excellent with both, but I really liked the superior test weight and yield of N5901. It yielded 183.5 bu/A at 17% moisture; almost 15 bu/A more than the Pioneer."

Rich Crone
Danville, PA

"I took off my NCGA 10 acre contest field of N6822 hybrid corn and even with some cutworm damage, it made 197 bu/A at 21.3% moisture. Nice field of corn."

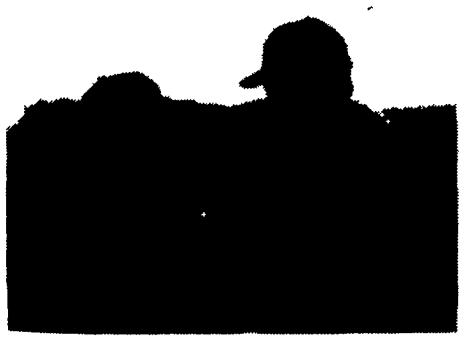
N4242 RM: 98-102

A top yielding hybrid, N4242 flowers early and dries down very fast to offer maximum return and profitability. It performs extremely well in either drought or cool wet growing seasons. Broad adaptability makes this a popular dual-purpose corn for grain or silage in northern Indiana, Ohio and early maturity areas of Pennsylvania. Superior stalk strength and ear retention. Works well with reduced tillage and continuous corn. Adapts to a wide range of soils and plant densities. Due to early maturity, N4242 is not generally recommended for dryland sandy soils of northwestern Indiana.

N6822 RM: 110-114

An outstanding newer hybrid for the Eastern Corn Belt, N6822 displays very good staygreen to maintain high yield potential under continuous corn or standard rotations. Performs well on medium to fine textured soils when planted at moderate to high densities. Semi-flex ears produce good quality, heavy test weight grain. Very good standability and drought tolerance protect yield potential.



NEW **N7448 (X771) RM: 112-116**

Excellent standability, superior staygreen and a good foliar disease package help this new hybrid carry maximum yields through to harvest. A long grain-fill period also contributes to outstanding yield potential. Heavy test weight grain dries down exceptionally fast. N7448 is a good choice for both no-till systems and continuous corn. Performs best at moderate to high plant populations with favorable moisture.

Corn Growers To Kick Up Heels In Music City

ST. LOUIS, Mo. — More than 2,000 of the nation's top growers and industry leaders will be kicking up their heels Feb. 26-28 in Music City USA during the National Corn Growers Association's (NCGA) Corn Classic to be held at the Nashville Convention Center.

With Nashville, Tenn. temperatures averaging a daily high of a comfortable 51 degrees in February, registrants are filling up their dance cards early with a chartbuster list of optional activities.

If you're all ears for getting acquainted with this easy-to-access Midwest location, NCGA is offering a variety of optional tours to introduce you to the area.

Come early before the 1995 Corn Classic officially opens Sunday at 6 p.m. with the Grand Opening Trade Show Reception, sponsored by DuPont Ag Products. Spend Saturday finding out how Jack Daniels' unique corn processing makes their sour mash world famous. This all day tour also includes an added "mane" attraction visit with Tennessee walking horse owners. Or, if you operate at a quick tempo, take the Nashville Music City on the Run! Saturday afternoon.

Sunday's tours offer something for everyone: see Nashville's highlights during the Music City and More! tour; unwind with a leisurely afternoon visit to the historic town of Franklin; or experience farming Tennessee-style during the hands-on tour of a nearby 1,800-acre family farm. Staff from this cotton, wheat, corn and cattle farm will be on hand to answer your questions.

Looking for one last chance to get in tune with the area before you leave? Two optional tours are offered Tuesday afternoon between the 275+ booth trade show's conclusion and the Evening of Entertainment featuring Louise Mandrell and Lee Greenwood. Finish your shopping before you head home during the Shopping Music City Style tour which will stop at a factory outlet mall and Loretta Lynn's country western store. Or, you may choose to take a ride past lovely Southern homes and visit the exquisite Cheekwood Fine Arts Center and Botanical Garden.

If it's the Grand Ole Opry that gets your toes tappin' toward Nashville, be sure to call (615) 889-3060 as soon as possible to purchase individual tickets for the world's longest-running live radio show. February's performances are only on Friday and Saturday evenings and sell-out early.

In addition to these optional opportunities, take note of Nashville's numerous treasures to be discovered on your own..riverboat cruises, antebellum mansions, Civil War history, President Andrew Jackson's home The Hermitage, the State Capitol, the Parthenon, the Country Music Hall of Fame, Music Row, golfing, boating, hiking...and more. For additional information. call Nashville's tourism hotline at (615) 259-4700.

For more information on how you can jump on the bandwagon at the agricultural industry's fastest growing commodity convention and trade show, call NCGA at (314) 275-9915 for a complete registration packet.

Corn Classic's registration fee includes participation in a diverse selection of educational sessions, attendance at the General Session featuring legendary football star Terry Bradshaw, admittance to the trade show, five trade show meals and receptions, the Monday evening Awards Banquet and Tuesday's Evening of Entertainment. Tours are available on a first-come, first served basis and are not included in the NCGA registration fee.

GROWING DEGREE DAYS AND LATE PLANTED CORN

Greg Roth
Penn State Agronomy
Assistant Professor

At the recent American Seed Trade Association annual corn and soybean conference, Purdue agronomist Bob Nielsen recently reported his findings on a study that evaluated the effect of planting date on growing degree accumulations for corn.

This research showed that when planting was delayed from early May to early June, the growing degree days required for hybrids to reach 50 percent silk and black layer decreases. Growing degree day requirements to 50 percent silk were reduced by an average or 64 GDDs and later plantings tended to have 1 to 2 fewer leaves.

Growing degree day requirements during the grain fill phase were also reduced from 0 to 9 GDD per day of planting day delay.

Overall GDD requirements from planting to black layer were reduced from 2 to 10 GDD per day of planting delay. If we assume an average reduction in the GDD requirement of about 5 GDD per day, then a 40 day delay in planting would reduce the GDD requirement from 2700 GDD for a full season hybrid in late April to 2500 GDDs in early June.

What does all this mean? It means that hybrids seem to adjust somewhat to the shorter season by reducing the amount of GDDs they need to mature. It also means that we may not necessarily need to switch to hybrids as early as GDD requirements might dictate. The experience of growers and seedsmen I've talked to appears to support this concept. Our research in Pennsylvania has shown similar results with one difference. Here, hybrids will mature in fewer GDDs than they are rated at even when planted in early May. For example, in a two year study we conducted, a hybrid rated at 2850 GDDs matured in two seasons at 2621 GDDs in Lancaster County.

At Rockspring, when we delayed the planting of three 92 to 97 day hybrids for 20 days, they required about 125 GDDs less than in early May. This translates into about 6 GDD/day of planting date delay, consistent with the results of the Purdue study.

These results indicate that GDD requirements are only a rough guide to predicting hybrid maturity since they vary somewhat depending on location and planting date. Also, ratings of hybrids conducted in the midwest often overestimate the requirement in Pennsylvania by about 200 GDDs.

Mercer County Lists Crop Yields

MERCER (Mercer Co.) — Following are the results of several area corn plots that were received at the extension office over the last couple of weeks.

Some of the plots are company demonstration plots and some have hybrids from several different companies in them. These should not be taken as an endorsement of any one hybrid or company over another, but only as information that may help you in making the right decisions in your corn production for next year.

N.Y. Corn Growers Take Charge

SYRACUSE, N.Y. — Around the country, the first thing that comes to mind when thinking of New York is the hustle and bustle,. crowded streets, traffic jams, noise, and pollution. It's hard to imagine that on the outskirts of all this chaos are down-to-earth New York corn growers.

Ron Robbins, president of the New York Corn Growers Association (NYCGA), describes NYCGA members as "people who are driven to succeed and have the foresight to see the need to be involved."

By working together, they have overcome many legislative issues, the most difficult being the strict regulations involving pesticide registration. From 1988 to 1992, the Department of Environmental Conservation (DEC) forbid any new weed or pest control products to enter the New York market. Without access to new and improved, safer and lower-use pesticides, New York corn farmers were at an economic disadvantage compared to neighboring states. The NYCGA joined forces with the Farm Bureau, and after a five year battle with DEC, the rigid pesticide regulations were lifted.

Another pressing issue for NYCGA is the Clean Water Act, which involves investigating non-point sources of pollution. For example, Southview Farms, located in Western New York, was sued by citizens who claimed manure from the farm was seeping into water sources. Southview Farms spent half a million dollars fighting the case and won. Unfortunately, the case was appealed and the not-guilty verdict has now been overruled. "This will probably impact the New York farmer more than any other national issue I can recall," said Robbins. "We are surrounded by water on three sides and are in a prime area for regulations." Already a highly regulated state, this incident could trigger stricter regulations, investigations and lawsuits.

Still another challenge for the New York corn grower is the loss of farmland. New York farmers plant an average total of 1,150,000 acres of corn per year. However, in the past 12 years, urbanization has had a hand in decreasing farmland by 300,000 acres. "We have one of the highest tax rates in the nation. With high tax rates and declining farm income, many farmers that own land near urban areas must consider selling out for urban development," said Jim Czub, New York's delegate to the NCGA board.

But there is hope on the horizon. New York corn growers are just one law away from a feed grains checkoff. The current New York Marketing Order allows promotional funds to be collected from almost all commodities, except feed grains. NYCGA is currently working hard to legislate a change in this law, with the goal of passing a state checkoff by the summer of 1995.

Even without the additional market investment dollars a checkoff would produce, corn farmers are doing their best to promote the construction of an ethanol plant in New York. "Ethanol use and production has become a priority issue for the Empire State's Council of Agricultural Organizations (CAO), of which we are a member," said Robbins. To show their support, the NYCGA has testified at hearings on the Clean Air Act and has collaborated with Pal Energy Oil Company at a recent trade show to promote ethanol use.

"Starting out with no money and no paid staff has made it difficult for the organization (NYCGA) to grow. We have finally been able to make ourselves more visible to farmers, and our leadership has gained respect in our capitol," said Robbins. NYCGA is in the process of planning a membership drive this month, with a goal of totaling 400 members.

The NYCGA also participates in trade shows to promote corn and membership in the association. During "Empire Farm Days" held in August, all three-year memberships, new or renewed, received a bag of free seed corn, donated by several seed corn companies. Free samples of popcorn and biodegradable plastic bags were also used to lure both farmers and non-farmers into the booth to discuss new uses for corn.

The NYCGA has earned respect from both consumers and the government. And Robbins adds, "We may not grow the most corn, but we do have the most consumers living in our backyard—and those consumers are the foundation of everyone's future!"

The Sweet In Sweet Corn

UNIVERSITY PARK (Centre co.) — Sweet corn has gotten sweeter over the years; and many of the newer hybrids retain their sweetness longer, giving gardeners a longer harvest window, and consumers more flexibility in storage.

It's no longer necessary to dash from the garden to a pot of boiling water in order to have sweet sweet corn.

Regular sweet corn contains a double dose of a recessive gene called sugary (su). Sweet corn kernels contain almost twice the amount (10 percent) of sucrose as field corn, plus a water- soluble polysaccharide that produces a creamy texture.

However, the sugar in regular sweet corn rapidly converts to starch after harvest, losing 50 percent of peak sugar concentration in just 24 hrs at room temperature.

"Silver Queen" is an example of a standard sweet corn.

The new sweeter sweet corn hybrids have even higher concentrations of sugar,and this sugar converts to starch more slowly. One gene involved in this improvement is the shrunken gene (sh2). The sh2 hybrids can have a sucrose content as high as 37 percent at harvest, that drops only to 29 percent after 2 days storage at 80 F. However, the sh2 sweet corns are low in water-soluble polysaccharides so lack the creamy texture of the regular sweet corns.

Examples of sh2 hybrids are "Illini Xtra Sweet," "Milk 'n Honey Supersweet," and "Butterfruit."

Another gene involved in some of the sweeter sweet corns is the sugar enhanced gene (se). It produces both extra sweetness (with a more complex flavor due to a mix of sugars) and tenderness.

Some corns in this group have the registered trademark EH, which stands for Everlasting Heritage (e.g. Kandy Korn EH).

WARNING! DETERIORATING CONCRETE FROM CORN JUICE!

WARNING, ALL SILO OWNERS

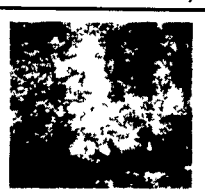
Check your silo now for rotten staves. If you have been using your silo for 10 to 15 years for either corn silage or haylage, it is time to SHOTCRETE.

RESURFACES INTERIORS:
- Coats the silo's interior
- Protects feed in storage
- Durable tough acid resistant
- Increases useful life
- Economical

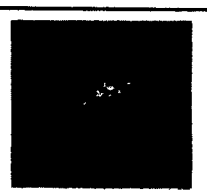
Before The silo's interior with plaster damaged and stave exposed

After The surface is reconditioned and a new, thick tough surface will protect stored feed

REPAIRS HOLES:
- Repairs even large holes
- Up to twice the strength of the original stave
- Rapid application
- Durable surface



Before A hole is worn completely through the silo wall



After With the hole repaired by ShotCrete and a new surface applied the silo is ready for years of use

EXTENDS USEFUL LIFE:
- Support for old foundations
- Special repairs can be made quickly and economically
- Little or no forming needed
- Stronger than the original

Before The bottom part of the staves are completely worn away

After The ShotCrete System repairs and replaces the missing structure

Shotcrete is also good for repairing stone walls

When you think your silo is beyond repair THINK OF SHOTCRETE!

Lancaster Silo Co., Inc.
2008 Horseshoe Rd. • Lancaster, PA • (717) 299-3721

When You Plant CFS Waxy Hybrids, You're Planting More Than Just Corn.

Facts prove that starch content is what makes corn the ideal animal feed. And that's what makes CFS waxy corn different from dent. CFS waxy is 100% amylopectoin starch ... zero percent amylose. (Dent is 25% amylose).

Amylopectin starch is more digestible. That means CFS waxy maintains no less than a 25% advantage over dent ... in the feedlot or milking parlor.

On-farm tests show the average weight gain/feed efficiency in beef, sheep, swine and other animals fed waxy corn increased up to 10% over dent fed animals.

In dairy herds CFS waxy increased butterfat, protein and milk production.

And, CFS waxy yields as well, if not better than dent. And it costs no more. Also, CFS waxy can be produced as a cash crop ... often bringing premium prices when used for export.

Faster weight gain, more milk and flexibility ... that's why CFS waxy hybrids are more than just corn.

See Your Local CFS Seedsman for More Information.

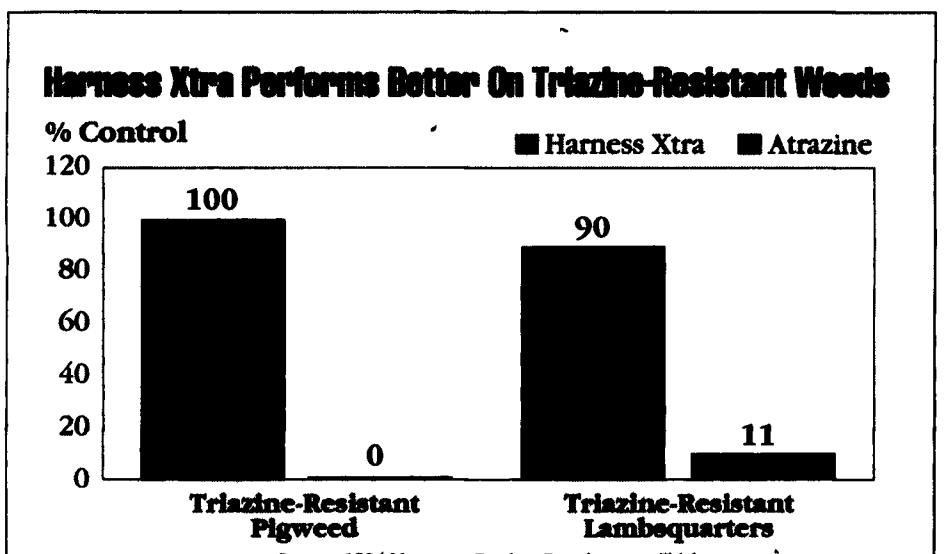
Xtra Consistency

Harness Xtra delivers consistent control across a wide range of growing conditions, too. Because it binds tightly to soil particles, Harness Xtra stays in the weed zone. Even after heavy rains, Harness Xtra is there to provide consistent, season-long control.

But dry weather is where Harness Xtra really stands out. Acetochlor, the active ingredient in Harness Xtra, needs only one quarter-inch of rainfall for activation in most situations, so it requires only half as much rainfall as some other herbicides to begin killing weeds. In a dry spring, that can be the difference between relatively clean fields and a weedy mess.

Along with superior control and consistency, Harness Xtra is cost competitive with other premixes. All of which make Harness Xtra the best value in its field.



Source: 1994 Monsanto Product Development Trials
Rates=2.3 qts/A Harness Xtra and 1.5-2.0 lbs/A atrazine

Triazine-Resistant Broadleaf Control

Unlike Bicep,® Dual,® and Extrazine,® only Harness Xtra offers you complete triazine-resistant broadleaf control.

Lambsquarters, pigweed, and even common ragweed are no match for Harness Xtra. Plus, the ideal combination of Harness and atrazine will produce more consistent control in varied weather situations.

HARNESS® XTRA
HERBICIDE BY Monsanto

Always follow label directions. Restricted Use Pesticide. Harness® and Roundup® are registered trademarks of Monsanto Company Surface Blend™ is a trademark of Monsanto Company Bicep, Dual, and Princep are registered trademarks of Ciba Corp Bladex and Extrazine II are registered trademarks of E I duPont de Nemours & Co , Inc Gramoxone® Extra is a registered trademark of Zeneca. © Monsanto Company 161-94-13

Ideal For Varied Application Methods

Approved Application Method/Timing

Early Preplant: Apply Harness Xtra up to 30 days before planting. You'll spread out your workload and still get season-long control of labeled grasses and broadleaves.

Preplant Incorporated: Apply and Surface Blend™ or shallowly incorporate Harness Xtra any time within 14 days prior to planting.

Preemergence Surface: Apply Harness Xtra before the crop and weeds emerge and within 5 days after your last tillage trip.

High Quality Formulation

Other premix formulations can settle out in the spray tank, creating a nasty "hard pack." Harness Xtra resuspends after agitation making it superior to other premixes. Plus, Harness Xtra mixes easily with fluid fertilizer.

Use Rates For Harness Xtra

Always be sure to follow the Harness Xtra label directions for best results. Listed below is a guide for application rates based on your soil type.

Harness Xtra Application Rates

Soil Textural Group	Broadcast Rate Per Acre*
Coarse	1.8 quarts
Medium	2.3 quarts
Fine	2.3 quarts

*In areas of heavy weed infestation use up to 2 3 quarts per acre on coarse textured soils and up to 2 7 quarts per acre on medium and fine textured soils

CORN TALK NEWS

PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

Now's The Time To Join Corn Growers

STATE COLLEGE (Centre Co.) — The Pennsylvania Master Corn Growers Association (PMCGA) is pleased to announce continuing support for the Membership Incentive Program (MIP) that is being conducted in conjunction with several cooperating seed companies.

The MIP, with seed corn company sponsorship, will entitle any corn grower who plants at least five acres of corn to a free bag of seed corn (standard size) with a three-year membership in PMCGA/NCGA.

This program applies to all three-year memberships, new or renewal.

To participate, simply complete the membership form included in this issue of ***Corn Talk*** and indicate the brand of seed corn you would like to try.

Remember, the theme of the program is "Try Something New." Growers who sign up will receive a free bag of seed from the company chosen by PMCGA. The grower will make the ultimate decision about which hybrid he will receive in consultation with the local seed corn dealer for the company selected. PMCGA will send the names and addresses by brand chosen to the appropriate seed corn company's statewide contact person, and that person will contact the grower.

Locally, those who sign up will be helping to support PMCGA's activities, such as ***Corn Talk***, the annual Pennsylvania Crops Conference, and local corn promotion activities.

The PMCGA board of directors have also developed a membership program in cooperation with DuPont. This program is targeted at recruiting new members of PMCGA. Any Pennsylvania corn grower who joins PMCGA for three years for the first time is eligible to receive a free four-acre sample of Accent herbicide ($100 retail value).

The offer is available to anyone who grows more than 100 acres of corn, has not been a member of PMCGA before, and who has not received an Accent sample in the past. There is a limit of one sample per farming operation. In addition, new three-year members can elect to participate in the PMCGA Membership Incentive Program and elect to try a free unit of seed corn from one of the participating companies on the membership application.

Service Quality Experience

500 and 600 gallon TANDEM AXLE HPT SERIES SPRAYERS

from Demco

Reliable Sprayers

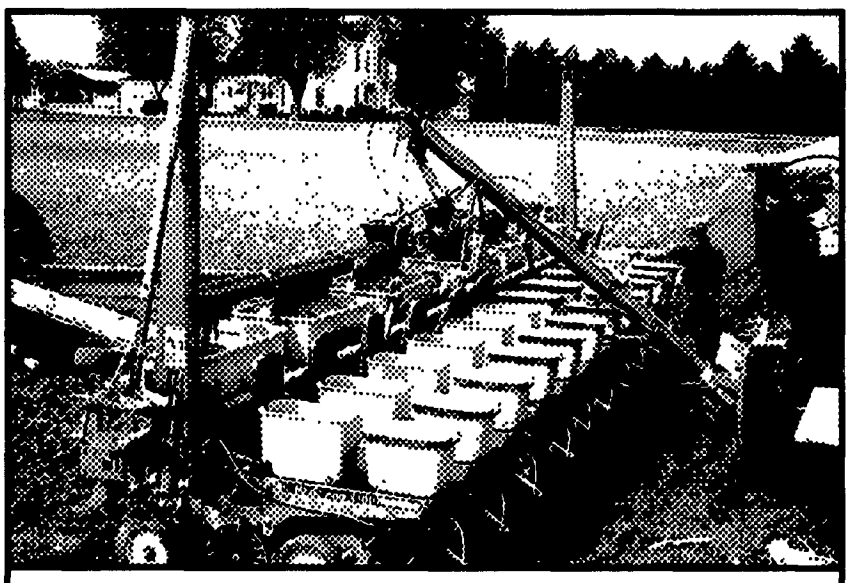
- 500 or 600 gallon elliptical poly-ethylene tank with baffle and deep sump for complete drainage.
- Jet agitation for thorough mixing and excellent chemical suspension.
- Large 16" fillwell with 4" center cap.
- Adjustable wheel spacings of 60", 70", or 80" centers. (120" optional)
- Walking tandem axle trailer with ground clearance settings of 23" or 29", three ton hubs and spindles and 15" x 10" wheels.
- Large front mounted step, platform, and safety rail for easy filling.
- Three section boom control.
- 2½ gal. clean water tank for safety.
- Available with 28', 30', 40', 45' or 60' heavy duty truss booms with boom skids, ¾" boom plumbing, and diaphram check nozzles. **DBFT** Flotation boom mount is standard on truss booms.
- Available with 60' or 80' wheeled booms with ¾" boom plumbing, diaphragm check nozzles, and 4.80x12" boom carrier wheels with built in suspension.

Pump Packages

- Demco single or double piston pump with electric shut-off.
- Hypro belt driven centrifugal pump.
- Hypro gear driven centrifugal pump.
- Ace hydraulic driven centrifugal pump.

Large front mounted step, platform and safety rail for easy filling of the tank. Clean water tank is standard

Available With Hydraulic Fold Booms



New Fertilizer Auger Loader For Folding Corn Planters

WE BUILD AUGERS... AND WE BUILD'EM RIGHT.

Westfield grain augers are built right from the ground up They re designed and engineered to be tough durable and dependable – by people whose only business is augers

Westfield offers a choice of several electric gas or PTO drive styles (SD Model shown) in lengths from 26 to 71 feet and diameters of 6 7 8 and 10 inches

Our new MK Series in 8 10 and 13 inch models feature a simple PTO driven internal mechanical drive – powering both the main auger and intake swing hopper – plus a labour-saving hydraulic lift – to make light work of grain handling chores

When you buy Westfield you know you re getting the best auger your money can buy

See your Westfield dealer today for an auger built just right for you

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

1994 PENNSYLVANIA CORN CLUB SUMMARY

Our 1994 5 Acre Corn Club Report documents another banner year in corn production in Pennsylvania Average grain yields were higher than in any other year While we did not have any record breaking yields we did have high yields on many of the productivity group 3 and 4 soils this year In fact, on average yields from group 4 soils were higher than others Grain moistures were generally lower by 1-2 points for most entrants, reflecting the good weather experienced by most members On many fields yields exceeded the yield goals and recommended N applications On the average N applications, including manure credits, were about 25 pounds per acre less than would have been recommended for the yields that were achieved This indicates that N recommendations have an insurance factor built in that helps to account for years when growing conditions are ideal Despite the high yields, production records indicate the potential for improvements such as reducing insecticides following crops other than corn, matching P and K applications to crop needs, and monitoring the fixed costs involved in corn production Although silage entries were limited this year, forage tests indicated low protein on two of the entries This has been common this year due to the higher rainfall, high yields and losses of N that occurred from the soil This emphasizes the need for forage testing of corn silage We appreciate the help of all those who made this report possible members, extension agents, crop consultants and seedsmen

Greg W Roth and Jayson K Harper

Commitment To NCGA

SHELTON, Neb. — Missed basketball games. From time to time, that thought comes to mind when Rod Gangwish contemplates the year ahead. As newly elected president of the National Corn Growers Association (NCGA), Gangwish expects that he'll be investing lots of time in meeting the responsibilities of NCGA's presidency this year.

Leadership comes with a price. But for Gangwish, the opportunity to lead NCGA is a commitment that, at least for a while, will have to be first. Gangwish, who with the help of two full-time employees farms 1,400 furrow-irrigated acres of corn, soybeans and alfalfa near Shelton, Neb.

Gangwish has two teenage sons and a daughter who help out on the farm. Gangwish's wife Jane works as a physical therapist.

As the volunteer, elected leader of nearly 30,000 corn growers, Gangwish has a big responsibility. Congress is reaching increasingly crucial points in its consideration of the 1995 farm bill. And corn growers are positioning themselves to help set the policies that will affect them.

"There are many facets to the farm bill. There are many pieces of legislation that will affect the farm bill," said Gangwish. "There will be more debate on clean water, clean air, the environment and conservation reserve. Corn growers have to be prepared. If we don't take the opportunity to take the lead on the issues that affect us, we forfeit the chance to have a voice in the outcome.

"We have to assess which battles we can influence and which ones we can win. And even if we can't win an issue, we must at least speak our piece," said Gangwish.

Eleven years ago, Gangwish began participating in the local corn growers association's group in Buffalo County, Neb. "NCGA was an organization bettering a segment of agriculture I was interested in," he said. "It gave me a chance to make a difference and have a voice in what's important to me. In some small way, I felt I could participate in bringing new products to market."

That interest in new products still drives Gangwish. Policy decisions made in Washington, D.C. will continue to profoundly affect the growth of new market opportunities, he believes.

"New uses for agricultural commodities will be a major part of the '95 farm bill," said Gangwish. "There are indications that the federal government will be moving away from traditional farm payments and is looking toward supporting new uses and new products to increase demand for corn. As corn growers, we must use resources like partnership dollars that we find in the government to help us search for new uses and new demand for our crop."

During the past several years, corn growers have worked diligently to increase demand for ethanol. And Gangwish expects that struggle to continue, even though the U.S. Environmental Protection Agency (EPA) recently granted a 30 percent market share over two years to renewable fuels in areas participating in the Clean Air Act's Reformulated Gasoline (RFG) program.

"As long as ethanol is competing against Big Oil, farmers will have to champion the fight to maintain and expand this 500 million bushel market."

Also this year, Gangwish will guide NCGA through the transition period of changing chief executive officers (CEO). Iowa farm native Christine Wehrman now leads NCGA as CEO.

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

NC+ seed corn hybrids get four-to-seven years before they're released for good behavior.

An NC+ seed corn hybrid must endure years of evaluation in test plots from Colorado to Pennsylvania before it's worthy of commercial release. It's another way you can count on NC+ to meet your standards of performance.

ADD 6% CASH DISCOUNT UNTIL MARCH 18

America's down to earth seed company

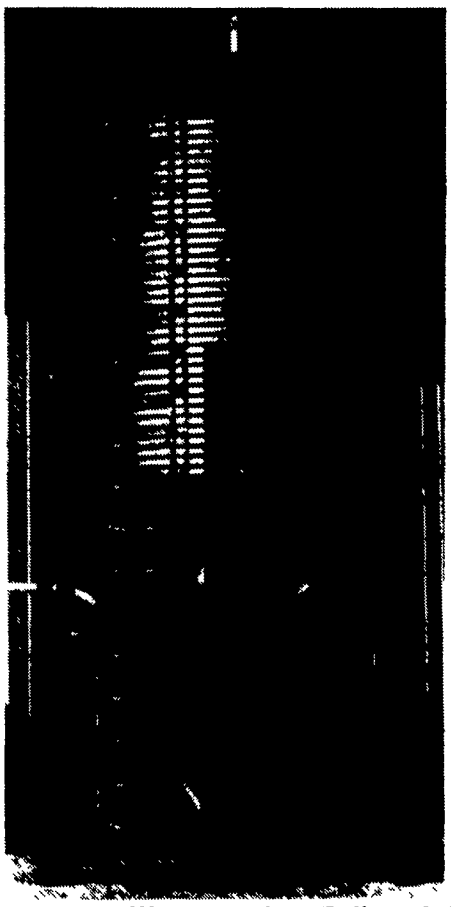
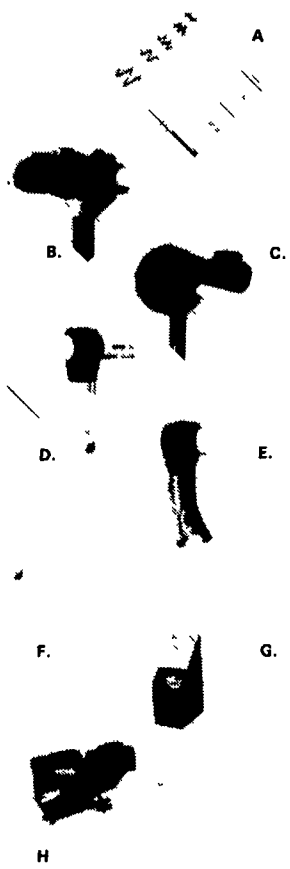
GRAIN SYSTEMS

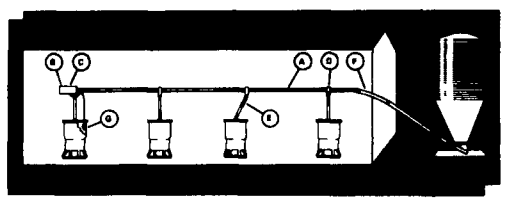




Flex-Flo Feed Delivery Systems

are known world wide for their reliability and long lasting performance. Continually the concept of utilizing flexible auger for feed transfer has proven to be the clear leader for over two decades. Designed for easy installation and trouble free operation, Flex-Flo can drastically cut your time, labor and management costs. (A.) Flex-Flo systems are available in 5 different capacities. Manufactured in our facility, PVC tubing is formulated with special compounds to reduce wear and provide ultraviolet protection. Flex-Flo coreless auger is manufactured with advanced computer-controlled equipment in one continuous length.

FEATURES: (B.) Direct power drive with gearhead connection to the auger makes for minimal maintenance. (C.) The more economical belt power drive is available for the Flex-Flo systems. (D.) Molded polypropylene drop kits have a slide shut-off controlled by a pull cord. (E.) A flexible drop tube is available for off-center feeder installations. (F.) Formed elbows, with an increased wall thickness, are used in Flex-Flo systems when turns are necessary. (G.) A hopper level switch turns off the Flex-Flo system when the last feeder is filled. (H.) An extension hopper is used when a standard length Flex-Flo system is not long enough.



The Flex-Flo system is a completely flexible system. Unlimited variations of the system can be utilized to accommodate any housing plan. Installations of unlimited numbers of successful hog, dairy, and poultry operations assure dependability and guarantee the Flex-Flo system can help you build efficiency and profitability in your business.

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

Nation's Top Growers To Dig In Heels For Latest Issues

ST. LOUIS, Mo. — The nation's leading growers will be digging in their heels at the National Corn Growers Association's (NCGA) Corn Classic in Nashville, Tenn. to get their hands on the latest industry issues, farming techniques, and management practices. More than 2,000 of the nation's top growers and industry leaders will meet at this easy-access Midwest location Feb. 26-28 at the Nashville Convention Center.

The lineup begins with Monday morning's Opening General Session as legendary football star Terry Bradshaw kicks off the event, sponsored by DowElanco. United States Vice President Al Gore has been invited to speak, as will be the U.S. Secretary of Agriculture. Monday afternoon attendees will gather for "Hands-On" working knowledge on two topics of importance to a farming operation's long-range effectiveness.

The Site Specific Farming session will offer an in-depth look at this new farming practice through the eyes of a panel of growers and industry suppliers. The panel discussion, moderated by Lynn Henderson of Doane's Agricultural Report, will be followed by breakouts on specialty areas of site specific farming. These key players in the concept will be sharing their expertise and product information: Deere & Company, Crop Technology, Inc., Infielder and Resource 21.

"There are so many new technologies being discovered to help corn growers increase yields or save expenses. This workshop will give corn growers an overview of what to watch for in the future," said Henderson. "You will hear from growers who are actually practicing site specific farming and learn from their results. This topic will be to the next century what no-till was to the '80s."

Dr. Donald Jonovic will also be leading a Hands-On Session Monday afternoon on Integrating Personal Life with Farm Business, sponsored by Successful Farming/Corn Farmer magazine. Jonovic is back by popular demand after his standing-room-only session at last year's Corn Classic. A nationally-recognized authority on managing successful family-owned businesses, Jonovic will also conduct a Tuesday morning Breakout Session on Developing Successors and an Ownership Transfer Plan.

In addition to Dr. Jonovic's session, growers may choose to glean profit-enhancing ideas from the following Tuesday morning Breakout Sessions:

• **1995 Farm Bill** A panel of farmer leaders and media and industry experts will explore how this upcoming legislation is impacting the industry's bottom-line and future actions. The session is sponsored by Farm Journal.

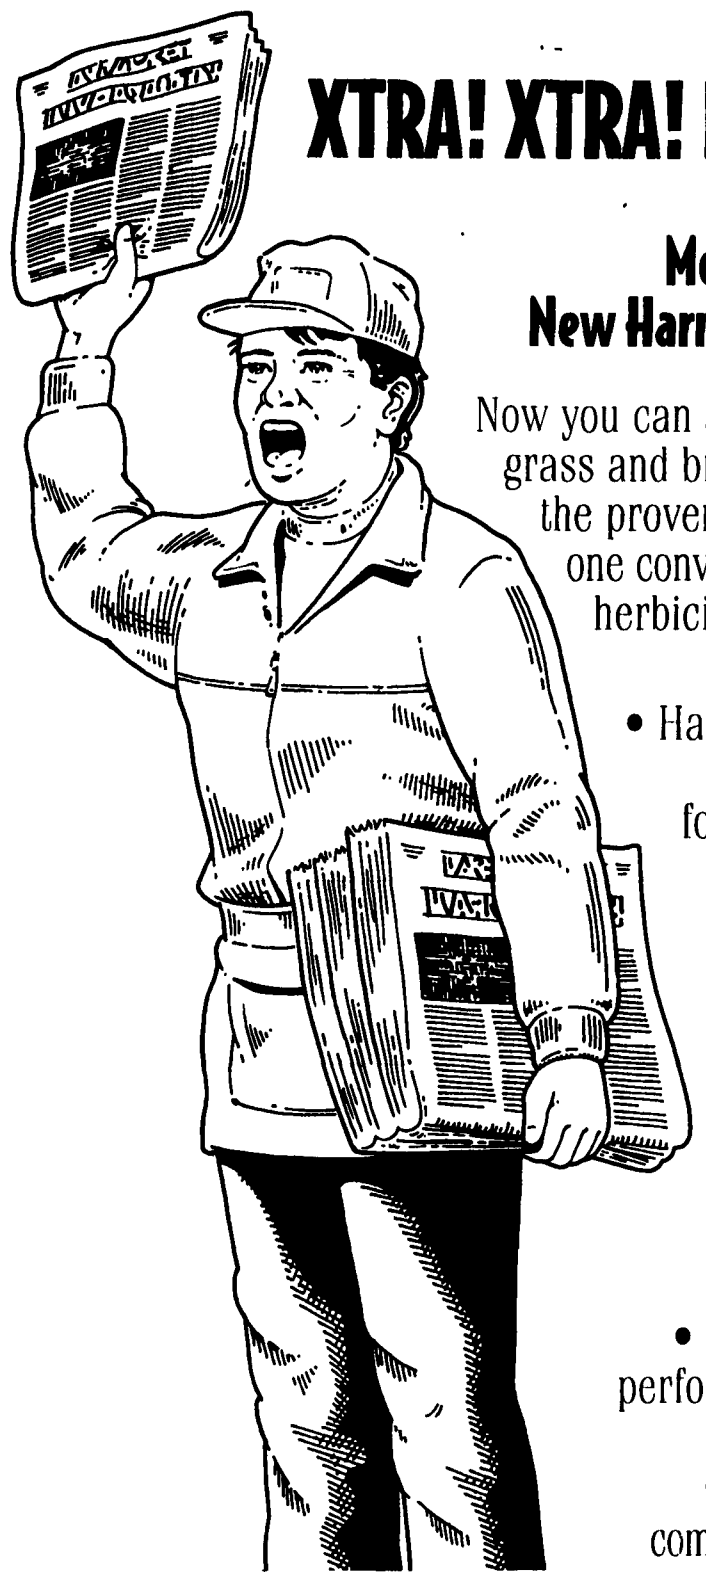
• **Future Worlds, Future Minds** Dr. Lowell Catlett will take a futuristic look at agriculture in the next century, sponsored by Ciba Seeds. Dr. Catlett is a professor of agricultural economics and agricultural business at New Mexico State University. Also active as a consultant and author, he teaches and conducts research in the areas of marketing, policy, futures and options markets, management and futuristic issues.

• **How to Communicate with Your City Cousins** Attendees will learn through group participation how to make a difference by sharing their perspective with city neighbors as taught by Jolene Brown. Mrs. Brown, who grew up on a grain and livestock farm, draws on her experience as a teacher, management consultant and training in psychology, business and agriculture to relate to her audience. Moreover, she and her husband continue to operate a farm in Eastern Iowa. Session sponsor is Pioneer Hi-Bred International, Inc.

• **How is World Trade Impacting You** Growers will have a chance to listen and ask questions about how these global issues impact their operation and how to become actively involved in making a difference on the operation's bottom-line by increasing global demand through this world market opportunity.

The Early-Riser Marketing Sessions will headline Down-on-the-Farm Tool Box for Risk Management, sponsored by Rain and Hail Insurance Service, Inc., on Monday and additional marketing tips by the Chicago Board of Trade on Tuesday.

For more information on how you can get in tune by attending Corn Classic, call NCGA at 314-275-9915 for a complete registration packet. Corn Classic's registration fee includes participation in all educational sessions, the 275+ booth trade show, five trade show meals and receptions, Monday evening Awards Banquet and Tuesday's Evening of Entertainment featuring Louise Mandrell and Lee Greenwood.



XTRA! XTRA! READ ALL ABOUT IT!

Monsanto Introduces New Harness® Xtra Premix for Corn.

Now you can get the superior, broad-spectrum grass and broadleaf control of Harness® plus the proven broadleaf activity of atrazine in one convenient premix. New Harness® Xtra herbicide from Monsanto.

- Harness Xtra stops over 40 grasses and broadleaf weeds, including foxtails, barnyardgrass and yellow nutsedge, plus velvetleaf, cocklebur, and triazine-resistant lambsquarters and pigweed.
- One simple use rate of 2.3 quarts per acre delivers consistent, season-long control in most soils.
- Harness Xtra delivers consistent performance in wet or dry conditions.
- Best of all, Harness Xtra is priced competitively with other corn premixes.

So try new Harness Xtra this spring and get the Xtra performance you deserve in a preemergent corn herbicide.

Corn Brief Filed On Renewable Oxygen Requirement

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA), along with the American Farm Bureau Federation (AFBF) and the American Coalition for Ethanol (ACE) filed a joint amicus curaie, "friends of the court," brief with the U.S. Court of Appeals, District of Columbia on the Renewable Oxygenate Requirement (ROR). The brief was filed to address efforts by the petroleum and methanol industries to stop the ROR.

The ROR was developed and proposed by the Environmental Protection Agency (EPA) to address various environmental, energy security and economic issues achievable with the use of renewable fuels in the reformulated gasoline (RFG) program. Without the ROR, the NCGA and others contend that the RFG program would be a one oxygenate program for methyl tertiary butyl ether (MTBE), a methanol based oxygenate produced by the petroleum industry.

Rod Gangwish, NCGA president and a Shelton, Neb., corn grower said, "The ROR will help to ensure a role for ethanol in RFG. The EPA promulgated this rule after careful consideration of the environmental, economic and energy security benefits that this program would help to achieve."

The brief filed by the NCGA, AFBF and ACE cites historic increasing ethanol production trends over the last 12 years, while at the same time corn acreage has decreased. Modern farming practices and much more energy efficient equipment contribute to the net energy reduction in agriculture. In addition, statistics have shown that nearly 50 percent of present corn acres are farmed using some type of conservation tillage practices, which also reduces energy and environmental impacts. In 1994 alone, nearly 75 million gallons of diesel fuel were saved in corn production as a result of conservation tillage programs.

The brief also cites the reduction in greenhouse gas emissions from the utilization of a renewable resource like corn. "Contrary to claims made by the oil and methanol industries in their brief," Gangwish said, "the EPA is convinced there are long term environmental benefits to be derived from the expanded use of ethanol. They believe the global warming impact of reduced greenhouse gas emissions achievable from ethanol use are significant and more than support its implementation."

The Court of Appeals will hear final oral arguments in January of 1995 and should deliver a decision on the case sometime in the spring. At stake is a potential future market for 800 million bushels of corn.

AFBF is the nation's largest general farm organization.

NH 1915 - 2115 FORAGE HARVESTER

—We stock and sell the most harvesting equipment and parts in the East!

—All backed by experienced, fully equipped service department with on-the-road service. From metal detectors to hyd-transmission to gearboxes etc. - We fix'em right the first time!

PLANTER CLINIC

Tuesday, February 21, 1995

1:30 PM - Til ?

No-Till Zone-Till Minimum-Till Ridge-Till Clear-Till
Coulters • Firming Points • V-Wheels • Seed Firming Wheels
Trash Movers • Metering Systems • Seed Monitors
Fertilizer Units

The Purpose of this Clinic is to Expand Your Knowledge of Your Planter. Information given is for ALL BRANDS of Planters.

Conducted by: **Mr. Joe Whitney, St. Marys, Ohio**
(More than 30 Years Planter Experience)

Some Say It's the Most Informative Planter Seminar Ever Offered

Covering: **Operation • Maintenance • Repair**

You may also benefit by swapping experiences with other local farmers

PREVIOUS PRESENTATIONS OF THIS CLINIC HAVE BROUGHT GREAT RESPONSE

ROLLING ON...IN THE 90'S

Brillion

MEETS THE CHALLENGE

The " Quality Crafted Line

Better Seedbeds... Better Stands!

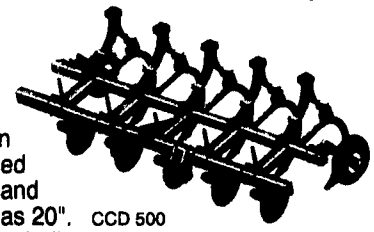
SOIL BUILDERS

SOIL BUILDERS. Optional Coulter gang can be hydraulically controlled to save maintenance dollars. 5, 7, 9, 11 & 13 shanks. Available in 2 & 3 bar.

3-SHANK DEEP TILLS

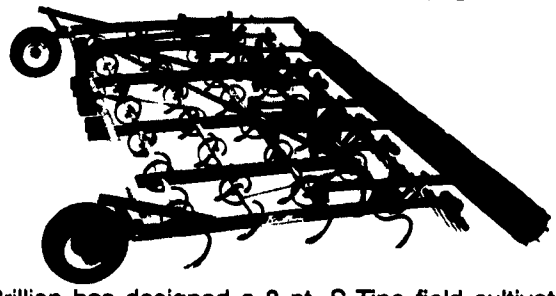
The three shank model, shown above, has a Category II hitch. With a cutting width of 7'6", it is ideal for operators with smaller acreages and horsepower. It is extremely maneuverable, yet provides the same basic deep tilling job as its "big brothers" Available with coulters.

COMPACTION COMMANDERS
NO-TILL RIPPER/DEEP RIPPER
DESIGNED FOR YOUR CONSERVATION NEEDS
3-5-7 Shank



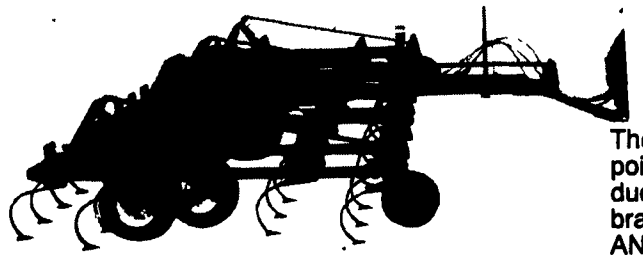
Brillion introduces their new Compaction Commander...designed to break up hardpan and compaction as deep as 20". CCD 500
The standard V-shaped alloy point and wear strip leaves residue on the surface with minimal soil disturbance. Auto-rest shanks with 20" of trip height allows for non-stop tillage. Parabolic shanks lift and fracture the soil. **39" of underframe clearance** assures trouble free operation even in heavy residue.

3 PT. BASKET HARROWS



Brillion has designed a 3 pt. S-Tine field cultivator with a larger, aggressively angled 12" diameter rolling basket, a 4-bar frame that allows for either 4" or 6" tooth spacing and an adjustable leveler bar in 12', 15' and 18' sizes. Gauge wheels are optional.

HFC FIELD CULTIVATORS
16½' to 31½'

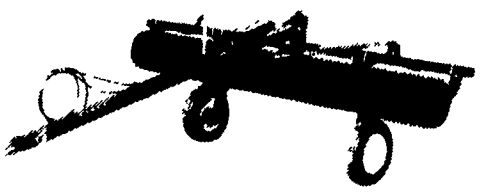


'C' Tooth - 4 Year Warranty

S-Tine - 3 Yr. Warranty

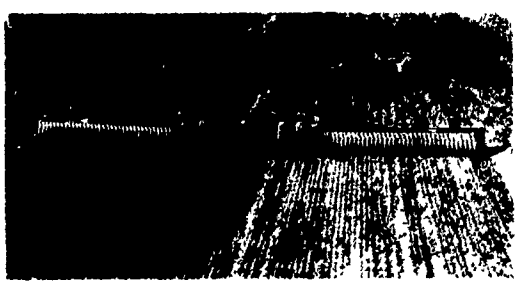
The "heart" of any field cultvator is the shank pivot point. A "bulked up" shank bracket made of cast ductile iron instead of the usual formed steel bracket, incorporated a hardened steel bushing AND a zerk grease fitting to lubricate the pivot point to reduce wear. The result is thousands of acres of extended life of the shanks.

P-SERIES TRANSPORT PULVERIZERS
10 Ft. to 18 Ft.



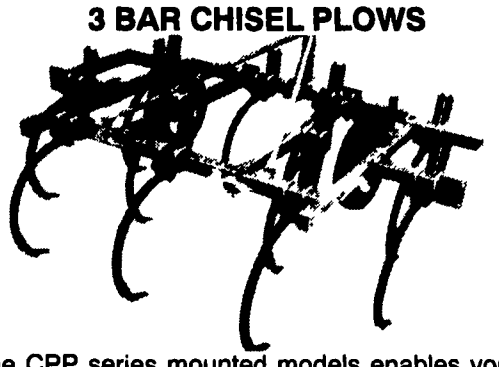
Rotary Frame Pulverizers; New PT10 Series Transport Concept. Machine weight is hydraulically rotated over the wheels for transport. This reduces draw bar hitch weight considerably and provides ample clearance for transport. **Also Available As Pull Type.**

X-FOLD PULVERIZERS



The X-Fold pulverizers are designed to meet the needs of today's larger acreage farmers...and Brillion offers them in two models and 11 sizes from 19' through 46'. Now available with 20" Ductile Wheels.

3 BAR CHISEL PLOWS



The CPP series mounted models enables you to turn short and fast... to transport easily, utilizing your tractor's hydraulic system, 7, 9, 11, 13 or 10,12,14,16 shank.

AG SURE STAND SEEDERS

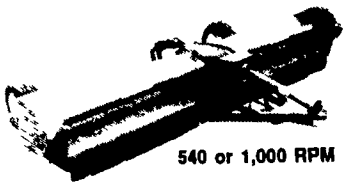
SS8, SS10 & SS12 SEEDERS
For years Brillion Grass Seeders have proven to be the best machine for planting grasses and legumes... and now they're even better! Larger, heavier boxes, high seeding rates, nylon lined seed meter, heavier frame, new drive system and more. 5 ft., 8 ft., 10 ft., **Available In 3-point or pull type.**

ML SERIES PULVI-MULCHERS
12'6", 13'10", 15'2", 18'9"

SERIES 03 - Built to last.
- Easy rolling 20" ductile iron notched or crowfoot roller wheels with a 5 year limited warranty.
- Longer life external mounted bearings.
- Longer, heavier drawbar for shorter turns.

There's lots more reasons to buy Brillion... stop in and we'll talk.

FLAIL SHREDDERS
12 Ft. And 15 Ft.



540 or 1,000 RPM

FLAIL SHREDDERS Heaviest gearbox on the market eliminates the number one cause of downtime. Available in 12' and 15'. Either cup or side slicer knives. 540 or 1000 RPM.

ATTENTION CORN FARMERS:

A Scale System Priced & Designed For The Farm

J-STAR Scale Systems combine reliability, versatility, durability and accuracy with a low cost you'll have to see to believe.

Another surprise: all this performance capability

For a scale system this economical, you might expect J-STAR to scrimp on features Not so Take a look at all you get

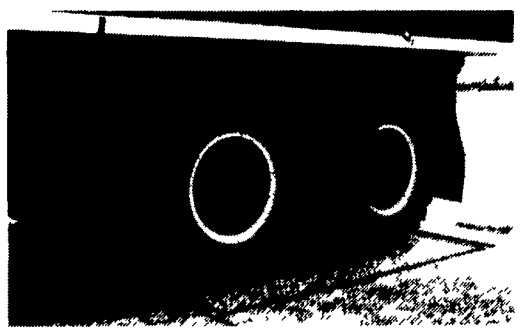
- Standard 7 ft x 10 ft platform, sized to easily accommodate tandem axles
- Two models to choose from, with 40,000 pound or 50,000 pound capacities per tandem or single axle
- Rugged J STAR weigh beams with ½ of 1% accuracy (99 5% accurate)
- Choice of accurate, reliable scale indicators to match your weighing needs and preferences
- Shock-resistant strain gauge load cells for long-lasting, dependable performance
- Engineered and constructed of heavy structural steel for years of dependable service and demanding use.
- Portable operation, if desired, because of the system's 12-volt DC electronics, 3 point tractor hitch lift attachment and detachable ramps (40,000 pound model only); and low-profile, easy-on-and-off platform design.

All this plus J-STAR's years of expertise in building hard-working, long-lasting equipment makes a J-STAR Scale System the logical choice for your operation.

A choice that gives you a proven management tool that can provide vital information to help you consistently make better business decisions The "easy weigh"

Options and weighing versatility

- Detachable ramps
- 3 point tractor hitch lift attachment (40,000 pound model only)
- AC/DC power converter for stationary operation
- Indicator stand.
- Radio-controlled remote operation (Model 15 only)
- Printer for batch or other weighing applications (Model 15 only).
- Computer interface capabilities (Model 15 only)



7 ft. by 10 ft. weighing platform easily handles tandem axles.

The easy weigh

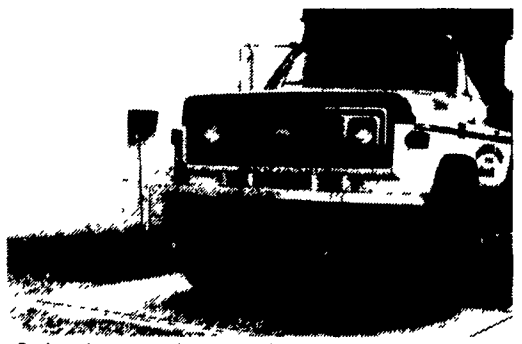
J-STAR 7'x10' Platform Scale Systems: accurate axle weights...at surprisingly-low cost

Now, when you need precise weight information, load after load — for efficient, cost-effective management of your farm, over-the-road or custom hauling operation — J-STAR makes it easy With accurate, reliable scale systems at a fracton of the cost of scales you may have considered in the past This "easy weigh" lets you

- Accurately check axle and vehicle weights
- Assure maximum weights, every load, without risking fines for running over legal limits
- Make more efficient use of your trucks by consistently hauling at or near capacity, without underhauling.
- Monitor load placements and weights at the time of shipment
- Verify the weight of bulk commodity purchases
- Monitor crop yields
- Handle up to 40,000 or 50,000 pound loads per tandem or single axle
- Assemble and install the J-STAR scale system where needed quickly and easily

J-STAR

Rugged J-STAR Scale Systems are constructed of heavy gauge structural steel for years of reliable weighing.



Scale indicator can be mounted in an outside environment on a nearby building or on the optional indicator stand.

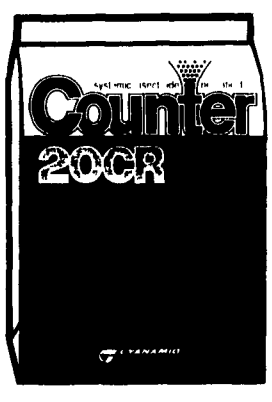
ROOTWORMS BEWARE!

systemic insecticide nematicide **Counter®** JUST GOT TOUGHER.

NOW LABELED FOR USE WITH ACCENT® HERBICIDE



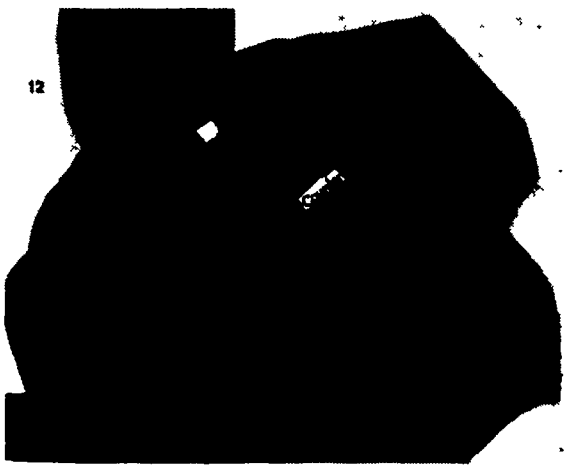
COUNTER® 20CR® systemic insecticide-nematicide gives corn growers all the most desirable insecticide features in one outstanding product.

UNIQUE PELLET COUNTER 20CR has the active ingredient evenly distributed throughout each pellet. The pellets break down gradually, providing controlled release for longer term effectiveness.

OUTSTANDING PERFORMANCE. No other corn insecticide can match the performance and broad-spectrum control of COUNTER. Corn treated with COUNTER has bigger, stronger roots, for healthier plants and higher yields.

MORE HERBICIDE OPTIONS. Applied banded, COUNTER 20CR is labeled for use with ACCENT® and virtually any other herbicide. So you don't have to sacrifice rootworm control for weed control.

LOWEST DUST. COUNTER 20CR is formulated with soybean oil, and the pellets don't crumble during handling and shipping. So there's virtually NO dust. For information about COUNTER 20CR see us.



ALSO AVAILABLE IN LOCK'N LOAD

FREE JACKET

WITH THE PURCHASE OF 600 LBS. OF COUNTER. (ANY FORMULATION OR PACKAGE)

Corn Growers Join Ethanol Coalition

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA) is pleased to announce with the 19 state Governors Ethanol Coalition (GEC) the formation of a new program to expand the use of ethanol powered E-85 vehicles. This joint venture is part of a larger effort including the United States Department of Energy (DoE), state corn grower organizations, state energy offices and members of the ethanol industry.

"The objective is to break the chicken-and-egg syndrome we have been caught in for a number of years," said Rod Gangwish, president of NCGA and a Shelton, Neb. farmer. "The problem is that fuel providers would not install refueling facilities until cars were available and auto manufacturers were reluctant to provide alternatively fueled vehicles until the refueling capabilities were available."

The endeavor is an effort by the two organizations to provide more than $1 million in funding to help facilitate the development of a refueling infrastructure in several Midwest states. This infrastructure will be designed to service several hundred cars being produced by Ford Motor Company and distributed by the General Services Administration (GSA). In the first order, 125 cars will be placed in the Chicago area and 125 placed in St. Louis.

NCGA Testifies Before IRS On ETBE

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA) testified at a hearing held by me Internal Revenue Service (IRS) in Washington D.C. on tax provisions provided to ethyl tertiary butyl ether (ETBE) in a recent IRS ruling.

On October 17, 1994, the IRS proposed regulations to allow the ethanol portion of ETBE blended into gasoline to qualify for the reduced motor-fuel excise tax rates applicable to blends of gasoline and ethanol.

Testimony presented to the IRS by the NCGA stressed the importance of this rule to help meet the stringent requirements of reformulated gasoline. ETBE provides a lower blending vapor pressure and higher octane than MTBE (a comparable ether derived from methanol) and therefore is an important contributor to the reformulated gasoline program. The testimony also reiterated the longstanding intent of Congress to support the use of renewable fuels.

"One of the most important tools for furthering this public policy goal is the excise tax exemptions for ethanol and other renewable alcohols," NCGA indicated.

This IRS is expected to finalize the rule within the next 60-90 days. However, they have stated in the preamble to the regulation that taxpayers may rely on the proposed rules until final regulations are issued.

RECONDITIONED JOHN DEERE PLANTER FIELD DAYS

1994 Pennsylvania Corn Club Budget Summary

Jayson K. Harper
Assistant Professor of Agricultural Economics

Gregory W. Roth
Assistant Professor of Agronomy

Crop enterprise budgets are an important farm management tool. Budgets summarize the cost of production and the returns from a given crop enterprise. Budgets can be developed as 1) projections prior to planting and 2) after harvest to check the economic performance of the crop enterprise. In this way, budgets can be used to 1) estimate cash flow, 2) provide a basis for credit, 3) assist in farm planning, and 4) develop least cost feed rations. They can also be used to help indicate possible areas of inefficiency on your operation. The information contained in these summaries along with farm specific data can be used to help develop corn cost of production projections for the 1995 growing season. Budgets for other crops on your farm can be developed in a similar manner. Land changes have not been reported in any of the budget summaries. Because land charges (principal and interest payments, taxes, rent) are so variable and location specific, the bottom line has been reported in these summaries as "Returns to Land and Management". When preparing your own budgets, land charges should be included so that all relevant costs are considered when gauging the performance of the crop enterprise. The agricultural value of the land should be used rather than the market value. Market value includes the "development" or "speculative" value of the land, which the corn enterprise should not be expected to cover.

Table 1 contains statewide budget summaries for corn grain. Averages, standard deviations, and ranges are given for each budget item. The standard deviation and range give us an idea of the variability of the budget data. The standard deviation can be used to construct confidence intervals for the average values. We would expect about 68% of all farmers to fall within ± 1 standard deviation of the average, 95% to fall within ± 2 standard deviations, and 99.7% to fall within ± 3 standard deviations. For instance, using the returns to land and management from Table 1, we would expect 68% of the grain farmers to fall between $94.78 and $268.80 per acre. The range gives the lowest and highest values reported for each budget item. Not enough silage budgets were completed this year to have a silage cost of production summary.

Due to the small number of producers participating in the budget program this year, summaries by region, tillage practice, yield level, and soil productivity group were not generated.

Table 1. Grain Budget Summary, Five Acre Corn Club, 1994 Crop Year

	Grain Production Budget Summary (32 records)			
	Average	Standard Deviation	Range Low	Range High
Receipts:				
Yield (bu.)	164.3	32.2	76.0	214.0
Price ($/bu.)	$2.25	$0.13	$2.00	$2.60
Deficiency Payment	$0.06	$0.15	$0.00	$0.53
Gross Returns	$380.52	$83.85	$182.40	$549.02
Variable Costs:				
Seed	$26.39	$4.65	$14.88	$35.00

Binkley & Hurst Bros. Has CASE IH The Early Riser® Compliancy Plan:
(Ready For Delivery)

No Attachments Required

A Case International 950 Early Riser planter is designed to plant in mulch-till and no-till fields as well as it does in clean-tilled fields

Yet you won t have to add costly coulters or down-pressure springs Plus no matter what the field s tillage condition you ll get accurate seed placement spacing and depth control for fast complete germination

The secret s in the design The exclusive Cyclo Air metering system and Early Riser row-unit together put seed in a precision-controlled environment which results in fast starts and bigger yields next harvest

Stop by to find out more about the Case International 950 Early Riser planters the original conservation compliance planters

6 Row Planter With Dry Fertilizer And Lots Of Other Fine Features

Front Pulled, Equalizing Gauge Wheels- These are connected through a special linkage that maintains equal pressure on the gauge wheels at all times. As one wheel moves up and over an obstacle, the other wheel is forced down. This equalizing action limits opener movement to half the height of the obstacle and results in more uniform depth control and better seed placement. Example If your customer is planting two inches deep and encounters a 2¼ inch root, the equalizing gauge wheels will limit opener movement to 1¼ inches, so the seed is planted in the soil, not on top of it

Earth Metal® Opener Blades - Earth Metal blades are known for their superior wear characteristics and strength. This is especially important to your customers who rely on the planter to do more of the tillage function in reduced tillage operations. They provide increased service life over standard opener blades

Staggered Disc Openers- Staggered double disc openers use the leading disc to cut the soil and residue and the trailing disc to open the seed trench. This design provides superior cutting efficiency and penetration over parallel double disc openers. This design virtually eliminates the need and costs of add-on coulter attachments common to competitive so-called "no-till" planters.

Furrow-Firming Point - Any double disc opener tends to leave a "W" shaped seed trench that can lead to uneven depth control, inaccurate in-row seed spacing and germination problems. To eliminate these concerns, the Early Riser row unit uses a furrow firming point to remove the seed trench "W"s and leave a well-defined "V" trench bottom.

NOTE: Some competitors have tried to tell your customers that the furrow firming point compacts the soil and reduces germination, but this is not true. The furrow firming point isn't as wide or deep as the double disc openers that actually open the seed trench. A rolling disc opener creates a water-wheel effect with the loose soil it's moving. Some of this loose soil falls back into the just-opened seed trench. The furrow firming point removes this loose soil.

GVM USED EQUIPMENT LIST

Pick-up Truck Sprayers

1992 GVM HydraSpray Hy Volume, 430 gal. s.s. tank, 2"x2" Scot pump, 50' hydraulic booms with adjustable rack, 1" boom lines on 30" spacing with Richway nozzle valves, Dicky John monitor controller, 30 gallon S.S. inter-ior wash tank, 10x20 tire package, 5 speed, suspension seat, and multi wing fan. 30,400 Miles.

Price: $33,000.00

1989 GVM Hydra Spray, 430 gallon s.s. tank, 40' hydraulic booms 1" boom lines on 30" spacing, 2"x2" Flomax, 2 section hydraulic boom shut-offs, 25 gallon wash tank, 30 gallon foam marker, Dickey John 1000 rate controller, suspension seat, dual lever controls, fence row nozzle, automatic transmission, chemical inductor, 12x and 12x16.5 super single tires.

Price: $22,500.00

1989 GVM Hydra Spray, 430 gallon s.s. tank, 40' rebuilt hydraulic booms with 18" hydraulic adjustable back rack, 1" boom lines on 30" spacing, 2"x2" flomax, 2 section hydraulic boom shut-offs, 25 gallon wash tank, 30 gallon foam marker, Raven acre counter, suspension seat, dual lever controls, fence row nozzle, 5 speed transmission, chemical inductor, and 12x16.5 super single tires.

Price: $20,500.00

Spra Coupe

1990 220 Spra-Coupe, 60' booms, air cond., cab insulation, deluxe seat, Dickey-John CCS 100 and CMS 100 controller, activated carbon filter, Richway foam marker, and cable support kit. 900 hrs.

Price: $19,800.00

1989 220 Spra-Coupe, 60' booms, wooden back rack, Ace pump with carbide seals, air conditioning, cab insulation, deluxe seat, Raven 440 controller, activated carbon filter, and cable support kit. 900 hours.

Price: $17,990.00.

1988 220 Spra-Coupe, 50' booms, air condition, cab insulation, deluxe seat, activated carbon filter, and 22 gallon foam marker, 1,400 hrs. and in excellent condition

Price: $13,900.00

1987 220 Spra-Coupe, 50' booms, air condition, suspension seat, sed controller, and boom tip lifts.

Price: $12,500.00

1993 Melroe 230 Spra-Coupe, 60' booms, crop deflectors, belly shields, factory air condition, cab insul SOLD sion seat, Raven 440 rate contro hts, carbon filter, and foam marker. Sold the winter of 94.

Price: $33,500.00

1991 Melroe 220 Spra-Coupe, 60' booms, factory air condition, cab insulation, suspension seat, Rave SOLD controller, flood lights, carbon fil marker. Around 500 hrs.

February Price: $22,500.00

1991 Melroe 220 Spra-Coupe, 60' booms, factory air condition, cab insulation, suspension seat, Rave SOLD controller, flood lights, carbon filt marker. Around 500 hrs.

February Price: $22,500.00

High Clearance

1985 Hagie 8460 Hi-boy, Perkins diesel engine, hydrostatic transmission, adjustable wheel track and dual stainless steel tanks.

Special: $15,950.00

Hahn 440 with 40 ft. hyd. booms and trailer 15" & 30" spacing - good rubber - 200 gal. S.S. tank - hydrostatic drive V4 Wisc.

Price: $6,500.00

Air Rides

1991 745 Wilmar Air Ride, air conditioning, 500 gal. tank. MT 5000 Micro Trak controller, and foam marker. In good condition. 1004 hrs.

Price: $28,500.00

Blenders

Layco 6 ton S.S. single unit blender with Cardinal scale and dial head, completely reconditioned.

Price: $9,900.00

Spreaders:

1985 5 Ton Mobility spreader 409 S.S., Rope pull clutch and press wheel. As is!

Price: $795.00

Loader:

1982 50B Swinger loader, Perkins diesel engine, new 31x15.500-15 tires and 2/3 yard bucket.

Price: $10,500.00

Dump Body

Grain body, 18' Snyder dump body, hydraulic dump, sides, and double opening door (rear). Is new, but was mounted.

Price: $5,500.00

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

Neb. Farmers To Head NCGA, NCDF

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA) and the National Corn Development Foundation (NCDF) have elected a new slate of corn growers from eight states to lead their organizations.

Rod Gangwish, a corn grower from Shelton, Neb., has been elected to serve as NCGA president by its board of directors. For the past year, Gangwish has served as NCGA vice president. He has also chaired NCGA's Government Relations Committee. At the state level, Gangwish has served as president and vice president of the Nebraska Corn Growers Association.

During his one-year term as president, Gangwish says that the 1995 farm bill will rank as a top priority. "Congress is reaching increasingly crucial points in its consideration of the 1995 farm bill and related legislation," said Gangwish.

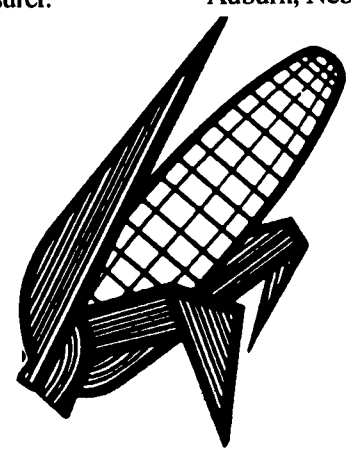
"As corn growers, we have to be prepared. If we don't take the opportunity to have a say in the issues that affect us, we forfeit the chance to have a voice in the outcome," he said.

Outgoing NCGA president Pete Wenstrand, who farms near Essex, Iowa, will serve as NCGA chairman. And Bill Northey, a Spirit Lake, Iowa, corn grower is the newly elected NCGA vice president.

Also elected to lead NCGA are Wallie Hardie, Fairmount, N.D., chairman of government relations; Ryland Utlaut, Grand Pass, Mo., chairman of market development; Daryl Reid, Macomb, Ill., chairman of field services; Russell Williams, Leaf River, Ill., chairman of research and commercialization; Gayle Bergstrom, Adams, Minn., chairman of public relation; Neal Burnett, Plainview, Texas, secretary; and Gary Krug, Bad Axe, Mich., treasurer.

The NCDF directors elected LaMoine Smith, a corn grower from Minden, Neb., to serve a one-year term as president. Smith previously served a one-year term as NCDF vice president. Outgoing NCDF president Larry Zabel of Dwight, Ill., well serve as chairman.

Other officers elected are Everett Nordine, Albert City, Iowa, vice president; Gene Fynboh, Brandon, Minn., secretary; and Ruth Gerdes, Auburn, Neb., treasurer.



NCGA, Ethanol Coalition Receive Federal Funds

ST. LOUIS, Mo. — The National Corn Growers Association (NCGA) announced that the joint E-85 vehicle promotion project being coordinated with the Governors' Ethanol Coalition has received a federal grant of $162,000 from the U.S. Department of Energy (DoE).

Last fall, NCGA and Governors' Ethanol Coalition joined forces in an effort to coordinate marketing, promotional and development activities regarding the use of high blends of ethanol. The use of ethanol at levels of 70 to 85 percent alcohol is limited to vehicles being manufactured by Ford Motor Company. Such Alternative Fuel Vehicles are being acquired by federal and state governments, private fleet operation, and individuals in a effort to improve air quality, reduce the importation of foreign oil and promote rural economic development.

"The increased use of high concentrations of ethanol for vehicle application offers a tremendous opportunity to increase demand for corn," said Rod Gangwish, president of NCGA and a Shelton, Neb. corn grower. "Federal laws and a recognition that our nation's demand for fossil fuels is harmful to our domestic economy, is a driving force to increase the use of renewable fuels to power motor vehicles. Ethanol derived from corn is an extremely

There's something extra in a starter fertilizer program.

Starter fertilizers unlock benefits for corn farmers. They stimulate seedling growth, hasten crop maturity, improve crop tolerance to some insects, increase crop competition with weeds and frequently increase yields, particularly in production fields featuring conservation tillage and irrigation. Starter fertilizers make crop production more environmentally sound because they improve fertilizer uptake efficiency.

The agronomic benefits of starter fertilizers increase crop productivity and profits from corn production.

Association Records Membership Gain

CORN TALK NEWS
PENNSYLVANIA MASTER CORN GROWERS ASSOC., INC.

ST. LOUIS, Mo. —For the 14th consecutive year, the National Corn Growers Association (NCGA) has reached another all-time membership high with 29,875 members as of September 30, 1994, the end of its fiscal year. That's up 1,190 members from just one year ago.

"NCGA is a dynamic membership organization. Growers are registering support for us. In programs and policies, we are agriculture's innovators," said Daryl Reid, a Macomb, Ill. corn grower and chairman of the NCGA field services committee.

Four corn growers can claim an extra measure of credit. Top national winners in NCGA's Surpass the Goal membership campaign, sponsored by Zeneca Ag Products are Earl Youngblut, LaPorte City, Iowa (Division I); Barbara Fulcher Reynolds, Brodhead, Kentucky. (Division II); and Richard Harer, Bloomville, Ohio (Division III). Each wins a two-year lease on a Ford F-250 4x4 XLT Lariat pickup truck filled with Zeneca ag products. Also receiving a two-year lease on a pickup truck is Richard Peterson, Mount Lake, Minn., who won a random drawing of all membership recruiters.

First place runners-up are Tim Burrack, Arlington, Iowa (Division I); Wallie Hardie, Fairmount, N.D. (Division II); and Roger Bonham, Washington Court House, Ohio (Division III). Each wins a laptop computer.

Corn growers in Illinois can claim credit as the top state in overall membership gain with a net increase of 362 members. And Kentucky corn growers led their state to the top in net percentage gain with an increase of 33.91 percent. These states, along with other top recruiting states, will be recognized for their efforts at the 1995 Corn Classic, February 26-28, in Nashville, Tenn. Awards will be sponsored by Zeneca Ag Products.

"Another year of membership increase confirms NCGA is on the right track. We're front-and-center in Washington, D.C. on issues like ethanol, the General Agreement on Tariffs and Trade (GATT), the 1995 farm bill and environmental legislation. We're on the cutting edge in development of new uses. And we're assertively taking our message to consumers," Reid said.

Farmer-members of NCGA can claim many accomplishments in 1994 including:

• **Progress on the General Agreement on Tariffs and Trade** (GATT). After winning assurances the Clinton Administration would not unduly tap agriculture, NCGA endorsed GATT and is urging swift Congressional approval. In exchange for its support, NCGA won additional funding for export promotion programs, development of new uses and an extension of the Conservation Reserve Program.

• **Expanded market oppor-**

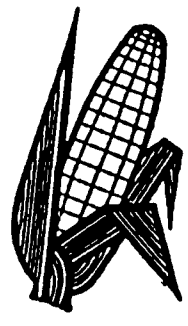
good form of fuel which has proven to reduce the amount of harmful exhaust emissions that are generated in an automobile engine."

Ford Motor Company will be making an announcement during the 1995 Corn Classic, NCGA's annual convention, regarding the manufacture of a large number of E-85 passenger cars in the Taurus model. With the problem of a lack of E-85 vehicles apparently resolved, the federal funds recently received by the NCGA and GEC will be used to establish public E-85 refueling facilities.

During the next 12 to 18 months, E-85 refueling facilities are to be established in Chicago, Ill.; St. Louis and Kansas City, Mo.; Lincoln and Omaha, Neb.; Des Moines, Iowa; Minneapolis, Minn.; Milwaukee and Madison, Wis.; Indianapolis, Ind. and other communities.

Along with the federal funds, the states of Illinois, Iowa, Minnesota, Missouri, Wisconsin, Nebraska and Indiana have each committed $20,000 to the project and NCGA state affiliate offices in Michigan, Illinois, Iowa, Nebraska, Missouri and Minnesota have also committed $20,000 each to the E-85 refueling project.



Association Records Membership Gain

(Continued from Page 33)

tunities for ethanol and its derivatives, such as ETBE. NCGA leads the drive for the Renewable Oxygenate Requirement (ROR). This side rule to the Clean Air Act's Reformulated Gasoline Program gives renewable fuels a 30 percent market share in affected areas. NCGA is fending off a last ditch attempt by the petroleum industry to kill the program already approved by the U.S. Environmental Protection Agency. Once ROR clears this hurdle, total ethanol demand could consume 500 to 600 million bushels of corn in the first year of implementation.

• **Crop Insurance Reform.** NCGA worked to ensure every crop producer can obtain catastrophic coverage and that producers who need additional coverage can purchase it at lower premiums.

• **Ratification of the North American Free Trade Agreement** (NAFTA). As a leader of the AG for NAFTA Coalition, NCGA played a pivotal role in shepherding NAFTA through Congress. Today, corn growers can reap the rewards of a new 100-million-bushel market.

• **Corn Utilization Conference V** (CUC). In June, NCGA once again sponsored the prestigious CUC. Previous conferences have yielded commercial results including development of fully degradable foam packing peanuts made from cornstarch.

• **Increased visibility with consumers.** In more than 300,000 classrooms, fourth-graders are using NCGA's curriculum kit to learn about corn as an environmentally friendly, renewable resource.

• **Teamwork.** Working together, corn growers have made NCGA one of the most progressive, farmer-based and farmer-led organizations in the world. To join, call NCGA, 314-275-9915. Ask your neighbors to join, too.

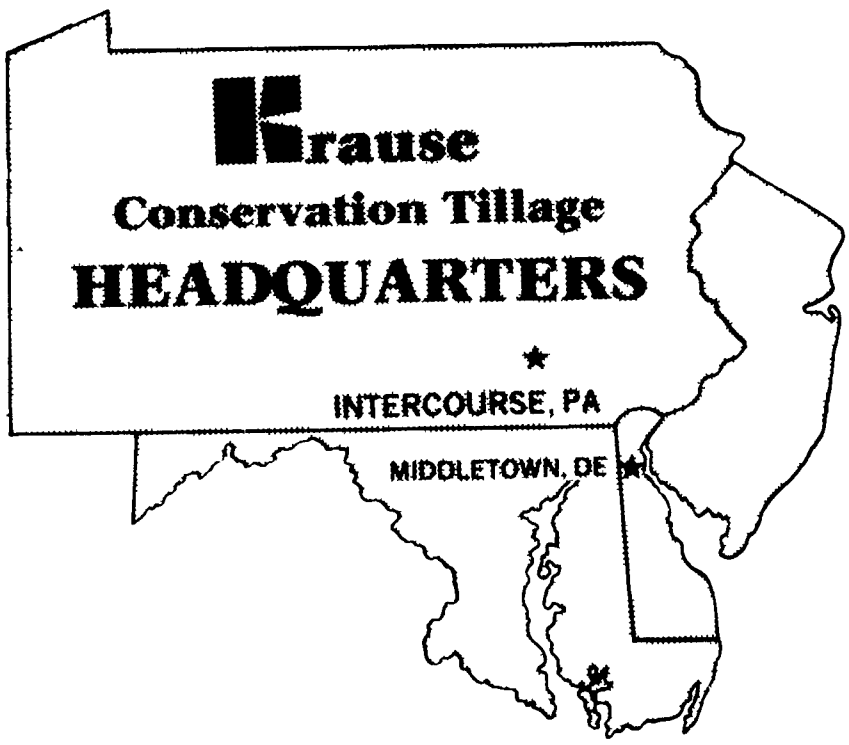
HYBRIDS, INC.



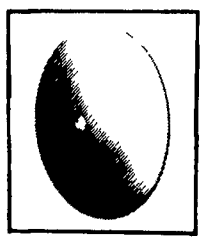
#1 CONSERVATION DISC In The EAST

Here's Three Reasons WHY They WORK On Eastern Farms — The Toughest Tillage Conditions In The U.S.

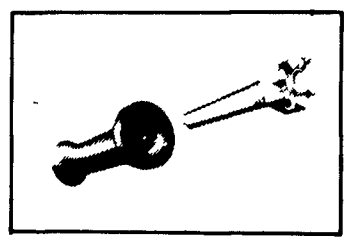
HEAVY-DUTY GANGS

Krause Invented The ROCK-FLEX BEARING SYSTEM.

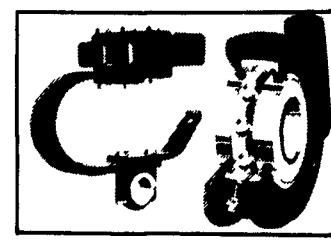
THE HEART OF THE GANG...



IMPACT RESISTANT DISC BLADES With 2.5" Concavity For CONSERVATION Residue Management



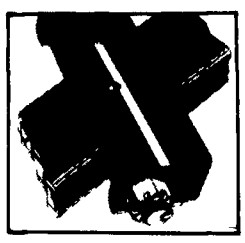
COLD-ROLLED Alloy Tie Rods With Nuts On Both Ends. DUCTILE IRON SPOOLS w/Machined Ends For Tight Fit



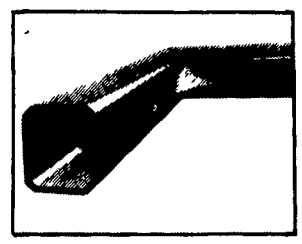
Regreasable BEARINGS Encased In RUBBER Inside A CAST-IRON Housing To Reduce Shock To The Bearings **(2 YEAR BEARING WARRANTY)**

HEAVY-DUTY FRAME

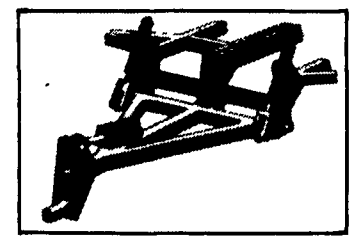
Krause Invented The FLEX-WING System That LEVELS YOUR FIELDS...



Big 1½ "x15" wing hinge bolts in replaceable, hardened wear bushings. Grease zerk provided for lubrication.
(4990 Series)



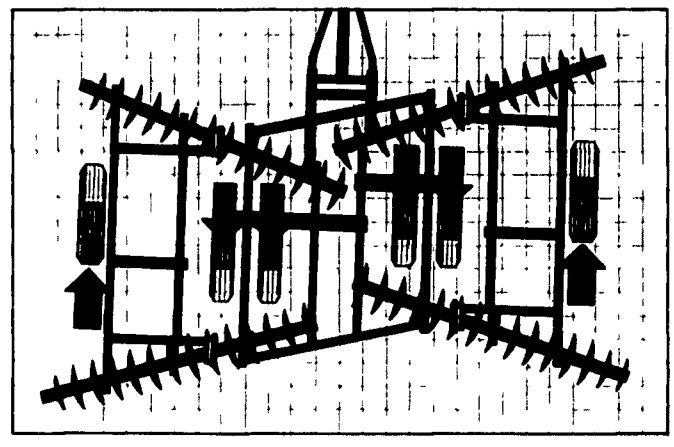
Super-strength frame with gang beams bolted to the underside of the frame for extra durability compared to integrated construction techniques where gangs are welded onto the frames.



Massive hitch is built for rugged field use, with a large 4"x4" steel center tube, and 2"x4" steel tube braces.
(4900 Series)

UNIQUE WHEEL ARRANGEMENTS

(4900 Series)



This special wheel arrangement saves fuel by helping to prevent gouging.

In field position, the center wheels move backward as the wing wheels move forward — providing more uniform depth-gauging of front wing gangs. Heavy-duty, regreasable wheel hubs and big 10:00x15" 8-ply tires are standard equipment.

PERFORMANCE IN THE FIELD — Cutting, Finishing, Or Residue Management: KRAUSE DISCS CUT IT!
